16. **Interest Returned on Capital Expenditure.**—In the year 1901–2 the State Government railways made a profit of 2.94 per cent. on the capital expenditure at that time. In the subsequent years up to and including the year 1910–11, the percentages were 2.56, 3.11, 3.36, 3.98, 4.45, 4.32, 4.22, 4.26, and 4.63 respectively, rates which show substantial increases with one exception on that for the first-named year. Since 1910–11, the rates have oscillated and have shewn a decreasing tendency, the rate for the year 1919–20 being 3.38, or 1.25 less than that for the year 1910–11. The reasons for this reduction are to be found in the increases of the charges in respect of working expenses, brought about by the opening of new lines, the higher cost of materials, and the raising of the rates of wages, while in recent years additional expenses have been incurred in consequence of the war. The return on the capital invested as at the 30th June, 1920, was not equal to the interest payable for that year, the rate of which was 4.33 per cent. This average, however, does not accurately express the position. At an early period the necessity for the construction of railways to open up undeveloped districts was recognised, and the money had to be raised at a very high rate of interest. It may be noted, however, that although the loans made for expenditure on railway construction and equipment very largely increase the amount of the public debt of the States, forming, in fact, nearly three-fifths of the total debt, the money borrowed has not been sunk in undertakings which give no return, but has been expended on works which are increasingly reproductive, yielding in most cases a direct return on the capital expended, and representing a greater value than their original cost. In Europe the national debts of various countries have been incurred principally through the expenses of prolonged wars, and the money has gone beyond recovery; but in Australia the expenditure by the States up to a recent period is represented to a large extent by public works which yield a direct return. In addition to the purely commercial aspect of the figures relating to the revenue and expenditure of the State railways, it is of great importance that the object with which many of the lines were constructed should be kept clearly in view; the anticipated advantage in building these lines has been the ultimate settlement of the country rather than the direct returns from the railways themselves, and the policy of the State Governments has been to use their railway systems for the development of the country's resources to the maximum extent consistent with the direct payment by the customers of the railways of the cost of working and interest charges.

(i) *Profit or Loss after Payment of Working Expenses and Interest.* The net revenue of the Government railways of each State after payment of working expenses is

shewn in sub-section 13 hereof. The following table shews the amount of interest payable on expenditure from loans on the construction and equipment of the railways of each State, the actual profit or loss after deducting working expenses and interest and all other charges from the gross revenue, and the percentage of such profit or loss on the total capital cost of construction and equipment.

The losses during the last four years for all the States are due to the causes to which allusion has already been made in the remarks as to increases in the working expenses of the railways (see pp. 591 and 592 *ante*). It will be observed in the following table that the interest charges in 1920 were £1,890,237 higher than they were in 1916.

STATE RAILWAYS.—INTEREST ON LOAN EXPENDITURE, PROFIT OR LOSS, AND PERCENTAGE OF PROFIT OR LOSS ON TOTAL COST, 1916 TO 1920.

(a) Allowing for payment of special expenditure and charges (see sub-section 11 above).

(b) — indicates a loss.

17. Passenger Fares and Goods Rates.—Fares and rates are changed from time to time to suit the convenience and varying necessities of the railways, but, as traffic is developed and revenue increases, they are in many cases reduced to an extent consistent with the direct payment by the customers of the railways of the cost of working and interest charges.

(i) *Passenger Fares.* On the Australian Government railways two classes are provided for passenger traffic. The fares charged may be classified as follows:—
(a) Fares between specified stations (including suburban fares). (b) Fares computed according to mileage rates. (c) Return, periodical, and excursion fares. (d) Special fares for workmen, school pupils, and others. Fares in class (a) are issued at rates lower than the ordinary mileage rates. Fares in class (b) are charged between stations not included in class (a). On the average, mileage-rate fares run about 1.91 pence per mile for first-class and about 1.22 pence per mile for second-class single tickets. In New South Wales, Victoria, and Queensland the mileage rates are based upon a tapering

principle, *i.e.*, a lower charge per mile is made for a long journey than for a short journey. In Victoria return fares are generally about $1\frac{1}{2}$ to $1\frac{3}{4}$ times the single fare, and the second-class are about 30 to 45 per cent. lower than the first-class fares, whilst in Western Australia the return fares are double the single rates. In all the States the issue of ordinary return tickets outside the suburban areas has now been discontinued. Special excursion return tickets are, however, issued at certain times of the year, subject to restrictions as to break of journey and trains available for such tickets.

The following table shews the passenger fares for different distances charged in each State between stations for which specific fares are not fixed :—

ORDINARY PASSENGER MILEAGE RATES ON STATE RAILWAYS, 1920.

The above rates were those in force in June, 1920. Since that time several changes have been made in the rates, of which full particulars are not yet available.

(ii) *Parcel Rates.* In all the States parcels may be transmitted by passenger train at prescribed rates, which are based upon weight and distance carried. The rates vary slightly in the different States. In New South Wales they range from threepence for a parcel not exceeding 3 lbs. for any distance up to 25 miles to thirteen shillings and fourpence for a parcel weighing from 85 lbs. to 112 lbs. for a distance of 500 miles. In Victoria the charge for a parcel weighing from 84 lbs. to 112 lbs. for a distance over 450 miles is fourteen shillings and fourpence. The rate in Queensland for a parcel weighing from 85 to 112 lbs. for 500 miles is sixteen shillings and threepence; in South Australia for 550 miles fourteen shillings and ten pence; in Western Australia for a parcel weighing from 99 lbs. to 112 lbs. for 500 miles fourteen shillings; and in Tasmania for a distance of 250 miles the rate is eight shillings.

(iii) *Goods Rates.* The rates charged for the conveyance of goods and merchandise may generally be divided into three classes, *viz.* :—(a) Mileage rates, (b) District or “development” rates, and (c) Commodity rates. In each of the States there is a number—ranging from eight in Victoria to fifteen in Tasmania—of different classes of freight. Most of the mileage rates are based upon a tapering principle, *i.e.*, a lower charge per ton-mile is made for a long haul than for a short haul; but for some classes of freight there is a fixed rate per mile irrespective of distance. District rates are charged between specified stations, and are somewhat lower than the mileage rates. In addition to the ordinary classification of freights under class (a), certain commodities, such as wool, grain, agricultural produce, and crude ores, are given under class (c) special rates, lower than the mileage rates.

Space will not permit of exhibiting a complete analysis of goods rates in the several States. As an indication of the range and amount of such rates the subjoined tables are given. The first table shews for each State the truck-load rates charged for hauls of different distances in respect of agricultural produce not otherwise specified; these special rates are here given for this class of produce, since it is generally forwarded in truck-loads.

RATES FOR AGRICULTURAL PRODUCE IN TRUCK-LOADS ON STATE RAILWAYS, 1920.

State.	Charge per Ton in Truck-loads for a Haul of—					
	50 Miles.	100 Miles.	200 Miles.	300 Miles.	400 Miles.	500 Miles.

(a) Maximum freight for distances up to 500 miles on highest class goods to Western stations is 210 shillings per ton.

The classification of commodities varies in the several States. Generally, the highest-class freight includes expensive, bulky, or fragile articles, while the lowest-class comprises many ordinary articles of merchandise, such as are particularly identified or connected with the primary industries of each State.

In New South Wales, for example, the highest-class freight comprises such articles as boots, drapery, drugs, groceries, furniture, liquors, crockery and glassware, cutlery, ironmongery, confectionery, and carpets. In the same State the lowest-class freight includes agricultural produce, ores, manures, coal, coke, shale, firewood, limestone, stone, slates, bricks, screenings, rabbit-proof netting, timber, and posts and rails.

18. Numbers and Description of Rolling Stock, 1919-20.—The following table shews the rolling stock in use on the State Government railways in each State, classified according to gauge :—

Total ..	24,232	22,962	31,849	249	225	79,517

19. Number of Railway Employees.—The following table shews the number of employees in the Railway Department of each State in each year from 1916 to 1920 inclusive, classified according to (a) salaried staff, and (b) wages staff :—

In the period under review it will be seen that the totals of salaried and wages staffs have fallen from 93,576 in 1916 to 85,837 in 1918, but rose to 91,536 in 1920, the latter being a decrease of 2.17 per cent. of the number in 1916.

Separate returns for salaried and wages staff are not available for South Australia prior to 1916-17; the number of salaried staff is therefore included in the wages staff.

STATE RAILWAYS.—NUMBER OF EMPLOYEES IN RAILWAY DEPARTMENTS, 1916 TO 1920.

State.	At 30th June—									
	1916.		1917.		1918.		1919.		1920.

(D) Graphical Representation of Government Railway Development.

1. General.—Railways are so important a factor in the development of Australia that it has been deemed desirable to represent graphically the main facts of their progress from 1860 onwards. To this end the graphs shown on pages 572 to 574 have been prepared.

2. **Capital Cost and Mileage Open** (page 572).—The graph shews that the ratio between these elements was, naturally enough, very variable from 1860 to 1870, consequent upon progressive decrease in cost of construction. It then became subject to a more regular change, implying reduction of average cost, though in recent years a slight increase has been in evidence.

3. **Cost per Mile Open**.—The fluctuations in cost per mile open from 1860 are clearly indicated by the graph on page 572. In 1855 the cost per mile open was no less than £28,430; by 1858 it had fallen to £17,752, when it rose again to a maximum of £35,958 in 1862. It then diminished rapidly till 1885—when it reached £10,074 per mile—rose to £10,244 in 1886, then fell slowly till 1888, when it amounted to £10,092 per mile. Again rising, this rate attained to £10,481 in 1892, since when it has, on the whole, been declining, reaching its lowest value, £9,466, in 1911. In 1912, 1913, and 1914 it rose to £9,544, £9,665, and £9,820 respectively, but fell in 1915 to £9,632. In 1916 it rose to £9,895, in 1917 was £9,901, in 1918 £9,943, and fell slightly in 1919 to £9,942, and rose to £9,985 in 1920.

4. **Gross Revenue**.—This graph (page 572) exhibits considerable irregularities, the most striking of which are the maxima in 1892, 1902, 1914, and 1920. The fall commencing in 1892 was in consequence partly of the commercial crisis and partly of the then droughty conditions of several of the States, while that of 1902–3 was due to drought. In the latter case the recovery was very rapid, and there has been a continuous rise up to the year 1914. In 1915, there was a fall amounting to £1,016,421. Since 1915 each year has given an increase over the previous year's figures, the increases for 1916, 1917, 1918, 1919, and 1920 being £1,260,646, £813,479, £1,280,565, £983,563, and £6,802,538 respectively.

5. **Working Expenses**.—In this case the graph (page 572) has the same characteristics as those of gross revenue. It should be noted, however, that working expenses have been increasing during the last five years at a greater rate than gross revenue, owing to increases in wages and the higher cost of materials.

6. **Net Revenue**.—This graph (page 572) shews a fairly constant rate of increase up to 1900. Thence to 1903 there was a continuous fall, which was followed by a rapid rise to 1907. In 1911 and 1914 there were maxima, followed by a fall in 1915 and a rise in 1916. In 1917 there was a slight fall, and a substantial rise in 1918. In 1919 there was a fall, with a considerable rise in 1920.

7. **Percentage of Working Expenses on Gross Revenue**.—This is shewn for each State and for the Commonwealth, from the year 1855, on page 573. The curve for the Commonwealth shews considerable fluctuations, but points also to the fact that, although a slight rise occurred in 1908, there was from 1903 to 1907 a rapid decline in the percentage of working expenses to gross revenue; since 1907, however, there has been a steady increase up to 1915. In 1916 the percentage slightly declined, rose again in 1917, declined in 1918, but rose in 1919 and 1920. In the case of the individual States it will be seen that the curves shew considerable fluctuations, particularly in the early years of the period under review.

8. **Percentage of Net Revenue on Capital Cost**.—The fluctuations in this item from the year 1855 are shewn in the graph on page 574. After exhibiting somewhat remarkable oscillations in the earlier years, and less marked ones between 1885 and 1900, and also a rapid fall to 1903, the curve for the Commonwealth from that year shews a well-marked increase until the year 1908, a slight fall occurring in that year and in 1909. Maxima were reached in 1865, 1877, 1881, 1907, and 1911—viz., 3.44, 3.71, 4.12, 4.45, and 4.54 per cent. Since 1911 the rate has varied considerably, that for 1920 being 1.36 lower than that for 1911.

For the individual States the results are in general very satisfactory up to 1911. The greatest maximum percentage attained by each of the States in any year during the period under review is as follows:—New South Wales 5.31 in 1881, Victoria 4.51, Queensland 4.51, and South Australia 6.47 in 1911, Western Australia 11.48 in 1896, and Tasmania 2.49 in 1913. Since 1911 (1913 in the case of Tasmania) the States have shewn varying and declining rates. The effect of the drought of 1915 is discernible, also the rise of wages and higher cost of materials, to which allusion has already been made.

The remarkable maximum for Western Australia in 1896 is consequent upon the large use made of the railways at the time of the development of the Western Australian goldfields.

9. **General Indications of Graphs.**—Reviewing the cost of railways, as a whole, it may be noted that at the undermentioned dates the average cost per mile open was as follows:—

**GOVERNMENT RAILWAYS.—AVERAGE COST PER MILE OF LINE OPEN,
1859 TO 1920.**

STATE AND FEDERAL.

Date	1859.	1869.	1879.	1889.	1899.	1909.	1919.	1920.
	£	£	£	£	£	£	£	£
Cost per mile	27,857	19,857	11,891	10,367	9,722	9,489	9,942	9,985

While the sinister influence of the drought of 1902 is strikingly shewn in the curves (a) by the fall in the gross and net revenue in 1902-3, (b) by the fall in the percentage of net revenue on capital cost, and (c) by the increase of working expenses on gross revenue, the rapidity of recovery is even more striking, and serves to indicate the great elasticity of the economic condition of the Commonwealth. Although the percentage of net revenue on capital cost during the year 1919-20 has been exceeded in previous years, nevertheless it is satisfactory that the Government railways, necessarily constructed largely in accordance with a policy of widespread development of Australia's resources rather than as mere commercial enterprises, and costing so large a sum as £231,115,732 for construction and equipment up to the 30th June, 1920, should yield a return of no less than 3.18 per cent.

It should be mentioned that the graphs for the Commonwealth include the Federal railways.

(E) Government Railways Generally.

1. **Rolling Stock.**—In the following table particulars of the numbers of the rolling stock employed on both the Federal and State Government railways are set out, classified according to gauge, as at the 30th June in the years 1901, 1911, 1916, and 1920 respectively, together with the percentage of the numbers for each gauge on the total for the mainland. For geographical reasons the figures for Tasmania are shewn separately from those for the mainland.

Grand Total	40,746	..	57,196	..	77,857	..	80,605	..

In the nineteen years under review the percentages of the numbers of locomotives for each gauge on the total number of locomotives on all Government railways on the mainland have undergone the following changes : on the 5-ft. 3-in. gauge the percentage has fallen by 8.07 per cent., the 4-ft. 8½-in. gauge increased by 10.86, and the 3-ft. 6-in. gauge fallen by 3.10 per cent.

As regards passenger vehicles the alterations are as follow : on the 5-ft. 3-in. gauge the percentage has fallen by 10.00 per cent., the 4-ft. 8½-in. gauge increased by 10.15, and the 3-ft. 6-in. gauge fallen by 0.84 per cent.

In the case of vehicles other than passenger the changes have been small, the 5-ft. 3-in. gauge percentage having fallen 0.28, the 4-ft. 8½-in. gauge risen by 0.75, and the 3-ft. 6-in. gauge fallen by 0.76 per cent.

2. Railway Mileage (Route) Open for Traffic.—The Government railway route mileages open for traffic, classified according to gauge, as at the 30th June in each of the years 1901, 1911, 1916, and 1920, are set out in the following table, which gives as well the percentages of each mileage on the total on the mainland, the figures for Tasmania being shewn separately, as in the case of the preceding table relating to rolling stock :—

RAILWAY (ROUTE) MILEAGE OF THE FEDERAL AND STATE GOVERNMENT RAILWAYS, CLASSIFIED ACCORDING TO GAUGE AS AT 30th JUNE IN EACH OF THE YEARS 1901, 1911, 1916, AND 1920, WITH PERCENTAGES ON TOTAL FOR MAINLAND.

At 30th June—

Gauge.	1901.		1911.		1916.		1920.	
	Miles.	%	Miles.	%	Miles.	%	Miles.	%
Mainland—								
5 ft. 3 in. ..	3,696.77	30.50	4,023.61	25.78	4,955.44	24.56	5,215.70	23.16
4 ft. 8½ in. ..	2,805.34	23.14	3,717.17	23.82	4,925.86	24.41	6,032.05	26.79

Grand Total	12,579.43	..	16,078.14	..	20,738.24	..	23,147.42	..

From the above table it will be seen that in the nineteen years from 1901 to 1920 the 5-ft. 3-in. gauge percentage has fallen by 7.34 per cent., and the 4-ft. 8½-in. and 3-ft. 6-in. gauges risen by 3.65 and 3.42 per cent. respectively.

3. **Railway Mileage (Track) Open for Traffic.** In the following table, the track mileages of all Government railways and sidings, exclusive of Tasmania, are shown for the years ended 30th June, 1901, 1911, 1916 and 1919, classified according to gauge, together with the percentages of each mileage on the total.

RAILWAY (TRACK) MILEAGE, FEDERAL AND STATE GOVERNMENT RAILWAYS. EXCLUSIVE OF TASMANIA, ACCORDING TO GAUGE AS AT 30th JUNE, 1901-1919.

Gauge.	At 30th June—							
	1901.		1911.		1916.		1919.	
	Miles.	%	Miles.	%	Miles.	%	Miles.	%
5 ft. 3 in. ..	4,531.09	32.13	5,102.77	27.64	6,309.82	26.13	6,586.49	24.95

2 ft. 6 in. ..	51.00	0.36	128.65	0.70	130.90	0.54	130.97	0.50
2 ft. 0 in.	29.35	0.12	29.35	0.11
Total ..	14,103.95	100.00	18,460.73	100.00	24,149.90	100.00	26,397.54	100.00

In the eighteen years under review, the 5 ft. 3 in. gauge percentage has fallen by 7.18 per cent., and the 4 ft. 8½ in. and 3 ft. 6 in. gauges have risen by 4.59 and 2.34 per cent. respectively.

4. **Summary of Working of Federal and State Government Railways.**—In the following table a summary is given of the working of all Government railways, both Federal and State, for the year ended 30th June, 1920, fuller particulars of which have been given in the sections B and C of this chapter:—

SUMMARY OF THE WORKING OF THE FEDERAL AND STATE GOVERNMENT RAILWAYS FOR THE YEAR ENDED 30th JUNE, 1920.

Particulars.	Federal Railways.	State Railways.	Total for Commonwealth.
Total mileage open Miles	1,732.88	21,414.54	23,147.42
Average miles open during the year	1,732.88	21,284.00	23,016.88
Total train mileage	725,974	59,611,082	60,337,056
Total cost of construction of lines open £	11,094,910	a220,020,822	a231,115,732
Cost per mile £	6,402	a10,275	a9,985
Gross revenue £	315,757	31,793,562	32,109,319
Working expenses £	417,637	24,351,312	24,768,949
Percentage of working expenses on gross revenue %	132.26	76.59	77.14
Net revenue £	—101,880	7,442,250	7,340,370
Interest payable £	363,646	9,269,196	9,632,842
Number of passenger journeys No.	83,528	320,375,842	320,459,370
Tonnage of goods and live stock carried Tons	176,427	30,622,786	30,799,213
Number of employees at 30th June, 1920—			
Salaried No.	196	13,208	13,404
Wages	877	78,328	79,205
Number of persons killed and injured during the year through train accidents and movement of rolling stock—			
Killed	2	174	176
Injured	62	2,211	2,273

(a) Exclusive of lines from Mount Gambier to Victorian border, and from Murrayville to Victorian border.

NOTE.—The sign — denotes a loss on working.

5. **Government Railway Facilities.**—On page 566 *ante* the population per mile of line open for general traffic is given in respect of the States' railways for each State. In the following table is given the mileage of all Government railways, State and Federal, in each State and Territory, per 1,000 of population :—

MILEAGE OF ALL GOVERNMENT RAILWAYS, FEDERAL AND STATE, PER 1,000 OF POPULATION IN EACH STATE AND TERRITORY AS AT 30th JUNE, 1920.

State or Territory.	Population 30th June, 1920.	Length of Line Open (Route).			Mileage per 1,000 of Population.
		State.	Federal.	Total.	
	No.	Miles.	Miles.	Miles.	Miles.

(F) Private Railways.

1. **Total Mileage Open, 1919-20.**—As has been stated in a previous part of this section (see A. 8) a number of private railway lines have from time to time been constructed in the Commonwealth. By far the greater proportion of such lines, however, has been laid down for the purpose of hauling timber, sugar-cane, coal, or other minerals, and is not generally used for the conveyance of passengers or for public traffic; in many cases the lines are often practically unballasted and are easily removable, running through bush and forest country in connexion with the timber and sugar-milling industries, and for conveying firewood for mining purposes. Private railways referred to herein include (a) lines open to the public for general passenger and goods traffic; and (b) branch lines from Government railways and other lines which are used for special purposes and which are of a permanent description. Other lines are referred to in the part of this section dealing with Tramways (see § 3, *Tramways*).

The following table gives particulars of private railways in the Commonwealth open for traffic for general and special purposes during 1919-20. A classification of these lines according to their gauge has already been given (see page 567).

MILEAGE OF PRIVATE RAILWAYS OPEN, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.	Miles.
For general traffic ..	189.32	24.94	278.68	33.80	278.35	162.86	967.95
For special purposes ..	172.35	45.71	982.91	15.95	575.50	48.69	1,841.11
Total ..	361.67	70.65	1,261.59	49.75	853.85	211.55	2,809.06

2. **Classification of Private Railways.**—In previous issues of the Year Book, a classification has been given shewing particulars of the private railways open for general traffic and for special purposes. On account of the necessity for economy of space, this classification has been omitted from this issue and has been transferred to the "Transportation Bulletin No. 12."

3. **New South Wales.**—In this State the mileage of private railways open to the public for general traffic at the end of 1919 was 184.32, and of lines used for special purposes, 160.83 miles. Most of these lines were constructed primarily for the purpose of conveying

coal from the mines to the Government railway systems. Particulars for the year 1919-20 of the operations of lines open for general traffic are given, so far as available, in the table on page 614.

(i) *Private Railways Open for General Traffic.* The most important of the lines open for general traffic are as follows:—(a) *The Deniliquin-Moama Line.* In 1874 permission was granted by the New South Wales Government to the Deniliquin and Moama Railway Company to construct a line forty-five miles long from Deniliquin in the Riverina district, to Moama, connecting with the Victorian Railway system at the Murray Bridge, near Echuca. The line was opened in 1876, the land required being granted by the Government. (b) *The Cockburn-Broken Hill Line.* This line is owned by the Silverton Tramway Company. It was opened in 1888, and connects Broken Hill with the South Australian railway system, having a total length of 36.67 miles. (c) *South Maitland Railways.* These lines, belonging to the South Maitland Railways, Limited, run from East Greta Junction, on the Northern line of the Government railways, to Stanford Merthyr, a distance of 7.36 miles, and from Aberdare Junction to Cessnock, 12.08 miles—a total of 19.44 miles. (d) *The New Redhead Coal Company's Railway.* The lines owned by this company branch from the Northern line of the Government railways, and run from Adamstown to Burwood Extended Colliery, thence to Belmont, and from Burwood Junction to Dudley Boundary and branches, a total distance of 12.00 miles. The lines are worked by the Railway Department, coal wagons being supplied in part by the coal companies using the line. The colliery companies using the line pay a way-leave for right to run their coal over the line, and the Railway Commissioners allow the New Redhead Company a proportion of the revenue from the passenger and goods traffic. (e) *The Seaham Coal Company's Railway.* This line runs from Cockle Creek to West Wallsend and Seaham Collieries, and has a total length of 5.13 miles. (f) *Hexham-Minmi Railway.* This line branches from the Northern line of the Government railways at Hexham, and has a length of 6.00 miles. (g) *The Commonwealth Oil Corporation's Railway.* This line runs from Newnes Junction on the Great Western line of the Government railways to the company's refinery, a distance of 33 miles. The Shay geared type of locomotive is in use on this line. (h) *The Warwick Farm Line* is a short line, 0.83 of a mile in length, connecting the Government line near Liverpool with the Warwick Farm Racecourse. Government rolling stock is used. (i) *The Goondah-Burrinjuck Line* is a line 26.25 miles in length built and worked by the Public Works Department in connexion with the reservoir at Burrinjuck. (j) *Liverpool-Holdsworth Line* is a line 5 miles in length, worked by the Railway Department, for which service a sum of £300 per annum is paid by the Defence Department.

In addition to the lines referred to above, legislative sanction was obtained in 1890 for the construction of a private line from the flux quarries at Tarrawingee to the Broken Hill line, a distance of 39.51 miles. The line was purchased by the Government in 1901, and is operated by the Silverton Tramway Company under lease from the Chief Commissioner, who pays the working expenses and receives the ordinary earnings and one-half the net receipts on special and holiday traffic. The mileage of this line is included in that of the Government railways, and it has a gauge of 3 feet 6 inches.

4. *Victoria.*—In Victoria there are two private railways open for general traffic. (a) *Kerang-Koondrook tramway*, opened in 1889. The cost of construction of this line to the end of September, 1920, was £39,229, paid out of a loan advanced by the Victorian Government. The total length is 13.94 miles. The line is at present controlled by the Kerang Shire Council, but proposals have been made for its transfer to the Railway Department. (b) *Yarra Junction to Powelltown.* This line has a length of 11 miles, and is worked mainly for timber purposes.

A line running from Elsternwick to Oakleigh, a distance of about 5 miles, was constructed by a private company many years ago. It was never in general use, and has for some time been dismantled.

5. *Queensland.*—In this State private railways open for general traffic may be grouped under two heads:—(i) Lines constructed primarily for mining purposes or for the transport of sugar-cane, and (ii) Shire tramways.

(i) *Mining Railways.* (a) *The Chillagoe Railway.* The most important of these is the Chillagoe railway, constructed under the Mareeba to Chillagoe Railway Act 1897,

and opened in 1901. This line runs from Mareeba, on the Cairns railway, to Mungana, a distance of 102.73 miles. On 20th June, 1919, it was vested in the Queensland Railways Commissioner. (b) *The Stannary Hills Line*. This line branches from the Chillagoe railway at Boonmoo and runs to Rocky Bluff, via Stannary Hills, a total distance of 21 miles. The gradients on this line, which has a gauge of 2 feet, range as high as 1 in 27, while the radius of some of the curves is as low as $1\frac{1}{4}$ chains. An additional length of 8 miles has been surveyed with a view to extending the line.

(ii) *Shire Tramways*. Under Part XV. of the Local Authorities Act of 1902 provision is made whereby not less than one-third of the ratepayers in any district may petition the local authority to apply to the Governor for the constitution of a tramway area. The Governor may define the area and may also approve of the plans and specifications of the proposed tramway. The amount which may be advanced by the Government for the construction or purchase of a tramway may not exceed a sum equal to £5,000 for every mile of its length. As regards repayment of loans, no sum need be paid during the first three years, but after the expiration of that period the principal and interest must be repaid by half-yearly instalments on the basis provided for by the "Local Works Loans Act 1880 to 1899." For the purpose of raising the money to pay these instalments the local authority may levy a rate upon all ratable property within the tramway area. The money required for the tramway may be raised by the local authorities by the issue of debentures.

6. *South Australia*.—In this State a private railway open for general traffic is owned by the Broken Hill Proprietary Company, and runs from Iron Knob to the seaboard near the head of Spencer's Gulf, a distance of 33.80 miles. The line is utilized for the carriage of ore for use in connexion with the smelting works at Port Pirie and the steel works at Newcastle. There is also a line from Marion Bay, having a length of 5 miles, used for mining purposes.

7. *Western Australia*.—Owing to the difficulty experienced at one time by the Government in constructing lines urgently required for the development of the country, private enterprise was encouraged to undertake the work of construction on the land-grant principle, and two trunk lines were thus constructed. The greater part of the private lines now open, however, have been constructed in connexion with the timber industry. (i) *The Midland Railway*. This line is 278.35 miles in length, and runs from Midland Junction, ten miles from Perth, to Walkaway, where it joins the Government line running to Geraldton. It was constructed under a concession of 12,000 acres of land per mile of line constructed, to be selected along the entire route of the railway. (ii) *The Great Southern Railway*. This line, which was built by private enterprise under the land-grant system, is 242 miles in length, and was acquired by the Government by purchase on the 1st January, 1897. The total price paid for all the interests of the private company and of the original concessionaire, was £1,100,000, which was divided by the Government for book-keeping purposes into £300,000 for the land and £800,000 for the railway. (iii) *Millar's Timber Trading Company's Lines*. These lines have been built chiefly under special timber concessions and leases. There were, at latest date available, in all eight lines situate in various parts of the State extending into the bush, whence logs are brought to the mills. The total length of these lines was approximately 239.69 miles. (iv) *Other Lines*. There are also several other lines in various parts of the State used chiefly in connexion with the timber industry.

8. *Tasmania*.—In this State the three private lines open for general traffic are situated in the western part of the island.

(i) *The Emu Bay Railway Company*. The lines owned by this company run from Burnie to Waratah, from Guildford to Zeehan, and from Rayna to Dundas, and have a total length of 102.94 miles.

(ii) *The Mount Lyell Mining and Railway Company*. The Mount Lyell railway runs from Regatta Point, Strahan, to Queenstown, and the North Mount Lyell line from Kelly Basin to Linda. The former line, 22.13 miles in length, was constructed in 1895–6, while the latter line, 27.80 miles long, was taken over from the North Mount Lyell Copper Company on the amalgamation of the two companies in 1903. The line from Kelly Basin to Linda is now worked only intermittently.

(iii) *The Magnet Silver Mining Company's Railway*. This line runs from Magnet Junction, near Waratah, on the Emu Bay Company's line, to Magnet, a distance of 9.99 miles.

9. Operations of Private Railways, 1919-20.—The tabular statement given below shews particulars, so far as returns are available, for the year 1919-20, of all private railways open to the public for general traffic in the Commonwealth:—

PARTICULARS OF PRIVATE RAILWAYS OPEN FOR GENERAL TRAFFIC, 1919-20.

10. **Comparative Railway Statistics.**—On page 566 *ante* a table is given shewing the railway facilities in 1919-20 in the States, in the Northern Territory, and in the Commonwealth, the railway mileage open for traffic being compared both with the area and population.

In the table below, comparative railway statistics of a like character are given in respect of the principal countries of the world at certain dates. The dates have been so chosen as to bring into relation the latest accurate figures for both population and railway mileage.

COMPARATIVE RAILWAY STATISTICS, VARIOUS COUNTRIES.

Country.	Year.	Miles of Railway.	Population.	Area in Square Miles.	Miles of Railway.	
					Per 1,000 of Popu- lation.	Per 1,000 Sq. Miles of Territory.

(a) Including lines of "local" interest.

(b) Exclusive of Balearic and Canary Islands.

(c) Exclusive of Faroe Islands.

(d) Exclusive of 1,500 miles in the Sudan.

It will be seen from the above table that per 1,000 of population the Commonwealth of Australia had the greatest mileage (in 1920), 4.90 miles; the next in magnitude being Canada (1917) with 4.37 miles, Argentina (1918) with 2.64 miles, the United States (1916) with 2.53 miles, and New Zealand (1920) with 2.49 miles.

The least mileage per 1,000 of population is shown in the case of India (1918) with 0.12 mile, followed by Egypt (1917) with 0.23 mile.

With regard to the mileage per 1,000 square miles of territory, Belgium (1914) with 479.29 miles was easily first, followed by Switzerland (in 1917) with 229.09 miles, the United Kingdom (in 1919) with 195.05 miles, Germany (in 1914) with 189.67 miles, and Denmark (in 1918) with 175.84 miles.

The least mileage open per 1,000 square miles is that of Asiatic Russia (in 1913) with 1.59 miles, the next being 5.34 miles in the case of Brazil (1917).

§ 3. Tramways.

1. **General.**—Tramway systems are in operation in all the States of the Commonwealth, and in recent years considerable progress has been made in the adoption of electrical traction, the benefit of which is now enjoyed by a number of the principal towns of the Commonwealth.

In many parts of Australia private lines used for special purposes in connexion with the timber, mining, sugar, or other industries are often called tramways, but they are really private railways, and the traffic on them has nothing in common with that of the street tramways for the conveyance of passengers, which are dealt with in the present section.

(i) *Total Mileage Open and Classification of Lines.* The following tables shew the total mileage of tramway lines open for general passenger traffic in each State and in the Commonwealth for the year 1919–20, and also in the Commonwealth as a whole for the years 1910–11 to 1919–20, classified (a) according to the motive power utilised, (b) according to the nature of the authority by which the lines are controlled and (c) according to gauge:—

TRAMWAYS.—CLASSIFICATION OF MILEAGE OPEN FOR PASSENGER TRAFFIC IN EACH STATE AND IN THE COMMONWEALTH, 1919–20.

2. New South Wales.—In this State the tramways, with but few comparatively unimportant exceptions, are the property of the Government, and are under the control of the Railway Commissioners.

(i) *Government Tramways.* In Sydney and suburbs the Government tramways are divided into distinct systems. There were in June, 1920, seven such systems in operation within the metropolitan area, the most important being the City and Suburban lines, 112.97 miles in length (207.10 miles single track); the North Shore line, 21.93 miles in length (37.20 miles single track); the Ashfield to Mortlake line, 8.47 miles in length (15.12 miles single track); Manly to the Spit, Brookvale, and Narrabeen, 10.73 miles in length (15.47 miles single track); and Rockdale to Brighton-le-Sands, 1.25 miles in length (single track). The last-mentioned line was purchased from a private company and opened for traffic on 7th June, 1914. All of these systems are now operated by electricity. There are two systems on which the motive power used is steam, namely—(a) from Kogarah to Sans Souci, 5.56 miles in length (6.99 miles single track), and (b) from Arncliffe to Bexley, 2.62 miles long (single track).

There are also Government steam tramways in operation at Newcastle, Broken Hill, Parramatta, from East to West Maitland, and from Sutherland to Cronulla. The gauge of line on all the Government tramways is 4 ft. 8½ in.

(a) *Sydney Tramways.* In October, 1862, a horse tramway, 1½ miles long, was opened for traffic in Sydney. Owing to the rails being laid higher than the road surface, the inconvenience thus caused to other traffic necessitated its removal under the authority of an Act passed in November, 1865, and it was not until the 15th September, 1879, that the first steam tramway was opened, running from Bridge-street to Hay-street via Elizabeth-street. In the following few years the steam tramways were considerably extended. The electric system was commenced by the opening of a section of the North Sydney lines on the 20th September, 1893. This was followed by the opening of the Ocean-street-Rose Bay line on the 4th October, 1898, and by the opening of the George-street-Pymont line on the 8th September, 1899, which introduced the electric system into the city. The tramways in the heart of the city, running along King-street to the suburb of Woollahra, as well as those in North Sydney, were originally worked by underground cables, and have since been converted into electric lines on the overhead trolley system. With the exception of the Kogarah-Sans Souci and the Arncliffe-Bexley lines, the whole of the steam tramways in Sydney and suburbs have now been converted into electric lines, and provision for the extra power required for the electrification of the former of these two lines has been made at the central power station.

(b) *Other Tramway Systems.* In Newcastle the first section of the tramways, from Perkins-street to Plattsburg, was opened on 31st December, 1887; the total length open on the 30th June, 1920, was 34.07 miles (44.42 miles single track). At Broken Hill and Parramatta the first sections of the tramways were opened in 1902. On the 30th June, 1920, the mileage open at Broken Hill amounted to 10.05 miles (11.44 miles single track), and at Parramatta to 6.69 miles (single track). The line from East to West Maitland, 4.06 miles long (single track), was opened in February, 1909, and the line from Sutherland to Cronulla, 7.40 miles long (single track), on the 12th June, 1911. Further particulars are given below.

(c) *Particulars of all Government Tramways.* The following table shews the total length, the capital cost, the gross revenue, working expenses, net earnings, interest, percentages of working expenses on gross revenue, and of net earnings on capital cost, passengers carried and persons employed for the financial years 1916 to 1920:—

**NEW SOUTH WALES.—PARTICULARS OF WORKING OF GOVERNMENT
TRAMWAYS, 1916 TO 1920.**

Year ended 30th June—	Mileage Open for Traffic. (Route.)	Total Cost of Construction and Equipment.	Gross Revenue.	Working Expenses.	Net Earnings.	Interest.	Per-centage of Working Expenses on Gross Revenue.	Per-centage of Net Earnings on Capital Cost.	Passen-gers carried.	Persons employed.
	Miles.	£	£	£	£	£	%	%	No. '000	No.
1916 ..	220.83	8,166,423a	1,991,628	1,602,650	388,978	302,686	80.47	4.76	292,022	9,806
1917 ..	223.98	8,309,629a	2,008,539	1,691,367	317,172	335,361	84.21	3.82	295,304	9,763
1918 ..	225.35	8,470,001a	1,992,641	1,603,260	389,381	348,546	80.46	4.60	255,741	8,955
1919 ..	225.64	8,568,138a	2,237,701	1,850,724	386,977	368,529	82.71	4.52	268,798	9,028
1920 ..	225.81	8,768,548a	2,881,797	2,486,121	395,676	404,125	86.27	4.51	324,885	8,970

(a) £47,455 of this sum has been paid from the Consolidated Revenue, and no interest is payable thereon.

The net result, after providing for all working expenses and £404,125 for interest on the capital invested, was a loss of £8,448 in 1919-20 as compared with a profit of £18,448 in the preceding year. During the year 1919-20, 324,884,651 passengers were carried, an increase of 56,086,837 as compared with the previous year.

(d) *Particulars of Different Systems of Government Tramways.* In the subjoined statement particulars are given of the working of the electric and steam tramways in Sydney, and of other tramways under Government control in 1919-20 :—

(a) + indicates a profit; — indicates a loss.

The total capital cost shewn in the preceding table was made up as follows :—

CAPITAL COST OF NEW SOUTH WALES GOVERNMENT TRAMWAYS AS AT 30th JUNE, 1920.

Permanent Way.	Rolling Stock.	Power-houses, Sub-stations, and Plant.	Machinery.	Work-shops.	Furniture.	Store Advances Account.	Total.
£	£	£	£	£	£	£	£
4,508,008	1,830,822	1,818,227	152,618	232,481	2,392	224,000	8,768,548

The average cost per mile open was £19,964 for permanent way and £18,868 for all other charges, making a total of £38,832 per mile,

During the year 1919-20, one new extension, 0.80 mile in length, was opened for traffic.

(e) *Sydney Electric Tramways.* The current for the operation of the City and Suburban tramways is generated at the power-houses at Ultimo and White Horse Bay, which have been erected at a total cost of £1,818,227, including the cost of the sub-stations and plant. The total output of the power-houses, for both lighting and traction purposes, during the year 1919-20 was 114,124,798 kilowatt-hours, of which the direct-current supply was 73,538, and the alternating current 114,051,260 kilowatt-hours. The following table gives particulars of the working of the electric tramways for the financial years 1915-16 to 1919-20 :—

NEW SOUTH WALES.—PARTICULARS OF SYDNEY ELECTRIC TRAMWAYS.
1915-16 TO 1919-20.

1920	2,676,748	2,246,674	430,074	83.93	1,394	8,440

(ii) *Private Tramways.* A private steam tramway passes through the township of Parramatta. Commencing at the park gates, it runs as far as the Duck River, a distance of 3½ miles, where it connects with the Parramatta River steamers, conveying passengers and goods to and from Sydney. This line, the gauge of which is 4 ft. 8½ in., was opened for traffic in 1883. In 1920 the number of tram miles run was 18,200, and the number of passengers conveyed 161,496.

(iii) *Sydney Harbour Ferries.* As the ferry services on the waters of Port Jackson are mainly supplementary to the suburban railway and tramway systems, it has been thought advisable to include them here rather than under Shipping. The figures for the year 1919-20 are based on returns shewing the working of two companies for that year, and for one company in respect of the year 1918-19 as particulars are not yet available for the year under review. The returns shew that these companies had 62 boats in commission, which were licensed to carry a total of 40,371 passengers, or an average of

651 per boat and per trip. The total number of passengers carried during the year is stated as 36,600,759, an average of 100,276 per day. In addition to the ordinary passenger traffic there are two lines providing for vehicular traffic, which afford the only rapid means of transit for such traffic between the city and the northern suburbs. The three companies employed during the year a total of 990 persons. The gross revenue amounted to £494,789, and the expenditure to £400,621, thus giving a net revenue of £94,168. The services are well managed, and the boats constructed during recent years—double-ended screwboats—are claimed to be superior in size and equipment to boats employed on similar service in any part of the world.

3. Victoria.—In Melbourne there are several tramway systems carried on under the control of various authorities, the most important being the cable system worked by the Melbourne Tramway and Omnibus Company up to the 1st July, 1916, and since that date by the Melbourne and Metropolitan Tramway Board, to which reference will be made further on. There are also four lines of electric tramways, viz. :—(a) St. Kilda to Brighton, belonging to the Government and under the control of the Railway Commissioners; (b) an electric tramway between Sandringham and Black Rock, 2.41 miles in length, which has been constructed by the Railway Department and was opened for traffic on 11th March, 1919; (c) Flemington Bridge to the Saltwater River and Keilor-road, owned by a private company; and the following lines controlled by the Melbourne and Metropolitan Tramways Board, viz. :—(d) lines connecting Prahran, Windsor, St. Kilda and Elsternwick with Glen Huntly, Caulfield, Malvern, Glenferrie and Kew, formerly controlled by the Prahran and Malvern Tramways Trust; (e) Prince's-bridge to Burwood; Burke-road to Boundary-road, Wattle Park; and Bridge-road, Richmond, to Power-street, formerly owned by the Hawthorn Tramways Trust; (f) lines from Queensberry-street, Melbourne, to Bell-street, Coburg, and Moreland-road to Baker's-road, Fawkner, formerly owned by the Melbourne, Brunswick, and Coburg Tramways Trust; (g) the Fitzroy, Northcote and Preston Tramway and (h) The Footscray Tramway. A cable tramway, 2½ miles in length, between Clifton Hill and Preston, was owned by the Northcote municipality, but was, on 2nd February, 1920, transferred to the control of, and has since been operated by, the Melbourne and Metropolitan Tramways Board. There is a short steam tramway,* about 1 mile long, at Sorrento, and there are also systems of electric tramways at Ballarat, Bendigo, and Geelong, constructed and run by private companies. A number of tramways has been constructed for special purposes in various parts of the State under the provisions of the Tramway Act 1890. These, however, correspond to the description of private railways referred to in sub-section 1 hereof. A tramway to the Zoological Gardens, with horse traction, is operated by the Melbourne and Metropolitan Tramways Board.

(i) *Melbourne Cable Tramways.* A short account of the formation of the Melbourne Tramway and Omnibus Company, and of the Tramway Trust, will be found in previous issues of this book. (See Year Books No. 7, page 652, and No. 9, page 679.) The company was required by the original Act, as amended in 1892, to complete the tramways by the end of the year 1893, and in return a thirty-two years' lease of the tramways was granted to it, dating from the 1st July, 1884—when the liability for interest on the loans commenced—and expiring on the 1st July, 1916. The total amount the Trust was empowered to borrow was £1,650,000, which was raised in London by means of debentures bearing interest at 4½ per cent. The premiums received amounted to £55,794, making a total of £1,705,794. This amount had been expended by the end of the year 1893, when further loan expenditure ceased. Up to the 30th June, 1919, the total cost of construction and equipment of the tramways amounted to £2,078,257. The first line—that to Richmond—was opened for traffic on the 11th November, 1885, and the work being rapidly pushed on, the other lines were opened at short intervals, and the whole system was completed in 1891. The complete system consisted of 43.68 miles of double-track cable lines, using constantly over 90 miles of wire rope, and 4.48 miles of horse tram line. Of the latter, 1.79 miles were transferred to the Kew Council in November, 1914, and 2.06 miles to the Hawthorn Tramway Trust in January, 1916, for electrification, leaving 0.63 mile of horse tramway at Royal Park. The gauge of track is 4 feet 8½ inches. The company also had omnibuses at work for many years down to 3rd May, 1916, when the East Brunswick line of omnibuses ceased running owing to the construction of an electric tramway along the route.

* Now dismantled.

(a) *Particulars of Working.* The subjoined statement shows the tram mileage, the number of passengers carried, and the revenue and expenditure for the years 1916 to 1920 :—

(a) Not available. (b) Inclusive of Northcote Cable Tramway from 2nd February, 1920.
(c) Exclusive of Northcote Cable Tramway.

(b) *Transfer of Cable Trams.* On the 30th December, 1915, the Victorian Government appointed a Tramway Board of five members to take over the tramways as from 1st July, 1916, and in due course the Board entered into possession of the tramway properties. The amount of compensation to be paid to the company in respect of the rolling-stock, car-houses, and other assets handed over by it to the Tramway Board was the subject of arbitration and of an eventual appeal to the Privy Council, which upheld the award by Mr. Justice Cussen under which a sum of £335,000 with interest at 5 per cent. from the 1st July, 1916, was payable to the company.

An action by the Tramway Board against the company to recover a sum of £587,915, for alleged breaches of the terms of the lease of the cable tramways was, after several days had been spent in part hearing the case, settled out of court by agreement between the parties.

(c) *Metropolitan Tramway Board.* In a previous issue of the Year Book (see No. 12, pp. 698-9) reference was made to the *Melbourne and Metropolitan Tramways Act 1918*, and to the terms under which it was to come into operation. On 2nd July, 1919, the appointments of the chairman and other members of the Tramway Board were made by the Governor-in-Council, and it was arranged that the Board should take over control of the Melbourne Cable Tramway System and of the Royal Park Horse Tramway on the 1st November, 1919.

On the 6th January, 1920, a proclamation was made under which the Board were to assume control of the Prahran and Malvern, Hawthorn, Melbourne, Brunswick and Coburg, Fitzroy, Northcote and Preston, and Footscray Tramway Trusts on the 2nd February following, after which date the Tramway Trusts were to cease to exist. The

Board thus assumed control of all the Metropolitan tramways, with the exception of the North Melbourne Electric Tramway, which the Board has power to acquire.

(ii) *Electric Tramways.* As already mentioned, there are in Melbourne four electric tramway systems in operation, viz. :—(a) the St. Kilda-Brighton line, (b) the Sandringham-Black Rock line, (c) the North Melbourne tramways; and the lines controlled by the Melbourne and Metropolitan Tramways Board (previously referred to), viz. (d) The Prahran and Malvern Tramways; (e) The Hawthorn Tramways; (f) The Melbourne, Brunswick and Coburg Tramways; (g) The Fitzroy, Northcote and Preston Tramways; and (h) The Footscray Tramways.

(a) *The St. Kilda-Brighton Line.* Under the St. Kilda and Brighton Electric Street Railway Act 1904, the Board of Land and Works was authorised to construct a tramway from St. Kilda to Brighton. The amount of interest payable on the cost of the land acquired for the tramway was guaranteed by the municipalities of St. Kilda and Brighton for a period of twenty years, and authority was given by the Act to the municipalities to levy either a general or special rate not exceeding one shilling in the pound for the purpose of paying the guarantee. The profit, if any, during the first twenty years is to be set off in reduction of the guarantee. The line was opened for traffic between St. Kilda and Park-street, Middle Brighton, on the 7th May, 1906, and the extension to Brighton Beach was opened on the 22nd December following. The capital cost to the 30th June, 1920, exclusive of rolling stock, was £108,252, and of rolling stock £41,876, making a total of £150,128. The gauge of track is 5 ft. 3 in. The subjoined statement gives particulars of the working of this line for the financial years ended the 30th June, 1916 to 1920 :—

ST. KILDA-BRIGHTON ELECTRIC STREET TRAMWAY, 1916 TO 1920.

(a) Profit is indicated by +, loss by —.

(b) Cost of Rolling Stock for Sandringham-Black Rock electric street railway was included under this head in preceding years.

The average fare paid per passenger was 1.76 pence in 1919–20 as against 1.94 pence in 1918–19. The gross revenue in 1919–20 was 21.98 pence per passenger car mile and £4,893 per mile of single track open.

(b) *The Sandringham-Black Rock Line.* This line has a length of 2.41 miles and, as already mentioned, was opened for traffic on 11th March, 1919.

The capital cost to the 30th June, 1920, was £57,910. The cost of rolling-stock at 30th June, 1919, is included in that for the St. Kilda-Brighton line. The gauge of this line is 4 ft. 8½ in. The subjoined statement gives particulars of the working of this line to the 30th June, 1920 :—

SANDRINGHAM-BLACK ROCK ELECTRIC STREET TRAMWAY, 1920.

Year ended 30th June—	Mileage Open (Route).	Total Cost of Construction.	Current used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Interest.	Net Profit.

(a) Exclusive of Rolling Stock.

(b) Inclusive of Rolling Stock.

(c) *The North Melbourne Tramways*, extending through the northern suburbs to the Saltwater River and to Keilor-road, were constructed by a private company, and were opened for traffic on the 11th October, 1906. The route and track mileage for year ended 30th September, 1920, were 7.51 and 11.43 miles respectively, the gauge of line being 4 feet 8½ inches. The number of passengers carried during the same period was 3,613,997. The current used during the year for traction purposes was 800,048 kilowatt-hours, while the number of persons employed was 129.

(d) *The Prahran and Malvern Tramways*. The lines were constructed under the control of a trust, which consisted of seven members appointed from the councils of Prahran, Malvern, St. Kilda, Caulfield, Hawthorn, Kew, and Camberwell. At the 30th June, 1920, the total route mileage open was 35.02 miles, the total track mileage being 66.12 miles, and the total capital cost £903,897. The gauge of the track is 4 ft. 8½ in. The current is supplied by the Melbourne Electric Supply Company Limited at a price varying according to the consumption of current and the price of fuel. The first section of the lines was opened for traffic on 31st May, 1910. During the nine months ended 30th June, 1920, the current used for traction purposes was 6,046,889 kilowatt-hours, and the number of tram miles run was 2,562,499, the number of passengers carried 28,504,376, the gross revenue £203,797, and the working expenses £146,991. The number of cars in use was 100, and the number of persons employed 707.

(e) *The Hawthorn Tramways*. The first section of these tramways, that from Prince's-bridge to Power-street, Hawthorn, was opened for traffic on 6th April, 1916, and on 30th June, 1920, the route and track mileages in operation were 11.12 and 17.93 miles respectively. During the nine months ended 30th June, 1920, the current used for traction purposes was 2,206,191 kilowatt-hours, the tram miles run 776,719, the number of passengers carried 8,448,862, the gross revenue £64,598, and the working expenses £49,651. The number of cars in use was 32, the number of persons employed 201, and the capital cost £300,171.

(f) *The Melbourne, Brunswick and Coburg Tramways*. The first section of these tramways, that between Moreland-road and Bell-street, was opened for traffic on 27th April, 1916. At the 30th June, 1920, the route and track mileages open for traffic were 7.07 and 12.32 miles respectively. During the nine months ended 30th June, 1920, the current used for traction purposes was 1,310,830 kilowatt-hours, the tram miles run 547,335, the number of passengers carried 5,424,331, the gross revenue £37,623, and the working expenses £30,453. Eighteen cars were in use, the number of persons employed was 147, and the capital cost £187,755.

(g) *Fitzroy, Northcote and Preston Tramway*. This line was opened for traffic on 1st April, 1920, and at 30th June, 1920, the route and track mileage in operation were 5.82 miles and 7.73 miles respectively. During the period (three months) the current used for traction purposes was 123,456 kilowatt-hours, tram miles run 77,666, and number of passengers carried 476,183. The gross revenue was £3,365, and working expenses £3,645. Eight cars were in use, and the number of persons employed was 45. The capital cost was £137,771.

(h) *Footscray Tramway*. The construction of this line was practically completed at 30th June, 1920, but the opening for traffic was deferred until 6th September, 1921, pending the supply of electric power. The gauge is 4 ft. 8½ in. and the route and track mileage are respectively 4.73 miles and 5.31 miles. The capital cost was £111,552.

(i) *The Ballarat and Bendigo Electric Tramways* are under the control of a private company, and run along the main streets and to and from the outlying suburbs of the two cities. The total length of lines open for traffic is 21.25 route miles and 25.86 track miles, the gauge being 4 ft. 8½ in. During the year ended 31st December, 1920, 5,907,443 passengers were carried, the gross revenue being £56,757, and the working expenses £38,920. The number of cars in use was 55, and the number of persons employed 133.

(j) *The Geelong Electric Tramways*, which are privately owned, were opened for traffic on the 14th March, 1912, and up to the 31st August, 1920, the cost of construction and equipment, exclusive of generating plant, totalled £61,861. The system has a route and track mileage of 4.90 and 5.67 miles respectively, the gauge being 4 ft. 8½ in.

The car mileage for the year ending on the last-mentioned date was 222,225 miles, and the number of passengers carried 1,905,542. For the same period the revenue was £21,037, and the expenditure £14,837.

(k) *Particulars of Working of all Electric Tramways.* The following table gives particulars of the working of all electric tramways in Victoria for each year from 1916 to 1920 inclusive:—

VICTORIA.—PARTICULARS OF WORKING OF ELECTRIC TRAMWAYS, 1916 TO 1920.

Year.	Mileage Open for Traffic (Route).	Total Cost of Construction and Equipment.	Current Used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Cars in Use.	Persons Employed.
	Miles.	£	Kilowatt-hours.	No.	No.	£	£	No.	No.

1920	105.26	2,442,746	15,758,101	7,302,713	74,359,826	553,507	418,462	284	1,554

4. *Queensland.*—In this State there is a system of electric tramways running through the streets of the city and suburbs of Brisbane and controlled by a private company which has its head office in London. The total length of the Brisbane system was 42.60 route miles at the end of the year 1920. There is also a steam tramway in operation at Rockhampton having a length of 6 route miles.

(i) *Brisbane Electric Tramways.* These tramways are run on the overhead trolley system, the voltage of the line current being 550. The total cost of construction and equipment to the end of the year 1917 was £1,435,414, the gauge of line being 4 ft. 8½ in. The following table gives particulars of these tramways for the calendar years 1916 to 1920:—

QUEENSLAND.—BRISBANE ELECTRIC TRAMWAYS, PARTICULARS OF WORKING 1916 TO 1920.

Year.	Mileage Open for Traffic (Route).	Total Cost of Construction and Equipment.	Current Used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Cars in Use.	Persons Employed.
	Miles.	£	Kilowatt-hours.	No.	No.	£	£	No.	No.
1916	40.45	1,468,906	9,272,709	4,286,802	51,029,668	364,745	216,607	172	921
1917	41.58	1,435,414	8,964,113	4,377,104	51,860,308	371,850	257,035	172	1,121
1918	41.58	(a)1,435,414	9,453,441	4,379,679	57,456,832	412,569	264,858	173	1,103

(a) Figures for 1917.

(ii) *Rockhampton Municipal Tramways.* These tramways were opened for traffic in 1909, the motive power being steam. The length of line is 6 route miles, and the gauge 3 ft. 6 in. The capital cost to 31st December, 1920, was £42,000. During the year 1,617,922 passengers were carried, the revenue being £15,437, and working expenses £15,911. The number of the staff at end of year was 48.

(iii) *Sugar-Mill Tramways.* In various parts of Queensland there are tramways used in connexion with the sugar-milling industry, chiefly for the purpose of hauling cane to the mills. Some of these lines are of a permanent nature, running through sugar-cane plantations, while others are portable lines running to various farms.

5. **South Australia.**—Up to the year 1906 the tram service in the principal streets of Adelaide and suburbs was a horse system run by various private companies. Power to acquire these lines, and to provide for their extension and management by means of a Trust, was given to the Government by the Municipal Tramways Trust Act 1906. In accordance with the provisions of the Act, a Trust consisting of eight members, of whom two were nominated by the Governor, two elected by the City Corporation, and two each by the Suburban Corporations and the District Councils involved, was formed in 1907, and a length of 49 route miles of horse traction tramways was purchased from the private companies for a sum of £282,582. On the 10th March, 1909, the electric car system was inaugurated on the Kensington route. At the end of July, 1920, a length of 66.03 route miles had been electrified and opened for traffic, the corresponding length of track opened being 114.00 miles, all of which are of a gauge of 4 ft. 8½ in. The cost of construction and equipment on the 31st July, 1920, was £1,793,298. The following table gives particulars of the tramways for the years ended 31st July, 1916 to 1920 :—

SOUTH AUSTRALIA.—ADELAIDE ELECTRIC TRAMWAYS, PARTICULARS OF WORKING, 1916 TO 1920.

Year.	Mileage Open for Traffic (Route).	Total Cost of Construction and Equipment.	Current Used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Cars in Use.	Persons Employed.
	Miles.	£	Kilowatt-hours.	No.	No.	£	£	No.	No.
1916	54.42	1,486,546	9,286,910	4,719,043	43,141,885	322,759	193,965	170	1,120
1917	64.46	1,703,151	10,382,667	4,954,848	45,431,691	338,361	211,662	170	1,200
1918	65.66	1,751,943	10,758,897	5,359,776	46,466,258	414,836	250,586	174	1,099
1919	65.66	1,789,487	10,730,307	5,176,264	45,882,376	428,477	284,993	185	1,337
1920	66.03	1,793,298	11,261,046	5,407,654	50,815,848	505,303	339,166	190	1,270

There are also in South Australia 19.86 miles of Government horse tramways in country districts, worked in connexion with the railway system, of which 17.36 miles are used for passenger service, and 2.50 miles for special purposes. The subjoined statement gives various particulars of these lines:—

SOUTH AUSTRALIA.—PARTICULARS OF HORSE TRAMWAYS, 1920.

(a) Included in mileage of Government railways.

6. **Western Australia.**—Apart from the electric tramways, there are in this State several tramways, amounting in all on the 30th June, 1920, to a length of 24.91 miles, which are the property of the Government. Of these, which are under the control of the Harbour and Light Department, the most important is the line between Roebourne and Cossack, constructed on a 2-ft. gauge. The length of this line is 12.50 miles, and it is worked by steam. The remaining 12.41 miles belonging to the Government are made up of several short lengths, worked by steam or horses, in connexion with the jetties at certain ports for the purpose of providing the necessary communication between such

jetties and the goods sheds or warehouses. In addition to these Government lines there are electric tramway systems at Perth, under Government control; at Kalgoorlie and Boulder City, carried on by private companies; and at Fremantle, under municipal control.

(i) *Steam and Horse Tramways.* Particulars as to the working of the Government steam or horse tramways for the year ended 30th June, 1920, shew that the capital cost of the lines to that date was £85,451, the gross revenue for the year being £8,281, and the working expenses £3,495.

(ii) *Electric Tramways.* There are now four towns in Western Australia which enjoy the benefits of electric tramway systems, namely, Perth, Fremantle, Kalgoorlie, and Boulder.

(a) *The Perth Electric Tramways* were opened for traffic by a private company on the 24th September, 1899, and the system has since been extended to many of the suburbs. This tramway system was taken over by the Government on 1st July, 1913, and is now running in conjunction with the Government railways. On the 30th June, 1920, the route and track miles open for traffic were 27.25 and 36.10 miles respectively, the total cost of construction and equipment to that date being £619,874. During the year, 19,175,143 passengers were carried, the gross revenue being £187,981 and the working expenses £149,652. Eighty-three motors were in use, and the number of employees was 436. The gauge of line is 3 ft. 6 in.

(b) *The Fremantle Tramways* were opened in November, 1905, under the control of the municipality. On the 31st August, 1920, there were 8.66 route and 11.55 track miles of line open for traffic, the cost of construction and equipment at that date being £103,405. This line has a gauge of 3 ft. 6 in. During the year 6,064,699 passengers were carried, the gross revenue being £53,223 and the working expenses £43,927. Twenty-one cars were in use, and the number of employees was 135.

(c) *The Kalgoorlie and Boulder Tramways* are run by a private company, the first line being opened in 1902. At the beginning of 1904 legislative authority was given for the construction of lines in Boulder and suburbs, and in November, 1904, the last section of the Boulder system was completed. At the end of the year 1920 the total mileage of the whole system—in Kalgoorlie and Boulder—amounted to 14.75 route or 20.50 track miles, the total cost of construction and equipment being £452,318. During the year 2,082,984 passengers were carried, the gross revenue being £36,913 and the working expenses £27,466. Twenty-five motors and seven trailers were in use, and the number of employees was 58. The gauge of this line is 3 ft. 6 in.

(d) *The Leonora-Gwalia Tramway*, two and a quarter route miles in length, was initially a steam tramway. It was opened for traffic by electrification under municipal control on 5th October, 1908, but is now worked with a petrol motor by a private syndicate. It has a gauge of 3 ft. 6 in.

(e) *Particulars of Working of all Electric Tramways.* The subjoined table shews so far as returns are available, particulars of the working of all electric tramway systems in the State for the years 1916 to 1920:—

**WESTERN AUSTRALIA.—PARTICULARS OF ELECTRIC TRAMWAYS,
1916 TO 1920.**

Year.	Mileage Open for Traffic (Route).	Total Cost of Construction and Equipment.	Current Used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Cars in Use.	Persons Employed.

(a) Exclusive of Leonora tramway.

(iii) *Perth Ferries.* As the Perth ferry services are mainly used for suburban passenger traffic, they are referred to in this section rather than under Shipping. Of the thirteen boats in service, four are under the control of the Western Australian Government, the other nine belonging to a private company. The number of passengers carried during the year 1919-20 was 1,109,671, the revenue and expenditure for the same period being £14,518 and £13,077 respectively, and the number of persons employed 26.

7. *Tasmania.*—(i) *Tramways.* In Hobart there is a system of electric tramways, the first line of which was opened for traffic in 1893, amounting in all to a length of 13 and 16.50 route and track miles respectively. This was originally owned by a private company, but is now the property of the Hobart Municipal Council. Under the authority of the Launceston Tramway Act of 1906 the Launceston City Council entered into an agreement with a private company for the construction of a system of electric tramways in the city and suburbs of Launceston. The agreement provided that the company was to run the tramways for a period of 25 years, when the council could purchase the lines and stock at cost price; the electric power required was to be supplied by the Council. This agreement, however, lapsed, and the Council has constructed the tramways, and is running them as a municipal undertaking. The system, which was opened on the 16th August, 1911, has a route and track mileage of 10.13 and 13.05 miles respectively. The gauge of track in both these systems is 3 ft. 6 in.

The following table gives particulars of the working of the two systems for the years 1916 to 1920 :—

TASMANIA.—PARTICULARS OF WORKING OF ELECTRIC TRAMWAYS.
1916 TO 1920.

Year.	Mileage Open for Traffic (Route).	Total Cost of Construction and Equipment.	Current Used for Traction Purposes.	Tram Miles Run.	Passengers Carried.	Gross Revenue.	Working Expenses.	Cars in Use.	Persons Employed.
	Miles.	£	Kilowatt-hours.	No.	No.	£	£	No.	No.
1916	21.95	373,312	1,576,839	1,058,979	7,963,040	73,424	46,758	60	250
1917	21.95	383,219	1,687,407	1,115,090	8,349,789	79,693	49,930	60	259
1918	22.00	389,659	1,913,720	1,192,955	9,785,155	81,318	56,103	60	253
1919	23.25	400,375	2,396,717	1,215,663	11,070,263	97,459	63,561	60	288
1920	23.13	413,060	2,192,420	1,257,911	11,961,256	112,023	83,385	63	362

There is also a tramway from Smithton to Marrawah, 27.13 miles in length, operated by the Government. Of this distance 7.60 miles are worked as a horse tram, the rest being for steam traction. In the year ended 30th June, 1920, 1,526 passengers and 22,520 tons of goods were conveyed, the number of employees being 12.

A private steam tram at Zeehan, 1.50 miles in length, is also in operation. In 1920, 7,935 tons of goods were conveyed, the number of persons employed being 4. There is also a private steam tram running from Tullah to Farrell's Siding, a distance of 7 miles. In 1918, 1,476 passengers and 3,040 tons of goods were conveyed, the number of persons employed being 4.

In addition, a private steam tramway 2 ft. 0 in. gauge, 6 miles in length joins a Government line, about 6 miles from Zeehan, running in the direction of Pieman Crossing.

(ii) *Ferries.* The Hobart ferry service, being of a suburban character, is referred to here rather than under Shipping. There is one company controlling a fleet of five boats, and also a ferry operated by the Public Works Department with two boats. In the year 1919-20 the number of passengers carried was 859,059, the revenue £14,615, the working expenses £13,465, and the number of persons employed 36.

8. *Electric Traction in Commonwealth, 1919-20.*—The subjoined table gives particulars of electric tramways for each State and the Commonwealth. The returns for the Hobart tramways in Tasmania, for the Ballarat and Bendigo tramways in Victoria, for the Kalgoorlie tramways in Western Australia, and for the Brisbane tramways, are for the calendar year 1920; and for other tramways the returns are, generally, for the financial year 1919-20.

(a) For year 1917.

The percentage of working expenses on gross revenue for all electric tramways in the Commonwealth was 79.44, the range for the States being 67.12 in the case of South Australia and 83.93 in the case of New South Wales.

In "Transportation Bulletin No. 12," Table No. 20, will be found an analysis of the figures in the foregoing table in respect of revenue, working expenses, etc., for the year 1919-20.

In the following table particulars are shewn as to the operations of electric tramways in the Commonwealth for the period 1911 to 1920 :-

(a) Exclusive of Leonora tramway (W.A.), with exception of mileage. (b) Exclusive of Leonora tramway. (c) Exclusive of Launceston tramway.

During the ten years included in the last table the percentage of working expenses on the gross revenue of all electric tramways in the Commonwealth had a maximum of 79.44 in 1919-20 and a minimum of 73.32 in 1915-16, the average over the whole period being 76.31.

SECTION XVIII.

POSTS, TELEGRAPHS AND TELEPHONES.

§ 1. Posts.

1. **The Commonwealth Postal Department.**—Under the provisions of section 51 of the Commonwealth Constitution Act the Commonwealth Parliament was empowered to make laws with respect to the control of the postal, telegraphic, and telephonic services in Australia, and by proclamation, made under section 69 of the same Act, the six separate State Post and Telegraph Departments were amalgamated and taken over by the Federal Executive on the 1st March, 1901. On the 1st December following, the Commonwealth Post and Telegraph Act 1901 came into operation, and the provisions of the various State Acts referring to the postal and telegraphic services thereby ceased to apply; it was, however, specially provided by the Act of 1901 that, until such provisions should be revoked by the Governor-General, all regulations in force, and all rates and charges levied under any State Act, should continue in force and be applied in the same manner as if such State Act were not affected by the Commonwealth Act. The administration of the Act of 1901 was placed in the hands of a Postmaster-General, a responsible Minister with Cabinet rank, and of a Secretary having chief control of the Department throughout the Commonwealth under the Postmaster-General, whilst a principal officer in each State was provided for under the style of Deputy Postmaster-General. The rates and charges levied in each State for the transmission of letters, telegrams, and postal articles at the date of Federation remained in force until the Post and Telegraph Rates Act came into operation on the 1st November, 1902. This Act secured uniformity throughout the Commonwealth in the rates charged for the conveyance of newspapers by post, and for the transmission of telegrams, but did not alter the charges made in the individual States for the transmission of letters, cards, parcels, and packets. Uniform postage rates now exist in all the States under the Postal Rates Act of 1910, which came into operation by proclamation on the 1st May, 1911. (See paragraph 6 hereof.)

For a brief description of the postal services in the earlier period of Australian history, see Year Book No. 5, page 754.

2. **Development of Postal Services.**—In 1841 the number of post offices open in Australia was 102, situated mainly in New South Wales and Tasmania. Ten years later 101 post offices were open in New South Wales, 44 in Victoria, 72 in South Australia, and 51 in Tasmania. From the year 1851 onwards a remarkable increase in the number of post offices in Australia took place, until, in 1891, the number open totalled 4,463, of which 1,384 were situated in New South Wales, 1,729 in Victoria, 307 in Queensland, 629 in South Australia, 86 in Western Australia, and 328 in Tasmania. The number continued to increase until the end of the financial year 1916, when there were 6,082 post offices open in the Commonwealth, but the three subsequent years 1917–20 shew a net decrease of 215 in the number of post offices operating. At the 30th June, 1920, the number open in each State was as follows:—New South Wales, 2,034; Victoria, 1,707; Queensland, 645; South Australia, 674; Western Australia, 402; Tasmania, 405; a total for the Commonwealth of 5,867. In addition there were 2,425 receiving offices.

3. State, Interstate, and Oversea Postages for whole Commonwealth.—In the following table the matter dealt with from 1914 to 1919-20 is divided into (i) matter posted in the Commonwealth for delivery within the Commonwealth, (ii) matter received from places outside the Commonwealth, (iii) matter despatched to places outside the Commonwealth, and (iv) total postal matter dealt with by the Commonwealth Postal Department. Although mail matter posted in the Commonwealth for delivery therein is necessarily handled at least twice, only the numbers despatched are included in the table following, which consequently gives the number of distinct articles handled. The large increase in overseas mail matter despatched and received in 1916-17 and 1917-18 is mainly attributable to postages in connexion with the Australian troops abroad. Evidence of this is furnished by the decreases recorded in 1918-19, when the majority of the troops had returned to Australia.

5. **Postal Facilities.**—The subjoined statement shews the number of post and receiving offices, the area in square miles and the number of inhabitants to each post office (including receiving offices) in each State and in the Commonwealth at the end of the year 1919-20. In order to judge clearly the relative postal facilities provided in each State, the area of country to each office, as well as the number of inhabitants per office, should be taken into account.

**SQUARE MILES OF TERRITORY AND NUMBER OF INHABITANTS TO EACH POST
AND RECEIVING OFFICE ON 30th JUNE, 1920.**

(a) Including Federal Territory. (b) Including Northern Territory.

6. Rates of Postage.—Prior to the operation of the Postal Rates Act of 1910, the charges made for the postage of newspapers and parcels, and of interstate and foreign letters, were the same in all the States of the Commonwealth. The rates for the transmission of letters within the borders of a State, however, were not uniform, the Post and Telegraph Act 1901 having specially provided that the rates and charges levied in any State should continue in force. The last-mentioned provision, however, was repealed by the Postal Rates Act of 1910, which came into force by proclamation on 1st May, 1911, and uniform rates are now applicable throughout the Commonwealth. An amendment of the Act in 1918 imposed as from the 28th October of that year $\frac{1}{2}$ d. war postage in addition to the ordinary rate. A further amendment of the Act in 1920 repealed the "War Postage Section," and provided for increased rates of postage to operate as from 1st October, 1920.

The amending bill of 1918 provided for the transfer to the Treasury of all revenue derived from War Postage, which was imposed in addition to ordinary postage. From 28th October, 1918, the date the "War Postage Section" came into operation to 30th September, 1920, the date of the repeal of the section, the Treasury received from this source £1,211,132.

**POSTAL RATES ON CERTAIN ARTICLES POSTED IN THE COMMONWEALTH FOR
DELIVERY THEREIN ON AND AFTER 1st OCTOBER, 1920.**

Postal Articles.	Rates of Postage.
LETTERS	2d. per $\frac{1}{2}$ ounce { Single, 2d. each

ALL OTHER NEWSPAPERS	1d. per 4 ounces or part of 4 ounces For each newspaper, 1d. per 10 ounces or part of 10 ounces

Whilst the bookkeeping sections of the Constitution Act were in force, each State had necessarily to use its own postage stamps, and stamps sold in one State were only allowed to be used on letters posted in that State. The necessity for this arrangement disappeared with the change in the keeping of the Commonwealth accounts, and since the 14th October, 1910, it has been permissible to affix stamps of any State to letters, irrespective of the State in which such letters are posted. Stamps of a uniform design are now used throughout the Commonwealth.

(i) *Letters.* Under the Postal Rates Act of 1910, the charge (1d. for every $\frac{1}{2}$ -oz.) for letters posted for delivery within the Commonwealth was made uniform throughout all States. Previous to 1st May, 1911, various local and interstate rates were in operation within the States. The postage to the United Kingdom was reduced in January, 1891, from sixpence per half-ounce via the Red Sea, and fourpence via the Cape of Good Hope, to the uniform rate of twopence halfpenny. In 1891 the States were represented at the Congress of the Universal Postal Union held in Vienna, and on the 4th July a convention was signed on their behalf, by which they joined the Union from the 1st October of that year. On that date the rate of postage to all British possessions and to foreign countries included in the Union was reduced to twopence halfpenny. The rate on postal articles to places within the Commonwealth and to British Possessions overseas was reduced from 1st May, 1911, and from that date until 1st October, 1920, letters to British destinations were carried at the rate of one penny per half ounce. The present charge throughout the Commonwealth for postage of interstate letters and of letters to the United Kingdom and to British possessions, including the islands in the Pacific, which, prior to the War were held by Germany, but are now under British control, is uniformly twopence per half-ounce. The rate on letters to foreign countries (with the exception of New Hebrides, Banks and Torres Islands, where the rate is twopence per half-ounce) is threepence each half-ounce.

(ii) *Newspapers.* The different rates charged for the carriage of newspapers in the various States prior to Federation continued after the control of the Postal Departments had been taken over by the Commonwealth, until the 1st November, 1902, when a uniform rate was imposed by the Post and Telegraph Rates Act 1902. At present the rate on all newspapers posted for delivery in the Commonwealth or for transmission to Papua (without condition as to the number contained in each addressed wrapper posted) by registered newspaper proprietors, or by newsvendors, or returned by newsvendor or agent to the publishing office, is three halfpence per twenty ounces on the aggregate weight. The rate to New Zealand, the islands annexed thereto, and Fiji is three halfpence per sixteen ounces on the aggregate weight, which must not exceed 20 lbs. On all other registered newspapers posted within the Commonwealth for delivery therein or for transmission to New Zealand and the islands annexed thereto, Fiji, and Papua, the charge is one penny per ten ounces for each newspaper. At the end of the year 1919 there were in all 1,465 publications registered in the Commonwealth under section 29 of the Post and Telegraph Act 1901 for transmission by post as newspapers. The rates on registered newspapers for transmission to the United Kingdom are, by the ordinary route, for each newspaper not exceeding two ounces one penny, exceeding two ounces but not exceeding eight ounces three half-pence, exceeding eight ounces but not exceeding ten ounces threepence, every additional two ounces one halfpenny. By the all-sea route the rate for each newspaper exceeding eight ounces is three half-pence per sixteen ounces. To other parts of the world the rate is one penny up to two ounces and one halfpenny for every additional two ounces. The limit of weight allowed is 5 lbs. Newspapers which are not registered are charged at the same rates as other printed papers.

(iii) *Parcels.* Parcels may not exceed 11 lbs. in weight, 3 ft. 6 in. in length, or 6 feet in length and girth combined. The rate for the inland postage of parcels is sixpence up to 1 lb., and then threepence for every additional pound. For interstate, New Zealand, Fiji, and Papua the rate is eightpence up to 1 lb., and then sixpence per lb., and for transmission to the United Kingdom the rate is one shilling up to 1 lb., and sixpence for every additional pound. Various rates are charged for the conveyance of parcels to other parts of the world.

(iv) *Packets.* The following articles are classed as packets and are accepted for overseas destinations at the rates given. A table of charges for delivery within the Commonwealth is to be found on page 633:—Commercial Papers: For New Zealand

(including islands annexed thereto) and Fiji, three half-pence per two ounces; for all other places, two ounces threepence, each additional two ounces up to six ounces half-penny, each two ounces thereafter three half-pence, maximum 5 lbs. Printed Papers: All places penny per two ounces, maximum 5 lbs. Patterns and Samples: For New Zealand (including islands annexed thereto) and Fiji, three half-pence per two ounces (up to 1 lb.); for United Kingdom, three half-pence per two ounces (up to 5 lbs.); for all other places, three half-pence per two ounces (up to twelve ounces). Merchandise: For New Zealand (including islands annexed thereto) and Fiji, three half-pence per two ounces (up to 1 lb.); to all other places parcels rates are charged. Books: For New Zealand (including islands annexed thereto), Fiji, New Hebrides, and Solomon Islands, penny per four ounces; for all other places, penny per two ounces. Catalogues: Rates applicable Commonwealth only. Magazines: For New Zealand (including islands annexed thereto), Fiji, New Hebrides, and Solomon Islands, penny per four ounces; for all other places, penny per two ounces. Packets for transmission within the Commonwealth must not as a rule exceed 2 feet in length, 1 foot in breadth or depth; or, if in a roll, 2 ft. 6 in. in length.

7. Registered Letters, Packets, etc.—Under section 38 of the Post and Telegraph Act 1901, provision is made for the registration of any letter, packet, or newspaper upon payment of a fee of threepence, and any person who sends a registered article by post may obtain an acknowledgment of its due receipt by the person to whom it is addressed by paying an additional fee of twopence halfpenny in advance at the time of registration.

Number of Registered Articles. The subjoined table shews the number of registered articles posted in each State, classified according to the places to which they were despatched for delivery, also the number of registered articles received in each State from beyond the Commonwealth during the year 1919–20 :—

8. Ocean Mail Services.—Regular steamship communication between Australia and Europe was established in 1852 by a service run by the Peninsular and Oriental Company between Singapore and Sydney, via King George's Sound, Adelaide, and Melbourne. This service was inaugurated in September, 1852, by the arrival at Melbourne of the *Chusan*, and was continued until 1854, when it was stopped in consequence of the Crimean War; in 1856 a line of steamers was again started, and the service was carried on by the Peninsular and Oriental Company, in conjunction with the Royal Mail Company, for some years.

(i) *Mail Route via San Francisco.* The service via the Red Sea did not at first give much satisfaction to the public, and was looked upon with a certain amount of disfavour in New South Wales and New Zealand. The effect was to stimulate the colonists to agitate for an improved service, and proposals were made for the establishment of a line of mail packets from Sydney to Panama via Wellington, by rail across the isthmus, and thence to Great Britain. The result was that in 1866 the line was started, and continued in operation until the end of 1868, when it was terminated through the failure of the company by which it had been carried out. The completion of the railway across the American continent in 1869, with its western terminus at San Francisco, opened up a new and agreeable route, and in that year a monthly service was inaugurated by the Union Steamship Company, in conjunction with the Pacific Steamship Company, from Sydney to San Francisco via Auckland. This service was subsidised to the extent of £37,000 per annum, of which New South Wales paid £25,750 and New Zealand £11,250, and was continued until November, 1890, when a new contract was entered into and the amount of the subsidy largely reduced, the amount of the contribution being based upon the weight of mail matter carried. Various extensions of the contract were made, but the last agreement made between the New Zealand Government and the Oceanic Steamship Company of San Francisco expired on the 10th November, 1906, and has not since been renewed. From that date mails were carried at Postal Union rates until the 12th April, 1907, when the service was discontinued. At present mails to and from Europe are carried by the Union Steamship Company, which receives a subsidy from the New Zealand Government, with a four-weekly service; and by the Oceanic Company, with a service twice in every nine weeks. Postal Union rates are charged in respect of Australian mails conveyed by the Union Company, and poundage rates in the case of the Oceanic Company.

(ii) *Route via Suez Canal.* The establishment of a mail route via America had the effect of stimulating the steamship owners who were engaged in the service via Suez, and from that time there was a marked improvement in the steamers, as well as in the punctuality and speed with which the mails were delivered. Almost since the inception of ocean steam services, the Peninsular and Oriental Company, and, at a little later date, the Orient Pacific Company, have carried mails to and from Australia. Postal matter was carried under contract with the Companies named until 31st January, 1905, the subsidy being £170,000 per annum, of which £98,000 was paid by the United Kingdom and £72,000 by the States of the Commonwealth in proportion to the population of the several States. The Imperial and Commonwealth Governments then entered into separate contracts with the P. and O. Company and Orient Company respectively. The Commonwealth Government's agreement with the Orient Company (on behalf of themselves and the Pacific Steam Navigation Company) was made on 25th April, 1905, and provided for a fortnightly mail service between England and Australia for the period from 4th April, 1905 to 31st January, 1908, the subsidy being £120,000 per annum. A further agreement was entered into between the Commonwealth and the Orient and Pacific Companies on 20th December, 1907, under which the service was extended to Brisbane on payment by the Commonwealth of £4,880 per annum additional as from 1st January, 1907. These agreements were replaced by the 1907 agreement referred to in the next sub-section hereof. Mails were also conveyed to and from Australia by the P. and O. Steamers under the contract with the British Post Office at Postal Union Rates. This arrangement continued until July, 1917, since when mails conveyed from Australia by P. and O. steamers have been paid for at poundage rates. Fremantle has, since the year 1900, been the first and last port of call for European mail steamers, in lieu of Albany, the original port of call. The Peninsular and Oriental and Orient Steam Navigation Companies' steamers, before the outbreak of war in 1914, sailed alternately every week, both from London and Australia, conveying the outward and homeward mails. The Peninsular and Oriental service was entirely suspended subsequent to July, 1917, as a result of the war, while a very limited service was carried on for a greater part of the time by the Orient line via the Cape route. The situation has improved since the termination of the War, although the regular running of the Peninsular and Oriental and Orient line steamers has not yet been resumed. At present every opportunity is being availed of to improve the service by despatching mails by all vessels suitable for the purpose.

(a) *1907 Mail Contract.* On the 1st January, 1906, tenders were invited by the Commonwealth Postmaster-General for a fortnightly mail service between Adelaide and Brindisi, to alternate with a similar service to be provided by the Imperial Government, and a contract was entered into with Sir James Laing and Company Limited, providing for a service at an annual subsidy of £125,000. This contract, however, fell through, and new tenders were accordingly called for. On the 15th November, 1907, an agreement was entered into with the Orient Steam Navigation Company Limited providing for a fortnightly service for a period of ten years, commencing in February, 1910. The mail service was to be carried out by existing vessels belonging to the company and by five new mail ships, which had been specially built, and which were each over 12,000 tons gross registered tonnage and of not less than seventeen knots speed. An additional new vessel was to be added within eighteen months, and another within six years, from February, 1910, and the first of these—the *Orama*—entered into running during November, 1911. War conditions, however, delayed the addition of the later vessel to the mail fleet. The vessels were to call at Fremantle, Adelaide, Melbourne, Sydney, and Brisbane, and, during the months of February to May inclusive, at least six of them at Hobart. The voyage from Taranto to Adelaide was to be completed within twenty-six days, fourteen hours, and from Adelaide to Taranto within twenty-seven days, two hours, but the latter period might be exceeded by thirty-six hours during the prevalence of the south-west monsoon. The amount of the subsidy was fixed at £170,000 per annum; but, if the earnings of the company were decreased, or the expenses increased by reason of any Commonwealth shipping legislation passed subsequently to the date of the agreement, to the extent of not less than £5,000 a year, the contractors had the right to terminate the agreement unless the subsidy were increased. Insulated space of not less than 2,000 tons of forty cubic feet per ton was to be provided in each of the new vessels, and the freights were not to exceed one halfpenny per lb. for butter and sixty shillings per ton for fruit. These rates obtained until the beginning of the War when the control of space passed to the Imperial Government. White labour only was to be employed, and no discrimination was to be made between unionists and non-unionists. If before or during the sixth year of the period of the contract an accelerated service were provided by any competing line of mail ships, the contractors had, if so required by the Postmaster-General, to provide a service equal to the competing service, at an increased subsidy, to be determined by agreement or arbitration. With the expiration of the period in 1916, this clause in the agreement lapsed. The Commonwealth flag had to be flown on the mail ships, which the Commonwealth had the right to purchase at a valuation at any time. Within six months of the Postmaster-General establishing a permanent wireless telegraphy station at Rottnest Island, or at any point on the coast between Fremantle and Brisbane, the company was required to fit the mail ships with wireless telegraphy installations. The new service was inaugurated on the 11th February, 1910, but was interrupted by the War and has since been carried out as far as possible with the reduced number of steamers available. This contract expired on 17th September, 1921, the Company having given the necessary 24 months' notice of intention to terminate as provided by the agreement.

(b) *1921 Mail Contract.* On 27th April, 1921, a fresh contract was entered into between the Commonwealth and the Orient Company for a four-weekly service between Toulon or other approved port in Southern Europe and Fremantle. The mail steamers are to start from an approved port in the United Kingdom and are to call also at Adelaide, Melbourne, Sydney, and Brisbane, while at least three of them are to call at Hobart during the period February to May inclusive. The service commenced on 20th September, 1921, and will be performed by the four steamers remaining to the Orient Company after the war. The contract is terminable on twelve months' notice by either party to the agreement, and is based generally on the terms and conditions of the 1907 contract. The period of transit from Toulon to Fremantle is to be 632 hours, and from Fremantle to Toulon 644 hours. During the prevalence of the South-west monsoon the latter period is extended by 36 hours. The subsidy payable is £130,000. Refrigerated space similar to that provided for in the 1907 contract is to be provided in the four regular steamers employed in the service, but if necessary the contractors may, as under that contract, use one other steamer without refrigerated space. Instead of the charges for butter and fruit being fixed as in 1907 it is provided that the contractors shall not, without the approval

of the Postmaster-General, charge or receive for carriage of butter and fruit any higher rates of freight than the current ruling rates of freight charged or received (after deduction of all rebates allowed or allowable) for carriage of those articles on other lines of steamers regularly engaged in the trade between the Commonwealth ports of call and the port or ports of discharge of the mail ships. The contract is subject to the British Government arranging with the Peninsular and Oriental Company for a four-weekly service which will alternate with the Orient contract, and thus provide a regular fortnightly service between Australia and Great Britain. An arrangement of this nature has been made.

(c) *French and German Subsidised Mail Services.* Vessels belonging to the Messageries Maritimes and the Norddeutscher Lloyd, which were under contract respectively with the French and German Governments to convey mails monthly between Marseilles and New Caledonia and between Bremen and Sydney, via Genoa, also carried mails for the Commonwealth Government from Australia to Europe at Postal Union rates. The Messageries Maritimes service commenced in November, 1882; the amount of the annual subsidy granted by the French Government being £120,000. The vessels have, however, for the time being, been withdrawn from the Australian service. The first contract for the establishment and maintenance of a mail steamship line between Germany and Australia was made between the Imperial German Government and the Norddeutscher Lloyd in 1885, and the service was inaugurated in July, 1886, with the steamer *Salier*. The service afforded by German vessels was, of course, discontinued on the outbreak of hostilities in Europe in 1914.

(iii) *Route via Vancouver and Canadian-Pacific Railway.* During the year 1893 a direct monthly service was started between Sydney and Vancouver, in British Columbia, via Wellington in New Zealand, and thence to Liverpool via the Canadian-Pacific Railway, the New South Wales Government paying an annual subsidy of £10,000 for the maintenance of this service for a period of three years. In 1896 the agreement was renewed for a further period of three years, and in 1899 was again renewed for four years, subject to the same terms and conditions, except that the route was via Brisbane instead of Wellington. The contract was further extended, at an increased subsidy, from time to time until the 31st July, 1911, at a subsidy of £26,626 per annum, when it finally terminated, and Commonwealth mails for Canada are now forwarded from Sydney, via New Zealand, at poundage rates.

(iv) *Other Ocean Mail Services.* In addition to the mails via the Suez Canal, a number of other services, both regular and irregular, are maintained between the Commonwealth and various parts of the world, and also between the principal ports in the various States and a number of small ports in the less settled parts of the Commonwealth which are inaccessible by rail. The following statement gives a summary, in so far as returns are available, of all mail services maintained between the Commonwealth and other countries and between ports in the Commonwealth. The amounts of subsidies specified are the amounts payable per annum unless otherwise stated.

SUMMARY OF COMMONWEALTH MAIL SERVICES, 1921.

Description of Service.	Frequency of Service.	Ports between which Service is maintained.	Particulars regarding Subsidies.
1. <i>To and from Europe, via Suez—</i> (a) Orient Steam Navigation Co.	Every four weeks	Brisbane, Sydney, Melbourne, Adelaide, Fremantle and London, via Suez	Subsidy, £130,000. Commences 20th September, 1921. Terminable on twelve months' notice by either party
(b) Peninsular and Oriental S.N. Co. Ltd.	Irregular intervals	Sydney, Melbourne, Adelaide, Fremantle, and London, via Suez	Poundage rates

(h) C. A. Coghlan ..	Every two weeks	Launceston and Furneaux group of islands	
(i) King Island Steamers Ltd.	Fortnightly	Launceston and King Island	Subsidised by agreement dated 1st January, 1919, for three years. Amount of subsidy, £600 per annum, of which £300 contributed by State Government, contract terminable by month's notice either side
(j) King Island Steamers Ltd.	Fortnightly	Launceston and King Island	Subsidised by agreement dated 1st January, 1919, for three years. Amount of subsidy, £300 per annum
10. To and from Northern Territory—			
(a) Burns, Philp and Co. ..	Monthly ..	To and from Adelaide and Sydney, via Queensland ports, extending to China and Japan	Poundage rates
(b) State Steamship Service of Western Australia	Once each sixty days	Fremantle and Darwin..	See Item 8 above

SUMMARY OF MAIL SERVICES—*continued.*

Description of Service.	Frequency of Service.	Ports between which Service is maintained.	Particulars regarding Subsidies.
11. To Eastern Ports—			
(a) Burns, Philp and Co. . .	Monthly ..	Sydney to Singapore via Queensland Ports and Darwin	Subsidised by Commonwealth Govt. Mails at poundage rates
(b) China Navigation, Eastern and Ausn., and China Australian Line	About three times a month	Sydney to Hong Kong, Manila, etc., via Queensland Ports	Poundage rates
(c) Nippon Yusen Kaisha	Every four weeks	Sydney to Manila, China, and Japan, via Queensland Ports	Postal Union rates
(d) Royal Dutch Packet S.N. Co.	Monthly	Melbourne to Java, via Sydney and Queensland Ports	Poundage rates
(e) Various other steamers	About monthly	Sydney or Newcastle and ports in Borneo, Java, Sumatra, and Malay Peninsula	" "
(f) W.A.S.N. Co. . .	About fortnightly	W.A. Ports, Java, and Singapore	" "
12. South Africa— White Star, P. and O. Branch Service, and other Companies	Irregularly	Sydney to Durban and Capetown	" "
13. North America—			
(a) Various steamers . .	Irregularly	Sydney or Newcastle to San Francisco	" "
(b) " " " . .	"	Sydney to Guaymas (Mexico)	" "
(c) Union S.S. Co. . .	13 voyages yearly	Sydney, Wellington, Tahiti and San Francisco	" "
(d) " " " . .	Every four weeks	Sydney, Auckland, Fiji, Honolulu, and Vancouver	" "
(e) Oceanic S.S. Co. . .	Twice in nine weeks	Sydney, Pago Pago, (Samoa), and San Francisco	" "
14. South America—			
(a) { Oceanic S.S. Co. } { Union S.S. Co. }	Twice a month	Sydney, via San Francisco to ports in Chile, Brazil, Peru, Uruguay, and Argentina	" "
(b) Various other steamers	Irregularly	Via Newcastle to various ports	" "
15. Pacific Islands—			
(a) Burns, Philp and Co. . .	Every two months	Sydney to Lord Howe and Norfolk Islands and New Hebrides	Subsidised by Commonwealth
(b) " " " . .	Irregularly	Sydney to Nauru and Ocean Islands, Gilbert and Ellice Groups	" "
(c) " " " . .	"	Sydney to Marshall Islands	" "
(d) " " " . .	Every three weeks	Sydney to Papua and Rabaul	Subsidised by Commonwealth
(e) " " " . .	"	Sydney to Rabaul . .	" "
(f) " " " . .	"	Sydney to Solomon Islands	" "
16. New Caledonia and New Hebrides—			
(a) Messageries Maritimes	Monthly ..	Sydney and Noumea and to Vila (New Hebrides)	Postal Union rates
(b) Other steamers . .	About twice a month	Sydney and Noumea . .	Poundage rates
17. Fiji, Friendly Islands, and Samoa—			
(a) Union S.S. Co. . .	Every four weeks	Sydney and Suva . .	" "
(b) " " " . .	"	Sydney, Suva, Tonga, and Samoa	" "
(c) A.U.S.N. Co. . .	"	Sydney and Suva . .	" "

9. Amount of Mail Subsidies Paid.—The following table shows the amounts of subsidies paid by the Commonwealth Postal Department for ocean and coastal mail services during the year ended 30th June, 1920 :—

MAIL SUBSIDIES.—OCEAN AND COASTAL SERVICES, 1919-20.

Service.	Orient S. N. Co.	Queens- land Ports.	South Australian Ports.	Western Australian Ports.	Tas- manian Ports.
	£	£	£	£	£
Annual subsidy	111,524	20,000	5,374	7,000	(a)13,915

(a) Including £300 paid by Tasmanian Government, and £15 paid by Trade and Customs Department.

During the year 1919-20 the amount paid by the Commonwealth for conveyance of mails at poundage rates by non-contract vessels was £50,915 ; by road services, £486,539 ; and by railway services, £247,215. The total expenditure in 1919-20 on the carriage of mails, as disclosed by the Profit and Loss Account, amounted to £987,610.

10. Average and Fastest Time of Mails to and from London.—Great progress has been made in regard to the means of postal communication with the United Kingdom and the continents of Europe and America. In 1857 there was an unsatisfactory ocean mail service, which nominally brought monthly mails, with news nearly sixty days old ; before the outbreak of the war there were three lines of modern ocean steamships, which brought the mails from the United Kingdom in about twenty-nine days to Adelaide, in addition to services by way of New Zealand, via San Francisco and Vancouver. Since the completion of the railway connecting Kalgoorlie, Western Australia, and Port Augusta, South Australia in 1917, letters for Australia and New Zealand arriving by overseas vessels from the United Kingdom have been landed at Fremantle for despatch overland by rail to the Eastern States. In the new contracts entered into in 1921 Fremantle has been made the mail port in Australia, and henceforth both first and second class mail matter will be brought to the Eastern States by train instead of first class matter only as formerly. By landing at Fremantle instead of as formerly at Adelaide, a saving of approximately sixty-seven hours is effected. In consequence of the war in Europe, steamers belonging to the Orient S. N. Co. were diverted from the Suez Canal to the Cape route, but the Suez Canal route has since been reverted to. The steamers of the Peninsular and Oriental Co. have also resumed via the last named route. A service equal to that of pre-war days is not yet available. A regular fortnightly service is assured, however, under the terms of contracts entered into between the Commonwealth Government and the Orient Steam Navigation Company and between the Imperial Government and the Peninsular and Oriental Company. Particulars of these contracts, which date from September, 1921, will be found on page 637 ante.

The subjoined table shows the average and the fastest times occupied in the conveyance of mails from London to Adelaide and vice versa during the year 1919-20.

AVERAGE AND FASTEST TIME OCCUPIED IN CONVEYANCE OF MAILS VIA SUEZ CANAL BETWEEN LONDON AND ADELAIDE, AND VICE VERSA, DURING 1919-20.

Service.	London to Adelaide.(a)				Adelaide to London.			
	Average Time.		Fastest Time.		Average Time.		Fastest Time.	
	Days.	Hours.	Days.	Hours.	Days.	Hours.	Days.	Hours.

Papua	0 9	0 9	1 6	1 6	2 3	2 3	3 0	3 0	
United Kingdom, Union of South Africa, Hong Kong, Dutch East Indies, Egypt, Straits Settle- ments									
Canada									
Philippine Islands ..									

Ninepence for any amount up to £2, and 4d. for each additional pound or fraction of a pound.

Sixpence for each pound or fraction of a pound.

(a) For amounts not exceeding £1, 9d. for each 2s. or fraction, with maximum of 7s. 3d.

(b) For amounts exceeding £1 for each £1, 7s. 3d., and for any odd amounts less than £1, 9d. for each 2s., with a maximum of 7s. 3d.

Remittances may also be made by telegraph to and from money order offices in the Commonwealth which are also telegraph or telephone offices, and to New Zealand. The charge for a telegraph money order is the cost of the telegram of advice in addition to the ordinary commission. Where payment is to be made within the Commonwealth the remitter must also send a telegram advising the transmission of the money, which telegram must be produced by the payee when applying for payment. In the case of New Zealand a second telegram is not required, but an additional charge of sixpence is made by the Department to cover the cost of notifying the payee.

(ii) *Rates of Poundage on Postal Notes.* The values of the notes issued have been so arranged that any sum of shillings and sixpences up to £1 can be remitted by not more than two of these notes. The poundage or commission charged on notes of different denominations is as follows :—

POUNDAGE RATES, POSTAL NOTES.

Denomination of Note ..	6d. to 1s. 6d.	2s. to 4s. 6d.	5s.	7s. 6d.	10s. to 20s.
Poundage charged ..	$\frac{1}{2}$ d.	1d.	1 $\frac{1}{2}$ d.	2d.	3d.

(iii) *Value of Orders Issued and Paid and of Notes Sold.* The following table shews the total value of money orders issued and paid, and of postal notes sold in each State and in the Commonwealth during the year 1919-20, together with the total amount of commission on money orders and poundage on postal notes received by the Postal Department. The results throughout shew an improvement as compared with the corresponding figures for 1918-19.

VALUE OF MONEY ORDERS ISSUED AND PAID AND OF POSTAL NOTES SOLD, AND TOTAL AMOUNTS OF COMMISSION AND POUNDAGE RECEIVED IN EACH STATE DURING 1919-20.

State.	Value of Money Orders Issued.	Value of Money Orders Paid.	Net Money Order Commission Received.	Value of Postal Notes Sold.	Poundage Received on Postal Notes.

12. *Number and Value of Money Orders and Postal Notes Issued and Paid.*—The following table shews the total number and value of money orders and postal notes issued and paid in the Commonwealth from 1914 to 1919-20. The payment of military allotments by money order was chiefly responsible for the increase in business recorded in 1915-16. Payment of military allotments by this method was discontinued in 1916-17.

NUMBER AND VALUE OF MONEY ORDERS AND POSTAL NOTES ISSUED AND PAID, 1914 TO 1919-20.

15. Value Payable Parcel and Letter Post.—This is a system under which the Postal Department undertakes to deliver registered articles sent by parcel post within the Commonwealth, or between Papua and the Commonwealth, to recover from the addressee on delivery a specified sum of money fixed by the sender, and to remit the sum to the sender by money order, for which the usual commission is charged. The object of the system is to meet the requirements of persons who wish to pay at the time of receipt for articles sent to them, and also to meet the requirements of traders and others who do not wish their goods to be delivered except on payment. In addition to the ordinary postage, commission on the value of the articles transmitted at the rate of twopence on sums not exceeding ten shillings, and one penny for each additional five shillings or part thereof, must be prepaid by postage stamps affixed to the articles, distinct from the postage, and marked "commission." The registration fee (threepence) and the proper postage must also be prepaid. If the addressee refuse delivery, the parcel is returned to the sender free of charge. Any article that can be sent by parcel post may be transmitted as a value-payable parcel. Letters may also be sent as value-payable parcels, if prepaid at the letter rate of postage and handed to the parcels clerk, in the same manner as in the case of parcels. The subjoined statement gives particulars of the number and value of parcels sent through the Value Payable Post in each State during the years 1914 to 1919-20. From these figures it will be seen that the business in Queensland is in excess of the combined transactions of all the other States, chiefly owing to the fact that the system has been established in that State for some years, but was only extended to the whole Commonwealth with the advent of Federal control of the post office. The system has also found favour for a number of years in Western Australia and continues to make marked progress in New South Wales, but the amount of business transacted in Victoria, South Australia, and Tasmania remains negligible.

1919-20	5,435	331	13,076	106	4,000	15	22,963

In 1905, the first year for which complete figures for the Commonwealth are available, the number of value payable parcels posted was 24,920, of an aggregate value of £34,990. For 1919-20 the corresponding figures were 165,950 and £276,690, an increase in number of 141,030 and in value of £241,700. The average value collected on parcels in 1905 was £1 8s., and in 1919-20 £1 13s. 4d. The average value collected in each of the States for the six years 1914 to 1919-20 was New South Wales £1 16s. 5d., Victoria £1 16s. 4d., Queensland £1 7s. 7d., South Australia £2 15s. 4d., Western Australia £1 11s. 10d., Tasmania £1 17s. 11d., and for the Commonwealth £1 10s. 7d.

16. **Agricultural Produce Parcels Post.**—On the 1st July, 1914, the Postal Department, acting in conjunction with the Railway Department, inaugurated a system under which parcels of agricultural produce, fish, cut flowers, etc., might be transmitted at cheap rates from places in the country to persons living within six miles of the General Post Office, Melbourne. The service was introduced, by way of experiment, into the State of Victoria only, but as a loss of £3,000 per annum was incurred, the service has been discontinued.

17. **Transactions of the Dead Letter Office.**—Under sections 45 to 53 of the Post and Telegraph Act 1901, the Postmaster-General may cause to be opened all unclaimed and undelivered postal articles originally posted within the Commonwealth which have been returned from the places to which they were forwarded. Every unclaimed letter and postal article must be kept for the prescribed period at the office to which it has been transmitted for delivery, and must then be sent to the General Post Office. Letters and packets originally posted elsewhere than in the Commonwealth are returned to the proper authorities in the country in which they were so posted, or if originally posted in the Commonwealth are returned to the General Post Office in the State where posted; but unclaimed or undelivered newspapers may be forthwith sold, destroyed, or used for any public purpose. Opened postal articles not containing anything of value are returned to the writer or sender if his name and address can be ascertained, but may otherwise be destroyed forthwith. As regards an opened letter or packet containing valuable or saleable enclosures, a list and memorandum of the contents are kept, and a notice is sent to the person to whom the letter or packet is addressed if he be known, or otherwise to the writer or sender thereof if he be known. Upon

application within three months of the date of such notice the letter or packet may be claimed by the addressee, or, failing him, by the writer or sender. If unclaimed within three months, the letter and contents may be destroyed or sold, and the proceeds paid into the consolidated revenue fund. The following table shews the total number of letters, postcards and lettercards, and packets and circulars, including Inland, Inter-State, and International, dealt with by the Dead Letter Offices in the several States of the Commonwealth in 1919-20, and the methods adopted in their disposal.

(a) Numbers at 31st December, 1914.

19. Gross Revenue of Postal Department.—The following table shews the gross revenue of the Postal Department for the years ended 30th June, 1914 to 1920 inclusive, under three heads, viz., the Postal, the Telegraph, and the Telephone branches. In the Postal branch is included the revenue derived from money-order commissions, poundage on postal notes, private boxes and bags, and miscellaneous sources. The following figures and also those for expenditure are supplied by the Treasury and represent the actual collections and payments for the periods mentioned :—

GROSS REVENUE OF POSTAL DEPARTMENT, 1913-14 TO 1919-20.

Year ended 30th June—			Postal Branch.	Telegraph Branch.	Telephone Branch.	Total.
			£	£	£	£
1914	2,680,944	834,316	996,047	4,511,307
1915	2,616,887	878,238	1,099,417	4,594,542
1916	2,938,837	893,904	1,220,855	5,053,596

20. **Expenditure in respect of the Postal Department.**—The subjoined table represents the actual payments made as shewn by records kept for Treasury purposes in respect of the Postal Department in the Commonwealth for each of the years ended 30th June, 1915 to 1920 inclusive. The figures given include certain items of expenditure, such as rent, repairs and maintenance of buildings, fittings and furniture, sanitation, water supply, new buildings and additions and interest on transferred properties.

**TOTAL EXPENDITURE IN RESPECT OF POSTAL DEPARTMENT,
1914-15 TO 1919-20.**

Year	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

(a) Particulars of apportionment to each State not available.

21. **Balance Sheet of the Postmaster-General's Department.**—The first complete balance sheet and profit and loss account of the Postmaster-General's Department was presented in November, 1913, for the year ending 30th June, 1913. As will be seen from the figures of the General Profit and Loss Account hereunder, the year 1919-20, after providing for depreciation, pension and retiring allowances, closed with a surplus of £1,098,344. From this amount £610,390, interest on capital, was deducted, leaving a profit of £487,954, or £36,691 less than that of 1918-19.

Tables showing the results of the working of the Department for the years 1915-16 to 1919-20 are appended :—

**GENERAL PROFIT AND LOSS ACCOUNT, POSTMASTER-GENERAL'S DEPARTMENT,
1915-16 TO 1919-20.**

Items.	1915-16.(a)	1916-17.(a)	1917-18.(a)	1918-19.(a)	1919-20.(a)
	£	£	£	£	£

Surplus	207,902	381,236	964,383	1,114,680	1,098,344
Interest on capital	523,892	558,382	577,001	590,035	610,390
Total surplus (+) or deficit (-)	(-)315,990	(-)177,146	(+)387,382	(+)524,645	(+)487,954

(a) Excluding Wireless Telegraphy Branch, which was transferred to the Department of the Navy as from 1st July, 1915.

The deficit for the year 1915-16 shews a reduction of £313,732 as compared with the deficit of the previous year. A still more satisfactory result was obtained in 1916-17 when the year's operations closed with a loss of only £177,146. All past achievements were eclipsed in 1917-18, when for the first time in the history of the Department a profit amounting to £387,382 resulted. In 1918-19 the profit was £524,645, and last year (1919-20) £487,954, a slight reduction on the previous twelve months. The reasons furnished by the Department for the excess of expenditure over revenue in the years 1913-14 to 1916-17 were increases in wages and salaries, higher rates for the conveyance of inland mails, and increased prices for stores, etc., while in 1914-15 the prevailing drought and the effect of the war upon earnings were also contributing factors.

The following tables shew the yearly results of the working of the various branches, and the Department as a whole, and in each State from 1913-14 to 1919-20 :—

**PROFIT OR LOSS OF THE VARIOUS BRANCHES OF THE POSTAL DEPARTMENT,
1913-14 TO 1919-20.**

Year ended 30th June—	Postal.		Telegraph.		Telephone.		All Branches.	
	Loss.	Profit.	Loss.	Profit.	Loss.	Profit.	Loss.	Profit.

22. Royal Commission on Postal Services.—In 1908 a Royal Commission was appointed to report on the Postal, Telegraphic, and Telephonic services of the Commonwealth. An account of the work done by the Commission will be found in earlier issues of the Year Book. (See Year Book No. 6, p. 766.)

§ 2. Telegraphs.

1. First Lines Constructed.—The electric telegraph was first introduced into Australia for use by the public in the year 1854, when a line from Melbourne to Williamstown was opened. The first line in South Australia, from Adelaide to Port Adelaide, was opened in 1856, while the first line in New South Wales was brought into operation in 1858, when the line from Sydney to Liverpool, 22 miles in length, was opened. In Tasmania the first telegraph line was completed in 1857, while in the following year communication was established between Sydney, Melbourne, and Adelaide. The first lines to be constructed in Queensland were those between Brisbane and Warwick, and Brisbane and Lytton, distances of 169 and 12 miles respectively. These lines were working in 1861. In Western Australia the first telegraph constructed was from Perth to Fremantle, a distance of 12 miles, which was brought into use in 1869, and in the same year the cable joining Tasmania with the continent of Australia was completed.

2. Development of Services.—During the period from 1871 to 1881 great progress was made throughout Australia in the way of telegraphic construction, over 14,000 miles of line, exclusive of railway telegraph lines, being opened for use, making the total length of the line open at the end of the year 1881, 25,470 miles. At the present time the systems of telegraph lines throughout Australia are well developed. The longest line extends from Thursday Island, in Torres Strait, by submarine cable to Paterson, on the mainland of Cape York Peninsula; from Paterson the line runs in a southerly direction as far as Brisbane, where it joins the main interstate line to Sydney, Melbourne, and Adelaide; from Adelaide it runs to Port Augusta, then on to Port Lincoln, on Eyre's Peninsula, and thence to Eucla, on the Western Australia boundary; from Eucla the line extends along the coast of the Great Australian Bight to Albany, and thence it runs adjacent to the west coast of Western Australia as far as Onslow, via Perth, Geraldton, and Carnarvon. From Onslow connexion extends to Broome, in Roebuck Bay. From Roebuck Bay the line crosses the Kimberley district in an easterly direction, and then runs north as far as the terminus at Wyndham. In Queensland a line runs to Burketown, near the coast of the Gulf of Carpentaria, via Normanton; another line extends to Cloncurry and Urandangi, in the extreme west of the State. Branch lines extend to all important coastal and inland towns, while considerable networks of lines converge from the country districts towards the centres of population. From Adelaide the transcontinental line runs in a northerly direction to Darwin, from which place communication is provided with Europe by submarine cable by way of Batavia, Singapore, and Madras. In Western Australia a line runs from Eucla to the Coolgardie goldfields via Balladonia and Dundas, and from Coolgardie communication is provided with Perth, and with Mount Sir Samuel in the East Murchison district.

3. Number of Telegraph Offices and Length of Lines and Wire Open.—The following table shows the number of telegraph offices and the length of telegraph lines and of telegraph wire available for use in the Commonwealth from 1916 to 1920 inclusive. It will be noticed that 143,388 miles of wire are available for telegraph purposes, of which 79,930 miles are also used for telephone purposes.

NUMBER OF TELEGRAPH OFFICES AND LENGTH OF LINE AVAILABLE

4. Revenue and Expenditure.—Particulars as to the revenue from the telegraph systems for the years 1914 to 1920 are given on page 650.

5. Number of Telegrams Despatched.—The following table shows the total number of telegrams despatched to destinations within the Commonwealth in each of the years 1914 to 1919-20 inclusive :—

NUMBER OF TELEGRAMS DESPATCHED, 1914 TO 1920.

Year ..	1914.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Number (a)	13,918,135	13,939,424	14,088,606	14,633,859	15,461,034	17,934,998

(a) Including interstate cablegrams.

The following table shews the number of telegrams despatched in each State in 1919-20 for delivery in that State, and the number despatched in each State for delivery in other States, and also the total number of telegrams—exclusive of cablegrams for places outside the Commonwealth—despatched in each State:—

NUMBER OF TELEGRAMS DESPATCHED IN EACH STATE, 1919-20.

State, etc.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
Inland ..	4,779,884	2,977,725	2,338,604	1,108,122	1,514,501	402,578	13,121,414
Interstate (a) ..	1,460,245	1,359,122	716,938	567,655	452,114	257,510	4,813,584
Total ..	6,240,129	4,336,847	3,055,542	1,675,777	1,966,615	660,088	17,934,998

(a) Including interstate cablegrams.

6. Rates for Transmission of Telegrams.—The original rates for the transmission of telegrams within the Commonwealth were fixed by section 7 of the Post and Telegraph Rates Act 1902, and came into force on the 1st November, 1902. Under this Act charges are made for telegrams according to whether they are “ordinary” or “press” telegrams. “Press” telegrams are defined to mean those the text of which consists of political, commercial, etc., information, and of news intended for publication in a newspaper. The telegram must be sent by an authorised correspondent, and must be addressed to a registered newspaper or recognised news agency. The subjoined tables shew the scales of charges imposed by an amending Act which came into operation on 1st October, 1920:—

SCALE OF CHARGES FOR ORDINARY TELEGRAMS.

Particulars.	Town and Suburban, within Prescribed Limits, or within 15 miles from the Sending Station.	Other Places within the State, except Town and Suburban.	Interstate.
	s. d.	s. d.	s. d.
Including address and signature—			
Not exceeding 16 words	0 9	1 0	1 4
Each additional word	0 1	0 1	0 1

Double the foregoing rates are imposed for the transmission of telegrams on Sunday, Christmas Day, and Good Friday, and between the hours of 8 p.m. and 9 a.m., and for telegrams lodged for “urgent” transmission.

SCALE OF CHARGES FOR PRESS TELEGRAMS.

Particulars.	Within any State.	Interstate.	Relating to Parlia- mentary, Executive, Departmental, and other Common- wealth Proceedings as may be prescribed.(a)
	s. d.	s. d.	s. d.
Not exceeding 25 words	0 8	1 4	1 4
From 26 to 50 words	0 11	1 10	1 8
From 51 to 100 words	1 9	3 6	2 0
Every additional 50 words	0 8	1 4	0 8

(a) Within the Commonwealth.

7. Letter-telegrams.—Commencing in February, 1914, the Postal Department instituted a system of letter-telegrams between all telegraph offices which are open between 7 p.m. and midnight. The letter-telegrams are forwarded during the night by telegraph to the office of destination and are delivered as ordinary letters by the first letter delivery, or are despatched by mail to the address in the ordinary way. The object of the Department in introducing the system was to utilize profitably the unoccupied time of the staff, but it was found that ordinary business and revenue suffered through the extensive use of the system by the business community, consequently the concession has been limited to messages of a social, domestic or private nature. Letter-telegrams may be exchanged between any of the following offices; (a) offices which are open for the receipt of ordinary business between 7 p.m. and midnight, (b) offices which are open for ordinary or press business after 7 p.m. The rates charged throughout the Commonwealth are one shilling and threepence for the first 30 words, and one halfpenny for each additional word, double these rates being charged on Sundays. At the end of 1920 the service applied to 103 offices throughout the Commonwealth.

8. Wireless Telegraphy.—Prior to September, 1915, the Postmaster-General was, under the Wireless Telegraphy Act 1905, given the exclusive privilege of establishing and using stations and appliances for receiving and transmitting messages by wireless telegraphy within Australia, and an amendment of the Act in 1919 extended the Commonwealth's control to wireless telephony also. Licences for experimental work are granted by the Postmaster-General under the authority of the Act. Licences are now issued (a) in respect of wireless telegraphy installations on ships registered in Australia; (b) in respect of experimental work carried out by amateur investigators into radio-phenomena generally.

The administration of the Radio Service was under the control of the Navy Department from September, 1915, to 1st July, 1920, when it reverted to the Postal Department, although the actual transfer was not effected until 28th October, 1920. Upon the resumption of control by the Postal Department immediate action was taken to extend the uses of wireless both for inland and trans-ocean public requirements. The regulations were amended to permit of any person obtaining a licence to erect and operate his own station in remote localities not served by land lines. Where such stations are erected to the Department's satisfaction the Department undertakes to provide communication with the landline system. In furtherance of this policy collecting stations are about to be erected at Powell's Creek, N.T., and Camooweal, Q., to work in conjunction with private stations. In connexion with trans-ocean communication the recommendation of the Imperial Wireless Committee providing for the erection of a high-powered station in Australia as a terminal of the Imperial wireless chain and other schemes are under consideration. The capabilities of wireless telephony as a means of communication with isolated localities are also engaging attention.

In preparing the initial scheme for the construction of wireless stations in the Commonwealth, it was evident, viewing the insular position of Australia, that, for an effective system of radio-telegraphic communication to be given, not only must the service offered be continuous, but the distances separating the stations must to a great extent be governed by the normal working range of the vessels with which communication would have to be established. With this object in view the Commonwealth Government has constructed and erected stations at or near the following localities:—Port Moresby, Thursday Island, Cooktown, Townsville, Rockhampton, Brisbane, Sydney, Flinders Island, Melbourne, Hobart, King Island, Adelaide, Esperance, Perth, Geraldton, Broome, Wyndham, Darwin, Samarai and Misima (Lousiade Archipelago). In the Pacific the Commonwealth controls stations at Rabaul, Madang, Nauru, Kieta, Bita Paka, Morobe, Eitape, Manus, and Kawieng; all these being on former German territory now administered by Australia. The stations at Sydney, Perth, and Townsville are of a medium-power type. All the other stations are of low power, and constitute the internal scheme of inter and ship-to-shore communication. The ordinary ship-to-shore communication rates are, for vessels registered by the Commonwealth or New Zealand, 5d. per word, allocated as follows: 3d. for land station and 2d. for ship station charge. For vessels registered by other administrations 10d. per word, allocated as follows: 6d. for land station and 4d. for the ship station charge. Where the message has to be transmitted over land-lines, the charge is 1d. per word additional with a land station

charge of 2d. per word. Between the Commonwealth and Port Moresby the rate is 2d. per word, and between the mainland and Flinders Island or King Island 1d. per word, plus ordinary land-line charges.

Radio-telegraphic stations have been erected at Suva, Ocean Island, Tulagi, and Vila under the control of the High Commissioner of the Pacific, while the New Zealand Government has erected high-power stations at Awanui (Auckland), Awarua (Bluff), and Apia (Samoa), and low-power stations at Auckland, Chatham Islands, Raratonga (Cook Islands), and Wellington.

§ 3. Submarine Cables.

1. **First Cable Communication with the Old World.**—In earlier issues of the Year Book will be found a detailed account of the connection of Australia with the old world by means of submarine cables. (See No. 6, p. 770.)

2. **The Tasmania-Victoria Cables.**—A submarine cable joining Tasmania to the continent of Australia was opened for use in 1869, the total length being 170 miles. The line was owned by the Eastern Extension Telegraph Company, and was subsidised by the Tasmanian Government until the year 1909. On the 28th February, 1908, the Postmaster-General entered into an agreement with Messrs. Siemens Brothers and Company Ltd., of London, for the manufacture and laying of two submarine cables between Tasmania and Victoria. The new cables were taken over on the 24th March, 1909, and opened to the public on the 1st May, 1909, the day following the expiration of the agreement with the Eastern Extension Company. Their aggregate length is approximately 350 nautical miles of main cable, and 20 nautical miles each of intermediate and shore-end cable, making a total of 390 nautical miles. The contract price was £52,447.

3. **The Eastern Extension Company's Cables.**—In addition to the first Victoria-Tasmania cable and the original cable from Darwin (see Year Book No. 6, p. 770), the Eastern Extension Company has constructed several other cables connecting with various places in the Commonwealth. (a) In 1879 the original cable via Banjoewangie was duplicated, the States of New South Wales, Victoria, South Australia, Western Australia, and Tasmania having agreed to pay the above company a subsidy of £32,400 per annum for a period of twenty years, the amount to be divided between the States on a population basis. (b) In 1881 a cable was constructed connecting Broome, in Roebuck Bay, W.A., with Banjoewangie, and remained in operation until 1914, in which year it was taken up. (c) In July, 1899, the company offered to lay a cable direct to Great Britain via the Cape of Good Hope, and also offered reductions in the rates charged, if the States would agree to certain conditions giving the company the right of direct dealing with the public. The States of South Australia, Western Australia, and Tasmania accepted the terms offered, and New South Wales entered into the agreement in January, 1901. The cable was opened via Fremantle and Durban in October, 1901. (d) Another submarine cable from Fremantle to Adelaide forms an alternative line of communication between the eastern States and Western Australia. (e) There is an alternative route, partly belonging to the Eastern Extension Company and connecting the Port Darwin-Singapore cable with London, via Hong Kong, Shanghai, Possiet Bay (Pacific Russia), Libau (Russian Baltic), and Newbiggin (England). (f) In 1909 a cable was laid from Java to Cocos Island, thus affording another route from Australia to South Africa, whilst in April, 1911, a radio-telegraphic station was opened at Cocos Island, thus strengthening the line of communication between Australia and the East.

4. **The Pacific Cable.**—In July, 1898, a conference of representatives of Great Britain, Canada, New South Wales, Victoria, Queensland, South Australia, and New Zealand was held for the purpose of considering a project for a cable to be laid across the Pacific Ocean, touching only British territory on its way from Australia to Canada, thus providing an "All Red" route, as it is termed, for a cable system between England and Australia. In the following year it was agreed at a meeting held by representatives

of the countries interested that the cable should be laid and that Great Britain and Canada should each pay five-eighteenths of the cost, and the States of New South Wales, Victoria, Queensland, and the Dominion of New Zealand should each pay one-ninth. The construction and management of the cable were placed under the control of a Board composed of seven members—two each from Great Britain, Canada, and Australia, and one from New Zealand—called the Pacific Cable Board. The Australian shore-end of the cable was landed at Southport, Queensland, in March, 1902, and the cable was completed on the 31st October, 1902, and opened for traffic on the 7th December of the same year. There are cable stations at Norfolk Island, Fiji, and Fanning Island, and a branch cable runs from Norfolk Island to New Zealand. In 1910 the Board leased a wire from Bamfield, British Columbia, to Montreal, thus extending the Pacific cable system from Queensland to Montreal. The traffic is then carried across the Atlantic to the United Kingdom by the cables of the Anglo-American and Commercial Companies, or if desired the Marconi wireless system between Canada and the United Kingdom may be availed of for either homeward or outward messages at a reduction of 2d. on the through cable rate of 8s. per word. The operations of the Pacific cable for the year ended 31st March, 1920, resulted in a profit of £27,979, after providing working expenses, interest on loan and renewal fund contributions. In addition to the usual annual contribution of £30,000, a sum of £323,000 was transferred to the renewal fund to replace any loss by depreciation of securities in which the fund is invested and to strengthen the position of such fund for future contingencies. After deducting the annual sinking fund instalment of £17,545 from the profit of £27,979, there remained a surplus of £10,434, whereof the Commonwealth's share was £3,478. In accordance with the Pacific Cable Act 1901 the surplus was applied in the reduction of the balance of the original loan of £2,000,000. The following table shews particulars of the revenue, expenditure, total profit or loss, and the proportion of the loss payable by the Commonwealth for the financial years 1911–15, and the proportion of profit credited to the Commonwealth for the years 1916–20.

REVENUE, EXPENDITURE, AND PROFIT OR LOSS ON WORKING OF PACIFIC CABLE, 1911 TO 1920.

Year ended the 31st March—	Revenue.	Expenditure (including Annuities and Renewal Fund).	Profit or Loss.	Commonwealth Proportion of Loss or Profit.
	£	£	£	£
1911 ..	138,678	186,888	Loss 48,210	Loss 16,071
1912 ..	159,150	199,649	„ 40,499	„ 13,500
1913 ..	167,901	200,171	„ 32,270	„ 10,757
1914 ..	197,848	217,798	„ 19,950	„ 6,650
1915 ..	225,045	232,961	„ 7,916	„ 2,638
1916 ..	310,516	292,592	Profit 17,924	Profit 5,975

1919 ..	564,097	554,516	„ 9,581	„ 3,193
1920 ..	664,986	654,552	„ 10,434	„ 3,478

5. **New Zealand Cables.**—A submarine cable joining New Zealand to the Australian Continent was laid in 1876. The line is 1,191 miles in length. The Australian shore-end of the cable is at Botany Bay, while the New Zealand terminus is at Wakapuaka, near Nelson, in the Middle Island, from which place another cable, 109 miles in length, is laid to Wanganui, in the North Island. For a period of ten years after its opening the cable was subsidised by the New South Wales and New Zealand Governments, the total contributions amounting to £10,000 a year. The branch from Norfolk Island to New Zealand of the Pacific cable was opened on the 23rd April, 1902. The length of this cable is 597 miles, the New Zealand terminus being at Doubtless Bay in the north of the North Island. During 1911 a scheme to lay a second cable between New Zealand and Australia (Auckland to Sydney) was adopted by the various Governments concerned, and the laying of the new cable was completed on the 24th December, 1912, the cable being opened for traffic on the 31st December, 1912.

6. **The New Caledonia Cable.**—In April, 1892, a French company, known as the Compagnie Française des Câbles Télégraphiques, entered into an agreement with the French, the New South Wales, and the Queensland Governments to lay down a submarine cable between New Caledonia and Queensland in return for guarantees by the French Government to the extent of £8,000, and by the Governments of New South Wales and Queensland to the amount of £2,000 each annually for a period of 30 years. The cable was opened for use in October, 1893, the Australian shore-end being at Burnett Heads, near Bundaberg. The guarantees of the Governments of New South Wales and Queensland have now been transferred to the Commonwealth Government.

7. **Number of Cablegrams Received and Despatched.**—The subjoined table shows the number of cablegrams received and despatched in the Commonwealth from 1917–18 to 1919–20 :—

**CABLEGRAMS RECEIVED AND DESPATCHED, COMMONWEALTH,
1917–18 TO 1919–20.**

Particulars	Cablegrams Received.			Cablegrams Despatched.			Total Cablegrams Received and Despatched.		
	1917–18.	1918–19.	1919–20.	1917–18.	1918–19.	1919–20.	1917–18.	1918–19.	1919–20.
Number	522,746	516,942	502,671	407,293	394,285	478,263	930,039	911,227	980,934

The following table shows the total number of cablegrams received and despatched in each State during the year 1919–20 :—

**NUMBER OF CABLEGRAMS RECEIVED AND DESPATCHED IN EACH STATE,
1919–20.**

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.(a)	C'wealth.
Number received ..	277,879	154,858	20,637	20,858	21,667	6,772	502,671
Number despatched	250,260	153,809	20,652	22,188	23,964	7,390	478,263

(a) Exclusive of interstate cablegrams, which are included with interstate telegrams (see § 2 ante).

8. **Lengths of Cable Routes.**—The following table gives the lengths of various cable routes :—

LENGTHS OF CABLE ROUTES.

Via Darwin.				Via South Africa.			
			Miles.				Miles.
Adelaide to Darwin	2,134	Perth to Mauritius	4,417
Darwin to Banjoewangie	1,150	Mauritius to Durban	1,786
Banjoewangie to London	9,841	Durban to Cape Town	800
				Cape Town to Madeira	5,715
				Madeira to Penzance	1,341
				Penzance to London	260
Total	13,125	Total	14,319

Via Vancouver.				Via Russia.			
			Miles.				Miles.
Southport (Queensland) to Norfolk Island	963	Sydney to Darwin	2,992
Norfolk Island to Suva (Fiji)	1,129	Darwin to Hong Kong	4,237
Suva to Fanning Island	2,351	Hong Kong to Possiet Bay	2,647
Fanning Island to Bamfield (Canada)	3,980	Possiet Bay to Libau	6,399
Across Canada	3,450	Libau to Newbiggin (England)	1,657
Canada to Ireland	2,450				
Total	14,323	Total	17,932

9. **Cable Rates.**—In 1872 the cable rate to England was nine guineas for twenty words, but when word rates were brought into general use in 1875, the rate between Great Britain and Australia was fixed at ten shillings and sixpence, subsequently altered to ten shillings and eightpence. In 1886 the Eastern Extension Telegraph Company reduced the rate to nine shillings and fourpence a word for ordinary messages, to seven shillings and a penny for Government messages, and to two shillings and eightpence a word for press messages. At a conference of the postal and telegraphic authorities held in March, 1891, the proposal to reduce the rates to four shillings a word for ordinary messages, three shillings and eightpence for Government, and one shilling and tenpence for press messages was agreed to, the States of New South Wales, Victoria, South Australia, Western Australia, and Tasmania undertaking to make good half the loss which the Eastern Company might suffer through such reductions. The States guaranteed to the company one-half of the amount of receipts short of the sum of £237,736—the amount received by the company in 1889 in respect of cable charges—the other half to be borne by the company. The Government of South Australia was also guaranteed by the other contracting States against any loss to the revenue which the lower cable rates might cause in the working of the overland lines. Queensland subsequently joined the other States in these guarantees. In 1893, however, owing to the heavy losses incurred, the rate for ordinary messages was increased to four shillings and ninepence per word, and at the same time New Zealand joined in the guarantees to the company and to South Australia.

(i) *Present Rates to United Kingdom.* On the acceptance by three of the States of the terms offered by the Eastern Extension Telegraph Company for the construction of a cable via South Africa, the rate for ordinary messages was reduced in May, 1900, to four shillings a word. It was further reduced to three shillings and sixpence in January, 1901, and to three shillings in January, 1902, and this rate has since applied to all cable systems connected with Great Britain with the exception of a partly wireless service which has been introduced by the Pacific Cable Board, and for which the “through” rate has been fixed at two shillings and tenpence per word. Under this arrangement cablegrams passing between Australia and the United Kingdom are transmitted by the Pacific cable between Australia and Canada and by the Marconi wireless system across the Atlantic. The scale for future reductions was to be based on a revenue standard and provided that the rate should be reduced to two shillings and sixpence per word, when the revenue averaged £330,000 per annum. In consequence of the abnormal

conditions created by the war, which involved a large increase in expenditure, this provision has been abrogated, but its restoration is anticipated with a return to normal conditions. In September, 1912, the "through" charge for press cables was reduced from ninepence to sevenpence-halfpenny per word.

(ii) *Deferred Cablegrams.* With a view to affording additional cable facilities and to keeping the Pacific cable fully occupied during the whole 24 hours, proposals were made by the Postmaster-General's Department for the adoption of a system of deferred cablegrams. A meeting of representatives of the administrations and companies concerned was held in London in November, 1910, and the new rates came into force on the 1st January, 1912. Under this system a reduction of 50 per cent. in the charges is made, providing the message is written in plain language, and conveys no other meaning than that which appears on the face of it. Messages can only be transmitted after non-urgent private cablegrams and press cablegrams. Those which have not reached their destination within a period of 24 hours from the time of handing in are transmitted in turn with cablegrams charged full rate. They may be sent via the Pacific or Eastern routes to nearly all countries to which the ordinary rate exceeds tenpence per word. The arrangement, previous to the war, extended to some 60 countries, and became very popular. This service, together with that of the week-end cable letters, has affected the ordinary cable business to a large extent. Deferred press cablegrams, subject to a delay of eighteen hours, may be exchanged between the Commonwealth and the United Kingdom at the rate of fourpence halfpenny per word, and between the Commonwealth and Vancouver at the rate of one penny three farthings per word. The deferred cable service was suspended frequently during the war owing to the pressure of other cable business, and the service has not yet returned to normal conditions.

(iii) *Week-end Cable Letters.* The service of the week-end cable letters between the Commonwealth and the United Kingdom was introduced on the 4th January, 1913. Under this arrangement, messages written in plain language might be lodged at any post office in the Commonwealth or the United Kingdom in time to reach the forwarding cable office by post or telegraph by midnight on Saturday. The messages, which were deliverable by post on Tuesday morning, were charged at the rate of ninepence per word, plus ordinary telegraph rates if required to be forwarded by land telegraph in either the country of despatch or destination.

The system was extended subsequently to messages between the Commonwealth and the Union of South Africa, India, Ceylon, Burma, Canada, Portugal, and Newfoundland. A further benefit was conferred on users, as week-end cables to the countries enumerated were transmitted by telegraph throughout without extra charge. The pressure on the cables during the war rendered the suspension of the week-end service necessary on numerous occasions, and although the service has now been resumed, practically no business was transacted in 1919-20 owing to the suspension of the service for extended periods.

The rates to the countries named, including the United Kingdom, are given hereunder:—

RATES FOR WEEK-END CABLE LETTERS.

Country.	Rate per Word.	Minimum Charge per Telegram.
United Kingdom ..	9d.	15/-
Union of South Africa ..	7d. (plus $\frac{3}{4}$ d. for those lodged in Tasmania)	11/8
India, Ceylon, and Burma ..	7 $\frac{1}{2}$ d.	12/6
Canada (ordinary rate 2s. 4d.) ..	7d.	11/8
Other parts of Canada ..	8d. to 10d.	12/11 to 16/8
Newfoundland ..	8 $\frac{1}{2}$ d.	13/9
Portugal ..	9d.	15/-

Week-end cable letters may also be sent to the United Kingdom or Canada for transmission by registered post to other countries at an extra charge of 5d. per message.

(iv) *Rates to New Zealand.* As a result of the completion of the New Zealand branch of the Pacific cable in 1902, the rates charged for cablegrams between Australia and New Zealand, except to and from Tasmania, were uniformly reduced to fourpence-halfpenny per word. Between New Zealand and Tasmania the charge was fixed at fivepence-halfpenny a word, but it has since been reduced to fourpence-halfpenny. The charge for ordinary cablegrams from New Zealand to Great Britain was reduced from the 1st June, 1902, from five shillings and twopence to three shillings and fourpence a word, and has since been further reduced to three shillings a word.

10. Subsidised Press Cable Service.—In October, 1909, a Select Committee of the Commonwealth Senate was appointed to report upon the circumstances of the supply, conditions of sale, and distribution, which affect the Press Cable Service within and from outside the Commonwealth. A majority report of this Committee was issued in December, 1909, and recommended (a) the completion of an "All Red" cable route via Canada, (b) the conditional subsidization of a press cable association, (c) the utilisation of the High Commissioner's office for the dissemination in Australia of Empire news, and (d) the amendment of the Copyright Act in regard to cables.

In accordance with the recommendations of this Committee the Commonwealth granted a total subsidy of £6,000, extending over a period of three years, to the Independent Press Cable Service, on the conditions that at least 6,000 cable words were supplied each week, to be sent via Pacific, and that any newspaper proprietary in the Commonwealth was permitted to become a subscriber at rates approved by the Government. This terminated on the 1st July, 1912, and a new arrangement was entered into under which the Commonwealth agreed to grant a subsidy of £2,000 per annum, provided that not less than 26,000 words were sent each month. A later agreement was drawn up to extend for a period of three years from 1st October, 1916, with an annual grant of £1,500, but within a year the service lapsed, the last payment being made by the Government in August, 1917.

11. Cable Subsidies Paid.—The agreement between the State Governments and the Eastern Extension Telegraph Company expired on the 30th April, 1900. From the year 1895 onwards the amounts guaranteed—£237,736 to the company and £37,552 to South Australia—were met by the receipts.

The following table shews the total amounts paid by way of cable subsidies for the years 1914–15 to 1919–20:—

TOTAL AMOUNT OF CABLE SUBSIDIES PAID, 1914–15 TO 1919–20.

Year	1914–15.	1915–16.	1916–17.	1917–18.	1918–19.	1919–20.
Amount	£	6,638	4,860	3,929	3,851	3,756	3,797

As the agreement in connexion with the Tasmanian cable expired in 1909, and as new cables were laid by the Commonwealth Government, the guarantees were, in the course of the year 1910, reduced to those in connexion with the New Caledonia and Pacific cables. From 1915–16 the only cable subsidy paid by the Commonwealth was in respect of the New Caledonian cable guarantee.

§ 4. Telephones.

1. Development of Telephone Services.—The Postal Department has established telephone services in all the capital towns and in many of the important centres of population throughout the Commonwealth. Particulars as to the revenue from telephone services for the years 1914–20 are given on page 650 ante.

2. **Telephone Rates.**—On the 10th December, 1915, revised charges for telephone services came into operation. Under the new scale, ground-rent for telephones is calculated on the number of subscribers connected with the exchange or network, instead of being based on the total population residing within the telephone network, as formerly. The smallest and greatest rental charges remain the same as under the old system, but between these a more gradual scale was introduced. Previously the charge for calls made by a subscriber was at the rate of two calls for one penny up to 2,000 calls per half-year; above that number, three calls for one penny. This charge was increased to one penny per call, without any progressive reduction. At the same time, the public telephone charge per call was increased from one penny to twopence. On 1st October, 1920, telephone charges were again increased, and the rates given in the following table are now in force:—

TELEPHONES.—RENTAL CHARGES, 30th JUNE, 1921.

Exchanges or Networks with Subscribers' Lines Connected, as shewn hereunder.	Radius of Network with Main Exchange as Centre.	Annual Ground Rent, within Two-mile Radius.		
		For an Exclusive Service.	For each Subscriber or Instrument on a Two-party Service.	For each Subscriber or Instrument on a Three or more party Service.
	Miles.	£ s. d.	£ s. d.	£ s. d.
From 1 to 300	5	3 0 0	2 10 0	2 0 0
„ 301 to 600	5	3 5 0	2 10 0	2 0 0
„ 601 to 1,500	5	4 7 6	3 7 6	2 15 0
„ 1,501 to 4,000	10	4 12 6	3 15 0	3 2 6
4,001 and upwards ..	10	5 0 0	3 15 0	3 2 6

It is provided that for each effective call originating from a subscriber's instrument the charge shall be one penny in respect of exchanges or networks with 600 subscribers or less, and one penny farthing in respect of exchanges or networks with more than 600 subscribers.

3. **Particulars of Telephone Services.**—On 30th June, 1920, there were in the Commonwealth 172,106 telephone lines connected to 2,323 exchanges, as compared with 157,314 lines connected to 2,256 exchanges a year previously. The following tables shew the mileage of lines, etc., for telephone purposes, shewing trunk lines separately, on 30th June, 1919 and 1920:—

MILEAGE OF LINES, ETC., FOR TELEPHONE PURPOSES (EXCLUSIVE OF TRUNK LINES), 30th JUNE, 1919 AND 1920.

Particulars.	1919.	1920.
Conduits duct miles	2,456	2,489
Conductors in aerial cables loop mileage	38,543	38,421
Conductors in underground cables	204,885	211,513
Conductors in cables for junction circuits	24,835	32,864

The subjoined table gives the number of subscribers' lines and the daily calling rate at Central, Suburban, and Country telephone exchanges in the several States for the year 1919-20. A comparison of the daily calling rates for each class of exchange shews New South Wales to have registered the greatest number per line at central exchanges, Western Australia at suburban exchanges, and Queensland at country exchanges. Taking the figures for the Commonwealth, it will be observed that the average number of calls per line at central exchanges was slightly more than double the number registered at suburban exchanges, while the average for suburban exchanges was slightly less than double the number shewn for country exchanges.

NUMBER OF SUBSCRIBERS' LINES AND DAILY CALLING RATE AT TELEPHONE EXCHANGES, 1919-1920.

State.	Central Exchanges.		Suburban Exchanges.		Country Exchanges.		Total.	
	Subscribers' Lines.	Average Outward Calls Daily per line.	Subscribers' Lines.	Average Outward Calls Daily per line.	Subscribers' Lines.	Average Outward Calls Daily per line.	Subscribers' Lines.	Average Outward Calls Daily per line.

SECTION XIX.

COMMONWEALTH FINANCE.

§ 1. General.

1. **Financial Provisions of the Constitution.**—The main provisions of the Constitution relating to the initiation and development of the financial system of the Commonwealth are those contained in Chapter IV., "Finance and Trade," being sections 81 to 105 of the Constitution Act. Two other sections which have a most important bearing on questions of Commonwealth finance are sections 69 and 51.

Section 69 provided for certain departments which were transferable under the Constitution. Section 51 referred to other departments which it would be necessary to create under the Constitution. Section 87 dealt with the financial relations between the Commonwealth and the States. All of these matters have been treated in detail in previous issues of the Official Year Book up to and including No. 12, and no further reference to them will be made here.

2. **Accounts of Commonwealth Government.**—The Commonwealth Government, like the States Governments, operates nearly all its accounts by means of three funds: the Consolidated Revenue Fund, the Trust Fund, and the Loan Fund. The latter only came into existence in the financial year 1911-12, but on the outbreak of war became so important that it is now treated in two parts: a General Loan Fund mainly for purposes of Public Works, and a War Loan Fund for purely military purposes. The accounts of these funds are now so interwoven that a proper conspectus of the Commonwealth Accounts can hardly be obtained by an analysis of each of them singly. Two tables are therefore appended, shewing receipts and disbursements from all sources for the last five years. The different funds will then be treated in detail in the subsequent sections.

COMMONWEALTH RECEIPTS, 1915-16 TO 1919-20.

Heading.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

(a) Includes £371,118 repayment of advance from Notes Fund in 1914-15.

§ 2. Consolidated Revenue Fund.

(A) Nature of Fund.

The provisions made for the formation of a Commonwealth Consolidated Revenue Fund, and the means to be adopted for operating on that fund, are contained in sections 81, 82, and 83 of the Constitution. In section 81 it is provided that "All revenues or moneys raised or received by the Executive Government of the Commonwealth shall form one Consolidated Revenue Fund, to be appropriated for the purposes of the Commonwealth in the manner and subject to the charges and liabilities imposed by this Constitution." A strictly literal interpretation of this section would appear to require all loan and trust moneys received by the Commonwealth Executive to be paid to Consolidated Revenue. It is, however, held by Quick and Garran, in their "Annotated Constitution," that the "generic word *moneys* must be controlled by the preceding specific word *revenues*, and limited to moneys in the nature of revenue." This is the view of the matter which has been adopted by the Commonwealth Treasury in the preparation of its accounts. At present certain moneys received by the Commonwealth, which are not of the nature of revenue, are paid to Trust Account, and other moneys are paid to Loan Account. As regards expenditure from the Consolidated Revenue Fund, section 82 provides that the costs, charges, and expenses incident to the collection, management, and receipt of the Consolidated Revenue Fund should form the first charge thereon, while section 83 stipulates that "no money shall be drawn from the Treasury of the Commonwealth except under appropriation made by law." Such appropriations are either special, and as such are provided for by means of a permanent Act, or annual, and provided for in an annual Appropriation Act.

(B) Revenue.

1. **Total Collections.**—The consolidated revenue of the Commonwealth, which in 1901-2, the first complete financial year under the new régime, amounted to £11,296,985, had, in 1919-20, reached a total of £52,783,102, an increase in the period of £41,486,117.

Particulars concerning the total amount of revenue collected by the Commonwealth Government from 1st July, 1915, to 30th June, 1920, are contained in the following table :—

CONSOLIDATED REVENUE OF THE COMMONWEALTH, 1915-16 TO 1919-20.

	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Commonwealth	30,762,216	34,067,434	36,839,868	44,716,918	52,783,102

The great increase in recent years is due to the large expansion in direct taxation, which will be dealt with in detail in a later subsection.

2. Collections per Head.—In the table given hereunder particulars are furnished of the amount of revenue per head of population collected in respect of the Commonwealth for the last six years :—

COMMONWEALTH REVENUE PER HEAD OF POPULATION, 1915-16 TO 1919-20.

(a) Exclusive of Railways, and other items which appear elsewhere under their appropriate headings.

In addition to the new direct taxation, there was for some time a fairly steady return from Customs and Excise. In the two years 1916-8, however, there was a striking fall in the Customs returns, due probably to the diminution of imports caused by a scarcity of tonnage. A marked improvement was manifested in 1919-20. The postal receipts have shewn a consistent upward tendency, and there has been also a large addition to the revenue in recent years by the operations of the Commonwealth steamers, detained enemy vessels, and other activities.

The principal items composing the revenue are discussed in greater detail hereunder.

4. Customs Revenue for Past Five Years.—Particulars for the Commonwealth as a whole, for the five years 1915-16 to 1919-20, are furnished in the following table :—

COMMONWEALTH CUSTOMS REVENUE, 1915-16 TO 1919-20.

Classes.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Stimulants	2,500,606	1,986,321	1,693,957	1,455,667	1,880,531
Narcotics	1,333,516	1,300,683	1,236,085	1,268,357	1,590,450
Sugar	587,028	453,380	51,119	107,965	a7,229
Agricultural products	1,310,437	862,227	603,605	515,236	726,360
Apparel and textiles	2,902,012	3,197,778	2,393,518	3,422,371	3,444,292
Metals and machinery	1,572,536	1,404,705	1,000,943	1,603,767	2,165,221
Oils, paints, etc.	386,994	338,202	267,129	319,043	311,022
Earthenware, etc.	368,300	249,525	176,244	248,664	280,064
Drugs and chemicals	160,997	163,027	163,623	219,532	289,437
Wood, wicker and cane	365,969	277,396	203,430	214,715	274,500
Jewellery, etc.	335,147	325,718	279,785	334,986	413,134
Leather, etc.	505,652	498,874	346,073	466,589	576,106
Paper and stationery	346,158	419,323	299,330	506,662	467,623
Vehicles	499,140	429,077	322,344	337,334	625,498
Musical instruments	100,562	107,915	110,413	110,850	142,082
Miscellaneous articles	295,895	320,334	298,661	425,349	477,612
Other receipts	39,735	39,179	40,296	48,323	48,517
Total Customs	13,610,684	12,373,664	9,486,555	11,605,410	13,705,220

(a) Debit.

It will be seen that during the period here dealt with, the Customs revenue from stimulants and narcotics has represented a proportion of the total varying approximately from one-fourth to one-third. The other principal articles from which Customs revenue was derived were "apparel and textiles," "metals and machinery," and "agricultural products." The smaller revenue from Customs duties in 1917-18 was due to the restriction of imports in consequence of the shortage of ships.

5. Excise Collections, 1915-16 to 1919-20.—Particulars concerning the amount of Excise collected under each head during each of the years ending 30th June, 1916 to 1920, are given hereunder :—

COMMONWEALTH EXCISE REVENUE, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Beer	1,485,543	1,387,115	1,703,888	2,862,760	3,702,442
Spirits	627,431	670,768	804,476	1,098,440	1,609,065
Sugar	(a)170
Tobacco	1,204,556	1,172,787	1,223,792	1,847,661	2,545,214
Licenses	6,059	5,953	5,601	12,699	4,681
Total Excise	3,323,419	3,236,623	3,737,757	5,821,560	7,869,339(b)

(a) Debit.

(b) Including £7,937 "Other."

Comparing the Excise collections for 1919-20 with those for 1915-16, it will be seen that the revenue from beer, spirits, and tobacco, the most important items, has much more than doubled in the period under review. The large increase in every item in the last two years is due to the operation of increased excise duties which came into force on 25th September, 1918.

6. Commonwealth Direct Taxation.—(a) *General.* Under section 51, sub-section (ii) of the Constitution, power is given to the Commonwealth Parliament to make laws with respect to taxation, but so as not to discriminate between States or parts of States. Section 90 of the Constitution makes the power of the Commonwealth Parliament to impose Customs and Excise duties an exclusive one, but it would appear that as regards all other forms of taxation the States and Commonwealth possess concurrent powers. The question of the imposition by the Commonwealth Parliament of direct taxes such as land and income taxes is one which has been the subject of considerable discussion, and the opinion has been expressed that the intention of the framers of the Constitution was that of restricting the powers of taxation of the Commonwealth to the imposition of Customs and Excise duties except in case of great national peril. Whatever the intention of the framers may have been in this matter, the Constitution itself expresses no such limitation, and consequently the Commonwealth Parliament is unfettered in the imposition of taxation. Up to the end of the financial year 1909–10 the only taxes so levied were those of Customs and Excise, treated in detail in the foregoing paragraphs. During the 1910 session of the Federal Parliament, however, an Act—assented to on 17th November, 1910—was passed, giving to the Commonwealth the power of levying a tax upon the unimproved value of all lands within the Commonwealth not specially exempted. Detailed reference to this Act will be found in Commonwealth Year Books Nos. 5 and 6. A conspectus relating to land taxation will be found at the end of Section XX.

(b) *Budget of 1914–15.* The fact stated in the previous paragraph, that there was nothing in the Constitution itself to restrain the Federal Government from entering the field of direct taxation, received further exemplification by the Budget of 1914–15. The outbreak of war then made it necessary for the Commonwealth Government to exercise full powers in the matter of direct taxation. In the first place the Land Tax was raised by altering the graduation so that the increase in rate over the whole taxable value of the estate, for each succeeding pound of taxable value between £5,000 and £75,000, was one eighteen-thousand seven-hundred and fiftieth of a penny, instead of one thirty-thousandth of a penny, as hitherto. The maximum rate for resident owners became 9d. in the £ on estates whose taxable value was more than £75,000. Corresponding increases in the rates payable by absentee owners were made, rising to a maximum of 10d. in the £ on estates whose taxable value is more than £80,000. The Act No. 30 of 1918 increased the existing rates of land tax by 20 per cent. In addition to this substantial increase in an already existing tax, the Federal Government, for the first time, introduced Succession Duties on estates of deceased persons, in addition to those already imposed by the State Governments. The Commonwealth scale of succession duty, exempting all estates of less than £1,000 net value, ranges from a minimum of 1 per cent. to a maximum of 15 per cent. on estates of a higher taxable value than £71,000, the rate of duty going up $\frac{1}{2}$ per cent. for every increase of £1,000 in the taxable estate. The respective collections in the several States are given in the accompanying table.

COMMONWEALTH PROBATE AND SUCCESSION DUTIES, COLLECTED IN EACH STATE, 1915–16 TO 1919–20.

Year.	N.S.W.	Vic. (c)	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
	£	£	£	£	£	£	£
1915–16 ..	261,477	276,923	23,928	32,790(a)	8,530	22,567	626,215
1916–17 ..	306,249	588,125	61,239	65,130	30,064	11,361	1,062,168
1917–18 ..	338,006	448,225	55,181	69,737	18,616	17,467	947,232
1918–19 ..	307,499	377,872	56,909	131,488(b)	28,638	21,502	923,908
1919–20 ..	399,896	700,629	60,670	144,077(d)	99,826	36,720	1,441,818

(a) Including Northern Territory, £164.

(c) Including Central Office.

(b) Including Northern Territory, £1,280.

(d) Including Northern Territory.

In this table and the corresponding ones dealing with Land Tax, Income Tax, and War Time Profits Tax, it must be noted that the amount received in Victoria includes that collected on behalf of the Central Office, which deals with taxpayers who own property in more than one State.

AUSTRALIAN PUBLIC DEBT—COMMONWEALTH AND STATES, 1900-1 TO 1919-20.

See pp. 697, 716.

EXPLANATION OF GRAPH.—The base of each small square represents an interval of one year, while the vertical height represents £10,000,000 in the case of the Commonwealth (Federal) and States Debts the scale for which is on the left hand side, and £20,000,000 for Commonwealth and States combined the scale for which is on the right hand. The Commonwealth (Federal) debt commenced in the year 1911.

AUSTRALIAN CONSOLIDATED REVENUE—COMMONWEALTH AND STATES, 1901-2 TO 1919-20.

See pp. 668, 702.

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year, while the vertical height represents £5,000,000. The zero lines in each case are marked thus "0."

TAXATION.—COMMONWEALTH AND STATES, 1901-2 TO 1919-20.

See pp. 668, 704.

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year. Of the two scales on the left hand the outer one is that for the Commonwealth and States combined, the vertical height of each square representing £2,000,000 and the inner one that for the Commonwealth (Federal), the vertical height representing £1,000,000. The scale on the right hand is that for the States and the vertical height of each small square represents £100,000.

INTEREST ON PUBLIC DEBT.—COMMONWEALTH AND STATES, 1900-1 TO 1919-20.

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year, while the vertical height represents £500,000 in the case of the Commonwealth (Federal) and States, the scale for which is on the left hand side and £1,000,000 in the case of the Commonwealth and States combined for which the scale is on the right hand side.

(c) *Commonwealth Income Tax.* The first Commonwealth Income Tax was levied during the financial year 1915-16. The legislation on the subject comprised the Income Tax Assessment Act No. 34 of 1915, as amended by the Income Tax Assessment Acts Nos. 47 of 1915, 37 of 1916, 39 of 1916 and 18 of 1918. Full details as to the original Acts are to be found in Commonwealth Official Year Book No. 9. The rates are fixed for one year only, and in each financial year an Income Tax Act fixing the rate for that year is passed. Various estimates as to the probable yield in the first year were made, varying from £3,000,000 to £4,000,000, and the confidence of those who quoted the higher amount was justified by the result. The increased amounts collected in subsequent years are due to increases in the rates. The result of the first five years' collections was as follows :—

COMMONWEALTH INCOME TAX COLLECTIONS IN EACH STATE, 1915-16 TO 1919-20.

States.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20
	£	£	£	£	£
New South Wales ..	1,462,418	1,670,829	2,543,427	3,674,633	4,291,947
Victoria (a) ..	1,476,690	2,547,222	2,847,448	3,966,829	5,325,003
Queensland ..	497,059	545,475	795,717	1,206,051	1,446,503
South Australia ..	245,063	433,446	612,225	803,950	906,837
Western Australia ..	185,003	314,374	433,703	487,842	558,026

Northern Territory	359	1,767	3,047	3,085	1,757
Total..	3,932,775	5,621,950	7,385,514	10,376,456	12,848,124

(a) Including Central Office.

(d) *Entertainments Tax.* The rate of Entertainments Tax, according to Amending Act No. 11 of 1919, is as follows :—For tickets of 6d. and less, $\frac{1}{2}$ d.; exceeding 6d. but not exceeding 1s., 1d.; exceeding 1s., 1d. for the first shilling, and $\frac{1}{2}$ d. for every subsequent sixpence or part of sixpence. The collections for the first four years are as follows :—

ENTERTAINMENTS TAX : COLLECTIONS IN EACH STATE, 1916-17 TO 1919-20.

State.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£
New South Wales	48,990	107,033	136,932	234,327
Victoria	32,947	72,209	110,815	176,411
Queensland	12,730	30,086	45,930	62,671
South Australia	8,016	18,430	27,534	38,990
Western Australia	4,954	11,879	27,934	34,210
Tasmania	2,992	5,988	8,680	10,993
Northern Territory	54	273	301	309
Total	110,683	245,898	358,126	557,911

(e) *War Time Profits Tax.* This tax came into force on 22nd September, 1917. It provides for a tax on the amount by which the profits made in the war-time financial year (1st July to 30th June following), exceeds the pre-war standard of profits, which may be either :—(a) the average profits of two of the three years before 4th August, 1917, or (b) 10 per cent. on the capital employed in a business. The tax in respect of profits derived in the financial year 1st July, 1915, to 30th June, 1916, was 50 per cent., and in all subsequent years 75 per cent. The collections for the first three years are given in the accompanying table. The original section 2 of the War Time Profits Tax Assessment Act stated that this Act would apply to the profits of any business arising up to 30th

June next after the Declaration of Peace in connexion with the late war. Subsequent to the signing of the armistice, on 11th November, 1918, the section was amended to accord with that intention, and thus fixed the final application of the Act to profits arising during the year ended 30th June, 1919.

WAR TIME PROFITS TAX : COLLECTIONS IN EACH STATE, 1917-20.

State.					1917-18.	1918-19.	1919-20.
					£	£	£
New South Wales	147,285	524,658	880,442
Victoria (a)	371,969	364,572	1,066,161
Queensland	33,526	125,329	230,283
South Australia	67,795	137,641	243,527
Western Australia	43,323	15,940	105,517
Tasmania	16,110	38,398	43,083
Total	680,008	1,206,538	2,569,013

(a) Including Central Office.

(f) *War Postage.* This was a new source of revenue derived from an additional halfpenny rate imposed on postages from the 28th October, 1918. The amount credited to "War Postage" is the excess over the normal increase of revenue from postage. The amount collected for the balance of the financial year 1918-19 was £463,317, and in 1919-20 it was £745,962. [For further reference see page 633.]

(g) *Commonwealth Land Tax.*—Particulars as to the Land Tax assessment for each State for the year ending 30th June, 1918, the latest available return at the time of writing, will be found in the following table. Details in regard to rate of tax, etc., will be found at the end of Section XX.

Total	5,053,596	5,498,517	5,762,190	6,110,522	6,744,755

The item "Miscellaneous" includes a subsidy from the Commonwealth Bank for the conduct of Savings Bank business, the mail transit rates, and certain allowances.

8. Railways. The Commonwealth Government is now responsible for four lines, the Kalgoorlie-Port Augusta, the Port Augusta-Oodnadatta, the Darwin-Katherine River, and the Capital Territory line. The appended table shows the amounts paid into the credit of the Consolidated Revenue Fund on account of each of these railways for the past five years. In the case of the Port Augusta-Oodnadatta Railway the amount is made up by fees, wharfage rates, etc. Under an arrangement which came into effect on 1st January, 1914, this line is worked by the South Australian Government, and the Commonwealth Government is to receive the profit, if any, on the working, or to pay the deficiency. Since 1914 there has always been a deficiency, which is met by a payment from the Commonwealth Government, and debited to the Northern Territory Account.

COMMONWEALTH REVENUE FROM RAILWAYS, 1915-16 TO 1919-20.

Railway.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Darwin-Katherine River	29,150	32,605	35,172	45,725	31,783
Capital Territory	1,040	592	705	407	571
Total	304,068	305,964	201,107	196,988	265,918

It will be noticed that there was a substantial fall in the receipts of the Kalgoorlie-Port Augusta Railway in 1917-18, due to the reduction in freight receipts. In 1915-16 and 1916-17 large amounts were credited to working receipts for the carriage of constructional material. The completion of the line in 1917-18 closed this source of revenue.

9. Commonwealth Steamships. The Commonwealth Government announced, about the end of June, 1916, that, owing to the difficulty of obtaining tonnage, and to increasing freight charges, it had purchased fifteen steamers to insure to producers, as far as possible, the transport of their produce. The price given was rather more than £2,000,000, the capital cost brought forward from 30th June, 1917, being £2,080,656. The profits for the year 1916-17 amounted to £327,336, and for the year 1917-18 to £576,164, a total

of £903,500. Out of this amount the sum of £880,000 was transferred from the Trust Account to Consolidated Revenue in 1917-18, under the approval of the Treasurer. The Consolidated Revenue benefited further in 1918-19, the surplus earnings being £1,015,762. In 1919-20 there was not a sufficient balance in the Trust Account to allow of a transfer to Consolidated Revenue, these transfers being taken from Cash Balances and not from Revenue Account Balances, as disclosed by the Profit and Loss and Balance-sheet Statements of the line.

10. Detained Enemy Vessels. This is an item which first appeared in the Commonwealth accounts in 1914-15. For the first two years it appeared in the receipts of the Navy, but since 1916-17 it has ranked as a separate account. The great increases in 1916-17 and 1917-18 are due to higher freight charges, while the fall in 1918-19 is due to the fact that gross receipts were paid into the Consolidated Revenue in 1917-18, and net receipts in 1918-19.

11. Other Public Works and Services.—The most important items in 1917-18 were "Profit on sale of rabbit skins" £301,000, and "Profit on charter of vessels" £166,790. In 1918-19 they were "Profit under Wool Tops Agreement" £141,008, and "Profit on charter of vessels" £15,000. In 1919-20 they were "Profit under Cornsacks Distribution Account," £130,472; and "Profit under Wool Tops Agreement," £78,273.

12. Interest, Discount, etc.—The most important investments of the Commonwealth Government from which interest is derived are—Loans to States, General Trust Funds, Loans to the London Market, Fixed Deposits with the Commonwealth and other Banks, and certain advances and overdrafts. In 1919-20, the main receipts from this source were—Interest on Loans and Advances to States, £967,538; Interest on Bank Deposits, £210,873; and Interest on General Trust Funds, £176,701.

13. Coinage.—The Commonwealth Revenue under this head is derived from profit on coin issued, and for 1919-20 was made up of £40,871 for silver and £35,568 for bronze. The great fall in revenue from this source during recent years is due to the unprecedented rise in the price of silver, which has reduced the profits on seignorage to a very modest figure.

14. Defence.—The income from this source (which is derived from both Defence and Navy Offices) is mainly derived from sales of material and stores supplied, forfeitures, fines, costs, etc. In 1919-20, £94,837 was contributed by the Defence Department, and £88,390 by the Navy Office.

15. Patents, etc.—This heading includes Patents, Trade Marks, Copyrights, and Designs, the administration of which has been exclusively a Commonwealth concern for a very long time. The revenue has been very regular during the period under review at a figure somewhat in excess of £20,000 annually, excepting in the last year, when a substantial advance was shewn. In 1919-20, £23,662 was obtained from Patents, and £10,405 from Trade Marks, Copyright and Designs.

16. Unexpended Balance of London Orders.—The largely increased amount for 1919-20 is due to an amendment by the Treasury of the London Account Regulations, which superseded the system of charging votes upon the remittance of amounts from the Commonwealth, and made such charge only when payment in London is actually completed. This necessitated the closing of the Trust Account for London Liabilities, and the transfer of unexpended balances to the Revenue. A considerable amount was thus transferred in 1919-20, particularly on account of the Department of the Navy.

17. Miscellaneous.—This includes several items which are either small in themselves, or not included under separate headings as they are virtually non-recurring. Thus in 1916-17 there was a large item of £431,690 which was paid into Revenue under the operation of the Sugar Purchase Act of 1915. In 1917-18 it had fallen to £20,390, in 1918-19 to £6,547, and in 1919-20 to £10,279.

(C) Expenditure.

1. **Nature of Commonwealth Expenditure.**—The disbursements by the Commonwealth Government of the revenue collected by it fell naturally, under the “book-keeping” system, into three classes, viz. :—

- (a) Expenditure on transferred services.
- (b) Expenditure on new services.
- (c) Payment to States of surplus revenue.

Of these three, only the first two were actual expenditure, the last being merely a transfer, the actual expenditure being incurred by the States. In accordance with the provisions of the Constitution, the expenditure on transferred services was, under the “book-keeping” system, debited to the several States in respect of which such expenditure was incurred, while the expenditure on new services was distributed *per capita*. Surplus Commonwealth revenue was paid to the States monthly. During the earlier years of Federation, viz., until the end of the year 1903-4, new works, etc., for transferred departments were treated as transferred expenditure, and were charged to the States on whose behalf the expenditure had been incurred. In subsequent years all such expenditure was regarded as expenditure on new services, and was distributed amongst the States *per capita*. Under the new system of keeping the accounts there is no further debiting of expenditure to the several States.

2. **Total Expenditure.**—The expenditure by the Commonwealth Government during the period 1915-16 to 1919-20 is shewn in the following table :—

COMMONWEALTH EXPENDITURE, 1915-16 TO 1919-20.(a)

	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Commonwealth ..	24,415,221	27,797,015	30,499,494	38,262,585	46,062,610

(a) Including balance paid into Trust Funds, but excluding subsidies to States.

The largely increased expenditure of recent years is due partly to Old-age and Invalid Pensions, but mainly to the expenditure from Revenue upon War Services. In 1915-16 the expenditure included £3,000,000 set aside for the purposes of Pensions in subsequent years, and this item came to £2,077,427 in 1916-17, £3,925,820 in 1917-18, £3,476,478 in 1918-19, and £5,724,806 in 1919-20. These totals include amounts paid into Trust Funds, but exclude subsidy to States.

3. **Expenditure per Head.**—Particulars concerning the Commonwealth expenditure per head are furnished hereunder :—

COMMONWEALTH EXPENDITURE PER HEAD OF POPULATION, 1915-16 TO 1919-20.

	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Commonwealth ..	4 19 0	5 14 0	6 3 6	7 12 1	8 15 7

4. **New Works, etc.**—As previously mentioned, the Commonwealth expenditure on new works, etc., for transferred departments was, prior to 1904-5, included under the head of “transferred” expenditure, but in that and subsequent years up to 1909-10 was

* For an exposition of the “book-keeping system” see Commonwealth Year Book No. 6, p. 780.

treated as "other" expenditure, and debited to the States *per capita*. Particulars of the expenditure on new works, etc., during the last five years are given in the following table :—

COMMONWEALTH EXPENDITURE ON NEW WORKS, 1915-16 TO 1919-20.

Year ended— 30th June—	Defence.	Trade and Customs.	Postmaster- General.	Home Affairs.	External Affairs.	Treasury.	Prime Minister's Department.	Home and Territories.	Works and Railways.	Total.
	£	£	£	£	£	£	£	£	£	£
1916	1,940,682	133,976	644,134	168,898	50,598	2,547	2,940,835
1917	1,765,253	201,419	590,770	(a)	(a)	2,085	120,591	293,836	1,314,793	4,288,747
1918	245,501	109,164	233,255	(a)	(a)	2,377	..	27,718	4,188	622,203
1919	97,018	38,542	239,643	(a)	(a)	609	..	22,156	7,688	405,656
1920	116,663	12,104	184,788	(a)	(a)	1	..	21,439	159	335,154

(a) Merged into other Departments.

It will be seen that the Commonwealth expenditure from Consolidated Revenue on new works for the first two years of the table was of considerable magnitude. This was largely due to expenditure on fleet construction, which was supplemented in 1916-17 by large payments on account of works and railways which had formerly been charged to loan funds.

5. Cost of Departments, etc.—Arranged in such a manner as to shew under each Department the expenditure on behalf of that Department, the cost of the several branches of the Commonwealth service for the years 1915-16 to 1919-20 was as follows :—

COST OF COMMONWEALTH DEPARTMENTS, ETC., 1915-16 TO 1919-20.

Departments, etc.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Works and Railways	886,661	672,893	683,874	714,196
All other Expenditure (b) ..	9,718,684	15,263,945	16,960,023	25,947,547	31,550,309
Total	24,415,221	27,797,015	30,490,494	38,262,585	46,062,610

(a) For an explanation of the varying amounts in the expenditure on the Treasury see footnote to the table on page 685. (b) For details see table on page 687.

The heading "all other expenditure" includes War Services. More detailed reference to the items included under the above general heads is furnished in the succeeding paragraphs, and attention is particularly directed to the table giving detailed information concerning the items composing "all other expenditure" on page 687.

6. Governor-General.—In section 3 of the Constitution it is enacted that, until the Commonwealth Parliament otherwise provides, there shall be payable out of the Consolidated Revenue Fund for the salary of the Governor-General an annual sum of ten thousand pounds, and a proviso is made that the salary of the Governor-General

shall not be altered during his continuance in office. The total expenditure in connexion with the Governor-General and establishment for the five years 1915-16 to 1919-20 is as follows :—

**EXPENDITURE, GOVERNOR-GENERAL AND ESTABLISHMENT,
1915-16 TO 1919-20.**

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£

(a) Represents official services outside the Governor-General's personal interests, and carried out in the main at the instance of the Government.

7. Parliament.—Under this head have been grouped all the items of expenditure connected with the Parliamentary government of the Commonwealth, including the salaries of the Ministers and the allowances to senators and members of the House of Representatives. Details for the five years 1915-16 to 1919-20 are furnished in the table given hereunder :—

EXPENDITURE, COMMONWEALTH PARLIAMENT, 1915-16 TO 1919-20.

Miscellaneous	6,684	5,491	5,159	5,044	4,256
Total	263,397	344,060	237,464	245,713	348,415

In section 66 of the Constitution, provision is made that there shall be payable out of the Consolidated Revenue Fund of the Commonwealth, for the salaries of Ministers of State, an annual sum which, until Parliament otherwise provides, shall not exceed £12,000. This was modified in 1915-16, when the Minister of the Navy was given separate Cabinet rank. Allowances to senators and members of the House of Representatives are also provided for in the Constitution, section 48 of which specifies that until Parliament otherwise provides, each such allowance shall consist of £400 a year, reckoned from the day on which the member takes his seat. During the second session of the Commonwealth Parliament in 1907 the question of allowances to members came under consideration, and an Act was passed raising the annual allowance from £400 to £600, such increase to date from 1st July, 1907. During 1920, the salaries of members of both Houses were raised to £1,000 per annum.

8. Prime Minister's Department.—This was a new department created during the financial year 1911-12. In addition to the Prime Minister's Office it includes the Audit Office taken from the Treasury, the Executive Council taken from the External Affairs

Department, and the Public Service Commissioner's Office taken from the Home Affairs Department. In 1916-17 it assumed control of the High Commissioner's Office in London, which was detached from the old External Affairs Department when the latter was merged in the Home and Territories Department. The expenditure for the last five years is shown in the following table :—

EXPENDITURE, PRIME MINISTER'S DEPARTMENT, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£

	60,790	155,797	234,568	231,173	312,408

The "Miscellaneous" vote for 1917-18 included a grant of £5,000 for the relief of sufferers from the cyclone in Queensland, and an item of £13,831 for the working expenses of the Port Pirie wharf. The "Miscellaneous" vote for 1919-20 included £32,979 as a grant for the relief of distress caused by the maritime strike; £17,301 for the expenses incurred during the visit of the Prince of Wales; £10,994 for the Basic Wage Commission; £15,727 for the Australian Commission in the United States; and £10,000 as a reward to Sir Ross Smith.

9. Home and Territories.—Under this new department, created in the financial year 1916-17, is placed the bulk of the old External Affairs Department (after the removal of the London office), and the Census and Statistics, and Meteorological Offices, taken from the old Home Affairs Department. The Darwin-Katherine River Railway is administered by the Works and Railways Department.

EXPENDITURE HOME AND TERRITORIES DEPARTMENT, 1916-17 TO 1919-20.

(a) Includes Northern Territory and Port Augusta Railway.

10. **Attorney-General's Department.**—The extra expenditure connected with this Department of late years has been caused in large measure by the extension of the Federal High Court. Details for the five years 1915-16 to 1919-20 are furnished hereunder :—

EXPENDITURE, ATTORNEY-GENERAL'S DEPARTMENT, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Total	86,164	94,195	96,930	94,686	111,007

11. **Works and Railways Department.**—The great extension of Commonwealth Works and Railways led, in 1916-17, to the separation of these functions from the old Home Affairs Department and the constitution of a separate office. This new office also administers those Railways which were formerly under the control of the old External Affairs Department. The expenditure for the four years of its existence is as follows :—

EXPENDITURE, WORKS AND RAILWAYS DEPARTMENT, 1916-17 TO 1919-20.

Details.	1916-17.	1917-18.	1918-19.	1919-20.

Rent, repairs, etc.	14,635	2,953	2,957	3,286
Miscellaneous	5,245	12,244	6,599	1,578
Total	886,661	672,893	683,874	714,196

The rather large expenditure on the Port Augusta-Oodnadatta Railway in 1916-17, as compared with subsequent years, is due to the repayment of £137,128 which constituted part of the debt upon the line, and matured on 1st April, 1917.

12. **Treasurer's Department.**—The sub-departments under the control of the Commonwealth Treasurer are the Treasury, the Pensions Department, and the Taxation Office. The Audit Office was transferred to the Prime Minister's Department in 1911-12. Details of the expenditure of this Department for the last five years are given in the following table :—

EXPENDITURE, TREASURER'S DEPARTMENT, 1915-16 TO 1919-20.

Interest on Commonwealth Securities	14	19,833	12,273		
Miscellaneous	18,187	29,411	7,696	93,597	29,132
Departmental Expenditure	266,509	395,896	447,526	546,740	584,084
Invalid and Old-age Pensions (a)	2,859,766	453,344	1,781,564		1,196,454
Maternity Allowance	659,745	662,030	634,428	620,080	625,865
Maintenance of persons in charitable institutions ..	31,831	34,653	39,060	55,760	72,675
Total	3,817,851	1,545,923	2,902,578	1,222,580	2,479,078

(a) In addition, the following amounts were spent from Trust Funds:—In 1916-17, £3,000,000; in 1917-18, £2,077,427; in 1918-19, £3,879,241; and in 1919-20, £3,350,425.

The fluctuations in the expenditure on this Department are mainly due to the variations in the method of payment of the Invalid and Old-age Pensions, as explained in the footnote. The "Miscellaneous" vote for 1918-19 included £78,344, temporary credits under certain Trust Fund accounts.

13. **Trade and Customs.**—Under this head have been included the expenditure of all the sub-departments under the control of the Minister of Trade and Customs, as well as the amounts payable as sugar and other bounties and the expenses in connexion therewith. The administration of Patents, Trade Marks, and Copyright is now entrusted to the Attorney-General's Department. The large amount of £133,791 included in "Miscellaneous" for 1919-20 is due to the payment of £130,036 to the Australian Wheat Board as profit on cornsacks. Particulars for the five years 1915-16 to 1919-20 are given in the following table:—

EXPENDITURE, TRADE AND CUSTOMS DEPARTMENT, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Total	589,121	648,147	715,129	817,505	992,142

The rise in expenditure on quarantine and lighthouses in recent years has counteracted the abolition of the sugar bounty, and caused an increase in the expenditure on this Department.

14. **Defence.**—The Commonwealth expenditure from Consolidated Revenue in connexion with Defence, which in 1901-2 amounted to £861,218, had by 1919-20 grown to only £1,163,792. As shewn elsewhere, the bulk of the war expenditure is provided for out of loan. Particulars for the five years 1915-16 to 1919-20 are as follows:—

EXPENDITURE, DEFENCE, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Total	1,512,540	1,544,775	1,283,063	1,392,859	1,163,792

15. **Navy Office.**—During the financial year 1915-16, the Navy Office, owing to its increasing importance, was separated from the Defence Department and constituted an independent Department. Appended is the expenditure for the last five years, under similar headings to those of the Defence Department:—

EXPENDITURE, NAVY DEPARTMENT, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Total	5,358,371	5,288,998	5,349,994	5,449,722	6,136,920

17. **Miscellaneous.**—In addition to the foregoing there are certain items which do not come under any of the heads enumerated. They consist in the main of war services, expenditure on new works which has already been treated in detail on page 680, and sums carried forward in respect of pensions in subsequent years. The particulars for the five years, 1916-20, are given in detail in the next table.

ALL OTHER EXPENDITURE, 1915-16 TO 1919-20.

Details.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

(a) For details see second table appended to next paragraph.

18. **Cost of the War.**—A substantial amount of the cost of the war has been paid out of consolidated revenue in the last six years under the heading “War Services.” The expenditure on the war from revenue has already been dealt with in the previous table, but a further table is here presented shewing the total expenditure from the different funds during the four years for which the war lasted up to 1917-18, and including also the period 1918-20, which contained the last four months of war, and the first portion of the reconstruction period.

COST OF WAR SERVICES TO COMMONWEALTH TO 30th JUNE, 1920.

Year.	From Consolidated Revenue.	From War Loan Fund.	Total.
	£	£	£
1914-15	640,217	14,471,118	15,111,335
1915-16	3,777,849	37,423,568	41,201,417
1916-17	8,421,654	53,114,237	61,535,891
1917-18	11,863,251	55,095,109	66,958,360
1918-19	21,255,101	62,192,889	83,447,990
1919-20	24,579,099	46,070,595	70,649,694
Total	70,537,171	268,367,516	338,904,687

The expenditure in 1920-21, which will be mainly incidental to Repatriation and interest services, has been estimated at £62,241,931, of which £36,841,931 will come from Revenue, and £25,400,000 from Loan Funds. Full details of the war expenditure from Revenue and from Loan are given in the subjoined tables.

WAR SERVICES EXPENDITURE FROM REVENUE TO 30th JUNE, 1920.

Heading.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Interest, Imperial Loans	2,082,258	2,477,288	2,377,690	2,377,656
Sinking Fund, Commonwealth Loans	689,384	515,781	955,303	1,067,402
Sinking Fund, Imperial Loans	477,743	245,410	245,410	245,410
War Pensions, &c.	409,862
Annual Votes—						
Defence	640,217	3,005,994	550,377	532	310	497
Navy	771,855	686,701	272,608	143,274
Treasury	1,186,488	3,043,046	8,373,696	7,406,601
Prime Minister's Department	999,198	8,194	1,275
Trade and Customs	10,030	7,179	9,238	9,483
Repatriation	1,300,044	2,614,979
Works and Railways	2,837	34,414
Total	640,217	3,777,849	8,421,654	11,863,251	21,255,101	24,579,099

The extremely large vote debited to the Treasury in 1918-19 includes £3,430,000, which represents two years' interest to the Imperial Government for the maintenance of troops, and £4,827,368 spent on War Pensions. In 1919-20 it includes £5,450,000 for War Pensions, and £1,816,000 interest to the Imperial Government.

WAR EXPENDITURE FROM WAR LOAN FUND TO 30th JUNE, 1920.

Department.	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£	£

Works and Railways	220,279
Total	14,471,118	37,423,568	53,114,237	55,095,109	62,192,889	646,070,595

(a) Credit.

(b) Including £685,008 War Gratuity.

The expense incurred upon the Defence Department was almost entirely in connexion with the expeditionary forces. The largest item in the case of the Treasury was an advance of £10,149,222 to the States and Papua for the purpose of settling returned soldiers on the land.

(D) Subsidy Paid to States.

1. Payments to the Several States.—In the following table are furnished particulars relative to the amounts actually paid to the several States on account of each of the financial years 1915–16 to 1919–20 :—

COMMONWEALTH SUBSIDY PAID TO STATES, 1915–16 TO 1919–20.

State.	1915–16.	1916–17.	1917–18.	1918–19.	1919–20.
	£	£	£	£	£
New South Wales	2,297,872	2,286,913	2,317,783	2,380,139	2,472,717
Victoria	1,743,467	1,722,409	1,739,481	1,764,239	1,847,085
Queensland	836,743	823,771	845,913	856,300	895,454
South Australia	540,649	531,340	535,808	549,593	578,094
Western Australia	591,064	569,982	561,129	556,505	569,512
Tasmania (a)	247,200	246,004	250,260	257,557	267,630
Total (a)	6,256,995	6,180,419	6,250,374	6,364,333	6,630,492

(a) Not including special grant of £90,000 to Tasmania.

The normal rate of increase was checked in 1914–15 owing to the departure of the troops, and in 1915–16 four of the States, from this cause, shewed a decrease. This was still more marked in 1916–17, but, owing to the return of soldiers, increases were manifested in 1917–18 and 1918–19. The amounts allotted to Tasmania are exclusive of the instalments of the special payment.

The amounts of subsidy given in the preceding table are based upon an annual payment of £1 5s. per capita, with a special concession to Western Australia. This is in accordance with the provisions of the "Commonwealth Surplus Revenue Act" which was passed in 1910 and came into effect on the 1st July, for a period of ten years, after which it became subject to revision. This period expired on the 30th June, 1920, and it is now possible for Parliament to extend the Act for a further period, or to make new financial provisions for a Commonwealth subsidy to the States. In the meantime the existing arrangement is being continued provisionally. The matter was discussed at a meeting of Commonwealth and State Ministers held in January, 1919, at Melbourne, and the Commonwealth Treasurer of the day (Mr. Watt) made the following tentative proposal as the basis of a new arrangement :—In 1920–21 the States were to receive 22s. 6d. per capita, and in each succeeding year an amount diminishing by 2s. 6d. per head until 1925–26, when they would receive 10s. per head, after which the arrangement would come up for further revision. The Conference, however, adjourned without coming to a decision. It was subsequently announced that the matter would come up for decision at the forthcoming Federal Convention.

§ 3. Trust Fund and Miscellaneous.

1. **Trust Accounts.**—The Trust Fund credit balance on 30th June, 1920, amounted to £82,375,522, as compared with £75,058,977 for the corresponding date in the year ending 30th June, 1919. These enormous amounts are due mainly to the Australian Notes Account referred to in detail in par. 2 hereunder. Other large items are "Interest—Imperial Government" and "Invalid and Old-age Pensions." Details concerning the most important trust accounts contributing to this amount are as follows:—

COMMONWEALTH TRUST FUND, 30th JUNE, 1920.

Trust Accounts.	Balance at 30th June, 1920.	Trust Accounts.	Balance at 30th June, 1920.
	£		£

Loans Sinking Fund	2,020,818	Miscellaneous	70,463
London Liabilities	753,419		
Money Order	713,500	Total	82,375,522

2. **Australian Notes Account.**—After the passage of the Australian Notes Act, Australian notes began to appear in circulation in December, 1910. For the first half of the calendar year 1911, they circulated side by side with bank notes and Queensland Treasury notes. After 30th June, 1911, the penal clauses of the Notes Act came into operation, and the banks and the Queensland Government began to withdraw their notes from active circulation. By the end of the year the process was virtually complete. On 30th June, 1920, the notes issued and unredeemed amounted to £56,768,530. Against this there was a reserve in gold coin of £23,658,092 or 41.67 per cent., and other assets, of which the most important were investments in Government Stock and fixed deposits, totalling £37,808,770 and returning an annual income of about £1,500,000.

The position, according to a Treasury return issued at the end of June, 1921, was as follows:—

COMMONWEALTH NOTES ISSUED AND UNREDEEMED AT 27th JUNE, 1921.

	£
10s.	2,311,869½
£1	14,413,496
£5	9,960,225
£10	4,217,550
£20	616,980
£50	1,485,350
£100	1,592,600
£1,000	23,630,000
	£58,228,070½

The amount of the gold reserve was £23,844,394, representing 40.95 per cent. of the liability.

The subject is discussed at some length in Section XXI., Sub-section 2, *Banking*.

3. **Advances by Commonwealth Government to States.**—Reference has been made in the previous paragraph to the investments constituting the assets of the Australian Notes Account. A large proportion has been advanced to the respective State Governments for short periods, sometimes as low as one year. This is an interesting departure in Australian Public Finance, and in view of the financial relations thus brought about between the Commonwealth and State Governments, the following table is appended, giving full particulars of the investments of the £37,808,770, to which reference has already been made :—

**AUSTRALIAN NOTES ACCOUNT.—PARTICULARS OF INVESTMENT AS AT
30th JUNE, 1920.**

Investment.	Amount.	Rate of Interest.	Date of Maturity.	Amount of Interest.

(b) Approximate.

4. **London Flotations on behalf of States.**—Act No. 17 of 1916 authorised the Treasurer to borrow £8,940,000 in the United Kingdom, and Act No. 16 of 1917 to raise £8,000,000, and to lend the amount to the several States, other than that of New South Wales, and, pending the borrowing of the money, to advance the amounts set forth in the Acts out of loans made by the Government of the United Kingdom to the Commonwealth. In pursuance of these Acts, £16,750,000 was distributed to the States up to 30th June, 1920. The money was allocated to the States as follows :—

**COMMONWEALTH LOANS RAISED IN LONDON ON BEHALF OF STATES
AS AT 30th JUNE, 1920.**

State.	£
Victoria	1,954,000
Queensland	5,462,500
South Australia	4,116,000
Western Australia	4,150,500
Tasmania	1,067,000
Total	16,750,000

In addition to these amounts the Commonwealth Government had advanced as at 30th June, 1920, the sum of £11,235,310 to the States for the purpose of settling returned soldiers on the land. This sum was allocated as follows :—New South Wales, £1,996,731; Victoria, £5,750,371; Queensland, £727,678; South Australia, £614,058; Western Australia, £1,166,097; and Tasmania, £980,375. In addition, New South Wales was advanced £755,610 for the construction of silos for wheat storage. Lastly, the following advances were made to States to provide reserve employment through Local Government Bodies :—Victoria, £15,700; Queensland, £100,000; and South Australia, £19,796.

5. **Surplus Revenue.**—Until the end of 1906–7, the whole balance of the Consolidated Revenue Fund was paid to the States. From 1907–8, and until the abolition of the book-keeping provisions of the Constitution, the States received only three-fourths of the net Customs and Excise Revenue, and the balance of the Consolidated Revenue Fund was transferred to the Invalid and Old-age Pensions Trust Account, and the Naval Defence Trust Account, to provide for expenditure in subsequent years. The surplus existing on 30th June, 1920, is to be used for the payment of Invalid and Old-age Pensions, and War Pensions. A statement of surpluses and deficiencies for the past five years is hereto appended.

COMMONWEALTH SURPLUS REVENUE, 1915–16 TO 1919–20.

Year.				Surplus.	Deficiency.	Accumulated Surplus at end of Year.
				£	£	£
1915–16	3,000,000	..	3,000,000
1916–17	922,573	2,077,427
1917–18	1,848,393	..	3,925,820
1918–19	402,763	3,523,057
1919–20	2,201,749	..	5,724,806

§ 4. Commonwealth Public Debt.

Although it was not until 1915 that the Federal Government appeared before the public as a direct borrower, there had been a Commonwealth Public Debt for many years. It now includes several items, such as the balance of the debt taken over from South Australia, the money owing to the States for transferred properties, the Commonwealth General Loan Fund, the loans for military purposes, etc. In view of the large expansion of the Public Debt, and its present importance in Commonwealth public finance, the different items are treated seriatim in the sub-sections that follow.

1. **Loans Taken Over from South Australia.**—The first portions of the debt were contracted at the beginning of 1911, when the Commonwealth assumed responsibility for the administration and the liabilities of the Northern Territory and the Port Augusta-Oodnadatta Railway. At 30th June, 1911, the debt on account of the former was £3,657,836, and on account of the latter, £2,274,486—a total of £5,932,322. As the securities fall in they are redeemed by the Commonwealth Government, the money required being taken from the Loan Fund, which was created for this purpose, amongst others. This item is thus a constantly diminishing one, and on 30th June, 1920, stood at £4,192,111, of which £2,433,108 was on account of the Northern Territory, and £1,759,003 on account of the railway.

2. **Loan Fund for Public Works, etc.**—Up to 1911 the Commonwealth Government had met its Public Works expenditure out of Revenue. In that year, however, the Commonwealth being faced with the heavy prospective cost of the Transcontinental Railway and the Federal Capital Territory, it was decided to initiate a Loan Fund similar to those of the States. The flotation of this Fund was greatly assisted by the fact that the Treasury at this time held a large quantity of gold, principally on behalf of the Australian Notes Account, at that time only just inaugurated. Up to 30th June, 1914, the money required for loan expenditure was taken mainly from this account at 3½ per cent., and inscribed stock of an equivalent value created. Since the outbreak of war the creation of inscribed stock has ceased, the money required for the Loan Fund being obtained by the issue of Treasury Bills. The relation between the magnitude of the Loan Fund and the expenditure therefrom is shewn for the last five years in the following table :—

**SECURITIES CONSTITUTING COMMONWEALTH LOAN FUND FOR WORKS, ETC.,
AND EXPENDITURE THEREFROM, 1916 TO 1920.**

Year ended 30th June—	Commonwealth Loan Fund.			Expenditure in year ended 30th June.	Total Expenditure up to year ended 30th June.
	Inscribed Stock.	Treasury Bills.	Total Receipts.		
	£	£	£	£	£
1916	4,580,000	4,437,543	9,017,543	2,859,341	9,017,543
1917	4,580,000	4,437,543	9,017,543	..	9,017,543
1918	4,580,000	6,240,990	10,820,990	1,803,447	10,820,990
1919	4,580,000	7,670,881	12,250,881	1,429,891	12,250,881
1920	4,580,000	8,957,667	13,537,667	1,286,786	13,537,667

The preceding table gives the total expenditure. The details of the expenditure for five years are as follows :—

**COMMONWEALTH LOAN EXPENDITURE FOR WORKS, ETC., DETAILS,
1916 TO 1920.**

Total	160,300	36,554	318,786	515,640

3. Properties Transferred from States.—At the time of Federation, when the Commonwealth took over the control of a great many departments which had previously been administered by the States, a large amount of property was handed over to the Commonwealth Government. This consisted mainly of Post Offices, Customs Houses, Defence works, and other buildings necessary to the effective working of the transferred departments. In the early days of the “Braddon Clause,” when the Federal Government was spending less than its statutory proportion of the Customs revenue, the question of suitable compensation to the States did not become acute; but, when the “Braddon Clause” was replaced by another arrangement between Commonwealth and States, much less favourable to the latter, the time had evidently come to put matters on a more definite footing. In the Commonwealth accounts of the last nine years, certain amounts (independent entirely of the subsidy) have been paid to the States as “Interest on Transferred Properties.” These amounts have been substantially based upon a valuation made by the old Home Affairs Department, with the following result :—

ORIGINAL VALUATION OF TRANSFERRED PROPERTIES.

State.	Department.				Total.
	Postmaster-General.	Defence.	Trade and Customs.	Home Affairs.	
	£	£	£	£	£
New South Wales	2,337,316	1,182,003	154,009	1,320	3,674,648
Victoria	1,332,862	805,389	190,657	1,266	2,330,174
Queensland	925,628	386,802	202,082	7,356	1,521,868
South Australia	842,281	161,140	28,486	815	1,032,722
Western Australia	600,895	64,842	37,714	835	704,286
Tasmania	214,906	121,490	48,212	143	384,751
Total	6,253,888	2,721,666	661,160	11,735	9,648,449

Since the valuation some transfers and retransfers have been made. The estimated value of the transferred properties for the last five years is given in the table in sub-section 6 hereinafter.

4. War Loan from the Imperial Government.—On the outbreak of the European war in 1914, the Commonwealth Government contracted a loan from the Imperial Government for the purpose of financing the large military expenditure which was seen to be inevitable. At first, the arrangement was that the Imperial Government should advance the sum of £18,000,000 in twelve monthly instalments of £1,500,000 each. It was soon found, however, that this would be insufficient, and consequently the Imperial Government made a fresh advance of £6,500,000, also to be paid in monthly instalments. A third loan of £25,000,000 was subsequently negotiated, of which £12,000,000 was received by 30th June, 1916, and £11,000,000 in 1916–17. The total capital debt thus created up to 30th June, 1920, is set out in the following table :—

**CAPITAL DEBT TO IMPERIAL GOVERNMENT ON ACCOUNT OF WAR LOANS,
30th JUNE, 1920.**

Authority.	Imperial Loans—Capital Debt created up to 30th June, 1920.			
	Issues, 3½%.	Issues, 4½%.	Issues, 5%.	Total.
	£	£	£	£
War Loan Act 1914—£18,000,000 ..	1,263,158	11,500,000	5,757,540	18,520,698
War Loan Act No. 2 1915—£6,500,000	6,885,656	6,885,656
War Loan Act (United Kingdom) No. 2 1916—£25,000,000 (a)	23,675,705	23,675,705
	1,263,158	11,500,000	36,318,901	49,082,059

(a) Only £23,000,000 has been advanced.

In addition to this capital indebtedness, a further sum of £42,696,500 is due to the British Government for the maintenance of Australian troops.

The last item of nearly £43,000,000 remained unfunded until early in 1921. An arrangement was then concluded with the Imperial Government, by means of which almost the entire debt (nearly £92,500,000) was consolidated. The Commonwealth Government undertook to extinguish the debt by annual payments of approximately £5,550,000, spread out over 35½ years. This provides for interest at nearly 5 per cent., and a sinking fund of a little more than 1 per cent., and may be regarded as a very satisfactory arrangement for the Commonwealth, since it entails only a moderate rate of interest, and provides for the ultimate extinction of nearly one-fourth of the National War Debt.

5. Flotation of War Loans in Australia.—In addition to the advances from the Imperial Government, the Commonwealth Government has raised large amounts of money for the prosecution of the war, by direct application to the investing public of Australia. Acts No. 21 and No. 50 of 1915 authorised the Commonwealth to make application for £20,000,000 and £18,000,000 respectively, and in pursuance of these a loan of £5,000,000 was placed upon the market late in 1915, and a further amount of £10,000,000 early in 1916. These issues—unprecedented in Australian finance—were entirely successful, the latter being subscribed twice over, and the former more than two and a-half times. Both loans were issued at par, bore interest at 4½ per cent., and

were redeemable on 15th December, 1925. The expenses included a commission of two shillings per cent. to the Commonwealth Bank, commission to brokers at $\frac{1}{4}$ per cent., and miscellaneous items such as printing. The total cost of flotation, however, was very moderate, amounting only to £86,103, or less than five shillings per cent. of the amount subscribed. The two Acts already mentioned were succeeded by a third, which authorised the Commonwealth Parliament to raise a further sum of £50,000,000. In pursuance of this a third issue was placed upon the market, closing on 1st August, 1916, and subsequently a fourth issue, closing on 8th February, 1917. It may be mentioned that whilst the expenses of flotation were small, the accrued interest was by no means negligible. Owing mainly to this, the net proceeds to the Federal Government only amounted to about 98½ per cent., consequently, when allowance is made for redemption at par, the Government pays about £4 14s. per cent. interest, instead of the nominal 4½ per cent. In view, however, of the advancing rate of interest, this could not be called excessive.

A fifth Commonwealth War Loan, floated in November, 1917, realised £21,213,780, and a sixth loan, floated in April, 1918, realised £42,951,120. The sixth issue differed from the preceding ones in that it gave the investor the option of 4½ per cent. free of income tax, or 5 per cent. subject to tax, the bulk of the money being invested in the former security. The fifth and sixth loans, moreover, are redeemable on 15th December, 1927, thus to a large extent relieving the pressure on 1925 as year of maturity.

A seventh loan was floated in September and October, 1918. It was entirely a 5 per cent. loan, was repayable in 1923 after a currency of 5 years, and realised £44,083,750. This was the last War Loan. The first Peace Loan, floated in October, 1919, carried 5 per cent., and was redeemable on 15th December, 1927. It realised £25,025,370. Full particulars of the respective issues are as follows :—

6. **Total Commonwealth Public Debt.**—Separate consideration has now been given to the items composing the Public Debt. The table appended to this sub-section shews the entire debt of the Commonwealth (apart from the States) at yearly intervals since 1916. The liability on account of the note issue is excluded, but the liability on account of the transferred properties has been included for the entire period. The Commonwealth Public Accounts first took cognizance of this item in 1913 although the debt had been incurred much earlier.

PUBLIC DEBT OF THE COMMONWEALTH AS AT 30th JUNE, 1916 TO 1920.

Details.	1916.	1917.	1918.	1919.	1920.

(b) On account of Oodnadatta railway	1,896,132	1,759,003	1,759,003	1,759,003	1,759,003
Value of properties transferred by States	10,781,797	10,789,739	11,202,515	11,202,619	11,440,462
Amount of Commonwealth Loan Fund—					
Inscribed Stock	4,580,000	4,580,000	4,580,000	4,580,000	4,580,000
Treasury Bills	4,808,661	4,437,543	6,240,990	7,670,881	9,815,600
War Loan from British Government	36,774,269	47,774,269	49,082,059	49,082,059	49,082,059
Commonwealth Internal Loans	34,965,430	80,242,510	143,190,630	184,437,870	207,184,380
Accrued Deferred Pay, A.I.F.	4,759,730	9,373,977	10,309,908	5,500,000	260,000
Loans raised on behalf of States	7,500,000	12,000,000	16,750,000	16,750,000
Gratuities	30,000,000
Miscellaneous	42,917,398	42,355,207	48,005,293
Total	101,344,285	169,229,557	284,055,069	325,770,747	381,309,905
Commonwealth Debt per capita ..	£20 13 5	£34 11 3	£57 0 8	£63 7 6	£71 19 0

It will be noticed that the amount of the Commonwealth Internal Loans does not quite agree with the totals of the first eight issues in the table on page 696. This is owing to the fact that stock to a considerable amount has been presented as payment of Estate Duty, and cancelled, the payments being accepted in accordance with the provisions of section 5 of the Commonwealth Inscribed Stock Act 1915. The amount of £207,184,380 is the balance of the first eight issues. To this must be added £5,297,500 raised by the sale of War Savings Certificates, and £11,293 by the sale of War Savings Stamps. The item "Miscellaneous" is made up of the last two amounts and a sum of £42,696,500 due to the British Government for the maintenance of Australian troops.

7. **Place of Flotation.**—The loans taken over from South Australia, which constituted the first portion of the Federal Public Debt, included both London and Australian securities. The presence in the Treasury of a large holding of gold, and the moderate rate of interest ruling on gilt-edged securities, made the conditions in 1911, and for some little time afterwards, very favourable for the flotation of local loans. London securities were redeemed as they fell due, and replaced by the 3½ per cent. stock of the Loan Fund. Consequently, up to 1914 the amount of the securities repayable in London fell steadily, and the amount repayable in Australia rose rapidly. In 1915 the military loan from the Imperial Government caused a sharp rise in the amount of the securities repayable in London, which was maintained in the two following years. This was, however, more than offset by the flotation of the local war loans. Appended is a table shewing particulars of the loans of the Commonwealth for five financial years which have been floated in London and Australia respectively. A separate column is reserved for the cost of the transferred properties, which, for obvious reasons, it is impossible to allocate.

COMMONWEALTH PUBLIC DEBT.—LONDON AND AUSTRALIAN FLOTATIONS,
1916 TO 1920.

Year ended 30th June—	Payable in—		Value of Transferred Properties.	Total.
	London.	Australia.		
	£	£	£	£

1917	58,426,312	100,013,506	10,789,739	169,229,557
1918	102,579,102	170,273,452	11,202,515	284,055,069
1919	106,123,102	208,445,026	11,202,619	325,770,747
1920	111,680,602	258,188,841	11,440,462	381,309,905

8. **Rates of Interest.**—When the first debt was taken over from South Australia it consisted in the main of a mass of securities varying from 3 per cent. to 4 per cent., the average rate of interest for the first year being £3 12s. 4d. For the first three years the increase in the debt was due almost entirely to the expansion of the 3½ per cent. stock of the Loan Fund, and as a consequence the average rate of interest fell steadily, until on 30th June, 1914, it stood at £3 11s. 10d. Then came the loans for military purposes, and the fall in the average rate was ultimately converted into a rise which is almost certain to be maintained, since there is not likely to be any further borrowing for some time at a rate of less than 5 per cent. In fact, the influence of the heavy borrowing of the last five years at high rates is already reflected in the rise of the average rate of interest. It is notoriously difficult to forecast the future of the rate of interest, but the influence of the large Imperial War Loans on gilt-edged securities has been so far-reaching, that in all probability for some years the average rate of interest on the Federal Public Debt will rise continuously.

The accompanying table gives full particulars concerning the interest for the five financial years ended 30th June, 1920 :—

RATES OF INTEREST ON COMMONWEALTH PUBLIC DEBT, 1916 TO 1920.

Rates of Interest.	Year ended 30th June—				
	1916.	1917.	1918.	1919.	1920.
	£	£	£	£	£
Not bearing interest ..	4,759,730	9,373,977
3 ..	35,063	35,063	35,063	35,063	35,063
3½ ..	16,796,712	16,804,654	17,217,430	17,217,534	17,455,377
£3/12/3 ..	720,411	720,411	720,411	720,411	720,411
3¾ ..	1,399,758	1,394,008	1,394,008	1,054,600	1,054,600
4 ..	7,156,070	6,647,823	8,451,270	9,881,161	12,025,880
4½ ..	56,076,541	101,353,621	200,261,846	192,766,897	192,130,633
5 ..	14,400,000	25,400,000	43,975,041	87,345,081	111,137,941
5¼	4,000,000	4,000,000	4,000,000	34,000,000
5½	3,500,000	8,000,000	12,750,000	12,750,000
Total ..	101,344,285	169,229,557	284,055,069	325,770,747	381,309,905
Average rate of interest	£4/2/10	£4/4/8	£4/10/9	£4/12/2	£4/13/7

A table is appended shewing the amounts payable as interest on the Commonwealth Public Debt as at 30th June in the years 1916-20 inclusive. The rapid increase is due not only to the great expansion of the War Loan Fund, but also to the high rate of interest on recent loans.

**AMOUNT OF INTEREST PAYABLE ON COMMONWEALTH PUBLIC DEBT AS AT
30th JUNE—**

Year.	£
1916	4,196,404
1917	7,166,105
1918	12,879,793
1919	15,017,497
1920	17,847,623

9. **Dates of Maturity.**—A table is appended giving the dates of maturity of the several portions of the Commonwealth debt. The Commonwealth Government has refrained from issuing interminable stock, although as regards about one-fourth of the debt no definite date of maturity had been assigned on 30th June, 1920. It will be noticed that about £225,000,000 falls due in the space of four years, 1923-27, the bulk of this being represented by the balance of the first eight internal loans.

**DUE DATES OF THE COMMONWEALTH PUBLIC DEBT OUTSTANDING ON
30th JUNE, 1920.(a)**

Due Dates.	Amounts.	Due Dates.	Amounts.	Due Dates.	Amounts.
	£		£		£
1920 ..	176,714	1926 ..	66,801	1939 ..	881,393
1921 ..	47,100	1927 ..	100,717,955	1945 ..	11,500,000
1922 ..	4,000,125	1928 ..	1,263,158	1947 ..	36,318,901
1923 ..	42,122,000	1930 ..	750,950	1972 ..	4,580,000
1924 ..	5,493,887	1935 ..	83,051	Indefinite ..	95,615,231
1925 ..	77,108,870	1936 ..	583,769		
				Total ..	381,309,905

(a) Those loans in the case of which the Government has the option of redemption during a specified period have been in each case classified according to the latest date of maturity.

On pages 671 to 674 will be found a series of graphs illustrating the rise in the revenue, public debt, and taxation of the Commonwealth and States since 1902, the year 1901-2 being the first complete financial year since Federation.

10. **Sinking Fund.**—The Commonwealth Government has followed the usual practice in establishing a sinking fund against most of the securities which constitute its public debt. Part of the inscribed stock issued for works purposes carries a sinking fund of 5 per cent., and the remainder one of $\frac{1}{2}$ per cent. The loan from the Imperial Government, and the internal issues carry sinking funds, partly of $\frac{1}{2}$ per cent., and partly of 1 per cent. The War Savings Certificates carry a sinking fund of $\frac{1}{2}$ per cent., and the Northern Territory and Port Augusta-Oodnadatta Railway loans one of $\frac{1}{4}$ per cent. These sinking funds are invested partly in Treasury Bills, partly in Commonwealth Inscribed Stock, and partly in Bonds (War Issues). The situation of the Sinking Funds, as at 30th June, 1920, is set out in the accompanying table. It must, however, be pointed out that the situation as regards the loan to the Imperial Government has been materially altered since that date by the funding arrangement described in detail on page 695.

COMMONWEALTH SINKING FUNDS TO 30th JUNE, 1920.

SECTION XX.

STATE FINANCE.

§ 1. General.

1. **Functions of State Governments.**—In any comparison of the finances of the several States due recognition must be made of the actual functions assumed by the respective Governments, and of the local conditions and requirements in each case. Direct comparisons of public expenditure are thus rendered difficult, owing to the fact that functions which in one State are assumed by the Central Government are in another State relegated to local governing bodies, and further by the fact that costly developmental work may, under certain conditions, be not only economically justifiable, but may be an essential of progress, whilst parsimonious expenditure may be a serious economic blunder. A large expenditure may, therefore, be an indication either of gross extravagance and bad economy on the one hand, or of healthy and vigorous progress and good economy on the other.

Similarly, as regards revenue, imposts which in some States are levied by the Central Government, are in others considered as matters to be dealt with locally. Under these circumstances care is needed in instituting comparisons between the several States, and the particulars contained in this section should be read in connexion with those contained in the section dealing with Local Government. It should also be noted that in many ways the budgets of the Australian Governments differ materially from those of most European countries, owing to the inclusion therein of the revenue and expenditure of departments concerned in rendering public services, such for instance as railways, tramways, water supply, etc., which, in other countries are often left to private enterprise.

2. **Accounts of State Governments.**—The various financial transactions of the States are in each case concerned with one or other of three Funds—the “Consolidated Revenue Fund,” the “Trust Funds,” and the “Loan Funds.” All revenue collected by the State is placed to the credit of its Consolidated Revenue Fund, from which payments are made under the authority of an Annual Appropriation Act passed by the Legislature, or by a permanent appropriation under a special Act. The hypothecation of the revenue from a specific tax to the payment for some special service is not practised in Australia, all statutory appropriations ranking on an equality as charges on the Consolidated Revenue Fund. The Trust Funds comprise all moneys held in trust by the Government, and include such items as savings banks funds, sinking funds, insurance companies' deposits, etc. The Loan Funds are credited with all loan moneys raised by the State, and debited with the expenditure therefrom for public works or other purposes.

3. **Inter-relation of Commonwealth and State Finance.**—The principal alteration in State finance, brought about by Federation, has been that the States have transferred to the Commonwealth the large revenue received by the Customs and Postal Departments and have been relieved of the expenditure connected with these and the Defence Departments, while, in their place, a new item of State revenue has been introduced, viz., the payment to the States of a Commonwealth subsidy. Provision for the taking over by the Commonwealth of certain of the public debts of the States is made in section 105 of the Constitution, and a proposed law extending this provision to the whole of the State indebtedness, which passed both Houses of the Federal Legislature by the statutory majority, was submitted to a referendum at the election in April, 1910, and received the requisite endorsement by the electorate. No action has as yet been taken, although the subject has, on more than one occasion, been under discussion.

§ 2. State Consolidated Revenue Funds.

(A) Receipts.

1. Sources of Revenue.—The principal sources of State revenue are :—

- (a) Taxation.
- (b) The public works and services controlled by the State Governments.
- (c) Sale of and rental from Crown lands.
- (d) The Commonwealth subsidy.
- (e) Miscellaneous sources, comprising fines, fees, interest, etc.

Of these sources, that yielding the largest revenue for the States as a whole is the group of public works and services, the principal contributor being the Government railways and tramways. Next in magnitude comes Taxation, followed in order by the Commonwealth Subsidy and Land Revenue.

2. Amount Collected.—The following table furnishes particulars of the total amount of consolidated revenue received by the several States during the five years 1915-16 to 1919-20 :—

STATE REVENUE, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
1915-16	19,629,442	11,470,875	7,706,365	4,356,967	5,356,978	1,376,493	49,897,120
1916-17	20,537,835	11,813,879	7,880,893	4,874,603	4,577,007	1,369,368	51,053,585
1917-18	21,577,229	12,672,787	8,491,482	5,526,226	4,622,536	1,503,047	54,393,307
1918-19	23,448,166	13,044,088	9,415,543	5,798,313	4,944,850	1,581,984	58,232,944
1919-20	28,650,496	15,866,184	11,293,743	6,582,788	5,863,501	1,815,031	70,071,743

The figures given in this table relate in each instance to the financial year ended 30th June.

During the five years from 30th June, 1915, to 30th June, 1920, the aggregate revenues of the States increased by no less a sum than £20,174,623, or about 40 per cent. Increases were in evidence in all the States, the largest being that of £9,021,054 in New South Wales. This general advance is the more notable since, during recent years, a much smaller amount has been received from the Commonwealth, in the way of subsidy, than was the case up to 1910.

3. Revenue per Head.—Details concerning the revenue per head of population, collected in the several States of the Commonwealth during the five years 1915-16 to 1919-20, are furnished in the table given hereunder. It will be seen that throughout the period Western Australia has collected by far the largest amount per head, and that Tasmania has collected the least.

STATE REVENUE PER HEAD OF POPULATION, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1915-16 ..	10 10 1	8 1 10	11 6 6	9 18 2	16 16 11	6 16 11	10 2 4
1916-17 ..	11 1 0	8 8 9	11 15 4	11 5 9	14 16 5	6 17 0	10 9 5
1917-18 ..	11 9 7	8 19 7	12 6 8	12 13 4	14 18 9	7 8 0	11 0 5
1918-19 ..	12 3 0	9 2 4	13 11 2	13 0 2	15 15 6	7 11 6	11 11 6
1919-20 ..	14 6 1	10 12 1	15 11 5	14 1 2	17 13 7	8 7 5	13 7 1

In all the States, during the period, with the exception of Western Australia, there has been a marked increase in the State revenue collections per head, the most noticeable advance being in the case of Queensland. Western Australia throughout the period has led the other States, and in 1919-20 the revenue per head in that State exceeded the Commonwealth average by about 32 per cent.

4. **Details for 1919-20.**—Classifying the revenue of the several States in the manner indicated in § 2 (A) 1 above, particulars for the year 1919-20 are as follows :—

DETAILS OF STATE REVENUE, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
Taxation ..	4,962,518	3,159,767	3,323,745	1,391,830	844,197	609,576	14,291,633
Public works and services ..	18,515,785	9,043,647	5,093,239	3,841,244	3,181,937	623,528	40,299,380
Land ..	1,915,439	377,633	1,290,198	270,881	408,800	100,024	4,362,975
Commonwealth subsidy ..	2,472,717	1,847,085	892,836	578,094	569,005	(a)357,630	6,717,367
Miscellaneous ..	784,037	1,438,052	693,725	500,739	859,562	124,273	4,400,388
Total ..	28,650,496	15,866,184	11,293,743	6,582,788	5,863,501	1,815,081	70,071,743

(a) Including special grant of £90,000.

It will be noted that the amounts returned under the heading "Commonwealth subsidy" do not always agree with those given in the chapter on Commonwealth Finance, page 689. This arises from the fact that the State figures shew the amount for which credit was taken by the State during the financial year 1919-20, whilst the Commonwealth figures shew the amounts paid to State Treasurers on account of that financial year.

5. **Revenue per Head, 1919-20.**—Particulars concerning the revenue per head of population in each State derived from the several sources enumerated in the preceding paragraph are given hereunder :—

STATE REVENUE FROM VARIOUS SOURCES PER HEAD OF POPULATION, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Taxation ..	2 9 7	2 2 3	4 11 8	2 19 5	2 10 11	2 16 3	2 14 6
Public Works and services ..	9 4 11	6 0 11	7 0 6	8 4 1	9 11 10	2 17 7	7 13 7
Land ..	0 19 1	0 5 0	1 15 7	0 11 7	1 4 8	0 9 3	0 16 7
Commonwealth subsidy ..	1 4 8	1 4 8	1 4 7	1 4 8	1 14 4	1 12 10	1 5 8
Miscellaneous ..	0 7 10	0 19 3	0 19 1	1 1 5	2 11 10	0 11 6	0 16 9
Total ..	14 6 1	10 12 1	15 11 5	14 1 2	17 13 7	8 7 5	13 7 1

The magnitude of the revenue per head from public works and services in the case of Western Australia is mainly due to the fact that the number of miles of railway in that State is large compared with the population, while the revenue-earning power of the railways is also high.

6. **Relative Importance of Sources of Revenue.**—The following table furnishes an indication of the relative importance of the different sources of revenue in the several

States, the figures given being the percentage which each item of revenue bears to the total for the State for the year 1919-20 :—

PERCENTAGE OF ITEMS ON TOTAL STATE REVENUE, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States
	%	%	%	%	%	%	%
Taxation	17.33	19.92	29.43	21.14	14.40	33.59	20.40
Public works and services ..	64.63	57.00	45.10	58.35	54.27	34.35	57.51
Land	6.70	2.38	11.42	4.12	6.97	5.51	6.23
Commonwealth subsidy ..	8.63	11.64	7.91	8.78	9.70	19.70	9.58
Miscellaneous	2.71	9.06	6.14	7.61	14.66	6.85	6.28
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00

7. *State Taxation.*—(a) *Details, 1919-20.* Prior to the inauguration of Federation the principal source of revenue from taxation was the return from duties of Customs and Excise. At the present time the most productive form of State taxation is the income tax, which is now imposed in all the States (Western Australia, the last of the States to adopt this method of taxation, having passed the necessary legislation during the Parliamentary session of 1907). For 1919-20 probate and succession duties and stamp duties occupied second place. In addition to these a State land tax and licence fees of various kinds are now collected in all the States, while a dividend tax is levied in Western Australia. The total revenue from taxation collected by the States during the year 1919-20 was £14,291,633, details of which are set forth in the table given hereunder :—

STATE REVENUE FROM TAXATION, 1919-20.

Taxation.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£
Probate and succession duties ..	1,062,533	881,423	698,382	1,192,540	121,951	50,271	5,435,081
Other stamp duties	978,343	822,489		1,325,034	173,541	128,574	
Land Tax	2,834	314,217	459,188	146,336	46,415	87,785	1,056,775
Income Tax	2,308,267	915,551	2,023,316	662,384	416,136	279,476	6,605,130
Licences	183,455	213,204	86,068	34,905	40,242	23,213	581,087
Other Taxation	427,086	12,883	56,791	30,631	45,912	40,257	613,560
Total	4,962,518	3,159,767	3,323,745	1,391,830	844,197	609,576	14,291,633

(b) *Summary, 1915-16 to 1919-20.* The total amount raised by means of taxation by the several State Governments during the five years 1915-16 to 1919-20 is given in the following table :—

STATE REVENUE FROM TAXATION, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£
1915-16 ..	3,117,221	2,074,839	1,455,358	701,511	407,997	384,820	8,141,746
1916-17 ..	3,629,404	2,237,016	1,564,044	726,645	402,336	438,632	8,998,077
1917-18 ..	3,860,501	2,310,723	1,761,232	1,016,887	449,457	533,383	9,932,183
1918-19 ..	4,083,990	2,744,946	2,772,269	1,185,451	629,061	555,537	11,971,254
1919-20 ..	4,962,518	3,159,767	3,323,745	1,391,830	844,197	609,576	14,291,633

During the period between 30th June, 1915, and 30th June, 1920, the aggregate State revenue from taxation increased by about 75 per cent., the increase varying considerably in the several States. The remarkable increase of the last five years in New South Wales is due principally to the broadening of the basis of the State Income Tax, and increased receipts from Stamp Duties. Queensland collected a land tax for the first time in 1915-16, and substantially increased the income tax in 1918-19. Tasmania imposed in 1917-18 a super tax on incomes, and a tax on motor vehicles. The total increase in State taxation for the year 1919-20 amounted to £2,320,379, or nearly 20 per cent.

The revenue from State taxation per head of population, collected in the several States during each of the years 1915-16 to 1919-20, was as follows:—

STATE TAXATION PER HEAD, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1915-16 ..	1 13 4	1 9 3	2 2 9	1 11 11	1 5 8	1 18 3	1 13 0
1916-17 ..	1 19 1	1 12 0	2 6 9	1 13 8	1 6 1	2 3 11	1 16 11
1917-18 ..	2 1 1	1 12 9	2 11 2	2 6 7	1 9 1	2 12 6	2 0 3
1918-19 ..	2 2 4	1 18 4	3 19 10	2 13 2	2 0 2	2 13 2	2 7 7
1919-20 ..	2 9 7	2 2 3	4 11 8	2 19 5	2 10 11	2 16 3	2 14 6

Taking the States as a whole, the State taxation increased by 21s. 6d. per head during the period from 1915-16 to 1919-20, the most marked increase occurring in the case of Queensland. Most of the advance took place in the last two years, and was chiefly due to the Land Tax.

8. **Commonwealth and State Taxation.**—For the purpose of obtaining an accurate view of the extent of taxation imposed on the people of the Commonwealth by the central governing authorities, it is necessary to add together the Commonwealth and State collections. This has been done in the table given hereunder, which contains particulars concerning the total taxation for each of the years 1915-16 to 1919-20, as well as the amount per head of population:—

COMMONWEALTH AND STATE TAXATION, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Commonwealth taxation ..	23,533,529	24,527,040	24,606,743	32,864,486	41,847,692
State taxation ..	8,141,746	8,998,077	9,932,183	11,971,254	14,291,633
Total ..	31,675,275	33,525,117	34,538,926	44,835,740	56,139,325
Taxation per head ..	£6/8/5	£6/17/6	£7/0/0	£8/18/3	£10/14/0

Whilst the Commonwealth taxation increased during the period by £18,314,163. the State taxation advanced by £6,149,887, the aggregate increase being £24,464,050. The amount *per capita* of total taxation remained fairly constant for some years previous to 1915-16, at an average of about £4 15s. In the last five years, however, it has reached

an extremely high amount, owing to the imposition of fresh direct taxation by the Commonwealth Government. The large increase in Commonwealth taxation in recent years is mainly due to the appearance of the Federal income tax, Federal succession duties, War-time profits, and other taxes.

The subject of taxation is treated in greater detail, and a schedule of rates is given at the end of this Section.

9. Public Works and Services.—A very large proportion of the revenue of all the States of the Commonwealth is made up of the receipts from the various public works and services under the control of the several Governments. The principal of these are railways and tramways, harbour works, and water supply and sewerage, while in addition, State batteries for the treatment of auriferous ores exist in Western Australia, and various minor revenue-producing services are rendered by the Governments of all the States. For the year 1919–20 the aggregate revenue from these sources totalled £40,299,380, or nearly 57½ per cent. of the revenue from all sources. Details of revenue from public works and services for the year 1919–20 are as follows:—

STATE REVENUE FROM PUBLIC WORKS AND SERVICES, 1919–20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£

Other public services ..	437,779	577,624	115,162	417,065	150,468	116,005	1,814,103
Total	18,515,785	9,043,647	5,093,239	3,841,244	3,181,937	623,528	40,299,380

(a) Water supply only.

10. Land Revenue.—The revenue derived by the States from the sale and rental of Crown lands has, with few exceptions, been treated from the earliest times as forming part of their respective Consolidated Revenue Funds, and has been applied to meet ordinary current expenses. Where the rentals received are for lands held for pastoral or for residential purposes, such application of the revenue appears perfectly justifiable. On the other hand, where the rentals are those of mineral and timber lands, and in all cases of sales of lands, such a proceeding is essentially a disposal of capital in order to defray current expenses and as a matter of financial procedure is open to criticism. In the following table particulars of revenue derived from sales and rental of Crown lands are given for the year 1919–20:—

STATE LAND REVENUE, 1919–20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£
Sales ..	1,125,703	198,238	380,034	116,043	330,740	61,936	2,212,694
Rentals ..	789,736	179,395	910,164	154,838	78,060	38,088	2,150,281
Total ..	1,915,439	377,633	1,290,198	270,881	408,800	100,024	4,362,975

11. Commonwealth Subsidy.—The payments to the States of Commonwealth subsidy represent in each instance a considerable proportion of the States' revenue, and for the year 1919–20 aggregated £6,717,367. This represents a great decline from the amounts

received up to 1910, owing to the new system of allotting the subsidy. The percentage which the subsidy received by each State for 1919-20 was of the total revenue of that State is shewn in the following table:—

COMMONWEALTH SUBSIDY PAID TO STATES DURING 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£
Commonwealth subsidy	2,472,716	1,847,085	892,836	578,094	569,005	(a) 357,630	6,717,367
Total revenue ..	28,650,496	15,866,184	11,293,743	6,582,788	5,863,501	1,815,031	70,071,743
Percentage of subsidy on revenue	% 8.63	% 11.64	% 7.91	% 8.78	% 9.70	% 19.70	% 9.58

(a) Including special grant of £90,000.

The amount of subsidy here shewn is that for which the several States took credit during the year 1919-20. (See also page 703.)

12. Miscellaneous Items of Revenue.—In addition to the foregoing sources of revenue there are in each State several miscellaneous ones, including such items as interest, fines, fees, etc., which for the year 1919-20 aggregated £4,400,388.

(B) Disbursements.

1. Heads of Expenditure.—The principal heads of State expenditure from Consolidated Revenue Funds are:—

- (a) Interest and sinking funds in connexion with public debt.
- (b) Working expenses of railways and tramways.
- (c) Justice.
- (d) Police.
- (e) Penal establishments.
- (f) Education.
- (g) Medical and charitable expenditure.
- (h) All other expenditure.

Of these items, that of working expenses of railways and tramways was the most important, and for the year 1919-20 represented about 38 per cent. of the aggregate expenditure from the Consolidated Revenue Fund. Next in order for that year was the item of interest and sinking fund in connexion with the public debt, then education, medical and charitable expenditure, and police in the order named.

2. Total Expenditure.—The total expenditure from Consolidated Revenue Funds in the several States during each of the years 1915-16 to 1919-20 is furnished in the table given hereunder:—

STATE EXPENDITURE, CONSOLIDATED REVENUE FUNDS, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
1915-16	18,931,814	11,683,363	7,671,573	4,741,377	5,705,201	1,340,711	50,074,039
1916-17	20,806,633	11,795,295	8,134,387	5,190,453	5,276,764	1,412,893	52,616,425
1917-18	21,553,405	12,631,169	8,900,934	5,500,419	5,328,279	1,459,748	55,373,954
1918-19	23,233,398	13,023,407	9,587,532	5,876,811	5,596,864	1,644,512	58,962,524
1919-20	30,210,013	15,752,459	11,266,910	6,457,039	6,531,725	1,828,301	72,046,447

As in the case of the table previously given for revenue, the above figures relate to the year ended 30th June.

3. **Expenditure per Head.**—Owing to the varying conditions of the several States and the extent to which the different functions of Government are distributed therein between central and local governing authorities, the expenditure per head from Consolidated Revenue Funds differs materially in the several States, being highest in the case of Western Australia and lowest in that of Tasmania. The expenditure per head of population for each State for the years 1915-16 to 1919-20 is as follows :—

STATE EXPENDITURE PER HEAD, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1915-16	10 2 7	8 4 10	11 5 6	10 15 8	17 18 10	6 13 4	10 3 1
1916-17	11 3 11	8 8 6	12 3 0	12 0 5	17 1 9	7 1 4	10 15 10
1917-18	11 9 3	8 19 0	12 18 6	12 12 2	17 4 5	7 3 8	11 4 5
1918-19	12 0 9	9 2 0	13 16 2	13 3 8	17 17 1	7 17 6	11 14 5
1919-20	15 1 8	10 10 6	15 10 8	13 15 9	19 13 10	8 8 9	13 14 7

The total expenditure per head has increased every year in the period under review, although there have been fluctuations in the individual States.

4. **Details of Expenditure for 1919-20.**—The following table furnishes for the year 1919-20 particulars as to the expenditure of the several States under each of the principal heads :—

DETAILS OF STATE EXPENDITURE, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£
Public debt (interest, sinking fund, etc.) ..	6,062,079	3,608,493	2,665,548	1,736,590	2,067,541	700,582	16,840,833

All other expenditure ..	3 10 4	2 0 5	2 10 11	3 10 5	3 9 1	1 6 3	2 17 2
Total ..	15 1 8	10 10 6	15 10 8	13 15 9	19 13 10	8 8 9	13 14 7

6. **Relative Importance.**—The relative importance of the items of expenditure enumerated above varies considerably in the several States. This will readily be seen from the following table, giving for each State the percentage of the expenditure under the various items, on the total expenditure for the State :—

PERCENTAGE OF ITEMS ON TOTAL STATE EXPENDITURE, 1919-20.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	%	%	%	%	%	%	%
Public debt (interest, sinking fund, etc.)	20.07	22.90	23.66	26.89	31.66	38.32	23.37
Railways and tramways (working expenses)	40.09	38.35	38.35	31.93	34.39	23.62	37.78
Justice	1.36	1.23	1.28	0.85	1.10	0.78	1.24
Police	2.98	3.18	3.61	2.43	2.17	3.66	3.02
Penal establishments	0.31	0.40	0.33	0.42	0.39	0.42	0.35
Education	7.76	9.29	8.62	7.18	6.63	9.76	8.12
Medical and charitable	4.11	5.45	7.77	4.76	6.12	7.88	5.31
All other expenditure	23.32	19.20	16.38	25.54	17.54	15.56	20.81
Total	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Taken together, the interest and sinking fund on the public debt, and the working expenses of the railways and tramways, represented for the year 1919-20 about 60 per cent. of the aggregate State expenditure, a proportion which has been maintained with great regularity for many years past.

(C) **Balances.**

1. **Position on 30th June, 1920.**—On various occasions in each of the States the revenue collected for a financial year has failed to provide the funds requisite for defraying the expenditure incurred during that year, the consequence being a deficit which is usually liquidated either by cash obtained from trust funds, or by the issue of Treasury bills. In some of the States a number of such deficits has occurred, interspersed with occasional surpluses, the result being an accumulating overdraft, which in certain instances assumed very large proportions. Thus, during the period of financial stress resultant upon the crisis of 1893 and the drought conditions of succeeding years, the accumulated overdrafts of several of the States grew very rapidly, and the situation has changed very much for the worse in the years preceding 1919-20, so that not one of the States now has a credit balance. The position of the balances of the several Consolidated Revenue Funds on 30th June, 1920, was as follows :—

STATE CONSOLIDATED REVENUE FUND BALANCES, 30th JUNE, 1920.

State.	Cash Credit Balances.	Debit Balance.		Net Result.
		Cash Overdraft.	Overdraft liquidated by Treasury Bills.	
	£	£	£	£
New South Wales	1,804,062	..	Dr. 1,804,062

Queensland	554,606	..	Dr. 554,606
South Australia	1,097,649	..	Dr. 1,097,649
Western Australia	1,320,239	2,766,466	Dr. 4,086,705
Tasmania	145,011	..	Dr. 145,011
Total	5,071,764	4,019,752	Dr. 9,091,516

(D) Principal State Taxes.**(a) Probate and Succession Duties.**

1. **General.**—Probate duties have been levied for a considerable time in all the States of the Commonwealth. From the provisions of the several State Acts governing the payment of duty, it will be seen that both the ordinary rates and those which apply to special beneficiaries differ widely in several cases. A table shewing the values of the estates in the various States in which probates and letters of administration were granted is shewn hereinafter. (See Section XXIII § 5 (4).)

The duty collected in the several States for the financial years 1915-16 to 1919-20 is as follows:—

AMOUNT OF PROBATE AND SUCCESSION DUTIES COLLECTED, 1915-16 TO 1919-20.

State.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
New South Wales	645,554	826,769	677,433	575,875	1,062,533
Victoria	510,032	546,400	506,662	718,194	881,423
Queensland	136,277	146,077	121,986	(a)	(a)
South Australia	183,919	134,620	170,185	221,729	192,540
Western Australia	44,284	40,963	38,710	40,329	121,951
Tasmania	36,700	37,310	50,688	64,410	50,271
Total	1,556,766	1,732,139	1,565,664	1,620,537 (b)	2,308,718 (b)

(a) Included in Stamp Duties.

(b) Excluding Queensland.

(b) Stamp Duties.

1. **Revenue.**—The revenue derived by the several States of the Commonwealth from stamp duties for the years 1915-16 to 1919-20 is shewn in the accompanying table:—

STAMP REVENUE (EXCLUSIVE OF PROBATE AND SUCCESSION DUTIES), 1915-16 TO 1919-20.

State.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
New South Wales	522,992	550,211	616,180	687,304	978,343
Victoria	400,056	376,196	507,573	583,818	822,489
Queensland	185,734	175,186	205,674	a 387,742	a698,382
South Australia	114,169	145,079	179,521	213,130	325,034
Western Australia	64,858	67,035	80,720	112,104	173,541
Tasmania	69,888	77,636	96,215	96,949	128,574
Total	1,357,697	1,391,343	1,685,883	2,081,047	3,126,363

(a) Including Queensland probate and succession duties.

2. **Bank Notes.**—Promissory notes issued by any bank were not required to bear a duty stamp either impressed or adhesive, and might be re-issued as often as thought fit. An annual composition was, however, paid in lieu of stamp duty up to 1910. This

composition was payable quarterly, and was the same in all States, being at the rate of £2 per annum on every £100 or part thereof of the average annual amount of bank notes in circulation. On 2nd June, 1893, the Treasury Notes Act of Queensland became law, by which the issue of Treasury notes payable on demand was authorized. These notes were used exclusively by the banks in that State, but their issue was prohibited by the Federal Bank Note Tax Act, and they have now passed out of circulation. (See Section XXI, Private Finance.)

The issue of bank notes by the banks has practically ceased owing to this Act, which passed the Federal Parliament in the session of 1910, and was assented to on 10th October, 1910. Further reference is made to the Act in the section dealing with Private Finance. It is sufficient to say here that it imposed a tax of 10 per cent. per annum on all bank notes issued or re-issued by any bank in the Commonwealth after the commencement of the Act and not redeemed.

(c) Land Tax.

1. **General.**—All the States now impose a Land Tax, although Queensland, the last State to fall into line, only collected its first levy in 1915-16. Western Australia imposed its first tax in 1907, but in the other States the impost is of very long standing.

The following table shows the amount collected by means of such taxes during the financial years 1915-16 to 1919-20 :—

STATE LAND TAX COLLECTIONS, 1915-16 TO 1919-20.

State.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

Total	887,222	1,000,634	1,014,182	1,180,793	1,056,775

(d) Income Tax.

1. **General.**—A duty on the income of persons, whether it be derived from personal exertion or from property, is now imposed in all the States of the Commonwealth. As might be expected, the rates, exemptions, etc., are widely divergent in the different States, but the general principles of the several Acts are similar. The Dividend Duties Acts of Queensland and Western Australia—the former of which is now repealed—supplied to a certain extent the place of an income tax in those States in former years, but, with the increasing demands upon the State Treasury, the levying of a direct income tax has been found necessary.

In the following table particulars are furnished concerning the total amount collected in the several States during the years 1915-16 to 1919-20. In the case of Western Australia the amount of dividend duty collected is included, this tax being closely allied to the income tax.

STATE INCOME AND DIVIDEND TAXES, 1915-16 TO 1919-20.

State.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
New South Wales	1,707,403	1,973,477	2,182,117	2,355,243	2,308,267
Victoria	702,745	766,746	773,468	928,210	915,551

Western Australia	195,249	196,221	207,963	359,623	416,136
Tasmania	177,730	216,278	259,869	261,028	279,476
Total	3,762,105	4,173,960	4,843,140	6,123,446	6,605,130

§ 3. Trust Funds.

1. *Nature*.—In addition to the moneys received by the several State Governments as revenue, and paid to the credit of their respective Consolidated Revenue Funds, considerable sums are held by the Governments in trust for various purposes. One of the chief sources of these trust funds is the State Savings Bank, which exists in each State either as a Government department or under the control of a Board acting under Government supervision or Government guarantee. In most of the States also, sinking funds for the redemption of public debt are provided, and the moneys accruing thereto are paid to the credit of the appropriate trust funds. A similar course is followed in the case of municipal sinking funds placed in the hands of the Government. In all the States except New South Wales, life assurance companies carrying on business are required to deposit a substantial sum in cash or approved securities with the Government, and these deposits go to further swell the trust funds. Various other deposit accounts, superannuation funds, suspense accounts, etc., find a place in these funds. The trust funds have at various times enabled the several State Treasurers to tide over awkward financial positions, but the propriety of allowing deficits to be frequently liquidated in this manner is open to question.

2. *Extent of Funds*.—The amount of such funds held by the several State Governments on 30th June, 1920, was as follows:—

STATE TRUST FUNDS ON 30th JUNE, 1920.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
Amount of trust funds	9,848,520	12,540,845	494,049	2,335,979	15,902,077	1,023,968	41,157,340

§ 4. Loan Funds.

1. *Nature*.—As early in the history of Australia as 1842 it was deemed expedient to supplement the revenue collections by means of borrowed moneys, the earliest of the loans so raised being obtained by New South Wales for the purpose of assisting immigration, at rates of interest varying from 2½d. to 5½d. per £100 per diem, or approximately from 4¼ per cent. to 8 per cent. per annum. The principal reason for Australian public borrowing, however, has been the fact that the Governments of the several States have, in addition to ordinary administrative duties, undertaken the performance of many functions which, in other countries, are usually entrusted to local authorities, or left to the initiative of private enterprise. Principal amongst these have been the construction of railways and the control of the railway systems

of the several States, while the assumption by the State Governments of responsibilities in connexion with improvements to harbours and rivers, as well as the construction of works for the purposes of water supply and sewerage, have materially swelled the amounts which it has been considered expedient to obtain by means of loans. The Australian State loan expenditure and public debt thus differ very materially from those of most European countries, and also from those of the Commonwealth, where such expenditure was very largely incurred for purposes of defence, or absorbed in the prosecution of war. The State debts of Australia, on the other hand, consist in the main of moneys raised and expended with the object of assisting the development of the resources of the Commonwealth, and are, to a very large extent, represented by tangible assets such as railways, tramways, waterworks, etc.

2. Loan Expenditure, 1919-20.—During the year ended 30th June, 1920, the actual expenditure of the Australian States from loan funds amounted to £28,679,932, New South Wales with a total of £8,794,905 being the principal contributor to this amount. The expenditure on railways and tramways is a very heavy item, but the main cause of this large expenditure is the settlement of returned soldiers upon the land. Details for the year for each State are given in the following table :—

STATE LOAN EXPENDITURE, 1919-20.

Heads of Expenditure.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.
	£	£	£	£	£	£	£

(a) Repayment.

3. Aggregate Loan Expenditure.—The total loan expenditure of the Australian States from the initiation of the borrowing system to the 30th June, 1920, has amounted to no less a sum than £423,022,779. The manner in which this sum has been spent in the several States is furnished in the following table :—

AGGREGATE STATE LOAN EXPENDITURE TO 30th JUNE, 1920.

Heads of Expenditure.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	All States.

(a) Repayment.

It must be noted that the figures furnished in this table represent the amounts actually spent, and consequently differ somewhat from those given later in the statements relating to the public debt, which represent amount of loans still unpaid at a given date. The loan expenditure statement includes all such expenditure, whether the loans by means of which the necessary funds were raised have been repaid or are still in existence. On the other hand, in the public debt statement loans repaid are excluded, but in the case of loans still outstanding each is shewn according to the amount repayable at maturity, not according to the amount originally available for expenditure.

4. **Relative Importance of Loan Items.**—The relative importance of the different items of loan expenditure given in the foregoing table varies considerably in the several States. The following table gives for each State the percentage of each item on the total loan expenditure of that State to 30th June, 1920:—

PERCENTAGE OF EACH ITEM ON TOTAL LOAN EXPENDITURE OF THE STATES TO 30th JUNE, 1920.

5. **Loan Expenditure in Successive Years.**—In the following table are given particulars relative to the loan expenditure of the several States during each of the years 1915-16 to 1919-20:—

STATE LOAN EXPENDITURE, 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
1915-16..	8,173,104	4,473,569	3,061,839	2,097,197	1,584,643	880,394	20,270,746
1916-17..	6,862,179	2,440,966	2,267,962	1,811,531	855,184	476,472	14,714,294
1917-18..	4,487,511	1,931,679	1,828,320	1,586,766	1,054,177	518,929	11,407,382
1918-19..	3,918,887	2,932,521	2,736,412	2,006,166	1,049,736	575,054	13,218,776
1919-20..	8,794,905	7,601,266	4,797,865	3,446,617	2,663,319	1,375,960	28,679,932

Throughout the five years under review the loan expenditure of New South Wales exceeded that of any other of the States, and for many years has represented on the average about 35 per cent. of the aggregate of Australia.

6. **Loan Expenditure per Head.**—The loan expenditure per head of population varies materially in the different States and in different years, reaching its highest point for the five years under review in Western Australia in 1919-20 with £8 0s. 7d. per head, and its lowest in Victoria in 1917-18 with 27s. 5d. per head. Particulars concerning the loan expenditure per head for the five years 1915-16 to 1919-20 are given hereunder:—

STATE LOAN EXPENDITURE PER HEAD, 1915-16 TO 1919-20.

§ 5. Public Debt.

1. **Initiation of Public Borrowing.**—The earliest of the loans raised in Australia for Government purposes was that obtained by New South Wales in 1842. This and nine other loans raised prior to 1855 were all procured locally. In the last-mentioned year Australia's first appearance on the London market occurred, the occasion being the placing of the first instalment of the New South Wales 5 per cent. loan for £683,300. Victoria first appeared as a borrower in 1854, and made its first appearance on the London market in 1859. In the remaining States the first public loans were raised in the following years:—Queensland 1861, South Australia 1854, Western Australia 1845, and Tasmania 1867.

2. **Nature of Securities.**—All the earlier loans raised by the Australian States were obtained by the issue of debentures, some of which were repayable at fixed dates, and others by annual or other periodical drawings. In more recent years, however, the issue of debentures has given place to a great extent to that of inscribed stock, the inscription in the case of local issues being carried out by the State Treasuries, and in the cases of loans floated in London being mainly performed by the Bank of England and the London County and Westminster Bank. The issue of debentures has not, however, been entirely discontinued, for within recent years debentures to a large amount have been placed on the market by the Government of New South Wales. In other States also, recent issues of debentures have taken place, the occasions usually being those in which the term of the loan is less than that ordinarily attaching to issues of inscribed stock. Another form of security is that variously known as the Treasury bill or Treasury bond. This is usually merely a short term debenture having a currency in most instances of from three to five years. The bonds are issued in certain cases to liquidate deficiencies in revenue, and in others to obtain moneys for the purpose of carrying on public works at a time when it is deemed inexpedient to place a permanent loan on the market. The amount of the public debt of the several States held in each of these forms of security is furnished in the table hereunder:—

PUBLIC DEBT OF THE AUSTRALIAN STATES, 30th JUNE, 1920.

State.	Debentures.	Inscribed Stock.	Treasury Bills.		Total Amount Outstanding.
			For Public Works and Services.	In aid of Revenue.	
	£	£	£	£	£
New South Wales	13,966,350	128,525,532	10,284,200	..	162,776,082
Victoria ..	28,419,107	55,023,347	2,952,000	1,253,285	87,647,739
Queensland ..	24,351,399	41,632,337	1,379,350	..	(a) 69,680,764
South Australia	2,013,000	34,299,121	7,441,025	..	43,753,146
Western Australia	1,424,455	35,856,576	5,146,370	2,893,505	(b) 46,822,003
Tasmania	2,070,264	13,559,774	1,000,000	..	16,630,038
Total ..	72,244,575	308,896,687	28,202,945	4,146,790	(a), (b) 417,309,772

(a) Including loans of £2,317,678 from the Commonwealth Government not represented by securities.

(b) Including advance of £1,501,097 from Commonwealth.

The manner in which the amount of public debt of the Australian States held under these various forms of security has grown during the past six years will be seen from the following table:—

PUBLIC DEBT OF THE AUSTRALIAN STATES, 1915-16 TO 1919-20.

Date.	Debentures.	Inscribed Stock.	Treasury Bills.		Total Amount Outstanding.
			For Public Works and Services.	In aid of Revenue.

30th June, 1916 ..	51,069,616	277,268,688	27,074,647	2,400,820	357,813,771
" 1917 ..	60,364,239	279,252,215	29,782,535	3,118,635	372,517,624
" 1918 ..	63,616,822	296,459,069	28,468,060	3,996,210	392,540,161
" 1919 ..	70,928,892	289,785,322	28,961,760	5,626,140	(a) 396,356,149
" 1920 ..	72,244,575	308,896,687	28,202,945	4,146,790	(b) 417,309,772

(a) Including Queensland loan of £1,054,035 not represented by securities.

(b) Including Queensland and West Australian loans of £3,818,775 not represented by securities.

During the period between 30th June, 1916, and 30th June, 1920, the public debt of the States increased by £59,496,001, or at the rate of about £15,000,000 per annum.

3. **Increase in Indebtedness of the Several States.**—The table given hereunder furnishes particulars of the increase which has taken place during the past five years in the public debts of the several States:—

PUBLIC DEBT OF THE AUSTRALIAN STATES, 30th JUNE, 1916 TO 1920.

Date.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	All States.
	£	£	£	£	£	£	£
30th June, 1916 ..	130,514,018	76,775,032	58,732,843	37,993,289	39,889,676	13,908,913	357,813,771
" 1917 ..	138,138,347	78,125,395	61,303,136	39,364,280	40,914,826	14,671,640	372,517,624
" 1918 ..	152,584,693	79,595,646	62,296,986	40,621,480	42,304,001	15,137,355	392,540,161
" 1919 ..	147,174,536	82,031,929	65,581,121	42,650,206	43,637,076	15,281,281	396,356,149
" 1920 ..	152,776,082	87,647,739	69,680,764	43,753,146	46,822,003	16,630,038	417,309,772

The State in which the greatest increase in indebtedness was experienced during the period is New South Wales, which added £22,262,064 during the period under review. On the other hand, the public debt of Tasmania increased by less than £3,000,000. There was an apparent decline in the Public Debt of New South Wales in 1918-19. This was due to the fact that the debt in 1917-18 included stock raised in February, 1918, for the redemption of loans maturing in September, 1918.

4. **Indebtedness per Head.**—The indebtedness per head of population varies considerably in the several States, being highest in the case of Western Australia, and lowest in that of Victoria. Details for the period from 30th June, 1916, to 30th June, 1920, are as follows:—

PUBLIC DEBT OF AUSTRALIAN STATES PER HEAD, 30th JUNE, 1916 TO 1920.

5. **Flotation of Loans.**—The early loans of the Australian States, usually for comparatively small amounts, were raised locally, but, with the increasing demand for loan funds and the more favorable terms offering in the London than in the local money market, the practice of placing Australian public loans in London came into vogue, and for many years local flotations, except for short terms or small amounts, were comparatively infrequent. In more recent years, however, the accumulating stocks of money in Australia seeking investment have led to the placing of various redemption and other loans locally, with very satisfactory results. In the following table are given particulars of loans of the several States outstanding on 30th June, 1920, which had been floated in London and Australia respectively :—

PUBLIC DEBT OF AUSTRALIAN STATES, 30th JUNE, 1920.

Total ..	263,412,174	63.12	153,897,598	36.88	417,309,772

The following table, giving corresponding particulars for the aggregate indebtedness of the Australian States at the end of each of the financial years 1915-16 to 1919-20, furnishes an indication of the rapidity with which the local holdings of Australian securities have grown in recent years :—

PUBLIC DEBT OF AUSTRALIAN STATES, 30th JUNE, 1916 TO 1920.

Date.	Floated in London.		Floated in Australia.		Total Public Debt.
	Amount.	Percentage on Total Debt.	Amount.	Percentage on Total Debt.	
	£	%	£	%	£
30th June, 1916 ..	232,040,101	64.85	125,773,670	35.15	357,813,771
" 1917 ..	243,735,172	65.43	128,782,452	34.57	372,517,624
" 1918 ..	261,107,683	66.52	131,432,478	33.48	392,540,161
" 1919 ..	258,200,003	65.14	138,156,146	34.86	396,356,149
" 1920 ..	263,412,174	63.12	153,897,598	36.88	417,309,772

It will be seen that in the course of five years the London indebtedness of the States has increased by £31,372,073, while the local indebtedness has increased by £28,123,928. In other words, the Australian proportion had on 30th June, 1920, grown to more than one-third, and has remained at about one-third for the last five years.

It will be noticed in the foregoing table that the Australian indebtedness of the States increased during the year 1919-20 to a figure absolutely higher than had ever before been attained. This was due, in the main, to an arrangement with the Commonwealth Government, which was concluded shortly after the outbreak of war. It seemed very probable, at that period, that London would be reluctant to make

advances for other than military purposes, and this would have seriously embarrassed several of the States which were committed to a vigorous public works and developmental policy. The Commonwealth Government met the situation by advancing £18,000,000 to five of the States in the following proportion:—New South Wales, £7,400,000; Victoria, £3,900,000; South Australia, £2,600,000; Western Australia, £3,100,000; and Tasmania, £1,000,000. Victoria contracted her portion of the debt in debentures, whereas the remaining States chose Treasury bills, but otherwise the conditions were the same. The Commonwealth Government paid the money in monthly instalments, and the rate of interest was fixed at $4\frac{1}{2}$ per cent. The money was taken entirely from the Australian Notes Account, and the whole transaction furnishes another illustration of the increasingly intimate financial relationship between the Commonwealth and State Governments, to which reference was made in the preceding chapter. (page 691). Further advances were made to the States by the Commonwealth in 1916–19 out of the proceeds of loans contracted in London. The loans aggregated £16,750,000, and carried interest partly at $5\frac{1}{2}$ per cent., and partly at $5\frac{1}{2}$ per cent. Lastly, advances have been made by the Commonwealth Government to some of the State Governments for the purpose of settling returned soldiers on the land, for the construction of silos for wheat storage, and for providing employment. By agreement between the State Treasurers and the Commonwealth Treasurer, the £18,000,000 already referred to is to be repaid within five years of the termination of the war, but not later than 1925.

6. Rates of Interest.—As mentioned above, the highest rate of interest paid in connexion with the earliest Australian public loans was fivepence farthing per £100 per diem, or, approximately, 8 per cent. per annum. At the present time the principal rates of interest payable on Australian public securities are $5\frac{1}{2}$ per cent., $5\frac{1}{2}$ per cent., 5 per cent., $4\frac{1}{2}$ per cent., $4\frac{1}{2}$ per cent., 4 per cent., $3\frac{1}{2}$ per cent., $3\frac{1}{2}$ per cent., and 3 per cent. It is most probable, however, that the amount of outstanding debt at the higher rates will increase materially in the future, since conversion can scarcely be effected at present at a lower rate of interest than $5\frac{1}{2}$ per cent. The average rate payable on the aggregate indebtedness of the Australian States is about 4 per cent. For the separate States the average rate payable varies considerably, being lowest in the case of Western Australia and highest in that of New South Wales; the difference between these two average rates is about $\frac{1}{2}$ per cent. In the table given hereunder particulars are furnished of the rates of interest payable on the public debt of the several States of the Commonwealth on 30th June, 1920:—

RATES OF INTEREST PAYABLE ON PUBLIC DEBT OF STATES, 30th JUNE, 1920.

 (b) Including £2,317,678 } rate not settled.

The rapid increase which has taken place in recent years in the amount of Australian Government securities, bearing interest at the higher rates, is clearly shown in the table hereunder, which gives particulars concerning the aggregate amount of the Australian indebtedness, at the several rates of interest, on 30th June in each of the years 1916 to 1920 :—

**RATES OF INTEREST PAYABLE ON PUBLIC DEBT OF STATES, 30th JUNE,
1916 TO 1920.**

Rate of Interest.	30th June, 1916.	30th June, 1917.	30th June, 1918.	30th June, 1919.	30th June, 1920.
%	£	£	£	£	£
6	39,900	19,900	1,900	..	2,241,800
5½	13,076,000	16,076,000	19,576,000
5½	5,590,000	10,180,000	20,924,002	35,333,489

4	18,000,000	18,000,000	18,000,000	18,000,000	18,000,000
4	97,965,741	95,382,445	93,220,106	92,321,823	87,383,638
3½	25,989,072	24,714,487	24,376,838	23,834,798	12,654,252
3½	129,732,699	127,146,373	124,075,299	110,222,724	109,989,876
3	(a) 46,591,188	(a) 46,450,341	(a) 46,376,402	(a) 46,439,891	46,269,852
Not bearing interest ..	8,150	19,017	8,250	7,400	38,255
Total public debt ..	357,813,771	372,517,624	392,540,161	(b) 796,356,149	(c) 417,309,772
Average rate per cent. payable	£3/15/1	£3/16/6	£3/18/6	£4/0/3	£4/3/4

(a) Including £24,718 at 3½ per cent. (b) Including £254,035 for which rate of interest has not been fixed.
(c) Including £3,622,280 for which the rate of interest has not been fixed.

The feature of this table is the rapid rise in the average rate of interest. The process started in 1912, but was accelerated by the war, which has virtually made 5½ per cent. the present minimum rate of interest for gilt-edged securities. The average rate is likely to rise for some considerable time, since securities falling due in the immediate future will, in all likelihood, have to be renewed at a higher rate of interest.

7. Interest per Head.—The relative burden of the debts of the several States in respect of interest payments will be seen from the following table, which gives for the 30th June, 1920, the amount of interest paid during the financial year ending at that date, and also the corresponding amount per head of population :—

STATE DEBTS.—INTEREST PAID DURING 1919-20.

(a) Inclusive of flotation expenses.

8. Dates of Maturity.—An important point of difference between the securities of the Australian Governments, whether in the form of inscribed stock, debentures, or Treasury bills, and such a well-known form of security as British Consols, is that whereas the latter are interminable, the Australian Government securities have in almost all cases a fixed date for repayment, there being only a few exceptions, which are included in the following table under the headings "interminable" and "indefinite." The "indefinite" includes amounts which are payable by the respective Governments after giving a specified notice, and also certain amounts owing to the Commonwealth Government. The terms of the loans raised by the issue of debentures and inscribed stock have varied considerably

in the different States, ranging between fifteen and fifty years, while loans obtained by means of Treasury bills have usually been for such short terms as from six months to five years. In the case of the majority of the loans the arrival of the date of maturity means that arrangements for renewal are necessary in respect of the greater portion of the loan, as it is only in exceptional cases that due provision for redemption has been made. The condition of the money market at the date of maturity has an important bearing on the success or otherwise with which the renewal arrangements can be effected, and consequently, in order to obviate the necessity for making an application to the market at an unfavorable time, several of the States have now adopted the practice of specifying a period of from ten to twenty years prior to the date of maturity within which the Government, on giving twelve, or in some cases six, months' notice, has the option of redeeming the loan. By such means advantage may be taken by the Government during the period of opportunities that may offer for favorable renewals. Particulars concerning the due dates of the loans of the several States outstanding on 30th June, 1920, are given in the following table.

Those loans in the case of which the Government has the option of redemption during a specified period have been in each instance classified according to the latest date of maturity :—

DUE DATES OF THE PUBLIC DEBTS OF THE SEVERAL STATES OUTSTANDING ON 30th JUNE, 1920.

9. **Sinking Funds.**—The practice of providing for the ultimate extinction of the public debt by means of the creation of sinking funds, receiving definite annual contributions from Consolidated Revenue, and accumulating at compound interest, has only been consistently adopted in the case of Western Australia. This State has established, in connexion with each of its loans, sinking funds varying from 1 per cent. to 3 per cent. per annum of the nominal amount of the loan. These funds are placed in the hands of trustees in London, by whom they are invested in the securities of the British, Indian, and Colonial Governments, and applied from time to time to the redemption of loans falling due. In the remaining States the sinking fund provision made is varied, consisting in certain instances of the revenues from specified sources, in others of the Consolidated Revenue Fund surplus, and in others again of fixed annual amounts. In the following table are given particulars of the sinking funds of each State, and the net indebtedness of each after allowance for sinking fund has been made, the details given being those for 30th June, 1920 :—

STATE SINKING FUNDS AND NET INDEBTEDNESS, 30th JUNE, 1920.

10. **Total Public Debt, Commonwealth and States.**—With the object of setting out the entire liability of the Australian public, the Commonwealth and State debts have been brought together into one statement in the appended table. It will be noticed that there is a column headed "deduction for debts counted twice." This includes transferred properties for every year, and, for the last four years, loans raised in London by the Commonwealth on behalf of the States.

PUBLIC DEBT OF AUSTRALIA FOR FIVE YEARS, 1915-16 TO 1919-20.

CONSPECTUS OF INCOME TAX ACTS

Particulars.	Commonwealth.	New South Wales.	Victoria.
6. Taxation of Companies (other than Mining and Insurance Companies)	The taxable income is the total amount of income whether distributed or available for distribution to shareholders	Companies are taxed in the same manner as individual persons, but at a different rate	The taxable income is the profits earned in Victoria, and companies are taxed similarly to individuals, but at a different rate
7. Mining Companies	Except in the case of coal mines, the capital expended must be divided by the estimated number of years during which payable operations may be expected to continue, and the quotient thus obtained deducted from the income	Same as ordinary companies	The taxable income is to be the total amount of dividends declared and debenture interest paid
8. Insurance (other than Life Insurance Companies)	Same as ordinary companies	Same as ordinary companies	Same as ordinary companies, the amount of premiums may not be deducted
9. Life Insurance Companies	Same as ordinary companies, but the amount received in premiums is deducted. A reversionary bonus on a policy is not taxable	Same as ordinary companies	The taxable income is 30 per cent. of the premiums received, and for industrial life assurance business 15 per cent. of the premiums
10. Incomes exempt from Taxation	<p>(a) Revenue of a municipal corporation or other local authority</p> <p>(b) Income of a registered Friendly Society</p> <p>(c) Income of a registered Trade Union or Employers' or Employees' Association</p> <p>(d) Income of a religious, scientific, charitable, or public educational institution</p> <p>(e) Interest on Commonwealth War Loans, which are declared to be free from Income Tax</p> <p>(f) Income of a provident, benefit, or superannuation fund for employees.</p> <p>(g) Salaries of the Governor-General and State Governors</p> <p>(h) Income from personal exertion during war of persons on active service</p> <p>(i) Salaries of consuls and British trade commissioners</p> <p>(j) War pensions</p> <p>(k) Income of societies or associations not carried on for gain</p>	<p>(a) Revenues of municipal corporations and local authorities</p> <p>(b) Incomes of mutual life assurance societies and companies not carrying on business for gain</p> <p>(c) Profits of Savings Banks</p> <p>(d) Incomes of registered Friendly Societies and Trade Unions</p> <p>(e) Incomes of public ecclesiastical, charitable, or educational institutions</p> <p>(f) Income from sources outside the State</p> <p>(g) Incomes of Starr-Bowkett Societies</p> <p>(h) Income from Government securities</p> <p>(i) Income from shares in a company (dividends being taxed at their source)</p>	<p>(a) Income received by His Majesty, Railway Commissioners, public and local authorities, State Savings Bank, University, and technical schools when such income is official</p> <p>(b) Emoluments of the Governor</p> <p>(c) Income of bodies formed solely for the promotion of religion</p> <p>(d) Income of registered Friendly, Provident and Building Societies and Trade Unions, and Societies, etc., not engaged in trade for gain</p> <p>(e) Income from any insurance business licensed under the <i>Stamp Act</i></p> <p>(f) Interest accruing to a person not resident in Victoria from Victorian Government stock or municipal bonds</p> <p>(g) Pensions paid under any Commonwealth Act relating to war pensions</p> <p>(h) Interest on Government, Savings Bank, or Crédit Foncier securities</p> <p>(i) Dividends from companies</p>

IN FORCE IN AUSTRALIA, 1921—continued.

Queensland.	South Australia.	Western Australia.	Tasmania.
<p>(a) <i>Local Companies</i>—Tax is paid upon dividends and undistributed profits</p> <p>(b) <i>Foreign Companies</i>—Income is the profits on Queensland business, or taxable amount may be assessed at 7½ per cent. of sales in Queensland if a mercantile company or of capital if any other company</p>	<p>Income of a company is ascertained in the same way as that of an individual, but the amount accruing in South Australia is the only taxable amount, and is deemed to be income derived from property and taxable on that basis</p>	<p>Companies pay duty under the <i>Dividend Duties Act</i> upon dividends</p>	<p>(a) Companies pay income tax on all dividends and profits and on interest on borrowed money</p> <p>(b) The full amount of income is taxable in the case of a company having its head office in Tasmania</p> <p>(c) The taxable income of a foreign company is 5 per cent. of the turnover in the State of the capital; and the minimum assessment of such a company is £1,000</p>
<p>Profits are taken to be applied in the first place to repayment of the cost of labour and materials employed in developing the mine, and in the second place in repayment of three-fourths of the cost of machinery for raising ores and other material</p>	<p>No special provision</p>	<p>(a) The cost incurred for labour and material employed in development work and for testing mines under option of purchase may be deducted</p> <p>(b) The sale price of a mine when sold is deemed to be the taxable income, less deduction for capital expenditure</p>	<p>In the case of a mining company incorporated in Tasmania, carrying on the whole of its operations outside the State, the taxable amount is one-half of all dividends</p>
<p>The taxable income of a foreign company is 25 per cent. of the premiums received on Queensland business, less premiums paid in reinsurance</p>	<p>Same as ordinary companies</p>	<p>Duty is levied on the amount of net premiums received exclusive of premiums paid away in reinsurance</p>	<p>The taxable income of a foreign company is 50 per cent. of the premiums received, less the amount paid in reinsurance</p>
<p>The taxable income of a foreign company is 25 per cent. of ordinary and 15 per cent. of industrial premiums received on Queensland business</p>	<p>The taxable income is the amount of surplus or profits actually distributable amongst South Australian policy-holders</p>	<p>Duty is payable only on the amount received in interest on investments</p>	<p>The taxable income of a foreign company is 20 per cent. of the premiums received in the State</p>
<p>(a) Income of the Governor so far as respects the emoluments of his office as Governor</p> <p>(b) Revenues of local authorities and local bodies</p> <p>(c) Incomes of societies and institutions not carrying on business for gain</p> <p>(d) Funds and incomes of registered Friendly Societies and Trade Unions</p> <p>(e) Incomes and revenues of religious, charitable, and educational institutions of a public character</p> <p>(f) War gratuities granted by the Government of the Commonwealth</p> <p>(g) Income from companies which have paid duty on dividends</p> <p>(h) Income from interest on Queensland and Commonwealth securities</p>	<p>(a) Incomes of municipal corporations and district councils</p> <p>(b) Incomes of companies and societies not carrying on business for gain to be divided among the members</p> <p>(c) Incomes of Friendly Societies</p> <p>(d) Income from interest on Government securities</p>	<p>(a) Revenues of municipal corporations, road boards, and public bodies</p> <p>(b) Incomes of life insurance companies and companies or societies not carrying on business for gain, except interest on investments</p> <p>(c) Dividends and profits of the Government Savings Bank and Agricultural Bank</p> <p>(d) Funds and incomes of registered Friendly Societies and Trade and Industrial Unions</p> <p>(e) Incomes and revenues of public, ecclesiastical, charitable, and educational institutions</p> <p>(f) Salary and emoluments of the Governor</p> <p>(g) Income of a British pensioner, if taxable elsewhere</p> <p>(h) Pensions for injuries received on active service</p> <p>(i) Income from Government securities</p>	<p>(a) Incomes of companies, registered without "Limited," societies or public bodies not carrying on business or trading for gain to the members</p> <p>(b) Revenues of marine boards, municipal corporations, water trusts, and local authorities</p> <p>(c) Funds and incomes of registered Friendly Societies and Trade Unions</p> <p>(d) Dividends and profits of the State Savings Bank and Agricultural Bank of Tasmania</p> <p>(e) Police Provident Fund, Closer Settlements Fund, and any fund exempted by Statute</p> <p>(f) Income of the Governor</p> <p>(g) Income of every person arriving in Tasmania for six months after arrival (not applying to a company or person carrying on business in the State)</p> <p>(h) Salaries of the Agent-General and his officers</p> <p>(i) Commonwealth war pensions</p>

CONSPECTUS OF INCOME TAX ACTS

CONSPECTUS OF LAND TAX ACTS

Particulars.	Commonwealth.	New South Wales.	Victoria.
2. Definitions— <i>continued.</i>	(c) <i>Unimproved value</i> , the capital sum which the fee-simple of the land might be expected to realize, if offered for sale on reasonable terms assuming that improvements had not been made	(v) entitled to receive rents and profits as a beneficiary owner, trustee, mortgagee in possession or otherwise (b) <i>Unimproved value</i> , the capital sum for which the fee-simple would sell under reasonable conditions, assuming that improvements had not been made	(v) every person so entitled partly in one and partly in another of the foregoing ways (b) <i>Unimproved Value</i> means the sum which the owner's estate or interest, if unencumbered, might be expected to realize if offered on reasonable terms, assuming that improvements had not been made. That of land under Crown lease or license is the same after deducting the amount of purchase money which is not due
3. Administration of Act	The Act is administered by a Commissioner of Land Tax, subject to the control of the Minister	The Act is administered by three Commissioners	The Commissioner of Taxes under the Income Tax Act is also the Commissioner for Land Tax, unless the Governor appoints some other person
4. Liability for Taxation	Every owner of land is liable for taxation on the unimproved value thereof, after deducting the sum of £5,000, excepting that no deduction is allowed in the case of an owner, who is an absentee	Land tax must be paid on the unimproved value of land, after deducting £240, except in municipalities and shires, the councils of which levy a general rate on the unimproved capital value of all rateable property. The amount of income tax leviable upon any interest on a mortgage may also be deducted	Every owner of land, the value of which exceeds £250, must pay land tax based on the unimproved value. Where the value exceeds £250, a deduction of £250 is allowed, diminishing by £1 for every £1 of value in excess thereof, so that when the value is £500 or over, no deduction is allowed
5. Lands exempted from Taxation	(a) Land owned by a State or municipal, local, or other public authority (b) Land owned by a State Savings Bank (c) Land owned by a registered Friendly Society or Trade Union (d) Land owned by a registered Building Society, unless obtained by foreclosure of a mortgage (e) Land owned by or in trust for a charitable or educational institution, if not carried on for profit (f) Land owned by or in trust for a religious society, for superannuation purposes, or for religious or educational purposes (g) Land used as a site for (i) a place of worship or residence for clergy or a religious order or society; (ii) a charitable or educational institution not carried on for profit; (iii) a building owned and occupied by a club or society not carried on for profit; (iv) a public library, institute or museum; (v) a show ground; (vi) a public cemetery or burial ground; (vii) a public garden, recreation ground, or reserve; (viii) a public road; (ix) a fire brigade station	(a) Crown lands not subject to right of purchase and lands held by conditional or special lease or homestead selections (b) Land vested in His Majesty (c) Land vested in the Railway Commissioners (d) Public roads, reserves, and parks, cemeteries, and commons (e) Land used for pounds, public hospitals, benevolent institutions, public charitable purposes, churches, chapels, universities, and affiliated colleges, Sydney Grammar School, mechanics' institutes, schools of arts, markets, town halls, and lands vested in a municipality, public hospital, university or affiliated colleges (f) Land vested in trustees for zoological, agricultural, pastoral, or horticultural show purposes, or other public or scientific purposes (g) Land used for the site of residence of a minister ministering at some place of public worship (h) Land used for a school attached to or connected with any place of public worship	(a) Land the property of His Majesty which is unoccupied or used for public purposes (b) Land used exclusively for (i) commons; (ii) mines; (iii) public worship; (iv) mechanics' institutes or art galleries; (v) public libraries; (vi) cemeteries; (vii) agricultural show grounds; (viii) public gardens, domains, or other reserves; (ix) free primary schools; (x) charitable purposes; (xi) the purposes of any club for cricket, football, golf, bowling, tennis, or other athletic recreation, if the revenue is not applied by way of profit to individual members; (xii) public technical and working men's schools and colleges and schools and colleges affiliated with the University of Melbourne; (xiii) the University of Melbourne

IN FORCE IN AUSTRALIA, 1921—continued.

Queensland.	South Australia.	Western Australia.	Tasmania.
<p>(ii) entitled to receive rents and profits, as beneficial owner, trustee, mortgagee in possession or otherwise</p> <p>(c) <i>Unimproved Value</i>, the capital sum which the fee-simple might be expected to realize if offered for sale on reasonable terms, assuming that improvements had not been made</p>	<p>(c) <i>Unimproved Value</i>, the capital amount for which the fee-simple might be expected to sell, if free from encumbrances, assuming that the actual improvements had not been made</p>	<p>(iv) a settlor, grantor, assignor or transferrer of land in any settlement, etc., not made <i>bona fide</i>; or</p> <p>(v) entitled to land partly in one and partly in another way; or</p> <p>(vi) entitled to receive rents and profits as beneficial owner, trustee, mortgagee in possession or otherwise</p> <p>(b) <i>Unimproved Value</i>—</p> <p>(i) Land in fee-simple, the capital sum for which the fee-simple would sell under reasonable conditions without improvements</p> <p>(ii) Conditional purchase, the same assuming that the taxpayer was owner of the fee-simple</p> <p>(iii) Leasehold, twenty times the amount of annual rent</p>	<p>(v) entitled to land partly in one and partly in another way; or</p> <p>(vi) in possession or occupation of land held under any authority from the Governor of New South Wales or Lieutenant-Governor of Tasmania; or</p> <p>(vii) the holder of Crown land purchased on credit; or</p> <p>(viii) entitled to receive rents and profits as beneficial owner, trustee, mortgagee in possession or otherwise; or</p> <p>(ix) in possession of land under lease for not less than ten years</p> <p>(b) <i>Unimproved Value</i>, that ascertained under the <i>Land Valuation Act</i></p>
The Act is administered by a Commissioner of Land Tax	The taxes are under the control, direction and management of the Commissioner of Taxes	The provisions of the Act are carried out by the Commissioner of Taxation	The collection and recovery of taxes is under the control, direction and management of the Commissioner of Taxes
Land Tax is leviable on the unimproved value of all lands. A taxpayer, not being a company or absentee, may deduct £300. In ascertaining the taxable value of undeveloped land, the amount of exemption must bear the same proportion to £300 as the total value of all the undeveloped land bears to that of all the land held by the same taxpayer	Land tax is imposed upon the unimproved value of all land, including land of the Crown while subject to any agreement for sale or right of purchase, as well as perpetual leases	Every owner of land, the unimproved value of which does not exceed £50, is liable for land tax on such value. Every owner of improved land is entitled to a rebate of one half of the tax on the unimproved value. Improved lands outside a municipality used for agricultural, horticultural, pastoral or grazing purposes are assessed after deducting £250	Every person whose name appears in any district valuation roll under the provisions of the <i>Land Valuation Act</i> is liable to be taxed on the unimproved value of his land
<p>(a) Land owned by the Commonwealth, the State or a local or other public authority</p> <p>(b) Land owned by or in trust for a registered Friendly Society</p> <p>(c) Land owned by or in trust for a Trade Union not used for pecuniary profit</p> <p>(d) Land owned by or in trust for a registered Building Society, not obtained by foreclosure of a mortgage</p> <p>(e) Land owned by or in trust for a charitable or educational institution, if not carried on for profit</p> <p>(f) Land owned by or in trust for a religious society used for superannuation, religious, charitable, or educational purposes</p> <p>(g) Land used as a site for</p> <p>(i) a place of worship or place of residence of a minister or religious order;</p> <p>(ii) a charitable or educational institution not carried on for profit; (iii) a building owned and occupied by a society, club, or association not carried on for profit;</p> <p>(iv) a public library, institute or museum; (v) a show ground; (vi) a public cemetery; (vii) a public garden, recreation ground, or reserve; (viii) a public road; (ix) a fire brigade station</p>	<p>(a) Crown land which, for the time being, is not subject to any agreement for sale or right of purchase</p> <p>(b) Park lands, public roads, public cemeteries, and other public reserves</p> <p>(c) Land used solely for religious or charitable purposes or used by any institute under the provisions of the <i>Public Library, Museum, and Art Gallery and Institutes Act</i></p> <p>(d) Land exempted by special legislation from taxation</p>	<p>(a) Lands owned by or on behalf of His Majesty</p> <p>(b) Lands held under contract for conditional purchase for five years from date of contract, but this does not apply to a taxpayer holding less than 1,000 acres of cultivable or 2,500 acres of grazing land</p> <p>(c) Public roads, reserves, and parks, university endowments, cemeteries, and commons</p> <p>(d) Lands used for a public hospital, a benevolent institution, a public charitable purpose, a church, a chapel, a site of a ministering clergyman, a school connected with a place of public worship, a mechanics' institute, or a school of arts; land belonging to and occupied by a religious body; lands on which are erected a State or municipal market, town hall, or municipal council chamber; land owned by or vested in a municipal corporation, road board, or other statutory body</p> <p>(e) Lands held as mining tenements under the <i>Mining Act</i></p> <p>(f) Lands used for zoological, agricultural, pastoral, or horticultural show purposes or other public or scientific purposes</p>	<p>(a) Crown lands which for the time being, are not subject to lease, agreement for sale or right of purchase</p> <p>(b) Land the property of and occupied by or on behalf of His Majesty</p> <p>(c) Land held under lease or licence granted under any Act except the <i>Closer Settlement Act</i></p> <p>(d) Public roads, public cemeteries not the property of a company, and public recreation grounds and reserves</p> <p>(e) Land on which is built any hospital, benevolent asylum, or building used solely for charitable or religious purposes</p> <p>(f) Land vested in trust for public purposes</p> <p>(g) Land on which is built any public library or museum</p> <p>(h) Land the property of a registered Friendly Society</p> <p>(i) Land owned by a local authority or other local governing or statutory public body</p> <p>(j) Land used exclusively for holding public exhibitions not for the purpose of gain</p> <p>(k) Crown land situate beyond the limits of any town subject to a contract to purchase on credit until seven years from the date of contract have elapsed</p>

CONSPECTUS OF LAND TAX ACTS

Particulars.	Commonwealth.	New South Wales.	Victoria.
6. Returns	Every taxpayer must annually furnish returns of the improved and unimproved values of every parcel of land owned by him. Where he has furnished full returns in any one year, he may in the two succeeding years furnish supplementary returns	The Commissioners must give 30 days' notice of the time and place at which all taxpayers must furnish returns. Should a taxpayer fail to do so, the Commissioner may appoint some person to make a return on his behalf	Returns must be furnished by every land-owner, and no person is released from his liability to make returns by reason that he is, in consequence of exemptions or deductions, not liable to pay tax. The Commissioner may also cause valuations of land to be made
7. Payment of Tax.	One month's notice must be given of the date upon which land tax is payable. If the amount due is not paid within 30 days after due date, 10 per cent. is added to the amount of tax	The Commissioners must post notice of assessment to each taxpayer. Tax must be paid within 60 days of date of notice, otherwise 10 per cent. is added. When tax is in arrears for two years, the Commissioners may advertise that if it is not paid within one year they will let the land for not exceeding three years or apply to the Supreme Court for a sale thereof	Not less than 14 days' notice must be given of the date on which land tax is payable. If the tax is not paid at the expiration of 14 days after the due date thereof, 8 per cent. is added thereto.
8. Acquisition of Land, when Value is understated	If the Commissioner is of opinion that the owner has understated the unimproved value to the extent of 25 per cent. or more, he may apply to the Supreme Court, which may make a declaration that the land be vested in the Commonwealth. The owner is compensated by adding the value of improvements to the unimproved value stated in his return plus 10 per cent. Such acquired land must be offered for three months to the State in which it is situated	No provision	No provision
9. Appeals	Any taxpayer or person may appeal to the High Court in its original jurisdiction or to the Supreme Court or a County Court or a District Court of a State or such other Court as is proclaimed. Land tax may be levied as if no appeal were pending	A taxpayer may, within 30 days after notice of assessment, appeal to a Court of Review consisting of the Land Appeal Court or a Police Magistrate. On a question of law, further appeal may be made to the Supreme Court	Objections to assessment must be lodged with the Commissioner, and those not allowed by him are heard and determined by an Assessment Court consisting of a Judge of County Courts or a Police Magistrate and two persons having a knowledge of the value of land and of improvement values. An appeal to the Supreme Court on questions of law is allowed

IN FORCE IN AUSTRALIA, 1921—continued.

Queensland.	South Australia.	Western Australia.	Tasmania.
<p>Every owner of land of the unimproved value of £200 and upwards must furnish returns shewing the unimproved and improved value of each parcel, also the value of improvements. A taxpayer who has furnished full returns in any year may in future furnish supplementary returns. If a taxpayer fails to furnish a return within the prescribed time, 5 per cent. is added to the tax, and if not furnished within 60 days 10 per cent.</p>	<p>Every taxpayer must, within the prescribed time, furnish a return containing such particulars as will enable the Commissioner to estimate the amount of tax to be paid by him. The Commissioner must also make an assessment of all land liable to land tax every fifth year</p>	<p>The Commissioner must give not less than 30 days' notice of the time and place at which all taxpayers must furnish returns. Every taxpayer must furnish a return, otherwise the Commissioner may appoint a person to do so on his behalf</p>	<p>The Commissioner may require any taxpayer to furnish any information in writing or by verbal communication</p>
<p>Not less than 30 days' notice must be given of the date on which land tax is payable. If a taxpayer fails to pay his tax within 30 days after it has become due, 10 per cent. is added thereto</p>	<p>Land Tax must be paid by the 14th February in each year. If any taxes are in arrear for 21 days after particular notice to the taxpayer, the Commissioner may without warrant distrain upon the goods and chattels of the taxpayer. If any tax is not paid before the end of one month after it falls due, 10 per cent. is added and interest at 10 per cent. per annum. When a tax is in arrear for two years the Commissioner may advertise that if not paid within one year, he will let the land from year to year or apply to the Supreme Court for a sale</p>	<p>The Commissioner must give each taxpayer a notice of assessment with the amount of tax and date when payment is due. If the tax is not paid within 30 days after it is due, 10 per cent. is added thereto.</p> <p>Whenever any tax is unpaid for two years, the Commissioner may advertise that if not paid within one year, he will let the land for not exceeding three years or apply to the Supreme Court for the sale thereof</p>	<p>The Commissioner must forward a demand by post, setting forth the amount due and the place where payment is to be made. If the tax is not paid within 30 days after demand, proceedings may be taken for the recovery thereof. Whenever land tax is in arrear for six months, the Commissioner may advertise that if it be not paid within six months he will let the land from year to year, or after two years apply to the Supreme Court for a sale thereof</p>
<p>If the Commissioner is of opinion that the owner has understated the unimproved value of his land to the extent of 25 per cent. or more, he may apply to the Supreme Court for a declaration that the State is entitled to the land. If the Court vests such land in the Crown, the owner is compensated upon the basis of the unimproved value stated in his return with the value of the improvements, plus 10 per cent. An appeal lies to the Full Court</p>	<p>No provision</p>	<p>No provision</p>	<p>No provision</p>
<p>Any taxpayer or person may appeal to the Land Court against any assessment made by the Commissioner, but land tax may be levied and recovered on the assessment as if no appeal were pending. Further appeal allowed to the Land Appeal Court</p>	<p>A taxpayer may appeal within two months after the notice of assessment. Appeals are heard and determined by a special Local Court of Full Jurisdiction consisting of a Special Magistrate and two Justices skilled in the valuation of land and property. A special case may be stated for the opinion of the Supreme Court</p>	<p>A taxpayer may, within 30 days after the notice of assessment, appeal to the Court of Review, consisting of any magistrate of a Local Court, provided that one half of the tax and of any fines are deposited with the Commissioner. A further appeal on a question of law may be made to the Supreme Court</p>	<p>Objections are to be sent to the Commissioner, who, in the event of his disallowing them, transmits them to the Court of Review consisting of any Judge of the Supreme Court or of any Commissioner of a Court of Requests. An appeal may be made on a point of law to the Supreme Court</p>

CONSPECTUS OF LAND TAX ACTS

Particulars.	Commonwealth.	New South Wales.	Victoria.
10. Remission of Tax in cases of Hardship	Where a taxpayer has become bankrupt or insolvent or has suffered such loss that the exaction of the full amount of tax would entail serious hardship, or that, by reason of drought or adverse seasons the returns from the land have been seriously impaired, a Board consisting of the Commissioner, the Secretary to the Treasury, and of the Comptroller-General of Customs may release him wholly or in part from his liability	No provision	Where it is shewn to the satisfaction of the Commissioner that a taxpayer has suffered such loss from bush fires, drought, floods, or other calamity that the exaction of the full amount of tax would entail serious hardship, he may release such taxpayer wholly or partly from his liability or may postpone the payment of the tax
11. Offences and Penalties	(a) Failing to furnish a return, refusing or neglecting to give evidence or to answer questions, wilfully making false returns or false answers, not exceeding £100 (b) Understating the unimproved value with intent to defraud or evading taxation, not exceeding £500 and treble the amount of tax evaded, or forfeiture of the land undervalued or part thereof	(a) Failing to furnish a return, not exceeding £20 (b) Knowingly making a false return or answer or evading assessment or taxation, not exceeding £100 and treble the amount of tax evaded	(a) Refusing or neglecting to give evidence when required or to answer questions or to furnish a return, not less than £2 nor more than £100 (b) Knowingly making a false return or answer or evading full assessment or taxation or the payment of tax, not less than £2 nor more than £100 and treble the amount of tax evaded
12. Ordinary Rates of Taxation	(a) When the owner is not an Absentee.— (i) Not exceeding £75,000. The rate is $1\frac{1}{18,750}$ d. per £1: where the taxable value is £1, and increases uniformly by $1/18,750$ d. for each £1 in excess. The formula is: where R is the rate of tax in pence and V the taxable value in pounds $R = \left\{ 1 + \frac{V}{18,750} \right\} \text{ pence}$ (ii) Exceeding £75,000. For each £1 of taxable value exceeding £75,000, the rate is 9d. (b) When the owner is an Absentee.— (i) Not exceeding £5,000, the rate is 1d. per £1. (ii) Exceeding £5,000 but not £80,000, for so much exceeding £5,000 the rate per £1 is $2\frac{1}{18,750}$ d. for an excess of £1, increasing uniformly by $1/18,750$ d. for each additional £1 (iii) Exceeding £80,000, for each £1 in excess the rate is 10d.	One penny in the £1 of the unimproved value	Where the unimproved value exceeds £250, the rate is one half-penny in every £1 thereof, with a minimum tax of 2s. 6d.
13. Super-taxes ..	20 per cent. additional

IN FORCE IN AUSTRALIA, 1921—continued.

Queensland.	South Australia.	Western Australia.	Tasmania.
In any case where a taxpayer has become insolvent or has suffered such loss that the exaction of the full amount of tax would entail serious hardship, or that, by reason of drought or adverse seasons or other adverse conditions the returns from the land have been seriously impaired, the Commissioner may release such taxpayer wholly or partly from his liability	No provision	No provision	No provision
(a) Failing to furnish a return or refusing or neglecting to attend and give evidence when required or wilfully making a false return or answer, not exceeding £100 (b) Understating, with intent to defraud, the unimproved value, or wilfully evading taxation, not exceeding £500 and treble the amount of tax evaded, or forfeiture of the land undervalued or part thereof	(a) Failing to furnish a return, not exceeding £20 and treble the amount of tax payable (b) Wilfully furnishing a false return or declaration, punishable as for wilful and corrupt perjury	(a) Failing to furnish a return within the prescribed time, not exceeding £20 (b) Wilfully making a false statement for the purpose of evading assessment or taxation, not exceeding £100 and treble the amount of tax evaded	(a) Failing to furnish a return within the prescribed time, not exceeding £20 (b) Wilfully making a false statement or answer or fraudulently evading taxation, not exceeding £100, and treble the amount of tax evaded (c) Making a false declaration, imprisonment not exceeding three years or fine not exceeding £100

1. Acts in force ..	Estate Duty Assessment Act 1914, 1916 Estate Duty Act 1914	Stamp Duties Act 1920 Stamp Duties (Deductions) Act 1904 Companies (Death Duties) Act 1901	Administration and Probate Act 1915
2. Administration of Act	The Commissioner of Taxation has general administration, subject to the control of the Minister	The Commissioner of Stamps is charged with the levying and collection of duties	The Commissioner of Taxes appointed under the <i>Income Tax Act</i>
3. Property of a deceased person which is liable for Duty	(a) His real property in Australia (b) His personal property, wherever situate, if he was at the time of his death domiciled in Australia (c) His personal property in Australia, including all debts, money and choses in action receivable or recoverable in Australia, if he had at the time of his death a foreign domicile (d) Property which passed from him by any gift <i>inter vivos</i> or settlement made within one year before his decease, if being property comprised in a settlement under which he was tenant for life, the life interest of which was surrendered by him to the remaindermen within one year before his decease (e) Property in which he had a beneficial interest and which passed after his decease to any other person	(a) All his property in New South Wales (b) All property which he has disposed of by will or settlement (c) Any property comprised in a gift made within three years before his death without full consideration (d) Any property passing under any disposition— (i) by which an interest is reserved for his life; or (ii) which is accompanied by a reservation of any benefit for him for his life; or (iii) by which he has reserved the right to restore to himself the property (e) Any property comprised in a gift of which <i>bona fide</i> possession has not been immediately assumed and retained (f) Any property comprised in a <i>donatio mortis causa</i> (g) Any property which he has vested jointly so that the beneficial interest passes by survivorship to any person (h) Any property in which he had an interest limited to cease at his death unless such disposition was made <i>bona fide</i> or within three years before his decease (i) Any money payable under an insurance policy (j) An annuity to the extent of the beneficial interest arising by survivorship of another person (k) Any property over which he had a general power of appointment (l) Any property which he has within three years before his death transferred in consideration of shares or other interest	(a) The real and personal property of which his estate consisted at his death (b) Property conveyed by gift, assignment, etc., which purports to operate as an immediate gift <i>inter vivos</i> — (i) if made within twelve months preceding his death; or (ii) if relating to property of which <i>bona fide</i> possession has not been assumed and retained (c) All property which he has voluntarily transferred to or vested in himself and another person jointly so that a beneficial interest therein passes by survivorship to such other person (d) All property over which he had a general power of appointment (e) Any property conveyed or given with intent to evade the Act, and all property the subject matter of a <i>donatio mortis causa</i>
4. Exemptions from Duty	(a) Estates under £1,000 in value (b) So much of an estate as is devised or bequeathed or passes by gift <i>inter vivos</i> or by settlement for religious, scientific, charitable or public educational purposes	The estate of a deceased person, who at the time of his death was domiciled in New South Wales, the final balance of which does not exceed £1,000, but this does not apply to property separately assessed	(a) Estates and settlements which do not exceed £200 in value (b) The share of the widow and children and grandchildren when the amount does not exceed £500, both in the case of estates and settlements (c) Public charitable bequests and settlements

DUTIES ACTS IN FORCE IN AUSTRALIA, 1921.

Queensland.	South Australia.	Western Australia.	Tasmania.
Succession and Probate Duties Act 1892, 1895, 1904, 1906, 1915, 1918, 1920	Succession Duties Act 1893, 1915, 1917, 1919	Administration Act 1903, 1909	Deceased Persons' Estates Duties Act 1915, 1916, 1917
The Attorney-General is charged with the administration. The duties are under the care and management of the Commissioner of Stamps	The Act is administered by the Registrar of Probates	The Commissioner of Stamps administers the portion of the Act relating to duties on deceased persons' estates and succession duties	The Act is administered by the Commissioner of Taxes
<p>(a) His real property, including all freehold, leasehold and other hereditaments in Queensland</p> <p>(b) His personal property, including all moneys payable</p> <p>(c) Any beneficial interest in a property vested in joint tenants</p> <p>(d) The accretion of interest in a fund to which there is joint contribution with survivorship</p> <p>(e) The accretion of interest in a property which is purchased jointly with remainder to the survivor in fee-simple</p> <p>(f) Property disposed of under general powers of appointment</p> <p>(g) The increase of benefit accruing to any person upon the extinction or determination of any charge determinable by his death</p> <p>(h) Dispositions accompanied by the reservation of a benefit to the grantor, etc.</p> <p>(i) Dispositions made to take effect at periods depending on death, or for the purpose of evading duty</p> <p>(j) Dispositions of property made less than two years before death and purporting to operate as an immediate gift</p>	<p>(a) His real property in the State, including that over which he had a general power of appointment</p> <p>(b) His personal property, wherever situate, including that over which he had a general power of appointment, if he was at the time of his death domiciled in the State.</p> <p>(c) His personal property in the State, if he had at the time of his death a foreign domicile</p> <p>(d) Property disposed of by way of <i>donatio mortis causa</i></p> <p>(e) Property comprised in settlements</p> <p>(f) Property under a deed of gift, if he dies within twelve months after the date of such gift</p> <p>(g) The net present value of the increase of benefit accruing to any person by the extinction or determination of any charge, encumbrance, etc.</p> <p>(h) The beneficial interest in any property vested in any persons jointly, which accrues to the other person by survivorship</p> <p>(i) The net present value of an annuity purchased by the deceased</p>	<p>(a) The final balance of his real and personal estate</p> <p>(b) The net value of all property the subject-matter of a gift by way of a <i>donatio mortis causa</i></p> <p>(c) Property, including real and personal property over which he had a general power of appointment, comprised in a settlement or deed of gift in so far as it comprises—</p> <p>(i) his real property in the State;</p> <p>(ii) his personal property wherever the same is, if he was at the time of the settlement or gift domiciled in the State;</p> <p>(iii) his personal property in the State, if he had not at the time of settlement or gift a domicile within the State</p> <p>(d) Property conveyed in order to evade duty. This is deemed to be a deed of gift, and any property thereunder is liable to duty as if the donor had died within six months from the date thereof and double duty is payable thereon</p> <p>(e) Property given or accruing to any person under a deed of gift within six months of his death, except in cases of death by accident</p>	<p>(a) His real estate in the State</p> <p>(b) His personal estate, wherever situate, if he was, at the time of his death, domiciled in the State</p> <p>(c) His personal estate in the State, if he was, at the time of his death, domiciled elsewhere</p> <p>(d) Estate over which he had a general power of appointment included in (a), (b) and (c)</p> <p>(e) Property disposed of by way of <i>donatio mortis causa</i></p> <p>(f) Voluntary dispositions purporting to operate as an immediate conveyance or gift <i>inter vivos</i>, which had not been <i>bona fide</i> made within three years before his death</p> <p>(g) Property which has been conveyed to or invested in himself and another person jointly, so that the beneficial interest accrues by survivorship to that other person</p> <p>(h) Property settled on another, by which he reserves to himself the right to reclaim such property</p> <p>(i) Property which he has within three years preceding his death transferred to or vested in a company</p> <p>(j) Property taken under any gift from him of which <i>bona fide</i> possession and enjoyment have not been immediately assumed and retained</p>
<p>(a) Estates under £200 in value pay no succession duty, and those under £300 no Probate duty</p> <p>(b) Successions of less value than £20</p> <p>(c) Persons beneficially entitled to real property subject to leases for life</p> <p>(d) Property subject to a trust for any charitable or educational institution in Queensland</p>	<p>Property derived by a widow, widower, descendant, or ancestor of the deceased, the net present value of which is under £500</p>	<p>(a) Any legacy consisting of books, prints, pictures, statues, gems, coins, medals, specimens of natural history or other specific articles to any institution under control of the Government or of a board appointed or partly appointed by the Government</p> <p>(b) Any legacy whatsoever bequeathed to any University</p>	<p>(a) Estates where the total value after deducting all debts does not exceed £500</p> <p>(b) Money payable by a Friendly Society upon the death of a member or of the wife or child of a member</p> <p>(c) Any public charitable bequest, settlement or gift</p>

CONSPECTUS OF PROBATE AND SUCCESSION

Particulars.	Commonwealth.	New South Wales.	Victoria.
5. Reduction of Duty to Relatives of the Deceased	The duty is assessed at two-thirds of the ordinary rate on so much of the estate as passes to the widow or children or grandchildren of the deceased	Where the final balance does not exceed £5,000, duty is calculated at half rates on property passing to the widow or any of the children under 21 years of age, but this does not apply where the deceased at the time of his death was not domiciled in New South Wales	(a) Where the amount due to the widow, child or grandchild from an estate or settlement does not exceed £2,000, the usual rate is reduced by one half (b) The rates for the aforesaid persons as regards estates are on a lower scale than those for other persons (c) On settlements there are three scales of duty (see § 10)
6. Returns	Every administrator must furnish a return of all the estate in Australia of the deceased person, giving the descriptions and values of the items comprising the estate before deducting any debts or other charges and distinguishing between secured and unsecured debts. If the administrator makes default in furnishing a return or the Commissioner is not satisfied therewith, or has reason to believe that any estate is dutiable, he may make an assessment on the amount on which, in his judgment, duty ought to be levied.	Applicant for probate or administration must lodge with his application an affidavit of value verifying an account containing particulars of the dutiable estate of the deceased and all allowances claimed. He must also furnish the Commissioner with such other evidence as may be required	Every executor and administrator must file with the Commissioner a statement specifying— (a) The real and personal property of which the estate consisted at the death of the deceased (b) All property chargeable with death duty (c) The value of the property in (a) and (b) (d) The debts and liabilities of the deceased (e) The relationship of the deceased to the persons entitled under the will or intestacy
7. Payment of Duty	Duty is due within 30 days after notice of assessment, but time may be extended up to two years and payment by instalments permitted. Duty is paid out of personal estate, but if there is not sufficient personal estate, the real estate may be mortgaged or permission obtained from the Court for the sale of the whole or a part thereof. If duty is not paid by final date, Court may allow Commissioner to sell sufficient of the estate to pay the duty	Duty is due on the assessment thereof by the Commissioner, or, if not so duly assessed within six months of death, on the expiration of six months thereafter. Duty is paid out of all real or personal property vested in the administrator who has the power of selling, leasing or mortgaging the same	The rules may prescribe the time and notice after which duty must be paid, and if the same is not paid within the time prescribed, the Commissioner may apply to the Court for an order to sell part of the estate for payment thereof. Unless the contrary is stated in the will, duty is payable out of the residue of the estate, but if there is no residue, the balance of duty may be deducted from each legacy or bequest
8. Objections and Appeals	An administrator may, within 30 days after service by post of the notice of assessment, lodge an objection with the Commissioner. An appeal against the Commissioner's decision to the High or Supreme Court is allowed within 30 days, but duty may be levied and recovered pending an appeal	Any person liable to the payment of duty and any administrator who is dissatisfied with the assessment of the Commissioner may, within 30 days after the date of assessment, require him to state a case for the opinion of the Supreme Court	An executor or administrator who is dissatisfied with a determination may within 21 days after such determination and upon payment of the duty appeal to the Supreme Court if the valuation is over £500 or to a County Court if such valuation does not exceed £500
9. Offences and Penalties	(a) Failing to furnish a return or refusing or neglecting to attend and give evidence when required, or knowingly making a false return or answer, not exceeding £100 (b) Understating the value of an estate with intent to defraud or wilfully evading assessment or duty, not exceeding £500 or imprisonment up to three years	(a) Refusing to permit inspection of books, etc., not exceeding £50 (b) Fraudulently misstating the amount of property or debts, imprisonment not exceeding three years, or fine not exceeding £100	Making a false statement with intent to evade the payment of duties or to lessen the amount thereof, guilty of misdemeanour and liable to imprisonment with or without hard labour for not less than one nor more than three years or to a fine not exceeding £500

DUTIES ACTS IN FORCE IN AUSTRALIA, 1921—continued.

Queensland.	South Australia.	Western Australia.	Tasmania.
<p>(a) Where the total value of the estate does not exceed £500, the wife or lineal issue pay no duty of any kind.</p> <p>(b) Where the total value does not exceed £2,500 and the deceased was domiciled in the Commonwealth, the wife or lineal issue only pays half succession duty, and when it exceeds £2,500 but not £5,000, two-thirds</p>	<p>Where the property, either under a succession or a settlement or a deed of gift is under £2,000, and is taken by the widow or child under 21 years of age, half duty only is payable</p>	<p>Beneficial interests passing to persons <i>bona fide</i> residents of and domiciled in Western Australia, and occupying towards the deceased the relationship of parent, issue, husband, wife, or issue of husband or wife, only pay half duty on estates, settlements and deeds of gift</p>	<p>Separate scales of rates of duty are specified according to the relationship of the successor to the deceased, those for the widow, widower, descendant or ancestor being on the lowest scale</p>
<p>The persons accountable for the payment of duty must give notice to the Commissioner of their liability, and deliver a full account of the property, of the value thereof, and of the deductions claimed, with the relationship of the successors to the deceased. If they wilfully neglect to do so, they are liable to pay 5 per cent. upon the amount of duty payable, and a like penalty for every month during which such neglect continues after the first month</p>	<p>The persons becoming beneficially interested or the trustee must file a statement with the Registrar shewing all such particulars as he requires to enable him to assess the duty</p>	<p>(a) Every executor and administrator must furnish full particulars of—</p> <p>(i) the real and personal estate of the deceased; and</p> <p>(ii) the debts due by him; and</p> <p>(iii) the balance remaining after deducting debts; and</p> <p>(iv) any further information required by the Commissioner</p> <p>(b) The trustee of a settlement or deed of gift must file a statement setting forth—</p> <p>(i) the net present value thereof; and</p> <p>(ii) the net present value of any property given to an uncertain person or on an uncertain event; and</p> <p>(iii) any further information required by the Commissioner</p>	<p>Same as Western Australia</p>
<p>The Commissioner assesses the duty, and if the same be not paid within 21 days after the duty has been finally ascertained, any person wilfully neglecting to do so is liable to pay a sum equal to 5 per cent. upon the amount of duty unpaid, and a like amount for every further month during which the duty is in arrears</p>	<p>Immediately after the Registrar has approved the statement and assesses the duty, the person filing such statement must pay the duty so assessed. Interest at the rate of 4 per cent. per annum is charged on all duty not paid within three months from the date on which it became payable</p>	<p>Duty is payable immediately after the Commissioner has made the assessment, but he may extend the time for payment. On application the Court may allow of the whole or part of the property being sold to pay the duty</p>	<p>Duty must be paid immediately after the Commissioner has made his assessment, but he may extend the time for payment up to one year or permit the payment in instalments. The executor or trustee may apply to the Supreme Court for an order that the whole or any part of a property subject to duty may be sold to pay the duty</p>
<p>An appeal against the assessment of the Commissioner may be made within 21 days after the date thereof to the Supreme Court of Queensland, unless the duty in dispute does not exceed £50 when such appeal may be made to the District Court</p>	<p>An appeal from any assessment or decision of the Registrar may be made within the prescribed time to the Supreme Court, but duty may be levied and recovered on the assessment as if no appeal were pending</p>	<p>Any person interested may appeal to the Supreme Court against any assessment or decision of the Commissioner otherwise his decision is final</p>	<p>Any executor, administrator or trustee who is dissatisfied with a determination or valuation of the Commissioner may appeal, within 21 days, to the Supreme Court</p>
<p>Failing or neglecting to furnish a return, or refusing or neglecting to give evidence when required or making an incorrect return, understating the value of an estate, making a false answer or omitting to set forth all the facts, not exceeding £100</p>	<p>Failing or neglecting to file or amend any statement, to pay any duty payable or to register any settlement or deed of gift, not exceeding £500</p>	<p>(a) Making a false or fraudulent statement, with intent to evade duty, guilty of misdemeanour and liable to imprisonment up to three years and to a fine not exceeding £100</p> <p>(b) Failing to file a statement or to pay any duty or to register any statement or deed of gift, not exceeding £500</p>	<p>(a) Failing to file or amend any statement required, or to pay any duty payable, or to register any settlement or deed of gift, not exceeding £500</p> <p>(b) Knowingly and wilfully making a false oath or declaration, guilty of perjury</p>

CONSPECTUS OF PROBATE AND SUCCESSION

Particulars.	Commonwealth.	New South Wales.	Victoria.
10. Rates of Duty ..	Where the value exceeds £1,000 but does not exceed £2,000, the rate is 1 per cent., and where it exceeds £2,000, 1 per cent. with an additional percentage of one-fifth of a pound for every £1,000 or part of £1,000 in excess of £2,000, but so that the maximum percentage must not exceed 15 per cent.	<p>(a) Ordinary Rate— Value of Estate. SECTION XXI.

PRIVATE FINANCE.

§ 1. Currency.

1. **The Three Australian Mints.**—Soon after the discovery of gold in Australia steps were taken for the establishment of a branch of the Royal Mint in Sydney. The formal opening took place on the 14th May, 1855. The Melbourne branch of the Royal Mint was opened on the 12th June, 1872, and the Perth branch on the 20th June, 1899. The States of New South Wales, Victoria, and Western Australia provide an annual endowment, in return for which the mint receipts are paid into the respective State Treasuries, and it may be said that, apart from expenditure on buildings, new machinery, etc., the amounts paid into the Treasuries fairly balance the mint subsidies.

2. **Receipts and Issues in 1918.**—(i) *Assay of Deposits Received.* The number of deposits received during 1918 at the Sydney Mint was 393, of a gross weight of 1,214,008 ozs.; at the Melbourne Mint, there were 2,376, of a gross weight of 1,391,863.90* ozs.; and at the Perth Mint, 2,507, of a gross weight of 1,119,255 ozs. The average composition of these deposits in Sydney was, gold 907.5, silver 71.8, base 20.7 in every 1,000 parts; Melbourne, gold 886.2, silver 88.6, base 25.2 in every 1,000 parts; and Perth, gold 801.8, silver 144.6, base 53.6 in every 1,000 parts. As many parcels have, however, undergone some sort of refining process before being received at the mint, the average assay for gold shews higher in these figures than for gold as it naturally occurs.

(ii) *Issues.* The Australian mints, besides issuing gold coin in the shape of sovereigns and half-sovereigns, also issue gold bullion, partly for the use of local manufacturers (jewellers and dentists), and partly for export, India taking annually a considerable quantity of gold cast into 10-oz. bars. Owing, however, to the prohibition by the Commonwealth Government of the export of gold, the issue of bars for India ceased in July, 1916. The issues during 1918 are shewn in the table below :—

ISSUES OF GOLD FROM AUSTRALIAN MINTS DURING 1918.(a)

Mint.	Coin.			Bullion.	Total.
	Sovereigns.	Half-sovereigns.	Total.		
	£	£	£	£	£
Sydney ..	3,716,000	..	3,716,000	91,734	3,807,734
Melbourne ..	4,969,493	..	4,969,493	630,074	5,599,567
Perth ..	3,812,884	..	3,812,884	7,327	3,820,211
Total ..	12,498,377	..	12,498,377	729,135	13,227,512

(a) For later information see Appendix.

In addition to the issue of gold, the Sydney and Perth mints distribute silver and bronze Australian coins struck elsewhere.

* In addition 100,806.61 ozs. were re-deposited for coinage.

(iii) *Withdrawals of Worn Coin.* The mints receive light and worn coin for recoinage, gold being coined locally, while silver is forwarded to London. The value of gold coin so received in 1918 was £1,148, viz.:—Sydney, Nil; Melbourne, £181; and Perth, £967. The value of worn silver coins received during 1918 was £89,371, viz.:—Sydney, £71,100; Melbourne, £15,950; and Perth, £2,321.

3. **Total Receipts and Issues.**—(i) *Receipts.* The total quantities of gold received at the three mints since their establishment are stated in the gross as follows:—Sydney, 39,435,631.49 ozs.; Melbourne, 38,792,790.21 ozs.; and Perth, 25,719,134.09 ozs. As the mints pay for standard gold (22 carats) at the rate of £3 17s. 10½d. per oz., which corresponds to a value of £4 4s. 11½d. per oz. fine (24 carats), it is possible to arrive at the number of fine ounces received from the amounts paid for the gold received. These amounts were:—Sydney, £146,085,671; Melbourne, £152,247,096; Perth, £90,482,583; corresponding to—Sydney, 34,391,490 ozs. fine; Melbourne, 35,842,013 ozs. fine; and Perth, 21,301,410 ozs. fine. In the case of deposits containing over a certain minimum of silver, the excess is paid for at a rate fixed from time to time by the Deputy Master of the branch Mint concerned.

(ii) *Issues.* The total values of gold coin and bullion issued by the three mints are shewn in the table hereafter. It may be said that rather more than one-half of the total gold production of Australasia has passed through the three Australian mints, the production of the Commonwealth States to the end of 1918 being valued at £594,536,723, and that of New Zealand at £87,933,204, or a total of £682,469,927.

TOTAL ISSUES OF GOLD FROM AUSTRALIAN MINTS TO END OF 1918.

Mint.	Coin.			Bullion.	Total.
	Sovereigns.	Half-sovereigns.	Total.		
	£	£	£	£	£
Sydney ..	133,350,500	4,781,000	138,131,500	6,846,252	144,977,752
Melbourne ..	139,782,993	946,780	140,729,773	11,502,699	152,232,472
Perth ..	82,201,986	257,344	82,459,330	7,991,953	90,451,283
Total ..	355,335,479	5,985,124	361,320,603	26,340,909	387,661,512

The total issues of Imperial silver coins from the opening of the Mints to the end of 1918 were £2,415,200, viz.:—Crowns, £3,500; double florins, £4,585; half-crowns, £722,600; florins, £528,215; shillings, £606,200; sixpences, £253,220; and threepences, £296,880.

Imperial bronze coins to the value of £180,150 have also been issued to the end of 1918, viz.:—Pence, £126,640; half-pence, £53,310; and farthings, £200.

(iii) *Withdrawals of Worn Coin.* Complete figures as to the withdrawal of gold coin are as follows:—Sydney, £1,084,381; Melbourne, £751,781 (since and including 1890); and Perth, £1,403.

Withdrawals of worn silver coin amounted to £663,873 in Sydney, to £570,212 in Melbourne, and to £54,812 in Perth.

4. **Standard Weight and Fineness of Coinage.**—The coinage of the Commonwealth is the same as that of the United Kingdom, and the same provisions as to legal tender hold good, viz., while gold coins are legal tender to any amount, silver coins are only so for an amount not exceeding forty shillings, and bronze coins up to one shilling. As will be seen from the table below, the standard weights of the sovereign and half-sovereign are respectively 123.27447 grains and 61.63723 grains, but these coins will pass current if they do not fall below 122.5 grains and 61.125 grains respectively.

STANDARD WEIGHT AND FINENESS OF COMMONWEALTH COINAGE.

Denomination.	Standard Weight.	Standard Fineness.
	Grains.	
GOLD—		
Sovereign ..	123.27447	} Eleven-twelfths fine gold, viz. :— Gold .. 0.91667 } 1.00000 Alloy .. 0.08333 }
Half-sovereign ..	61.63723	
SILVER—		
Crown ..	436.36363	} Thirty-seven-fortieths fine silver, viz. :— Silver .. 0.925 } 1.000 Alloy .. 0.075 }
Double florin ..	349.09090	
Half-crown ..	218.18181	
Florin ..	174.54545	
Shilling ..	87.27272	
Sixpence ..	43.63636	} Mixed metal, viz. :— Copper .. 0.95 } 1.00 Tin .. 0.04 Zinc .. 0.01 }
Threepence ..	21.81818	
BRONZE—		
Penny ..	145.83333	
Halfpenny ..	87.50000	
Farthing ..	43.75000	

5. **Prices of Silver and Australian Coinage.**—(i) *Prices of Silver.* The value of silver has greatly decreased since its demonetisation and restricted coinage in almost the whole of Europe. A noticeable increase has, however, taken place since 1915, the price of silver following the general trend of world prices. Its average price in the London market in recent years is shewn in the table on page 350.

(ii) *Profits on Coinage of Silver.* As sixty-six shillings are coined out of one pound troy of standard silver, the silver required to produce £3 6s. of coin was only worth on the average about £2 17s. during 1919; the difference of 9s. represents, therefore, the gross profit or seigniorage made on the coinage of every £3 6s. Negotiations took place for a number of years between the Imperial authorities and the Governments of New South Wales and Victoria, which in 1898 resulted in permission being granted to the two Governments named to coin silver and bronze coin at the Sydney and Melbourne Mints for circulation in Australia. No immediate steps were, however, taken in the matter, and as section 51 of the Commonwealth Constitution makes legislation concerning "currency, coinage, and legal tender" a federal matter, the question remained in abeyance until the latter part of 1908, when the Commonwealth Treasurer announced his intention of initiating the coinage of silver in the future.

(iii) *Coinage Bill.* In 1909 a Coinage Bill was introduced in the Commonwealth Parliament, which provided that the future Australian coinage should consist of the following coins :—In gold, £5, £2, £1, and 10s. ; in silver, 2s., 1s., 6d., and 3d. ; and in bronze, 1d. and $\frac{1}{2}$ d. Gold was to be legal tender up to any amount, silver up to 40s., and bronze up to 1s. Ultimately the coinage was to be undertaken in Australia, but for the time an agreement was made with the authorities of the Royal Mint in London, under the terms of which the coinage was to be done in London on account of the Commonwealth Government. Orders were given for the immediate coinage of £200,000 worth of silver, viz., one million florins, one million shillings, one million sixpences, and

two million threepences. The coins were to bear on the obverse H.M. the King's head, with the Latin inscription which appears on the British coins, and on the reverse the Australian coat-of-arms, with the denomination and the date. The Imperial authorities undertook to withdraw £100,000 worth of the existing silver-coinage per annum at its face value. The first consignment of the new coinage arrived in Australia early in 1910, and in a short time all the silver coins contracted for were supplied to the Royal Mints, Australia. Copper coins of the value of £10,000, viz., 1,560,000 pennies and 1,680,000 halfpennies, of a design similar to that of the silver coins, were ordered. It was not, however, intended to withdraw any of the existing copper coins, but merely to make good the "leakage," which was considerable.

The issue in 1918 was £461,275 silver, and £14,430 bronze, according to a statement issued by the Commonwealth Treasury. The total issue since 1910 amounted to £3,468,350 silver, and £135,170 bronze.

§ 2. Banking.

1. Banking Facilities.—*Head Offices of Banks.* Of the twenty-one banks trading in the Commonwealth on 30th June, 1920, four have their head offices in London, viz., the Bank of Australasia; the Union Bank of Australia Limited; the English, Scottish and Australian Bank Limited; and the London Bank of Australia Limited. The head offices of the following four banks are in Sydney—The Commonwealth Bank of Australia, The Bank of New South Wales, the Commercial Banking Company of Sydney Limited, and the Australian Joint Stock Bank Limited (now the Australian Bank of Commerce Limited). Four banks have their head offices in Melbourne, viz., the National Bank of Australasia Limited, the Commercial Bank of Australia Limited, the Bank of Victoria Limited, and the Royal Bank of Australia Limited. Brisbane is the headquarters of two banks, viz., the Queensland National Bank Limited, and the Bank of Queensland Limited. Only one bank has at present its head office in Adelaide, viz., the Bank of Adelaide; one in Perth, viz., the Western Australian Bank; and one in Hobart, the Commercial Bank of Tasmania Limited. The Bank of New Zealand has its headquarters in Wellington. Of the three remaining banks, the Comptoir National d'Escompte de Paris has its head office in Paris, the Ballarat Banking Company in Ballarat, and the Yokohama Specie Bank in Yokohama, Japan. It is proposed, in the few instances where the banks are referred to by name, to arrange them in the order just given, with the exception of the Commonwealth Bank, which is placed first.

It is worthy of note that the bank amalgamations, which have been such a feature in British banking of late years, have appeared in Australia, and materially reduced the number of competitive joint stock banks. During the calendar years 1917 and 1918 the following were recorded:—(a) the Royal Bank of Queensland Limited with Bank of North Queensland Limited; (b) City Bank of Sydney with Australian Bank of Commerce Limited; (c) National Bank of Tasmania Limited with Commercial Bank of Australia Limited; and (d) National Bank of Australia Limited with Colonial Bank of Australasia Limited. This accounts for the reduction in number of independent joint stock banks operating in Australia.

A further amalgamation was announced in August, 1920, viz., the London Bank of Australia Ltd. and the English, Scottish and Australian Bank Ltd. These will, however, appear as separate banks in the present returns. The amalgamated banks further strengthened their position by absorbing the Commercial Bank of Tasmania, which from May, 1921, ceases to exist independently.

2. Banking Legislation.—Under Section 51 of the Commonwealth Constitution Act the Commonwealth Parliament has power to legislate with respect to "Banking, other than State banking, also State banking extending beyond the limits of the State concerned, the incorporation of banks, and the issue of paper money." For a few years the only Commonwealth banking legislation passed was Act No. 27 of 1909, "An Act relating to Bills of Exchange, Cheques, and Promissory Notes," which came into force on the 1st February, 1910. In the session of 1910, however, two Acts relating to banking were passed by the Federal Parliament. The first was the Australian Notes Act No. 11 of 1910, assented to on the 16th September, 1910, and proclaimed 1st November, 1910; and the second the Bank Notes Tax Act No. 14, 1910, assented to on 10th October, 1910, and proclaimed 1st July, 1911. These Acts have been fully discussed in recent issues of the Official Year Book. The former Act was superseded in December, 1920, when the control of the Australian Note Issue was handed over by the Commonwealth Treasury to the Commonwealth Bank. The Note Issue Department of the Bank, so created, is administered by a Board including the Governor and Secretary of the Commonwealth Bank, a leading Treasury official, and two outside financial experts.

The Act under which the transfer was effected requires not less than one-fourth of the amount of notes outstanding to be held in gold coin and bullion, and the remainder or any part thereof—

- (a) On deposit with any other Bank;
- (b) In securities of the United Kingdom, or of the Commonwealth, or of a State;
- (c) In Trade Bills with a currency of not more than 120 days.

On 31st December, 1920, immediately after the transfer, the Note Issue amounted to £58,713,251, of which £26,965,795 was in the hands of the public, and £31,747,456 in the banks. The assets included £23,714,983 in gold coin and bullion.

The Notes Act and the Bank Notes Act were supplemented in the following year by the passing of No. 18 of 1911, "An Act to provide for a Commonwealth Bank," which passed both Houses and was assented to on 22nd December, 1911. The early steps in the foundation of the Bank have been described in previous issues from No. 6 to No. 10 inclusive, and will not be repeated here.

As the initial expenses of the bank were heavy, and as no capital was advanced, the early operations resulted in a small loss. This was debited to the profit and loss account of the bank, and the increasing prosperity of the institution was shewn by the way in which the original debit was reduced, until on 30th June, 1915, it was entirely extinguished. The following table shews the results of the transactions of the bank for the last five financial years :—

COMMONWEALTH BANK.—NET RESULT OF TRANSACTIONS, 1916 TO 1920.

Net Result at 30th June—				General Bank.	Savings Bank.	Entire Bank.
				£	£	£
1916	Cr. 181,445	Dr. 34,376	Cr. 147,069
1917	Cr. 522,467	Cr. 3,825	Cr. 526,292
1918	Cr. 991,934	Cr. 84,092	Cr. 1,076,026
1919	Cr. 1,726,532	Cr. 196,438	Cr. 1,922,970
1920	Cr. 2,426,067	Cr. 330,038	Cr. 2,756,105

It will be seen from the above that the general bank became profitable at a much earlier stage than the savings bank. According to the provisions of section 30 of the Bank Act, the net profit of £2,756,105 disclosed at 30th June, 1920, was divided equally between a bank reserve fund and a redemption fund. The reserve fund is available for the payment of any liabilities of the bank. The redemption fund is available for the repayment of any money advanced to the bank by the Treasurer, or for the redemption

of debentures or stock which may be issued by the bank; and any excess may be used for the purpose of the redemption of any Commonwealth debts, or State debts taken over by the Commonwealth.

The Acts under which the various banks are incorporated are not all of the same nature, but it may be stated that while most of the older banks were incorporated by special Acts, e.g., the Bank of New South Wales, by Act of Council 1817; the Bank of Australasia, by Royal Charter; the Bank of Adelaide, by Act of the South Australian Parliament; and the Bank of New Zealand, by Act of the General Assembly of New Zealand, the newer banks are generally registered under a "Companies Act," or some equivalent Act. This is also the case with those banks which, after the crisis of 1893, were reconstructed.

3. **Capital Resources of Banks.**—The paid-up capital of the cheque-paying banks, together with their reserve funds, the rate per cent., and the amount of their last dividends, are shewn in the table hereunder. The information relates to the balance-sheet last preceding the 30th June, 1920. In regard to the reserve funds it must be stated that in the case of some of the banks these are invested in Government securities, while in other cases they are used in the ordinary business of the banks, and in a few instances they are partly invested and partly used in business.

CAPITAL RESOURCES OF CHEQUE-PAYING BANKS, 1919-20.

(a) Including calls in arrear. (b) Subject to estimated deficiency in connection with Special Assets Trusts Coy. Ltd. (c) £416,760 preferential, £1,061,250 ordinary. (d) For twelve months. (e) Dividend for quarter.

4. **Liabilities and Assets of Banks.**—(i) *Liabilities of Banks for Quarter ended 30th June, 1920.* As already stated, the banks transacting business in any State are obliged, under the existing State laws, to furnish a quarterly statement of their assets and liabilities, which contains the averages of the weekly statements prepared by the bank

for that purpose, and they have, during the years 1908-20, furnished quarterly statements to the Commonwealth Statistician. As all other financial returns in this work embrace, so far as possible, a period ended 30th June, 1920, it seems advisable to give the banking figures for the quarter ended on that date, and, where they are shewn for a series of years, similarly to use the figures for the June quarter of each year. The liabilities are those to the general public, and are exclusive of the banks' liabilities to their shareholders, which are shewn in the preceding table :—

AVERAGE LIABILITIES OF BANKS IN EACH STATE OF THE COMMONWEALTH AND THE NORTHERN TERRITORY FOR THE QUARTER ENDED 30th JUNE, 1920.

State.	Notes in Circulation not Bearing Interest.	Bills in Circulation not Bearing Interest.	Balances Due to Other Banks.	Deposits.			Total Liabilities.

(iii) *Liabilities of Banks for June Quarters, 1916 to 1920.* In the subjoined table, which shows the average liabilities of the banks for the quarters ended 30th June, 1916 to 1920, for the Commonwealth as a whole, it will be seen that the growth in total liabilities is almost entirely due to an increase in the deposits, and that deposits not bearing interest and deposits bearing interest have both shared in that increase :—

AVERAGE LIABILITIES OF BANKS IN THE COMMONWEALTH FOR THE QUARTER ENDED 30th JUNE, IN THE YEARS 1916 TO 1920.

Year.	Notes in Circulation not Bearing Interest.	Bills in Circulation not Bearing Interest.	Balances Due to Other Banks.	Deposits.			Total Liabilities.
				Not Bearing Interest.	Bearing Interest. (a)	Total.

1920 ..	20,704,078	625,786	5,375,279	2,909,031	7,819,654	232,440,445	269,874,273

(a) Including Government and Municipal securities, and Australian notes.

As the table shews, the increase in the total amount of assets is mainly due to advances. The decline in 1917 was due to a fall in the advances, which was not quite balanced by the rise in Government securities. The great increases of 1918 and 1919 are almost exactly accounted for by the increase in the advances, due largely to the action of the banks in financing wheat and other commodities awaiting shipment; also in assisting individuals to invest in war loan. In 1920 the liabilities exceeded the assets by about three millions. This was owing to the excess of exports over imports, and the fact that payments had been made by the British Government for wheat and wool in anticipation of shipments not then effected.

5. Percentage of Coin, Bullion, and Australian Notes to Liabilities at Call.—

- (i) *Commonwealth.* Although it is not strictly correct to assume that the division of deposits into those bearing interest and not bearing interest would in every case coincide with a division into fixed deposits and current accounts, the division, in default of a better one, must be adopted, and in the following table "liabilities at call" are therefore understood to include the note circulation of the banks and the deposits not bearing interest. From 1912 onwards, however, the former item steadily decreased, and is now almost negligible as compared with the latter.

PERCENTAGE OF COIN, BULLION, AND AUSTRALIAN NOTES TO LIABILITIES AT CALL, COMMONWEALTH BANKS, 1916 TO 1920.

Year.	Liabilities at Call.	Coin, Bullion, and Australian Notes.	Percentage to Liabilities at Call.
	£	£	%
1916	93,079,493	58,312,009	62.65
1917	105,635,767	53,777,126	50.91
1918	112,491,960	56,359,868	50.10
1919	119,210,322	57,894,016	48.56
1920	134,136,930	55,940,627	41.70

It would appear from the figures just given that the banks generally consider it advisable to hold about half the amount of liabilities at call in coin, bullion, and notes. There was a decline from this standard in 1920 owing to a substantial rise in the deposits not bearing interest.

(ii) *Queensland Treasury Notes.* No bank notes are issued by any of the banks in Queensland, where a Treasury note took the place of bank notes from 1893. These Treasury notes are disregarded in the quarterly statements of the banks; according to Treasury returns the amount outstanding on 30th June, 1919, was £25,600. Under the Australian Notes Act, previously referred to, the issue of notes by a State is now prohibited.

(iii) *States.* The proportion of coin, bullion, and Australian notes to liabilities at call varies considerably in the different States, and even sometimes in the same State from year to year. A table is appended shewing the percentage for each State for the quarter ended 30th June in each of the years 1916 to 1920 :—

PERCENTAGE OF COIN, BULLION, AND AUSTRALIAN NOTES TO LIABILITIES AT CALL, COMMONWEALTH BANKS, 1916 TO 1920.

(ii) *Deposits per Head of Population.* To shew the extent to which the population makes use of the banking facilities afforded to it, a table is given hereunder shewing the

amount of total deposits per head of mean population for each of the years 1916 to 1920. The figures must not be taken as representative of the savings of the people, as a large proportion of the deposits is non-interest-bearing and therefore presumably used in the business of the banks' customers, together with a small part of the interest-bearing deposits.

DEPOSITS PER HEAD OF POPULATION IN COMMONWEALTH BANKS, 1916 TO 1920.

(iii) *Total Advances.* In the quarterly statements furnished by the banks the column headed "all other debts due to the banks," is made up of such miscellaneous items as bills discounted, promissory notes discounted, overdrafts on personal security, overdrafts secured by deposit of deeds or by mortgage, etc. The quarterly returns furnished to the Commonwealth Statistician in 1908 and 1909 provided for a division of the amounts contained under this heading into a number of sub-headings, but all the banks were not in a position to make the necessary division, so that under present circumstances it is impossible to separate these items, and the total amounts contained in the column must, therefore, be treated as advances. The following table shows the totals for each State during the years 1916 to 1920. The fall in 1917 was due to the fact that the banks were not called upon to finance the harvest, this being undertaken by the Imperial Government. Part of the very large rise in 1917-19 is due to the advances made by the banks to their clients, to enable them to subscribe to the Commonwealth War Loans.

ADVANCES BY COMMONWEALTH BANKS, 1916 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N. Ter.	All States.
	£	£	£	£	£	£	£	£
1916 ..	50,443,748	41,990,188	18,456,103	10,156,148	9,414,042	2,871,661	4,141	123,336,031

1920 ..	68,171,203	45,642,462	21,485,247	10,676,319	10,744,799	3,957,318	16,193	160,693,541

(iv) *Proportion of Advances to Deposits.* The percentage borne by advances to total deposits shews to what extent the needs of one State have to be supplied by the resources of another State, and where the percentage for the Commonwealth as a whole exceeds 100 (as it did in the early years of the century), the banks must have supplied the deficiency from their own resources, or from deposits obtained outside the Commonwealth. The following figures shew, however, that the banking business of the Commonwealth has been self-contained during the period under review:—

PERCENTAGE OF ADVANCES TO TOTAL DEPOSITS, COMMONWEALTH BANKS, 1916 TO 1920.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	All States.
	%	%	%	%	%	%	%	%

1920 ..	65.95	52.40	66.34	47.61	85.94	51.39	5.06	60.50

7. Clearing Houses.—The Sydney Banks' Exchange Settlement and the Melbourne Clearing House, at which two institutions settlements are effected daily between the banks doing business in New South Wales and Victoria respectively, publish figures of the weekly clearances effected. From these figures it appears that in 1920 the total clearances in Sydney amounted to £764,546,000, and in Melbourne to £725,006,000. These figures represent an increase for Sydney of £174,448,000 on those for 1919, and for Melbourne of £180,795,000. Owing to the different distribution of the banking business in the two cities these figures do not, however, afford a fair comparison of the volume of banking business transacted in Sydney and Melbourne. For Adelaide the clearances in 1920 totalled £166,011,000, an increase for the year of £42,131,000. Returns for all Australian Clearing Houses for the last five years are shewn in the following table:—

YEARLY TOTAL OF BILLS, CHEQUES, ETC., PASSED THROUGH AUSTRALIAN CLEARING HOUSES, 1916 TO 1920.

Year.	Sydney.	Melbourne.	Brisbane.	Adelaide.	Perth.
	£	£	£	£	£
1916	422,371,000	357,788,000	100,064,000	71,433,000	40,366,000
1917	444,532,000	377,300,000	119,501,000	83,866,000	41,370,000
1918	552,216,000	493,768,000	134,050,000	105,705,000	50,518,000
1919	590,098,000	544,211,000	128,006,000	123,880,000	56,900,000
1920	764,546,000	725,006,000	160,539,000	166,011,000	80,758,000

§ 3. Companies.

1. General.—Returns in regard to registered companies are defective, and, with few exceptions, are not available for Tasmania. They embrace (a) Returns relating to Trustees, Executors and Agency Companies; (b) Returns relating to Registered Building and Investment Societies; and (c) Returns relating to Registered Co-operative Societies.

2. Trustees, Executors and Agency Companies.—Returns are available of eight Victorian, two New South Wales, one Queensland, four South Australian, one Western Australian, two Tasmanian companies, and two with head offices in New Zealand. The paid-up capital of these twenty companies amounted to £752,565; reserve funds and undivided profits to £530,632; other liabilities, £254,591; total liabilities, £1,537,798. Among the assets are included:—Deposits with Governments, £192,504; other investments in public securities, fixed deposits, etc., £410,363; loans on mortgage, £130,639; property owned, £498,717; other assets, £305,575. The net profits for the year were £127,765, and the amount of dividends and bonuses £74,960. Returns as to the amount at credit of estates represented by assets are available for only eleven companies, the total shewn being £59,204,063.

Probably about £25,000,000 would have to be added to this amount for the remaining nine companies, so that the total amount would probably be about £85,000,000. None of these companies receives deposits, and advances are only made under exceptional circumstances, and to a very limited extent, the total so shewn in the last balance-sheets being but £118,063.

3. Registered Building and Investment Societies.—Returns have been received of a total of 204 societies, viz., 126 in New South Wales, 31 in Victoria, 11 in Queensland, 20 in South Australia, 12 in Western Australia, and 4 in Tasmania. The balance-sheets

cover various periods ended during the second half of 1919 and the first half of 1920, so that the returns may be assumed to correspond roughly to the financial year 1919-20. The liabilities of the societies are stated as follows :—

LIABILITIES OF REGISTERED BUILDING AND INVESTMENT SOCIETIES, 1919-20.

State.	Paid-up Capital or Subscriptions.	Reserve Funds.	Deposits.	Bank Overdrafts and other Liabilities.	Total Liabilities.
	£	£	£	£	£
New South Wales ..	1,742,723	370,832	485,764	110,873	2,710,192
Victoria ..	1,334,075	387,867	848,787	124,044	2,694,773
Queensland ..	493,901	45,664	94,622	41,316	675,503
South Australia ..	290,025	21,951	4,899	336,346	653,221
Western Australia ..	153,408	1,008	26,342	10,361	191,119
Tasmania ..	116,321	61,943	166,929	4,366	349,559
Total ..	4,130,453	889,265	1,627,343	627,306	7,274,367

The assets of the companies for the same period were as follows :—

ASSETS OF REGISTERED BUILDING AND INVESTMENT SOCIETIES, 1919-20.

State.	Advances on Mortgage.	Landed and House Property, Furniture, etc.	Cash in Hand and on Deposit and other Assets.	Total Assets.

(a) Exclusive of Tasmania.

§ 4. Savings Banks.

1. **General.**—The total number of savings banks, with their branches and agencies, in the Commonwealth at the middle of 1920 was 2,320, distributed as follows:—New South Wales, 645; Victoria, 482; Queensland, 528; South Australia, 317; Western Australia, 199; and Tasmania, 149.* These figures are exclusive of the Commonwealth Savings Bank, except in the State of Tasmania, in which the Commonwealth Savings Bank absorbed the State Savings Bank. In the Northern Territory the Commonwealth Savings Bank alone is in operation.

In the following tables the figures for all the States except Tasmania refer to financial years ended 30th June. In the case of Tasmania, figures for the two joint-stock savings banks were made up to the last day of February in each year up to 1918–19, but in 1919–20 were made up to August, and will be so estimated in subsequent years. In the case of the Commonwealth Bank, figures are made up to the 30th June, 1920.

2. **Depositors.**—The total number of depositors, *i.e.*, of persons having accounts open, not of those making deposits, in each of the last ten years is shewn in the following table:—

NUMBER OF DEPOSITORS IN SAVINGS BANKS (b), 1915–16 TO 1919–20.

Year.	N.S.W.	Victoria. (a)	Q'land.	S. Aust. (a)	W. Aust. (a)	Tasmania.	N. Ter.	All States.
1915–16 ..	806,882	821,208	249,235	299,308	157,355	86,489	1,139	2,421,616
1916–17 ..	872,351	869,058	281,585	319,960	172,084	91,680	1,366	2,608,084
1917–18 ..	920,337	913,875	313,248	337,709	182,140	95,154	1,274	2,763,737

1919–20 ..	1,053,893	1,014,223	364,149	377,435	204,005	108,289	987	3,122,981

(a) Inclusive of depositors in penny savings banks.

(b) Inclusive of Commonwealth Savings Bank.

The subjoined table shews the above figures in relation to the population of the States; it must, of course, be borne in mind that savings bank accounts are not restricted to the adult population, but that it is, on the contrary, a very usual practice to open accounts in the names of children. Even so, the proportion is a large one, amounting in the case of the Commonwealth to about four-sevenths and rising in Victoria to nearly two-thirds and in South Australia to more than three-quarters. In the case of this table and the one that follows, it may be pointed out that as it is possible for the same person to have accounts in both Commonwealth and State Savings Banks, the figures given are probably slightly in excess of the number of individual depositors.

DEPOSITORS IN SAVINGS BANKS(a) PER 1,000 OF POPULATION,
1915–16 TO 1919–20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.	All States.

1919–20 ..	519	674	496	799	611	498	225	589

(a) Inclusive of Commonwealth Savings Bank.

* Year 1913. In this year the Government Savings Bank was taken over by the Commonwealth Savings Bank.

3. **Deposits.**—The total amount of deposits in the savings banks of the six States reaches the large sum of one hundred and twenty-eight million pounds, and would no doubt be even larger if the banks did not restrict interest-bearing deposits to certain limits. It must be remembered that though not granting facilities to draw cheques, the Australian savings banks practically afford the small tradesman all the advantages of a current account, in addition to which they also allow him interest on his minimum monthly balance, instead of charging him a small fee for keeping his account, as the ordinary banks do. The rates of interest allowed, and the limits of interest-bearing deposits, are as follows:—New South Wales, Government Savings Bank, $3\frac{1}{4}$ per cent. up to £500; Victoria, 4 per cent. on first £500, and on deposit stock up to £1,000; Queensland, $3\frac{1}{2}$ per cent. up to £1,000; South Australia, $2\frac{1}{2}$ per cent. on accounts closed during the year, and 4 per cent. up to £350 on accounts remaining open; Western Australia, $3\frac{1}{2}$ per cent. from £1 to £500, and 3 per cent. from £500 to £1,000; also 4 per cent. on deposit stock up to £1,000; Hobart Trustees' Savings Bank, 4 per cent. up to £300; Launceston Trustees' Savings Bank, 4 per cent. up to £150, and Commonwealth Savings Bank, $3\frac{1}{2}$ per cent. on the first £1,000, and 3 per cent. upon another £300. The savings banks of the six States including the two trustee banks of Tasmania, have, for the further benefit of depositors, entered into a reciprocity arrangement, under which money deposited in one State may be drawn out in another State, even by telegraph.

The table below shews the total amounts at credit of depositors in each of the last ten years:—

DEPOSITS IN SAVINGS BANKS(a), 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N. Ter.	All States.
	£	£	£	£	£	£	£	£
1915-16 ..	37,363,272	28,789,426	12,938,636	10,035,036	5,338,009	2,554,266	77,956	97,076,601
1916-17 ..	40,836,747	31,581,266	14,725,959	11,351,343	5,846,109	2,695,274	102,348	107,139,046
1917-18 ..	43,039,012	34,598,186	16,501,325	12,899,036	6,290,027	2,917,235	95,071	116,339,892

(a) Inclusive of Commonwealth Savings Bank.

A comparison between the tables shewing the number of depositors and the amount of deposits reveals the fact that the average amounts to the credit of each depositor are considerably larger in some States than in others; in other words, that in one State a comparatively larger proportion of the population makes use of the savings banks, and that the natural result is a smaller amount to the credit of the individual depositor. Within the same State there is little variation in the figures from year to year, except that Victoria and South Australia have shewn a steady advance in the period under review.

AVERAGE AMOUNT PER DEPOSITOR IN SAVINGS BANKS(a), 1915-16 TO 1919-20.

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	N. Ter.	All States.

(a) Inclusive of Commonwealth Savings Bank.

The average amount deposited per head of population shews a satisfactory increase during the period under review. Since 1908-9 it has practically doubled itself, the figures for South Australia being particularly noticeable.

SAVINGS BANKS DEPOSITS PER HEAD OF POPULATION, 1915-16 TO 1919-20.

4. **Annual Business.**—The annual volume of business transacted by the Australian savings banks is very large when compared with the total amount of deposits. This is mainly due to the fact already pointed out that many accounts are used as convenient current accounts. Thus, during the last year of the period under review, the total amount deposited and withdrawn (exclusive of interest added) amounted to about 225 per cent. of the total amount of deposits at the end of the previous year, while the amount at credit of depositors (inclusive of interest added) increased by only about 6½ per cent. during the same year. The following table shews the business transacted during the year 1919-20 :—

SAVINGS BANKS TRANSACTIONS DURING THE YEAR 1919-20.

State.	Total Deposits at end of Year 1918-19.	Amounts Deposited during Year 1919-20.	Interest Added during Year 1919-20.	Total.	Amounts Withdrawn during Year 1919-20.	Total Deposits at end of Year 1919-20.

5. **Commonwealth Savings Bank.**—The Savings Bank department of the Commonwealth Bank started operations in Victoria on 15th July, 1912, in Queensland on 16th September, 1912, in the Northern Territory on 21st October, 1912, and in the States of New South Wales, South Australia, and Western Australia on 13th January, 1913. Business is being transacted on the usual Savings Bank lines, interest at the rate of 3½ per cent. being now allowed on deposits up to £1,000, and 3 per cent. on the next £300. Extensive use is being made of the country post-offices as local agencies, the several States having received notice to remove their Savings Banks from the post-offices by the end of 1912.

The Commonwealth Bank absorbed the Tasmanian State Savings Bank in January, 1913, on terms set out in Official Year Book No. 6. Arrangements for the transfer of the Queensland Savings Bank were completed early in 1920, and it was effected at the end of the year. Consequently this is the last occasion on which the accounts of the Queensland Savings Bank will appear separately.

For further particulars concerning the Commonwealth Savings Bank, see Official Year Books Nos. 6-10.

The following table shews for each State the number of depositors, and the amount at credit on 30th June, 1920, in the Commonwealth Savings Bank :—

COMMONWEALTH SAVINGS BANK AS AT 30th JUNE, 1920.

§ 5. Life Assurance.

1. **General.**—Under section 51 of the Commonwealth Constitution Act, the Commonwealth Parliament is empowered to legislate in regard to “insurance, other than State insurance; also State insurance extending beyond the limits of the State concerned.” With the exception of Act No. 12 of 1905, “an Act relating to assurance on the lives of children by life assurance companies or societies,” no legislation relating to life assurance has been passed by the Commonwealth Parliament, and life assurance companies carry on their business under State laws where such laws are in existence, or otherwise under the provisions of various companies’ or special Acts. A Royal Commission consisting of the Honourable J. H. Hood, one of the judges of the Supreme Court of Victoria, and G. H. Knibbs, Esq., C.M.G., Commonwealth Statistician, was, however, appointed in 1908, “to inquire into and report upon the law relating to and the methods of operating, Fire, Life, Industrial, and other Insurance in Australia.” The Commission was originally required to report the result of its inquiry before the 30th June, 1909. A progress report was issued before that date, and the time for the final report extended to the 30th June, 1910. The report relating to Life Assurance was published on 15th March, 1910, and that relating to Fire Insurance on 15th October, 1910. On the conclusions contained in these reports future Commonwealth legislation will probably be based. A bill embodying some of the conclusions was introduced into the Federal Parliament on 20th December, 1912, but, owing to lack of time, did not reach its second reading. An additional report on Social Insurance was prepared by the Commonwealth Statistician and issued on 9th September, 1910.

Returns for the year 1919 have been directly collected from life assurance societies by the Commonwealth Statistician, with results which are in the main satisfactory. Figures for 1919 refer to business in the Commonwealth only, and do not include New Zealand business.

2. **Companies Transacting Business in the Commonwealth.**—The total number of companies at present established in the Commonwealth is twenty, of which the following nine have their head offices in New South Wales :—The Australian Mutual Provident Society, the Mutual Life and Citizens’ Assurance Company Limited, the City Mutual Life Assurance Society Limited, the Australian Metropolitan Life Assurance Company Limited, the People’s Prudential Assurance Company Limited, the Life Insurance Company, the Assurance and Thrift Association Limited, the Co-operative Assurance Company Limited, and the Australian Provincial Assurance Association Limited. The Mutual Life and Citizens’ Assurance Company Limited was formed in 1908 by the amalgamation of the Mutual Life Association of Australasia and the Citizens’ Life Assurance Company Limited. During 1910 it increased in size by amalgamating with the Australian Widows’ Fund Life Assurance Society Limited, which is therefore no longer included in the list of independent corporations. Five companies have their head offices in Victoria, viz. :—

The Australian Alliance Assurance Company, the National Mutual Life Association of Australasia Limited, the Victoria Life and General Insurance Company, the Colonial Mutual Life Assurance Society Limited, and the Australasian Temperance and General Mutual Life Assurance Society Limited. The head office of the Queensland State Insurance Office is in Brisbane. The head office of the Provident Life Assurance Company is in New Zealand, and that of the Liverpool and London and Globe Insurance Company in England. The remaining three societies belong to the United States, viz. :—The Equitable Life Assurance Society of the United States, the Mutual Life Insurance Society of New York, and the New York Life Insurance Society.

Most of the Australian companies are purely mutual; the following, however, are partly proprietary, the figures in brackets representing the shareholders' capital paid up :—The Victoria Life and General (£40,000), Mutual Life and Citizens' (£200,000), Metropolitan (£11,839), Prudential (£10,000), Life Insurance Company (£44,000), Assurance and Thrift (£17,684), Co-operative Assurance (£56,675), and Australian Provincial Association (£97,846). Of foreign companies transacting business in the Commonwealth, the Liverpool and London and Globe, the Provident, and the Equitable are partly proprietary, the shareholders' capital amounting to £265,525, £21,000, and £20,550 respectively.

3. Ordinary and Industrial Business.—Of the societies enumerated in the preceding paragraph, the following seven in 1919 transacted both ordinary and industrial business :—The Australian Mutual Provident Society, the Mutual Life and Citizens' Assurance Company Limited, the Australasian Temperance and General Mutual Life Assurance Society Limited, the Australian Metropolitan Life Assurance Company Limited, the Colonial Mutual Life Assurance Society, the Life Insurance Company, and the Co-operative Assurance Company.

The People's Prudential Assurance Company Limited and the Provident Life Assurance Company formerly restricted their operations to industrial business, but have now established an ordinary department.

The remaining nine societies transacted ordinary life assurance business only, with the exception of those companies which have fire and accident branches, etc.

It has been attempted in this section to keep returns relating to ordinary and to industrial business apart, so far as it is possible to do so, and figures relating to companies whose head offices are in New Zealand or in Europe or America refer to the Australian business only of those companies.

4. Ordinary Business : Australian Business in Force, 1919.—The subjoined table shews the ordinary life business in force at the latest dates available for the nineteen societies conducting operations in the Commonwealth :—

ORDINARY LIFE ASSURANCE.—AUSTRALIAN BUSINESS IN FORCE, 1919.

(a) Decrease.

7 Liabilities and Assets of Assurance Societies, 1919.—The liabilities of the Australian societies consist mainly of their assurance funds; as already mentioned, however, nine of the societies are partly proprietary, viz., the Mutual Life and Citizens', with a paid-up capital of £200,000; the Metropolitan, with a paid-up capital of £11,839; the Prudential, with a paid-up capital of £10,000; the Victoria Life and General, with a paid-up capital of £40,000; the Provident, with a paid-up capital of £21,000; the Life Insurance Company, with £44,000; the Assurance and Thrift, with £17,684; Co-operative Assurance Company, with £56,675; and the Australian Provincial with £97,846. With the exception of the Victoria, the Life Insurance, Assurance and Thrift, and Australian Provincial, this paid-up capital belongs in every case to the industrial branch of the respective societies. The capital of the Provident (£21,000) is held in New Zealand, that of the Liverpool and London and Globe (£265,525) in England, and that of the Equitable Life (£20,550) in the United States. None of these three amounts appears, therefore, in the two subjoined tables, where the capital of the Australian societies is included with the assurance funds. The assets consist mainly of loans on mortgage and policies, Government, municipal, and similar securities, shares, freehold property, etc. As in some cases the Australian liabilities exceed the Australian assets, it may be pointed out that this table should be read in connexion with the table on page 766, which sets out the total assets. Loans on personal security are granted by very few of the Australian societies.

(i) *Ordinary Business.* The following table shows the liabilities and assets of the societies transacting ordinary life business:—

(a) Including industrial business. As the business of these three societies is mainly ordinary life business they have been included in this table. (b) Not available. (c) Several life offices have a considerable portion of their assets invested outside the Commonwealth (see table on the next page).

(ii) *Industrial Business.* As stated in the footnote to the preceding table, the Australian Mutual Provident Society, the Australasian Temperance and General Mutual Life Assurance Society, and the Co-operative Assurance Company, which transact a certain amount of industrial business, but whose business is mainly ordinary life business, have been included with those societies doing only ordinary life business. On the other hand, the People's Prudential Assurance Company, in whose case industrial business greatly predominates over ordinary life business, has been included in the following table. Incomplete as the table is, it shows that the funds appropriated to industrial business are very insignificant in comparison with those pertaining to ordinary life business. Taking the table in conjunction with the statements of revenue and expenditure, the question may well be asked whether in the case of some of the societies, industrial business is worth catering for.

INDUSTRIAL LIFE ASSURANCE.—AUSTRALIAN LIABILITIES AND ASSETS, 1919.

(a) Including ordinary business.

(b) Particulars not available.

(iii) *Total Assets.* It has been thought advisable to confine the figures relating to life assurance to business in the Commonwealth. Several of the companies whose head offices are in Australia transact, however, a large amount of business elsewhere, viz., in New Zealand, in South Africa, and in the United Kingdom, while in the case of the foreign companies, the Australian business is insignificant compared with that done elsewhere. Particulars as to this foreign business of both Australian and foreign companies will be found in "Finance Bulletin, No. 11" (published by this Bureau), and a short table only is inserted here, shewing the total assets of the various companies, so that the deficiencies in the Australian assets shewn in the previous tables for those companies doing business elsewhere may not be misunderstood:—

§ 6. Fire Insurance.*

1. *General.*—Returns as to fire insurance are very defective, and only for Sydney and Melbourne and the country districts of Victoria have some figures been given which are worth reproducing. The Royal Commission mentioned above under "Life Assurance"

* See also Section XXVI., § 5, Fire Brigades.

has reported upon fire insurance matters, and Commonwealth legislation may, therefore, be expected in the future. Legislation concerning fire insurance was, in fact, contained in the bill to which reference has already been made. [§ 5, sub-section 1.]

2. **Sydney.**—Under the Fire Brigades Act 1902 the cost of the Metropolitan Fire Brigade is defrayed by equal payments on the part of the Colonial Treasurer, the municipal councils within the area under the jurisdiction of the Fire Brigades Board, and the insurance companies represented in Sydney. The companies divide their share proportionately to the amount held at risk. A new Act, which came into force on the 1st January, 1910, was passed in 1909. This Act substituted a Board of Fire Commissioners for New South Wales for the original Metropolitan Fire Brigades Board, and divided the whole State into eight fire districts for the greater facilitation of working.

3. **Melbourne.**—In Melbourne the Metropolitan Fire Brigades Board assesses the amount payable by the insurance companies on the amount of premiums returned. These premiums for the last four years averaged about £600,000 per annum, while the contributions paid by the companies averaged about £29,500, or about £5 for every £100 of premiums. It may be said, therefore, that the companies have to devote about 5 per cent. of their premium income from metropolitan insurances to the maintenance of the fire brigade.

The value of ratable property is about £8,434,000, and the amounts contributed by the municipalities—as in the case of the insurance companies, one-third of the amount required by the Fire Brigades Board, the remaining one-third being contributed by the State Treasurer—are equal to about $\frac{1}{10}$ d. per £1 of ratable value. In addition to this contribution, insurance companies doing business in Victoria have to take out an annual license at a cost of $1\frac{1}{2}$ per cent. of the gross premium income, which is probably equal to about $1\frac{2}{3}$ per cent. on net income.

4. **Country Districts of Victoria.**—The country districts are divided into nine areas for fire insurance purposes, and the contributions to be paid vary in these areas according to the actual requirements of the Country Fire Brigades Board. The value of ratable property for the last year was slightly over £1,856,000. The premium income of the insurance companies from country business in protected areas during the year 1919 was about £239,000, and the contributions of the companies £4,909, equal to rather more than 2 per cent. of the premium income.

5. **Brisbane.**—A similar arrangement holds good in Brisbane, under which the cost of the Fire Brigade Board, amounting to about £25,000 per annum, is paid in equal shares by the Government, the Brisbane City Council, and the insurance companies.

6. **Adelaide.**—The Fire Brigades Board of South Australia is incorporated under "The Fire Brigades Act 1904"; "The Fire Brigades Act Amendment Act 1905"; and "The Fire Brigades Act Further Amendment Act 1910." The cost is distributed as follows:—Three-ninths to the Government; four-ninths to the insurance companies; and two-ninths to the municipalities and districts which come under the operations of the board. The insurance companies are assessed in proportion to that portion of their premium incomes derived from the insurance of property (re-insurance within the State excepted) situated within the limits of the municipalities and districts coming under the operations of the board. The respective contributions for 1919 were as follows:—The Government, £10,376; the companies, £13,835; the municipalities, £6,917.

7. **Perth.**—A District Fire Brigades Bill was reported on by a committee of the Legislative Assembly during 1909, and it was recommended that all brigades should in future be controlled by one board, and that the expense should be met by contributions at the following rate:—By Government, two-eighths; by the municipalities, three-eighths; and by the insurance companies, three-eighths. These provisions were incorporated in an Act, "The District Fire Brigades Act 1909," which was assented to on 21st December, 1909, and came into force on the 1st day of January, 1910. This

Act is now superseded by the Fire Brigades Act 1916 which came into operation on 2nd April 1917. It provides that every municipal or road board district shall be a fire district for the purposes of the Act, under the control of the Western Australian Fire Brigades Board. The income of the Board is derived in the same proportions as provided for in the Act of 1909. The latest valuation of ratable property is £1,583,000, and expenditure £31,550, of which the Government paid £7,888, the municipalities £11,831 and the insurance companies, £11,831.

8. **Australian Fire Insurance Business.**—Returns are available shewing the revenue and expenditure, assets and liabilities, and investments of twenty-seven insurance companies having their head offices either in the Commonwealth or in New Zealand. These companies are:—(a) with head office in Sydney—the Australian Mutual Fire Insurance Company, the City Mutual Fire Insurance Company, the Mercantile Mutual Fire Insurance Company, the Queensland Insurance Company Limited, the United Insurance Company, the Insurance Office of Australia Limited, the Federal Mutual Insurance Company of Australia, The Manufacturers' Mutual and the Farmers and Settlers; (b) with head office in Melbourne—the Australian Alliance Assurance Company, the Colonial Mutual Fire Insurance Company, the Victoria Insurance Company, the Victoria General Insurance and Guarantee Company Limited, the Co-operative Insurance Company of Australia, the Chamber of Manufactures, and the Victoria State Accident Office; (c) with head office in Hobart—the Derwent and Tamar Fire and Marine Assurance Company Limited; (d) with head office in Launceston—the Mutual Fire Insurance Company of Tasmania, (e) with head office in Auckland—the New Zealand Insurance Company, and the South British Fire and Marine Insurance Company of New Zealand; (f) with head office in Dunedin—the National Fire and Marine Insurance Company of New Zealand, and the Standard Fire and Marine Insurance Company of New Zealand; (g) with head office in Wellington—the New Zealand State Fire Insurance Office, and the New Zealand Government Accident; (h) with head office in Christchurch—the Farmers' Co-operative Insurance Association of New Zealand; (i) with head office in Perth—the Western Australian Insurance Company; and (j) with head office in Brisbane—the Queensland State Government. As their names imply, many of these companies transact marine insurance, and in some cases guarantee and other business, in addition to the fire insurance business, and the returns relating to the latter cannot be separated from the former.

The accounts given hereunder cover two consecutive years, the second year ending at various dates from 31st December, 1918, to 30th April, 1920. The figures for the first year are in brackets.

The premiums, less reinsurances and returns, amounted to £4,957,322 (£5,308,884); losses were £2,608,869 (£2,728,571). Expenses and commission came to £1,577,784 (£1,527,046), and there was, therefore, a profit on trade operations of £770,669 (£1,053,267). As, however, interest, rent, fees, etc., amounted to £379,447 (£328,119), the total profit was £1,150,116 (£1,381,386). Dividends and bonuses came to £396,899 (£374,722). The ratio to premium income of losses was, therefore, 52.63 per cent. (51.40 per cent.), and of expenses and commissions, 31.83 per cent. (28.76 per cent.). The resulting ratio of trade surplus to premium income was 15.54 per cent. (19.84 per cent.).

The paid-up capital of the twenty-seven companies was £3,365,235 (£3,109,956); reserve and reinsurance funds, £4,627,900 (£4,203,548); undivided profits, £384,394 (£335,844). The total paid-up capital and reserves were, therefore, £8,377,529 (£7,649,348). In addition to these liabilities there were others, viz.:—Unsettled losses, £790,992 (£643,412); sundry creditors, £1,126,707 (£1,095,013); dividends payable, £297,617 (£283,677); and, in the case of two companies, life assurance funds £136,732 (£96,043); thus bringing the total liabilities to shareholders and to the general public up to £10,729,577 (£9,767,493).

The corresponding amount of assets is made up of investments, £8,806,746 (£8,044,811), viz.:—Loans on mortgage, £1,133,221 (£1,198,576); Government securities, debentures, shares, etc., £4,935,958 (£4,182,448); landed and other property, including furniture, £1,332,642 (£1,288,591); fixed deposits, £1,221,824 (£1,198,652); in the case

of one company doing a mixed business—loans on its own life policies, etc., £4,297 (£4,503); other investments, £183,804 (£172,041). The balance of assets consisted of cash in bank, on hand, and bills receivable, £831,063 (£811,909); and sundry debtors, etc., £1,091,768 (£910,773).

The financial position of the companies is undoubtedly a strong one, owing to the steady accumulation of reserves, and the high ratio borne by capital and reserves to premium income must be a cause of satisfaction to policy holders.

§ 7. Marine Insurance.

No returns are available in regard to Marine Insurance. It may, however, be stated that the Commonwealth Parliament in 1909 passed an Act (No. 11 of 1909, "An Act relating to Marine Insurance") which was assented to on the 11th November, 1909. This Act materially alters some of the conditions under which marine policies have heretofore been issued.

§ 8. Friendly Societies.

1. **General.**—Friendly societies are an important factor in the social life of the community, as probably one-third of the total population of the Commonwealth comes either directly or indirectly under their influence. Their total membership is about 480,000, but as certain benefits, such as medical attendance and free medicines, and in many cases funeral expenses, are granted to members' families as well as to members themselves, this figure must, even when due allowance is made for young and unmarried members, be multiplied by at least four to arrive at the total number of persons more or less connected with these societies. Legislation has conferred certain privileges on friendly societies, but, on the other hand, it insists on their registration, and it is the duty of the Registrars in the various States, prior to registering a new society, to see that its rules are conformable to the law, and that the scale of contribution is sufficiently high to enable the promised benefits to be conferred on members. Societies are obliged to forward annual returns as to their membership and their finances to the Registrar, and elaborate reports are published in most of the States dealing with the returns thus received.

In the following tables the figures refer to the year 1919.

2. **Number of Societies, Lodges, and Members.**—The total number of societies registered in New South Wales is 61; in Victoria, 49; in Queensland, 20; in South Australia, 17; in Western Australia, 15; and in Tasmania, 19. No total is given of these figures for the Commonwealth, as the societies shewn in one State are in most cases represented in all the other States. The number of different lodges, the total number of benefit members at the end of the year, and their average number during the year are shewn in the following table:—

FRIENDLY SOCIETIES.—LODGES AND MEMBERS, 31st DECEMBER, 1919.

State.	Number of Lodges.	Benefit Members at End of Year.	Average No. of Benefit Members during Year.
New South Wales	1,925	169,482	167,949
Victoria	1,489	144,280	146,919
Queensland	553	54,448	53,786
South Australia	593	68,542	67,795
Western Australia	280	18,388	18,087
Tasmania	190	22,530	22,406
Commonwealth	5,030	477,670	476,942

3. **Sickness and Death.**—Sick pay is generally granted for a number of months at full rates, then for a period at half rates, and in some societies is finally reduced to quarter rates. The following table shews the total number of members who received sick pay during the year, the number of weeks for which they received pay in the aggregate, and the average per member sick, and further the number of benefit members who died during the year, together with the proportion of deaths per thousand average members :—

FRIENDLY SOCIETIES.—SICKNESS AND DEATH, 1919.

State.	Number of Members who received Sick Pay.	Total Number of Weeks Sick Pay Granted.	Average Number of Weeks per Member Sick.	Deaths of Benefit Members and Wives.	Proportion of Deaths to 1,000 average Benefit Members.
	(a)	(a)	(a)	(a)	(a)
New South Wales ..	46,612	406,817	8.73	2,962	20.16

South Australia ..	4,626	36,211	7.83	229	12.66
Western Australia ..	5,402	36,787	6.81	397	17.72
Tasmania ..					
Commonwealth (b) ..	86,616	692,985	8.00	5,436	17.59

(a) Not available.

(b) Exclusive of New South Wales.

4. **Revenue and Expenditure.**—The financial returns are not prepared in the same way in each State, but an attempt has been made in the subjoined table to group the revenue under the main headings :—

FRIENDLY SOCIETIES.—REVENUE, 1919.

State.	Entrance Fees, Members' Contributions, and Levies.	Interest, Dividends, and Rents.	All other Income.	Total Revenue.
	£	£	£	£
New South Wales ..	551,278	117,524	40,740	709,542
Victoria ..	451,101	143,207	70,218	664,526
Queensland ..	187,573	44,789	..	232,362
South Australia ..	172,713	67,387	49,321	289,421
Western Australia ..	54,837	16,872	33,195	104,904
Tasmania ..	69,603	12,240	17,125	98,968
Commonwealth ..	1,487,105	402,019	210,599	2,099,723

The returns relating to expenditure are more complete than those relating to revenue, and can be shewn in full for every State. The figures shew that the excess of revenue, was only £75,581 for the entire Commonwealth, a result for which the outbreak of pneumonic influenza was probably responsible. The revenue exceeded the expenditure by about three shillings per average benefit member, a margin which cannot be called very large.

AUSTRALIAN BANKING STATISTICS.—CHEQUE-PAYING BANKS IN AUSTRALIA,
1870 TO 1920.

See pp. 753 to 755.

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year, and its vertical height a sum of £5,000,000.

SAVINGS BANKS IN AUSTRALIA, 1873 TO 1920.

See pp. 759 to 762.

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of one year. Of the two scales on the left, the outer one represents the amount at credit, and the inner one the number of depositors, while the vertical height of each small square represents £2,500,000 and 50,000 in number respectively. The scale on the right represents the average amount per depositor, and per head of population respectively, while the vertical height of each small square represents £1.

GRAPHS SHEWING LIFE ASSURANCE IN ORDINARY AND INDUSTRIAL DEPARTMENTS
IN THE COMMONWEALTH OF AUSTRALIA, 1906 TO 1919.

See pp. 763, 764.

EXPLANATION OF GRAPHS.—The base of each small square represents in each graph an interval of one year.

In the case of the "Ordinary" Assurance graph, there are three scales—two on the left—the outer one representing the Annual Premiums, and the inner one the number of Policies in force,—and one on the right representing the Amount Assured, exclusive of bonus additions. The vertical height of each small square represents £100,000, 10,000 in number and £5,000,000 respectively.

In the case of the "Industrial" Assurance graph, the scale on the left represents the Annual Premiums and the number of Policies in force, and the scale on the right the Amount Assured, exclusive of bonus additions. The vertical height of each small square represents £20,000, 20,000 in number and £500,000 respectively.

FRIENDLY SOCIETIES.—EXPENDITURE, 1919.

State.	Sick Pay.	Medical Attendance and Medicine.	Sums Paid at Death of Members and Members' Wives.	Administration.	All other Expenditure.	Total Expenditure.
	£	£	£	£	£	£
New South Wales ..	274,929	186,801	89,265	106,115	42,818	699,928
Victoria ..	298,170	178,980	54,164	81,067	68,562	680,943
Queensland ..	61,081	65,978	31,054	39,696	..	197,809
South Australia ..	86,237	38,769	38,740	34,879	48,769	247,403
Western Australia ..	29,569	18,484	6,298	14,327	39,719	108,397
Tasmania ..	28,139	19,689	21,248	13,029	7,557	89,662
Commonwealth ..	778,125	508,701	240,778	289,113	207,425	2,024,142

It appears from the above figures that sick pay averaged about twenty-two shillings per week, but, as the returns include pay at half and quarter rates, and as the proportion of these to full rates is not stated, the average given must be taken for what it is worth. Medical attendance and medicine came to about one pound per average benefit member.

5. Funds.—The two foregoing tables shew that the surplus of revenue over expenditure in five States amounted to £75,581 for the year, and a small surplus must, of course, result annually in every society which levies adequate contributions to enable it to meet all possible claims. These accumulations of profits are generally invested, and the subjoined table shews for all of the six States the division into invested and uninvested funds :—

FRIENDLY SOCIETIES.—FUNDS, 31st DECEMBER, 1919.

State.	Invested Funds.	Uninvested Funds.	Total Funds.
	£	£	£
New South Wales ..	2,217,796	(a)	2,217,796
Victoria ..	2,957,821	98,845	3,056,666
Queensland ..	977,812	3,272	981,084
South Australia ..	1,397,124	22,043	1,419,167
Western Australia ..	270,355	8,298	278,653
Tasmania ..	257,580	13,197	270,777
Commonwealth ..	8,078,488	145,655	8,224,143

(a) Included in Invested Funds.

The total funds amounted, therefore, to about £17 per member at the close of the year under review.

§ 9. Probates.

1. Number of Probates and Letters of Administration and Value of Estates.—The value of the estates left by deceased persons gives a fair view of the distribution of property among the general population. There occurred in 1919 the deaths of 39,545 adult persons, while the total number of probates and letters of administration granted during the same period was 19,950. It would therefore appear that about one half of

the adults who died during the year were possessed of sufficient property to necessitate the taking out of probate. The details for each State are shewn in the table hereunder:—

PROBATES AND LETTERS OF ADMINISTRATION, 1919.

State.	Number of Estates.			Net Value of Estates.		
	Probates.	Letters of Administration.	Total.	Probates.	Letters of Administration.	Total.
				£	£	£
New South Wales ..	7,188	(a)	7,188	17,131,131	(a)	17,131,131
Victoria ..	4,585	2,819	7,404	13,844,186	(a)	13,844,186
Queensland ..	947	175	1,122	3,439,594	294,370	3,733,964
South Australia ..	1,671	648	2,319	3,238,680	231,320	3,470,000
Western Australia ..	961	392	1,353	1,677,745	774,083	2,451,828
Tasmania ..	474	90	564	1,298,953	91,883	1,390,836
Commonwealth ..	15,826	4,124	19,950	40,630,289	1,391,656	42,021,945

(a) Included with Probates.

The number of intestate estates placed under the control of the Curator during the year, and the amount of unclaimed money paid into Consolidated Revenue in each State during the year 1919 are shewn hereunder:—

INTESTATE ESTATES, 1919.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'with.
Intestate estates placed under control of Curator during 1919—							
Number ..	(a)	831	2,077	392	522	134	(b)
Value .. £	(a)	91,928	535,083	(a)	74,303	30,216	(b)
Unclaimed money paid into Consolidated Revenue by Curator during 1919 £	50,457	758	5,555	787	4,566	..	62,123

(a) Included above.

(b) Not available.

On pages 771 and 772 will be found a series of graphs illustrating the progress of Banking and Life Assurance. The graphs on Banking cover a period of about forty years, and include cheque-paying Banks and Savings Banks. The graphs dealing with Life Assurance go back to 1906 only, and include ordinary and industrial business.

SECTION XXII.

PUBLIC INSTRUCTION.

§ 1. Evolution of Educational Systems in Australia.

1. *Educational Systems of the States.*—(i) *Place of New South Wales in Australian Education.* The first settlement in Australia being in New South Wales, it is but natural that Australian education should have had its beginning in that State. In the evolution of educational method and system in Australia, New South Wales also has played a leading part, and has had practically a dominating influence. For that reason an account of the evolution of education in this State contains, as it were, the key to the understanding of the Australian attitude to this question. The subject is dealt with in some detail in No. I. and No. II. issues of the Commonwealth Official Year Book, but it is not proposed to repeat it in the present volume. (See also 2 hereunder.)

(ii) *Educational Systems of Commonwealth States.* A more or less detailed account of the origin and development of the primary educational systems of the other States also appears in No. I. and No. II. issues of the Year Book. Later details are given hereunder.

2. *Recent Development in State Educational Systems.*—(i) *New South Wales.* The year 1913 was an important one in New South Wales educational history, in that it was the first complete year of active operation of the principles laid down in the University Amendment Act and the Bursary Endowment Act of 1912. More extended reference to these Acts will be found later on. It was also remarkable for the reorganisation of technical education on a Trades School basis and of the Superior Schools on a vocational basis. Reference may also be made to the development of the Evening Continuation Schools established in 1911, and to the wide extension of the scheme of school medical inspection. As pointed out in a preceding Official Year Book (see No. VII., page 765), the Education Department instituted a scheme of examinations in 1911 for what were termed respectively the “qualifying,” “intermediate,” and “leaving” certificate. The first “qualifying” examination was held in March, 1911, the first “intermediate” in November, 1912, and the first “leaving” in November, 1913. The successful students who were awarded exhibitions at the leaving certificate examination took up University studies in the first term of 1914, thus marking the definite linking up of the State School system with the University. Amongst noteworthy features in the year 1914 were the remarkable increase in school population, the establishment of Trade Schools, the expansion of secondary education, and the extension of the scheme of school medical inspection. The travelling hospital and the travelling ophthalmic and dental clinics are rendering splendid service in the remote and sparsely settled districts. During the last few years increasing attention has been devoted to the development of infant schools on the lines of awakening a larger sense of responsibility amongst the young children by giving them a greater measure of freedom. It is recognised by modern educationists that freedom coupled with responsibility lies at the root of all true education.

A school clinic, under the direction of Lecturers in Education from the Training College, was opened in the metropolis during 1918. The object of this institution is to examine and to suggest suitable treatment for children reported by their teachers as shewing special disabilities for school work.

During 1917 and 1918 the provisions of the Public Instruction (Amendment) Act of 1916 were found to have exercised a marked influence on school attendance, and in many schools the average exceeded 90 per cent. of the effective enrolment. The average for all schools in 1919 was about 81 per cent., but abnormal conditions as to sickness were responsible for very small returns from many schools.

Arrangements were made during the year 1917 for the teaching of Japanese in selected High Schools, and in 1918, classes were begun at North Sydney and Fort-street Boys' High Schools.

It has been found that a large proportion of children leave school at the age of fourteen years or thereabouts. As in other countries, it is realized in New South Wales

that this removal from educational guidance at the very time when such formative influences are so necessary is against the best interests of the children and the State, and it is intended to submit proposals to Parliament for continuous training to an extent which will give more adequate preparation for the responsibilities of adult life.

(ii) *Victoria.* Under the Amending Education Act of 1910 it is provided that every child must attend school for the full period of eight years between 6 and 14, unless he be given a certificate of education at 13. The schools are open on an average 225 days in each year, and require attendance on all these days, unless reasonable excuse is forthcoming. Provision is made for the mentally deficient. The primary curriculum divides the school life into eight grades, so that a child entering at six years of age should have completed the full course by the time he reaches his fourteenth year. After completion of the elementary school course, the pupil may go on to the Evening Continuation Schools, Higher Elementary Schools, District High Schools, or the Trade Schools. Special schools for feeble-minded children have been established in the metropolis, and an "open air" school for delicate children is in operation at Blackburn. There is also a special school for epileptics at Clayton. Highly encouraging results have been obtained at all these institutions. A Council of Public Education has been appointed to advise on educational matters generally, and particularly in regard to co-ordination. Examinations are held throughout the State for the certificate of merit, and the qualifying certificate. The former is granted to pupils who, under prescribed conditions, reach a satisfactory standard in subjects prescribed for Grade VIII., while the latter is awarded to pupils who reach a satisfactory standard in Grade VI. Possession of this certificate enables the holder to enter upon the work of the Higher Elementary or the District High School. Acting on the advice of the Council of Education, the Melbourne University has established a Schools Board. The function of this body is to consider all questions relating to school studies and the inspection and examination of schools. In addition to University representation, there are also on the Board representatives of the Department of Education, the registered Secondary Schools, and the business interests of the community. Being with wide powers, this Board must of necessity be the chief guiding factor in the development of education in Victoria. During the year 1915 a considerable amount of attention was devoted to the organisation of the elementary schools, especially in connexion with the question of retardation, and in regard to the teaching of infants. It is found that the greater flexibility in organisation and system of promotions, coupled with special methods of dealing with backward pupils, tends to lower considerably the retardation percentage. The institution of the uniform school year, the greater powers conferred on the head teachers in regard to the promotion of scholars, the making of the inspector an advisory rather than an examining officer, and the better provision for the practical training of the junior teachers have all been fraught with excellent results. During recent years methods of training teachers have been considerably improved. Formerly there was only one course leading to the trained teacher's certificate. At present four courses are provided—primary, secondary, infant, and short course for teachers of rural schools.

(iii) *Queensland.* The Amending Act of 1910 introduced several new features into the educational system of Queensland, chief amongst them being—(a) employment of proceeds of sales of land and other school property for school purposes, instead of paying them into Consolidated Revenue; (b) abolition of local contributions; (c) provision of scheme of school certificates to assist in co-ordination of various branches of the system; (d) establishment of compulsory continuation classes; (e) compulsory medical and dental examination; (f) raising the compulsory age to 14 years instead of 12 years; (g) provision for compulsory attendance on every day on which the school is open. The last-mentioned provision has already produced good results in regard to improved attendance. The organisation of the general scheme of education is being systematically developed. State High Schools were inaugurated in February, 1912, and a more liberal scheme of scholarships to secondary schools came into force in 1913, while further amendments were made in 1914 and 1915. A Teachers' Training College has been established, and greater attention is being given to the development of technical education. Methods of instruction have been brought into consonance with the latest developments under the new syllabus adopted in 1914. During this year also the medical and dental inspection of State School children were considerably extended.

(iv) *South Australia.* One of the chief events in educational development in South Australia in 1911 was the provision of Evening Continuation Schools, intended to help those who cannot afford to attend the Higher Day Schools. The State has also come into line with the other States in the matter of medical supervision of school children, and a medical officer and two trained nurses have been appointed. The changes introduced at the Teachers' Training College have proved very satisfactory, and the academic teaching at the University is now supplemented by a systematic pedagogic instruction for all classes of teachers. A course of six months' instruction and training for teachers of small schools was introduced in 1913, and has proved of great value. In 1913 the principle was adopted of simultaneous examination of the schools, and granting to teachers the authority to make the promotions of their scholars. An Act to consolidate and amend the law relating to Public Instruction was assented to on the 23rd December, 1915. Under the Amending Act of 1916 all Lutheran Schools were taken over by the State. A Superintendent of Technical Education was appointed in 1916. The new scheme of classification of schools and teachers, which came into operation in 1919, removes previously existing causes of dissatisfaction. In future, schools will be graded according to average annual attendance, and the remuneration of the teacher will be in accordance therewith. Provision has also been made for a more satisfactory scheme of promotion for teachers.

(v) *Western Australia.* During 1912 the curriculum of the Primary Schools was remodelled in order to bring it into line with the most up-to-date principles. The work was lightened in directions where experience shewed there was overloading, and efforts were particularly directed toward the removal of the abstract and to the development of the imaginative and constructive throughout all grades. Greater freedom was given for experiment by the teacher, and it is recognised that considerable improvement has resulted. Montessori principles are being increasingly adopted in the teaching of the youngest children. Constructive work is receiving greater attention in all departments, and encouragement is given to original or research work of an elementary character. Four special courses—commercial, industrial, domestic, and professional—have been established at the central schools. These schools are practically day continuation schools designed to carry on the education of boys and girls beyond the primary stage. Continued efforts are being made in the direction of bringing about a closer correlation between primary and secondary education. The Modern School at Perth was opened in 1911, and in June, 1914, a Goldfields High School was opened at Kalgoorlie. District High Schools are in operation at Geraldton, Albany, Bunbury and Northam, and it is proposed to establish additional schools at the larger country centres, and in the meantime to grant scholarships at the existing High Schools to country children. Continuation classes were held at twenty centres in 1919, with an enrolment of 2,827. Certificates granted to successful students entitle the holder to advanced tuition at the Technical College. During 1917 a medical officer for schools was appointed under the Public Health Department. Legislation passed in 1919 made compulsory the education of blind, deaf and dumb children either at home or in special institutions.

(vi) *Tasmania.* During the last few years educational effort in Tasmania has been directed to the development on modern lines of the primary system, the foundation of secondary schools, and the provision of a satisfactory system of training for teachers. Kindergartens, Montessori Schools, and Model Country Schools have been established as adjuncts to the training system, and the courses have been remodelled with a view to providing trained teachers for secondary as well as for primary work. At the High Schools, secondary, commercial, and industrial courses have been established. School hygiene has received especial attention, doctors and nurses have been appointed, and two dental clinics have been established. During the year 1918, regulations were framed with the object of establishing separate infant departments under a trained mistress. Four have already been established and it is proposed to open four additional schools of this type. Provision has been made for an extension of the system of teaching by correspondence for children in isolated districts.

(vii) *Northern Territory.* Although the number of children of school age in the Territory is small, nevertheless ample provision has been made by the Commonwealth Government for their education. State schools are in operation at Darwin, Parap, Pine Creek, Alice Springs, and Eumungalan. There is also a school for aboriginal

and half-caste children at Kahlin Compound, Darwin. A satisfactory standard is maintained at the schools, but progress is somewhat retarded by irregular attendance. Continuation classes are available at Darwin for cadets in Government employment and for others.

(viii) *Present Position of State Education in Australia.* Throughout Australia primary education is compulsory and free of charge, while there exists in most of the States a liberal provision of scholarships and bursaries to the Higher State Schools, to the Secondary Schools, and to the Universities. Provided that the requisite standard is reached, it is, of course, permissible for children to receive home tuition, or to attend so-called private schools. Considerable interest is taken in educational matters by the people of the Commonwealth, and within recent years several of the States have sent qualified representatives to inspect and report on the methods adopted in the chief countries of Europe and America. The reports of these Commissioners, especially those of New South Wales, have been widely studied, and various improvements have been made in accordance with their recommendations. The orientation, lighting, and ventilation of school buildings are being modernised. In all of the States periodical medical inspection of the children is in force. (A detailed statement of the work being done in this direction will be found in the chapter dealing with Public Hygiene.) Methods of training teachers are now better developed, and although the "pupil teacher" system with its effects have not been wholly eliminated, it appears to be gradually vanishing. (The methods adopted in the various States for the selection and training of teachers are described in some detail in § 2, 10, hereinafter.) There has been a wider employment of kindergarten principles in the early stages, and the more or less purely abstract teaching of the older days has been largely replaced by concrete methods. Such subjects as nature study, manual training, music, and drawing have received a general impetus. Greater attention has been given to the scientific classification of children. Moreover, as will be seen from the above, and from § 2, 7, the State Education Departments are increasing their activities in the direction of secondary education. Lastly, the system of inspection has been considerably remodelled. Under the old system, the inspector was little more than an examining officer, but, under the present régime, the primary duty of this officer consists in guiding and directing the teaching in accordance with approved methods. [See also § 6, Technical Education.]

(ix) *Co-ordination of Educational Activities.* As pointed out already, the educational system of New South Wales may now be considered as a more or less homogeneous entity, the various stages succeeding one another by logical gradation from kindergarten to university. In the other States development is proceeding on somewhat similar lines, although in varying degree. [See also § 1, para. 2 *supra*.]

(x) *Educational Conferences.* In May, 1916, the first Conference of Directors of Education in the States of the Commonwealth was held at Adelaide. Amongst important matters discussed thereat may be mentioned:—(a) *Education Reports (Departmental).* In regard to these a decision was arrived at respecting the general principles which should govern the preparation of future reports in order to ensure uniformity so far as the compilation and presentation of statistics relating to enrolment, attendance, and finance are concerned. (b) *Raising School-age Limit.* In view of the circumstance that educational expenditure has, up till now, been largely wasted owing to school attendance ceasing at the age of 14 in the case of so many children, it was resolved that legislation is desirable providing for continuous education up to the age of 16, and that attendance be made compulsory except where special exemption could be granted on the ground of educational fitness. (c) *Schools for Defectives.* At present New South Wales and Victoria have a school each of this type, but it was agreed that such schools ought to be provided where required. (d) *Other Special Schools.* Each State is making experiments in regard to the provision of new types of schools giving industrial and secondary instruction, and arrangements were made for the exchange of detailed information in regard to their working. (e) *Sex Physiology.* The Conference was opposed to the introduction of special teaching on this subject, and it was affirmed that efforts should be directed towards excluding all thought and talk about sex matters from the schools. It was agreed, however, that the Departments should prepare a special leaflet setting forth the duties of parents in this direction. The second Conference was held in Melbourne in June, 1918.

§ 2. State Schools.

1. **Introductory.**—The State Schools, or, as they are sometimes termed, the “public” schools, of the Commonwealth comprise all schools directly under State control, in contradistinction to the so-called “private” schools, the bulk of which, through privately managed, nevertheless cater for all classes of the community. Separate information regarding Technical Education is given in § 6.

2. **Enrolment and Attendance.**—The following table shews the number of State Schools, together with the teachers employed and the enrolment and “average attendance” in each State during the year 1919:—

STATE SCHOOLS, TEACHERS, AND SCHOLARS, 1919.

(COMMONWEALTH.)

State or Territory.				Schools.	Teachers.(a)	Scholars Enrolled.	Average Attendance.
New South Wales(b)	3,124	8,845	288,965	212,874
Victoria	2,349	6,872	222,000(c)	173,783
Queensland	1,574	4,194	113,070	92,569
South Australia	928	2,242	75,681	59,714
Western Australia	665	1,662	51,776	43,863
Tasmania	462	1,072	30,522	25,081
Northern Territory	5	9	303	185
Commonwealth	9,107	24,896	782,317	608,069

(a) Exclusive of sewing mistresses. (b) Including Federal Territory. (c) Estimated.

Unfortunately, the schemes of enrolment and of the computation of “average attendance” are not identical in each State, so that the comparisons are imperfect.

The figures for average attendance in New South Wales shew a considerable falling off as compared with the previous year, the decrease being due to the epidemic of influenza during the first half of 1919.

The enrolment and average attendance at the State Schools in the Commonwealth are given below for the years 1891, 1901, 1911, and for each year of the period 1915 to 1919:—

ENROLMENT AND ATTENDANCE AT STATE SCHOOLS, 1891 TO 1919.

(COMMONWEALTH.)

Year.	Total Population (a)	Enrolment.	Average Attendance.	Year.	Total Population (a)	Enrolment.	Average Attendance.
1891 ..	3,241	561,153	350,773	1916 ..	4,875	751,126	569,306
1901 ..	3,825	638,478	450,246	1917 ..	4,935	764,980	600,089
1911 ..	4,569	638,850	463,799	1918 ..	5,030	779,687	612,174
1915 ..	4,932	732,464	557,962	1919 ..	5,247	782,317	608,069

(a) In thousands.

As explained above, the diminished attendance in 1919 was due to the heavy fall in the New South Wales figures consequent on the epidemic of influenza.

3. **Schools in the Federal Capital Area.**—During the year 1919 thirteen State Schools were in operation in the Federal Territory (Yass-Canberra). The pupils enrolled numbered 373 and the average attendance 271. Cost of upkeep in 1919 amounted to £3,416. By arrangement with the Federal Government these schools are conducted by the New South Wales Education Department on the same lines as the ordinary State Schools, the Department being recouped for expenditure.

4. **Centralisation of Schools.**—The question of centralisation of schools adopted so successfully in America and Canada has received some attention in the Commonwealth, and particularly in New South Wales. It is recognised that a single adequately-staffed and well-equipped central institution can give more efficient teaching than a congeries of small scattered schools in the hands of less highly trained teachers, and the small schools in some districts were therefore closed and the children conveyed to the central institution. The principle was first adopted in New South Wales in 1904, when the conveyance of pupils was authorized in the case of 12 schools, and was later on extended to other States.

5. **Education in Sparsely-settled Districts.**—It has always been the aim of the State to carry the benefits of education into the remotest and most sparsely-settled districts. This is effected in various ways. (i) By the establishment of Provisional Schools, *i.e.*, small schools in which the attendance does not amount to more than about a dozen pupils, these institutions merging into the ordinary public school list when the attendance exceeds the minimum. (ii) When there are not enough children to form a provisional school, what are known as Half-time Schools are formed, the teacher visiting them on alternate days. (iii) In still more sparsely-peopled districts, an itinerant teacher goes from house to house within a certain radius. Thus, in Queensland during 1919 the 14 itinerant teachers covered 536,000 square miles of country and travelled 67,089 miles to visit 1,778 children. In this State also the Education Department has established what are known as Saturday Schools, in which small groups of children in outlying districts are visited by the nearest teacher on Saturdays and receive the benefit of several hours' instruction. These schools, of which there are now ten, have been warmly welcomed in the districts in which they are established, inasmuch as under this system the children "outback" receive a greater amount of instruction than is possible under the system of itinerant teachers. Provision has been made for a vocational "top" to be established at schools in important distributing centres of inland pastoral areas in Queensland and at Longreach, Barcaldine, Charleville, Mitchell and Geham special classes receive instruction in manual work, commercial work, and domestic economy. Itinerant teachers capable of imparting instruction in domestic and manual work have also been appointed to visit parents and children at various localities in the Central District. During 1919, the Education Department in Western Australia disbursed £10,741 in "driving grants," *i.e.*, sums of money granted to parents whose homes are over three miles from the nearest schools, and who arrange to have their children driven in. In New South Wales, Victoria, South Australia, Western Australia and Tasmania parents in the thinly-peopled areas are also allowed to club together and build a school, which receives aid from the Government in the form of a yearly subsidy and grant of school material. In some cases the Department also provides the building. During 1919 subsidy was paid to 575 schools in New South Wales. (iv) An experiment on the part of New South Wales, the result of which was awaited with some interest, was the establishment in 1908 of a "Travelling" School. A van was provided in which the teacher travelled, carrying with him a tent for himself and one to be used as a school, together with such books and apparatus as are required in a Primary School. So far very satisfactory results have been attained. Two additional schools of this nature were established in 1914. (v) There are also railway camp schools in operation on the sites of extensive railway works. In South Australia, attractive portable schools have been designed to meet the needs of new districts and settlements of a temporary character.

Regulations were framed in Tasmania during 1912, providing for the subsidising of private teachers at a rate not exceeding £5 per pupil in districts too remote or sparsely settled to warrant the establishment of an ordinary Provisional School. The schools of this nature operating in 1919 numbered 52, with an enrolment of 551 scholars. During the year the department also paid for the conveyance of 256 children to schools by boat, vehicle, or train.

New South Wales, Victoria, South Australia, Western Australia, and Tasmania provide for education, by correspondence, of children in isolated districts. In South Australia it is stated that the children of one family are 400 miles from the nearest school. Another family of four are 320 miles distant from a school, and several families live along the camel tracks in the far north. The Port Augusta School supervises the work of twelve children living along the East-West railway line.

6. **Evening Schools.**—Evening Public Schools have been in existence for many years in some of the States, but their progress has been uncertain. In New South Wales the 42 Evening Continuation Schools had an average attendance in 1919 of 1,399. It is pointed out by the Inspector of these schools that future extension depends on the introduction of some form of compulsory attendance. In Victoria there was only one night school in operation for elementary work during the year, the average attendance being 31. It is stated that future developments in evening instruction will be in the direction of continuation classes, of which there were at latest available date six, with an average attendance of 91. Western Australia has evening continuation classes in the chief centres; the enrolment in 1919 numbered 2,827. Evening Continuation Schools have been established under regulation in South Australia, and are intended principally to help the working boy to improve his general education and to add to the store of knowledge most useful in his present work.

7. **Higher State Schools.**—(i) In *New South Wales*, public schools which provided advanced courses of instruction for two years for pupils who have completed the primary course were classed as *Superior Schools*. These were reorganised in 1913 as Day Continuation Schools, and divided into Superior Commercial Schools, Superior Junior Technical Schools, and Superior Domestic Schools for Girls. During 1919 there were 95 schools of this type in operation, of which 25 were in the Commercial group, 24 in the Junior Technical, and 46 in the Domestic group, with an average attendance of 5,239 in the sixth and seventh classes. It is believed, however, that greater efficiency could be produced by reducing the number of these schools and establishing Central "Superior Public Schools" instead. Provision has also been made for the more advanced education of children in country centres by the establishment of 18 District Schools. These schools are specially staffed, and undertake the work of preparing students for admission to the training colleges. There are also 23 *High Schools* in the State. These had an enrolment in 1919 of 6,723, with an average attendance of 5,132. To meet the wishes of representatives of the registered Secondary Schools, the syllabus of the High Schools was amended in 1913, and now offers such a wide range of choice in the selection of subjects that there is no possibility of producing a merely stereotyped uniformity of study. Four "Intermediate" High Schools have been established to meet the growing demand for High School education in the metropolis, and others will be provided during the next few years in the city and in country centres. The average attendance at these schools in 1919 was 817. During 1919 further provision was made for higher education by the institution of a composite course of instruction at various country schools where only a small number of pupils can be grouped. The course includes practically all secondary subjects and has been extended to about 45 schools. Hostels have been provided in connexion with the High Schools at Albury, Goulburn, Hay, East and West Maitland. In accordance with Departmental regulations liberal provision is made for scholarships and bursaries to the higher State Schools. Under the provisions of the University Amendment Act of 1912, 200 exhibitions were awarded in 1919 to successful students at the leaving certificate examinations, and 119 of these were given to pupils attending the State Schools, and 88 to students of registered secondary schools.

The Sydney Grammar School (not a "State" School in the ordinary acceptance of the term), which receives a State endowment of £1,500 a year, had, in 1919, a quarterly enrolment of 625 pupils, and an average attendance of 564.

During 1917 the State School of Aviation at Richmond was transferred to the control of the Education Department. The school served a military purpose during the war, but it is hoped that it will henceforward prove of great commercial value to the State.

(ii) In *Victoria*, action was taken in January, 1912, to give effect to the provisions of the Education Act of 1910, with regard to the decentralisation of the system of secondary education. Twenty-four Higher Elementary and 28 District High Schools have

been established, and, to obviate congestion at the High Schools, Higher Elementary Classes are carried on at six "Central" Schools. The enrolment on the 1st January, 1919, at the Higher Elementary Schools was 1,932, of whom 977 were girls, at the District High Schools 5,947, of whom 2,868 were girls, while 495 boys and 511 girls were receiving secondary teaching in the Central Schools. The qualifications for admission to the High Schools and Higher Elementary Schools are that pupils shall be not less than 12 years of age, shall possess the qualifying certificate or its equivalent, and that their parents shall undertake that the children will remain at school for four years. For the first two years there is a common course for all pupils, thereafter replaced by four special courses:—(1) A preparatory professional course for pupils preparing to proceed to the University, to enter the teaching profession, or to gain a sound general education; (2) an agricultural course to be taken in Agricultural High Schools; (3) a commercial course; and (4) a domestic arts course for girls. Parallel with these courses an industrial course has been developed for pupils who intend to enter upon some form of industrial occupation.

The demand for places in the metropolitan High Schools is in excess of the available accommodation, and although the "Central" Schools, already referred to, have to some extent relieved the congestion, increased provision will shortly be necessary.

Junior Technical Schools have been established apart from the High Schools in Melbourne, Ballarat, Bendigo, and Geelong, and there are schools also at Glenferrie, Collingwood, Sunshine, and Warrnambool.

Schools of Domestic Arts have been established—three in Melbourne, one in Ballarat, and one in Bendigo. At these institutions, in addition to continuing their general education, the girls receive special instruction in cookery, needlework, and various home duties. A modified course in domestic arts is given to senior pupils in Maryborough and Castlemaine.

Scholarships granted by the Department are as follows:—(a) One hundred junior, tenable for four years at a District High School or approved Secondary School, with allowance of £26 per annum for board where required; (b) Forty senior, tenable four to six years, with allowance of £40 towards expense of course at University; (c) Fifty junior technical, giving free tuition for two years at a Junior Technical or other approved school, and, in certain cases, board allowance of £26 per annum; (d) Fifty-five senior technical, giving free tuition for approved courses at Technical schools, with £30 allowance for day students, and £10 for night students; (e) Sixty teaching, similar in other respects to junior; (f) Twenty nominated courses, giving four to six years' free tuition in agriculture, mining, or veterinary science at the University, with allowance in certain cases of £26 per annum.

Hostels for the accommodation of students have been provided by the local School Council or in connexion with religious denominations at Ararat, Leongatha, and Sale, but it is stated that the attendance at Secondary Schools in country towns generally suffers from the lack of facilities for boarding.

(iii) Prior to the year 1912, *Queensland* did not possess any distinctly Secondary Schools under State control, but in February of that year High Schools were opened at Warwick, Gympie, Bundaberg, Mount Morgan, Mackay, and Charters Towers. Tuition at these schools is free, but students must pass a qualifying entrance examination. Three courses of study, General, Commercial, and Domestic, are provided. The General Course will lead up to the University, and students will be able to matriculate from the High Schools. In 1917 a new High School was opened at Gatton. High Schools ranking in all respects with those mentioned are also conducted at Brisbane Central Technical College and at the Technical Colleges at Toowoomba and Rockhampton. In smaller centres where an average of not less than 25 qualified pupils can be obtained, secondary tuition is provided at existing State Schools, and this has been arranged for at Brisbane Central (boys), Brisbane Central (girls and infants), Herberton, Childers, Dalby, Pittsworth, Roma, Southport, Cairns, Wynnum Central, and Emerald. The enrolment at High Schools in 1919 was 1,716, and the daily attendance 1,111. There are moreover, ten Grammar Schools—six for boys and four for girls—each of which is subsidised by the State to the extent of £750 per annum, and in addition receives a payment of £250 per annum for providing five scholarships for State scholars. The

enrolment at the Grammar Schools in 1919 was 1,900, and the average attendance 1,478. Since the year 1909 these schools have been regularly examined by the Inspector-General of the Education Department.

Under the amended scheme of scholarships to Secondary Schools which came into force in 1914, all candidates who gained 50 per cent. of marks at the previous December examination were eligible for free scholarships tenable for three years at an approved Secondary School. Provision was made for board allowance of £30 per annum where necessary, and of £12 where the holder lived at home. In 1915 the tenure was altered to two years, with the proviso that, should the holder at the end of that period obtain an approved pass at the University Junior Examination, an extension scholarship of two years was granted, and, in addition, an extension at the end of the fourth year where an approved pass at the Senior University Examination was obtained. The extension scheme came into force in 1917, when 93 boys and 45 girls gained extension for a third and fourth year, the corresponding numbers in 1919 being 157 boys and 89 girls.

As a result of the 1919 examinations, held in April, scholarships (extended to two years and six months) were awarded to 852 boys and 643 girls. Of the successful candidates 224 boys and 176 girls were granted the allowance of £12 per annum, and 95 boys and 86 girls received the allowance of £30.

Prior to the establishment of the Queensland University, three exhibitions per annum to approved Universities were granted. These have been replaced by twenty scholarships to the local University. Each scholarship is tenable for three years, and carries an allowance of £26 per annum if the holder lives at home and attends the University, or £52 per annum board allowance where necessary. In addition to these "open" scholarships, twenty "teacher" scholarships are granted to students who undertake to enter the teaching profession. These carry an allowance of £66 where the students live away from home, and £39 to those who live at home.

(iv) *South Australia.* Including the Adelaide High School, there were altogether twenty-one High Schools open in South Australia in 1919, with an enrolment of 2,591 students, and a staff of 128 teachers. In addition to giving secondary education, these institutions form a valuable source from which the Department can draw a supply of young teachers. Under existing regulations provision is made for the following scholarships:—(i) Eight public exhibitions open to boys and girls who have been bona fide residents of South Australia for two years prior to the competitive examination. The exhibitions are tenable for three years at an approved school or college, carry free tuition and books, and an allowance of £22 per annum when the holder lives away from home. (ii) Forty exhibitions, tenable for three years at an approved school or college are open to competition by children under 13 years of age in attendance at State Primary Schools. (iii) Eight senior exhibitions, worth £40 per annum, and four of the value of £20, are tenable at the Adelaide High School or other approved Secondary School, and are open to pupils of any Secondary School. (iv) Twelve junior exhibitions, eight of £40 and four of £20, tenable for two years at any approved Secondary School, are reserved for pupils of Secondary Schools within a radius of 10 miles of the General Post Office, Adelaide. (v) Twelve Government bursaries, of which six are reserved for pupils of the High Schools. These are tenable at the University, and the holder receives £20 per annum and free tuition. (vi) The Government provides £180 per annum to assist students who are unable to attend the University during the day. Each studentship is limited to £10 for science students, and £7 for arts students.

(v) *Western Australia.* In 1919, there were two schools providing a course up to the leaving certificate standard—the Perth Modern School and the Eastern Goldfields High School—and four District High Schools, at Northam, Geraldton, Bunbury and Albany, providing a three years' course up to the junior certificate standard, although two of them have small upper classes working for the leaving certificate. In addition, the eight Central Schools have professional courses with a curriculum equal to that of the District High Schools. The Perth Modern School and the Eastern Goldfields High School had an enrolment in 1919 of 376 and 180 students respectively. Extension of the opportunity to obtain secondary education in country districts has been greatly appreciated, and the enrolments at the four District High Schools varied from 84 at Geraldton to 161 at Bunbury. The Science Courses in these

schools are designed to aid in the practical study of agriculture. Entrants to State secondary schools must have passed an examination identical with that for Secondary School scholarships, and boarding allowance up to £30 per annum is provided where necessary. Continuation classes were inaugurated in 1911, and were attended at 20 centres in 1919 by about 2,800 pupils. The classes are intended to provide some measure of higher education to those who leave school as soon as they reach the compulsory age of 14 years. Admission to these classes is free, but pupils must attend regularly three evenings a week. Evening Schools are held in various parts of the State, but the work carried on is mainly primary. Junior and senior exhibitions were abolished in 1914 and provision made for 10 University exhibitions, each tenable for three years at the University of Western Australia, and valued at £40 per annum for students living at home and £60 in the case of those living away from home. Fifty scholarships tenable for three years (with possibility of extension to five years) at approved Secondary Schools are annually offered for boys and girls attending Government or other efficient schools. Ten carry an allowance of £20 per annum, and the remainder entitle the holders to receive a grant for books and travelling expenses. Boarding allowance up to £30 per annum may also be granted where necessary. Thirty-four bursaries of the value of £5 each tenable for two years were also granted in 1919. Scholarships to enable children from country districts to attend at District High Schools or the Narrogin School of Agriculture were inaugurated in 1917. Only those children who must live away from home are eligible, and the tenure may in some cases be extended to five years. The scholarships for the High Schools carry an allowance of £30 per annum, and at Narrogin of £22 per annum. During 1919, 40 District High School scholarships, and 5 tenable at the Narrogin School of Agriculture were awarded. Thirteen scholarships also were awarded in 1919 to children of fallen or disabled soldiers.

(vi) *Tasmania*. Up to the year 1912 the Department confined its efforts to the provision of primary education for the school children in Tasmania. In 1911, however, super-primary classes were formed in the larger schools, with an enrolment in 1911 of 200, and in 1912 of 400 pupils. It was recognised, however, that the previously existing scheme of scholarships and exhibitions was inadequate to meet the demands for higher education. High Schools were therefore opened in January, 1913, at Hobart and Launceston, and intermediate High Schools were opened in 1915 at West Devonport and Burnie. In 1919 the school at Devonport was given the status of a full time High School. These provide for five classes of pupils—(i) Those who desire to become teachers; (ii) University students; (iii) Commercial; (iv) Mechanics; (v) Home duties (girls). The enrolment in 1919 was 1,023. It is proposed to grant a leaving certificate at the end of a four years' course. The Bursaries Act of 1915 provides for 30 junior and 20 senior bursaries tenable for two years at an approved State School or registered Secondary School. They are valued at £2 per annum for a State School and £12 at a Secondary School, in addition to satisfactory boarding and travelling allowance where required. Four-fifths of the bursaries are awarded to country children. The Tasmanian Education Department scholarship is open for competition to High School pupils under the age of 19 years. The scholarship is valued at £20 per annum, with an allowance of £40 if the student lives away from home while attending the approved University course. A Veterinary Science Scholarship was established in 1918, for competition amongst boys under 19 years of age. It is tenable for one year at the University of Tasmania (value £20 or £60), and at either the University of Melbourne or Sydney for the three succeeding years (value £120 per annum). During 1919 the Board awarded 11 junior city, 40 junior country, 6 senior city, and 13 senior country bursaries.

8. *Agricultural Training in State Schools*.—The question of agricultural training in ordinary schools has received considerable attention in *New South Wales*. In 1905 a teacher of school agriculture was appointed to visit schools and districts for the purpose of giving instruction to teachers and scholars in the subject, the officer selected possessing the qualifications of a thorough acquaintance with agricultural work as well as school methods. The Education Department makes grants of seeds of various kinds to schools having gardens, and in some instances has installed windmill plants to provide an adequate water supply. Under the direction of a capable head master, a college has also been opened at Hurlstone, near Sydney, at which practical lessons are given in elementary agriculture, and the institution also serves as a stepping-stone to the

Hawkesbury Agricultural College. Scholarships are available to students of the Hurlstone Agricultural High School as it is now called, and these scholarships entitle the holder to a two years' free course at the Hawkesbury institution, with a grant of £1 10s. per annum for text books. The Department has also organised Rural Camp Schools for the purpose of giving teachers and scholars first hand knowledge of country industries.

The subject of Agricultural Colleges and Experimental Farms is dealt with in the section relating to Agriculture. (See page 302.)

In *Victoria*, what are termed Agricultural High Schools have been established at Ballarat, Colac, Leongatha, Mansfield, Mildura, Sale, Shepparton, Wangaratta, Warragul, and Warrnambool. Pupils must be at least fourteen years of age, and have passed beyond the curriculum of the elementary school, or else be able to afford satisfactory proof that they are qualified to profit by the instruction offered. The schools are practically secondary schools with an agricultural bias, and form a link between the rural school and the agricultural college. They are also used as a preliminary stage in the education of boys and girls who wish to become teachers and eventually graduate in the State Training College and the University. At some of the schools short courses in agriculture have been instituted for farmers' sons who have left school. A local council is appointed for each school, and exercises a general oversight over its operations. The experimental plots at these schools have aroused much interest among the farmers from the surrounding districts. A Supervisor of Agriculture reports and gives advice on the teaching of agriculture in the State Schools. A fair number of teachers have gained diplomas in agriculture, and are capable of giving practical instruction at the High Schools. Schools of Agriculture are conducted by the Agricultural Department at the State Research Farm, Werribee. Teachers in the wheat-growing districts are also instructed for short periods by the organizing inspector of agriculture at the University, and their services are utilised as leaders or group supervisors in their districts. The elementary principles of agriculture are taught in a large number of State Schools. Progress has been made in the direction of establishing agricultural clubs and home-project organizations in connexion with the schools. A Horticultural Society has been established, and there are 1,221 schools in affiliation, while practical help in school gardening is afforded by the Departmental supervisor. The Society has a nursery and distributing centre for plants and seeds at Oakleigh, and sub-nurseries have been established at various schools.

In *Queensland* the Government provides a small grant to encourage the study of agriculture, horticulture, and kindred subjects in the State Schools, while a departmental teacher of agriculture visits the schools and gives assistance in agricultural, horticultural, and nature study work. Some excellent experimental work has been carried out at a few of the schools, while gardens have been established wherever circumstances permitted. Short courses of instruction for teachers have been instituted at the Gatton College. A large number of teachers have gained a practical knowledge of milk and cream testing, and the subject is now added to the programme of instruction in several of the dairying districts. At Nambour, a Rural School, the first of its type, was opened early in 1917. In addition to the ordinary subjects of the curriculum this school provides for instruction in farming, fruit growing, dairying, etc., with dressmaking, millinery and cookery for girls, and woodwork, leatherwork and tinsmithing for boys. Training in business methods shorthand and typewriting is also available. In view of the success of this institution schools of somewhat similar type have been established at Boonah, Marburg, Gracemere, and Geham, and one at Home Hill is under construction.

In *South Australia*, the Public Schools' Floral and Industrial Society, founded in 1880, holds annual exhibitions of school work from all parts of the State. In addition, it has for some years undertaken the distribution of flower seeds among school children at a very cheap rate, and has thus fostered the love of horticulture with remarkable success. A special instructor has been appointed to give assistance to teachers desirous of making their school gardens aid in nature study work. Aid is given by personal visits as well as by correspondence and the holding of vacation Summer Schools. Teachers in training receive instruction in Nature knowledge and the art of conducting Nature Studies with children. A seed wheat competition amongst school children inaugurated in 1911 proved very successful, a second, which was commenced in 1916, will conclude in 1920,

and a third in 1921. Two of the competitors who have entered on the work of wheat breeding produced wheat of such quality that they were unable to supply the orders for seed grain received from South Australia, as well as from other States.

In *Western Australia* an advisory teacher of nature study visits the schools and gives advice in regard to proper methods in horticulture and experimental agricultural work. The number and usefulness of the gardens and experimental plots attached to State Schools shew marked improvement each year. Early in 1914 a school was opened on the Narrogin State Farm. The students are taken directly from the primary schools, and the course of instruction lasts for two years. On its completion students are qualified to enter on the diploma course at the University.

In *Tasmania* the organising teacher of nature study visits and advises the teachers at the State Schools, and also gives addresses and model lessons at the schools of instruction.

9. **Teachers in State Schools.**—The distribution of the teaching staff in the State Schools during the year 1919, including teachers of needlework, was as follows:—

TEACHING STAFF IN STATE SCHOOLS, 1919.

(COMMONWEALTH.)

State.	Principal Teachers.		Assistants.		Pupil or Junior Teachers.		Sewing Mistresses.	Total.		
	Males.	Fem.	Males.	Fem.	Males.	Fem.		Males.	Fem.	Total.
New South Wales	2,168	1,186	1,464	3,928	4	95	157	3,636	5,366	9,002
Victoria ..	1,737	1,212	429	1,611	309	1,574	414	2,475	4,311	7,286
Queensland ..	838	785	541	1,306	248	476	..	1,627	2,567	4,194
South Australia ..	387	571	161	696	96	331	109	644	1,707	2,351
Western Australia	329	363	123	664	35	148	57	487	1,232	1,719
Tasmania ..	167	320	94	284	22	185	3	283	792	1,075
Northern Territory	2	3	..	2	..	2	..	2	7	9
Commonwealth ..	5,623	4,440	2,812	8,491	714	2,311	740	9,154	16,482	25,636

The figures for assistants include students in training.

It will be observed that there is a fairly large number of junior teachers, or pupil teachers, as they are called in some of the States. The pupil teachers will, however, in time disappear, and their places will be filled by young people who have undergone a course of training in schools specially provided for the purpose. Allusion to the methods of training will be found in the next paragraph.

In New South Wales attention has been drawn to the difficulty of securing an adequate supply of teachers, particularly male teachers for small schools in out-back districts.

10. **Training Colleges.**—The development of the training systems of the various States has been alluded to at some length in earlier issues of the Year-Book. The present position is as follows:—

(i) *New South Wales.* During 1919, the total number of students in training was 786, of whom 459 were taking the full course at the College, while 327 were taking the twelve months' course at Hereford House. Practically all accessible metropolitan schools are used as practice schools for giving training college students opportunity to acquire practical skill in teaching. At the college, a complete set of Montessori apparatus has been prepared for demonstration work on the Montessori principles, and one of the College staff was a few years ago sent to Italy in order to gain first-hand knowledge of the possibilities of the scheme. Opportunities are also afforded to other members of the teaching staff to visit foreign countries on study leave. The Principal of the Training College is also Professor of Education at the Sydney University. A new Teachers' College within the University grounds is in course of erection, and portion of the building was occupied in 1919. Up to the year 1913 the limits of accommodation at the Teachers' College were responsible for the employment of a number

of untrained junior assistants, but it is now provided that no teacher enters the service without at least six months' professional training. Schools of instruction for teachers are held each year, the subjects chosen being military drill, swimming, physical training, first-aid work, manual training work, etc., and lectures are given to teachers in rural districts by members of the Teachers' College staff. Hostels for students in training and for the accommodation of High School pupils have been established at various centres in the State.

(ii) *Victoria*. During recent years the educational and professional attainments of the general body of teachers in Victoria have steadily improved. Prior to the establishment of the High Schools, the pupil or junior teachers were recruited from the ranks of those who had obtained the Merit Certificate in the eighth grade of the elementary schools, and the acquirement of the necessary literary qualifications for promotion was greatly hindered by the circumstance that they were engaged in teaching for the greater portion of the day. Under present conditions, candidates spend three or four years in a High School exclusively in study, and consequently enter on their professional duties with a better mental and physical equipment. On receiving promotion in rural schools as sixth grade teachers, they may join the correspondence classes of the Melbourne High School and receive tuition for the higher examinations. At present about 600 rural teachers are on the correspondence class rolls, while evening and Saturday classes for junior teachers are also held at the school. A number of High School pupils after serving as junior teachers for a year are awarded studentships at the Training College, and competition has been so keen that it has been found possible to exact the standard of the Senior Public Examination for these studentships. The present Training College dates back to 1874, but during the retrenchment period, viz., from 1893 to 1900, it was closed. The institution was reopened in February, 1900, with an enrolment of fifty-seven students. During the year 1919, 349 teachers, some of whom were extra-departmental, were brought into contact with the college work. A Training College Hostel has been established, and a Correspondence class formed for country teachers desirous of qualifying for the Infant Teacher's Certificate. The students at the Hostel receive training in domestic economy. Three city and six country practising schools are attached to the Training College, and four infant rooms with attached kindergartens have been specially equipped for the training of infant teachers. The University High School gives secondary teaching practice to both departmental and private students. A remodelled system of training came into force in 1914, providing, amongst other things, for the alteration of the name "Training College" to "Teachers' College," and for the classification of students into three groups, i.e., those training for secondary teachers' certificate, for sub-primary teachers, and for primary teachers. At the Summer School for infant teachers there was an attendance of 103 in 1919, and 90 country school teachers attended a week's vacation school at the Rural Training School.

Twenty teachers are nominated annually for free attendance at the University lectures for the diploma of education.

The Teachers' College conducts a Correspondence class for women teachers in the country studying for the Infant Teacher's Certificate.

(iii) *Queensland*. In connexion with the Teachers' Training College opened in Brisbane in 1914, the following scheme has been evolved:—Twenty-five special Teacher scholarships to the University, each with a currency of two years, are to be awarded annually. Living allowances at the rate of £52 per annum and £26 per annum respectively are provided, the former being paid to students living away from home. The University is to provide an Education group of subjects, including Logic, Psychology, and Education. Ten of the scholarships may be carried on for a third year, and five for a fourth year. Practical training is entrusted to a Training Master appointed by the Department. Those who attend the two years' course will be appointed to the Primary Schools, and the graduates from the three and four years' course will be available for High Schools and Secondary Schools. Short courses of training have been instituted for teachers to take charge of small schools, and arrangements have been made to allow an approved number of teachers already in charge of such small schools to obtain the benefit of the training. During 1919

there were in training 31 short course students, 11 training for Class II., and 32 University students. In the meantime, young people of both sexes are admitted to the service as pupil teachers at the age of fourteen years, and receive training from the principals of the schools to which they are appointed. The schools for infants at Kangaroo Point and Rockhampton have been specially staffed and equipped for training Kindergarten teachers, and Kindergarten methods have been introduced into most of the larger schools. Teachers of small schools are also greatly helped by the inspectors' practical and theoretical instruction in the various districts, while the Central Technical College gives correspondence lessons to small-school teachers desirous of passing the Class III. examination. Schools of instruction for the untrained teachers of small schools are conducted by the inspectors in their respective districts.

(iv) *South Australia.* During the year 1910 the system of training in force in South Australia was remodelled and improved. Prior to that year students had devoted themselves chiefly to academic studies, but in 1910 provision was made for increased attention to the theory and practice of teaching. Distinct courses of training were established to prepare teachers for work in primary and infant schools, and an advanced course was outlined for those who will become High School teachers. Each of these courses extends over a year. Students in the primary course who shew special ability may be granted a second year's training. The special course for Secondary Schools gives students an opportunity of obtaining the Diploma of Education. Provision was also made for a six months' course of training for teachers of provisional schools. There were 134 students in the Training College in 1919. Most of the students have, in the first instance, had a period of one year's practical mentorship in a State school under the guidance of a head master. This is followed by three years' general education in a High School, and a further year of junior teachership in a primary school under the supervision of a head master, prior to entrance to the Training College. At the Adelaide High School there were 416 students training for teachers during 1919. Altogether over 1,000 students received instruction in 1919 at this institution, which claims to be the largest secondary school in Australia. Practice in teaching is gained by the student teachers at the Observation School, which also provides training for teachers qualifying for appointment to provisional schools. A "model" small school has been established for the purpose of illustrating methods of management for one-teacher schools. A director was appointed in 1917 to give instruction in Montessori methods at the school. A considerable amount of help is given to the teachers of small schools at the periodical "Summer" Schools and "refresher" courses.

(v) *Western Australia.* A Training College for teachers was opened at Claremont in 1902. The original building provided accommodation for sixty students, but extensions were opened in 1908, and the number in training in 1919 was 161. Of these 79 were taking the full course of two years, 57 were taking a twelve months' course, and 25 took the short course of six months. It is intended in future to make the minimum period of training twelve months. About half the full course students attend lectures at the University, and three remained for a third year to complete degree work. Special practising schools have been established for the proper training in teaching and managing the smaller country schools. Three classes of students are admitted to the full course—(i) from State or private secondary schools; (ii) monitors from departmental schools; (iii) ordinary teachers from the departmental schools. The standard of education required on entering is the school-leaving or matriculation certificate, but a special examination is held for candidates possessing neither. The course is both academic and practical, the former being co-ordinated with the University. As a help in the practical work, there is an adjunct school attached to the college, and several practising schools, two of which are for infants only. An advisory teacher visits the small country schools to give practical help and advice. At the Claremont Infants' School a room has been set apart for work on Montessori lines. During 1919, in addition to short courses at the Training College, a school of instruction for teachers of small schools was held at Toodyay. Arrangements have been made for the inspectors to carry out experimental work in the direction of affording opportunities for teachers and children in rural districts to acquire useful information in connexion with nature study, agriculture, and various industrial and art subjects. Two schools of instruction for teachers in cadet training were held in 1919, and these were attended by 31 teachers.

(vi) *Tasmania*. During 1917 the schemes for the training of teachers were recast and grouped in four divisions:—(1) A short course to supply the professional training required for the less important positions in the primary schools and for teachers of the smaller provisional and Sixth Class schools. The course lasts six months. (2) Training of infant teachers. (3) Training for positions in the larger primary schools. (4) Training of high school teachers. Practical training for the various classes is given in well-equipped practising schools and in model small schools. The inspectors also hold schools of instruction for teachers of small schools. During 1919, 36 teachers had the advantage of attendance at these institutions. The enrolment at the Training College in 1919 numbered 70.

11. **School Savings Banks.**—Returns shew that these institutions are in existence in three States. In New South Wales, there were 836 banks at the end of 1919, the deposits amounting to £35,358, and withdrawals to £36,973. Since the establishment of the banks in 1887, deposits totalled £695,834, and withdrawals £680,938. Of the latter sum £144,619 was placed to the children's accounts in Government Savings Banks. In South Australia, 552 schools had 28,634 depositors, with £28,525 to their credit; and in Western Australia, there were 434 school banks, with 30,537 depositors and £41,303 to their credit.

12. **Expenditure on State Schools.**—The net expenditure on State education in all grades of schools, excepting technical schools, during 1901 and for the five years ended 1919 is shewn below. The figures do not include expenditure on buildings, which is shewn separately in a subsequent table.

EXPENDITURE ON MAINTENANCE, STATE SCHOOLS, 1901 AND 1915 TO 1919.

(COMMONWEALTH.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	C'wealth.
	£	£	£	£	£	£	£	£
1901 ..	623,734	656,907	256,245	152,006	89,694	37,710	..	1,816,296
1915 ..	1,428,873	1,033,292	462,842	260,279	299,505	110,981	1,246	3,597,018
1916 ..	1,534,186	1,032,708	484,500	268,399	305,130	111,140	1,956	3,738,019
1917 ..	1,662,658	1,033,876	562,418	295,261	319,954	115,547	1,594	3,991,308
1918 ..	1,748,221	1,098,060	567,296	308,423	336,852	125,572	1,668	4,186,092
1919 ..	1,971,209	1,127,962	618,007	342,907	348,694	142,097	2,027	4,552,903

The expenditure per head of average attendance for each of the years given above will be found in the succeeding table:—

COST PER HEAD OF AVERAGE ATTENDANCE, STATE SCHOOLS, 1901 AND 1915 TO 1919.

(COMMONWEALTH.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	C'wealth.
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
1901	4 0 10	4 7 0	3 12 9	3 9 5	5 9 3	2 12 11	..	4 0 8
1915	7 7 1	6 4 0	5 8 9	5 7 4	7 10 0	4 15 4	9 13 2	6 8 11
1916	7 13 0	6 3 1	5 14 0	5 2 4	7 12 8	4 15 5	11 18 6	6 11 4
1917	7 9 10	6 3 5	6 7 5	5 4 0	7 15 11	4 15 1	8 11 5	6 13 0
1918	7 14 10	6 10 10	6 15 6	5 3 4	7 17 3	5 1 11	8 9 4	6 18 5
1919	9 5 2	6 9 10	6 13 6	5 14 10	7 19 2	5 13 4	10 19 2	7 9 9

The rise in the figures for total expenditure in New South Wales during 1919 is accounted for largely by increases in teachers' salaries, and this, coupled with the smaller average attendance due to the epidemic of influenza, had the effect of expanding the average cost per scholar for the year as compared with the preceding years in the quinquennium.

Expenditure on school buildings in each of the years quoted was as follows:—

EXPENDITURE ON STATE SCHOOL BUILDINGS, 1901 AND 1915 TO 1919.

(COMMONWEALTH.)

Year.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	C'wealth.
	£	£	£	£	£	£	£	£
1901 ..	57,663	36,040	33,421	13,656	49,073	7,762	..	197,615
1915 ..	234,281	315,869	83,159	32,163	51,252	20,640	214	737,578
1916 ..	303,001	220,042	96,397	32,196	24,863	28,793	..	705,292
1917 ..	208,733	116,010	78,080	44,311	21,034	21,667	253	490,088
1918 ..	238,434	62,532	94,323	40,299	16,540	8,883	252	461,263
1919 ..	265,174	87,273	94,603	41,974	24,579	23,897	650	538,150

The net total cost during the year 1919 was as follows:—

NET TOTAL COST, STATE SCHOOL EDUCATION, 1919.

(COMMONWEALTH.)

Item.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	Nor. Ter.	C'wealth.
	£	£	£	£	£	£	£	£
Net cost of education, including buildings ..	2,236,383	1,215,235	712,610	384,881	373,273	165,994	2,677	5,091,053

The figures in this and the preceding tables refer to all grades of State schools (with the exception of technical schools), and include evening schools. Including buildings the net cost per scholar in average attendance for the whole of the State schools in the Commonwealth amounted in 1919 to £8 7s. 5d. as compared with £4 9s. 3d. in 1901.

§ 3. Private Schools.*

1. Schools, Teachers, etc., in 1919.—The following table shews the number of Private Schools, together with the teachers engaged therein, and the enrolment and average attendance in 1919:—

PRIVATE SCHOOLS, 1919.

(COMMONWEALTH.)

State.	Schools.	Teachers.	Enrolment.	Average Attendance.
New South Wales	677	3,815	74,306	53,373
Victoria	493	1,903	63,476	(a) 48,000
Queensland	156	896	22,174	18,305
South Australia	166	715	15,297	10,991
Western Australia	124	493	11,939	10,322
Tasmania	79	313	5,874	4,601
Northern Territory	1	2	49	38
Commonwealth	1,696	8,137	193,115	145,630

(a) Estimated.

* Private schools include all schools not wholly under State control. The term "private," though popularly applied, is of course a misnomer.

The totals for New South Wales include returns from the Sydney Grammar School, which receives a yearly State subsidy of £1,500, and which, in 1919, had an enrolment of 625, and an average attendance of 564.

The figures for Queensland include the returns from Grammar Schools, of which there are ten—six for boys and four for girls, with an enrolment of 1,142 boys and 758 girls. These schools are governed by boards of trustees, partly nominated by Government, and partly by the subscribers to the funds. The trustees make regulations regarding the fees of scholars, the salaries of teachers, and generally for the management of the schools. Each school is endowed by the Government at the rate of £750 per annum, together with, in some instances, an additional £250 to provide district scholarships. The total Government aid received in 1919 was £9,785. The Grammar Schools are inspected annually by the departmental Inspector-General.

2. Growth of Private Schools.—The enrolment and average attendance at Private Schools during 1891, 1901, and in each year of the period 1912 to 1919 are as follows:—

ENROLMENT AND ATTENDANCE AT PRIVATE SCHOOLS, 1891 TO 1919.

(COMMONWEALTH.)

Year.	Enrolment.	Average Attendance.	Year.	Enrolment.	Average Attendance.
1891	124,485	99,588	1915	172,957	144,804
1901	148,659	120,742	1916	177,650	146,380
1911	160,794	132,588	1917	177,126	144,409
1912	164,085	133,940	1918	190,999	151,590
1913	161,204	132,679	1919	193,115	145,630
1914	162,813	135,141			

The small rate of increase in private school enrolment and attendance is due in a large measure to the development of the State educational systems, especially as regards the provision of secondary education. As compared with 1918, the figures for average attendance show a falling off in 1919 of about 6,000, the decrease being accounted for by the smaller attendance in New South Wales Schools resultant on the influenza epidemic.

3. Registration of Private Schools.—Until recent years the various State Governments had comparatively little control over privately conducted schools. With the advance of modern educational thought the position is improving, but still leaves much to be desired. It is evident that without a thorough system of registration there will always be a difficulty in regard to enforcing the compulsory clauses of the various Education Acts. Moreover, advanced educational thought demands complete supervision, not only of curricula, but of all matters pertaining to school hygiene.

In New South Wales, under the provisions of the Bursary Endowment Act of 1912, non-State Schools are inspected by the Departmental Inspector of Secondary Education for registration or renewal thereof. Under the compulsory clauses of the amending Public Instruction Act of 1916 children between the ages of 7 and 14 years must attend schools certified as efficient by the Minister. Provisional registration is granted to applicants pending inspection by Government officers. School proprietors must conform to prescribed conditions in regard to the hygiene, etc., of their buildings.

In Victoria, up to the year 1905, no attempt had been made to bring Private Schools under general administrative control, but the Registration of Teachers and Schools Act of 1906, and the Education Act of 1910, established a registration scheme under a special committee. Improvements were made in the regulation of these institutions by the Amending Act of 1914. At present, the committee consists of nine members of the Council of Education. Section 60 of the Act of 1910 also empowers the Minister of Education to authorise the inspection of any school (other than a State School) in order to ascertain whether the instruction given is satisfactory. The inspector of registered schools has pointed out that the Registration Act has had the effect of improving the school buildings as well as the methods of instruction. Since 1914, the improvement of existing buildings has been enforced where necessary, while full requirements have been insisted on in the case of additions or new buildings.

In Queensland, with the exception of the Grammar Schools, which are now examined annually, there is practically no control over the private schools, beyond the fact that they may submit themselves to inspection if so desired, and there is a similar provision under the Education Act of 1915 in South Australia. [See also Sub-section 4 hereunder.]

In Western Australia, non-Government schools must be declared efficient by the Education Department if attendance at them is to be recognised as fulfilling the requirements of the law, and the school registers must be open to the inspection of the compulsory officers of the Department.

In Tasmania the Education Act requires the teachers of other than State Schools "to furnish during January of each year returns shewing attendances at such schools." Despite the fact that penalties are prescribed for non-compliance with the law, many teachers neglect to return the forms sent out. Provision has been made for registration of private teachers and schools very much on the lines adopted in Victoria. The Act declares that all persons who were employed in a bona fide manner for at least three months before 25th October, 1906, were entitled to be registered as teachers without submitting proof of professional qualifications. No person can be registered as a private teacher since July, 1907, unless the Board is satisfied as to his fitness for the work.

4. German Schools in Australia.—The accompanying particulars in regard to German Schools in Australia have been extracted from information supplied by the State Education Departments.

New South Wales. In this State there are three private schools conducted by German teachers, and attended entirely by children of German descent. The schools are situated at Jindera, near Albury (34 pupils); Trungley Hall, near Temora (29 pupils); and Gidginbung West, near Temora (8 pupils). The schools are inspected by the Departmental officers, and school work is conducted in English. The use of German as the language of instruction is not permitted in any school. Jindera, Trungley Hall, and Gidginbung West have been gazetted "certified" schools under the provisions of the Public Instruction Amendment Act of 1916.

The scholars attending the following State schools consisted largely of children whose parents were known to be of German descent:—Alma Park, Burrumbuttock East, Gerogery Railway Station and Gerogery West, Glenellen, Hovell, Jindera, Lavington, Walkyrie, Walla Walla. Many of the scholars at these schools could speak German before they attended school.

Victoria. There are ten registered private Lutheran schools in Victoria, with an attendance of 339 pupils. In connexion with these schools it has been laid down by the Government that the German language is not to be employed in teaching, and books, charts, etc., in German are prohibited. Religious instruction in German is not permitted, and the syllabus of instruction must be on lines prescribed by the Education Department, and be such as will promote good citizenship and loyalty to the British Empire. There are no State German schools.

Queensland. There are now no German day schools in operation. In districts where German families form a considerable proportion of the population the children attend the State schools, and, in common with other children, are subject to the conditions imposed by the compulsory clauses of the State Education Act now in force.

South Australia. In the year 1916 there were 52 Lutheran schools in this State, practically all under the control of the Lutheran Church. In many of these schools the teaching was carried on in the German language, and English was hardly spoken at all. Religion as taught by the Lutheran Church formed an important part of the instruction. The Education Act of 1915 provided that teaching should be through the medium of the English language for at least four hours a day. The Education Amendment Act of 1916, however, provided that the Government should take over and carry on all Lutheran schools not earlier than 30th June, 1917, and not later than 31st December, 1917, and that no language but English should be spoken in the schools. The Act was put into force on the 1st July, 1917. With the exception of the Point Pass and Concordia Secondary Schools there are now no Lutheran schools in South Australia. Forty-nine Lutheran

schools were closed on the 30th June, and 45 of these re-opened, 25 being absorbed into neighbouring public schools, while 20 were carried on in their own buildings with an English teacher.

Western Australia and Tasmania. There are no German schools in either of these States.

§ 4. Free Kindergartens.

The following information regarding Free Kindergartens in the Commonwealth has been compiled from particulars supplied by the principals of the chief institutions or the organizing secretary in each State, except in the case of Western Australia, the details for which were furnished by the Education Department.

FREE KINDERGARTENS IN THE COMMONWEALTH, 1920.

State.	No. of Schools.	Average Attendance.	Permanent Instructors.	Student Teachers.	Voluntary Assistants.
New South Wales (Sydney)	10	600	19	53	19
Victoria (Melbourne) ..	25	850	48	26	197
(Ballarat) ..	1	20	2	..	8
Queensland (Brisbane) ..	6	173	9	15	2
South Australia (Adelaide)	7	260	9	19	..
Western Australia (Perth)	4	147	5	17	..
Tasmania (Hobart) ..	2	68	4	8	1
(Launceston) ..	1	58	1	5	3
Total ..	56	2,176	97	143	230

It must, of course, be distinctly understood that the information given above refers to institutions under private kindergarten unions or associations, and is exclusive of the kindergarten branches in the Government schools of the various States.

§ 5. Universities.

1. Origin and Development.—The history of the foundation and progress of the four then existing Australian Universities was traced at some length in Year Books I. and II. In the present volume space will permit of only a very brief reference to the subject.

(i) *University of Sydney.* The Act of Incorporation of the University of Sydney received Royal Assent on the 1st October, 1850, and the first Senate was appointed on the 24th December of that year. The first matriculation examination was held in October, 1852, when 24 candidates passed the required test, and the formal inauguration ceremony took place on the 11th October of the same year. A Royal Charter was granted to the University on the 27th February, 1858. Women students were admitted in 1881. The passing of the University (Amendment) Act of 1912 marks an important epoch in the development of the educational system of New South Wales. The Act aims at placing the University in a more effective position as the culminating point in a thoroughly co-ordinated system of State education, and it is claimed that the passing of this measure makes the educational system—from the Primary Schools through the Secondary Schools to the Technical Colleges or to the University—form a progressive and continuous whole. Under the new Act the Constitution of the Senate was radically changed, and this body now consists of—four Fellows appointed by the Governor, one elected by members of the Legislative Council, one elected by members of the Legislative

Assembly, five representatives of the University teaching staff, ten elected by graduates of the University, and three elected by the aforesaid Fellows. The professorial representatives hold office for two years, and the other Fellows for five years. In addition it was provided that in view of their distinguished services, the late Chancellor, Sir Normand MacLaurin, and the Vice-Chancellor, Judge Backhouse, should each during his life be a Fellow in addition to the ten Fellows elected by the graduates. The second part of the Act contains a feature of outstanding importance, in that it provides for the allotment of exhibitions in the proportion of 1 for every 500 of the population of New South Wales between the ages of 17 and 20, or in such other ratio as may be determined by Parliament. These exhibitions, which carry exemption from all fees, are not restricted to any particular faculty in the University, and are principally allotted in order of merit as shewn by examinations for leaving certificates at the State Schools. Pupils of registered Secondary Private Schools are also eligible for leaving certificates on the same conditions as those of the State Schools. To gain a leaving certificate a candidate must have satisfactorily completed an approved four years' course of study. Five per cent. of the total number of exhibitions allotted in any year are available for successful candidates at the written examination, even though they be ineligible for a leaving certificate. At the inception of the University there were only three professorships. The present staff consists of 26 professors, including the Director of Military Science, 6 assistant professors, and 133 lecturers and demonstrators. There are, in addition, various honorary lecturers and demonstrators, as well as 79 miscellaneous assistants in laboratories, and 5 curators of museums.

(ii) *University of Melbourne.* This institution was established by Act of Parliament assented to on the 22nd January, 1853, and its first Council was appointed on the 11th April of that year. The foundation stone of the main building was laid on the 3rd July, 1854, and the University was formally inaugurated on the 13th April, 1855. By Royal Letters Patent, issued in 1859, its degrees are, like those of the Sydney institution, declared of equal status with those of any other University in the British Empire. Women students attended lectures for the first time in 1881. The University, which began in 1855 with Schools of Arts and Laws, has now a staff of 19 professors, 74 lecturers and demonstrators, and 105 various assistants. The Conservatorium of Music has a staff numbering 38.

(iii) *University of Adelaide.* This University was established by Act of Parliament in 1874. Its origin and progress were largely due to the munificence of the late Sir Walter Watson Hughes and Sir Thomas Elder, G.C.M.G., the total gifts of the latter amounting to over £100,000. The academical work of the institution was commenced in March, 1876, when eight matriculated and fifty-two non-graduating students attended lectures. The foundation stone of the University buildings was laid on the 30th July, 1879, and the buildings were opened in April, 1882. In 1881, by Royal Letters Patent, the degrees granted by the institution were recognised as of equal distinction with those of any University in the British Empire. The Elder Conservatorium of Music was opened in 1898. Power was given by Act of Parliament in 1880 to grant degrees to women. At first there were only four professorships in the University, whereas the present staff consists of 13 professors, 49 lecturers and demonstrators, and 29 miscellaneous assistants, while the staff at the Conservatorium, not included in the foregoing figures, numbers 19.

(iv) *University of Tasmania.* The Act to establish the University of Tasmania (Hobart) was assented to on the 5th of December, 1889. At the present time the institution, which is small but efficient, possesses a staff of 7 professors, 8 independent lecturers, and 5 assistant lecturers and demonstrators. Under Statute dated 13th April, 1905, the Zeehan School of Mines and Metallurgy was affiliated to the University, while the School of Mines and Industries at Mount Lyell was affiliated on the 4th November, 1915. Tutorial classes have been arranged at Hobart and Launceston, and Extension Committees have been formed in various country centres.

(v) *University of Queensland.* The Act to establish the University of Queensland was passed in 1909, and the first Senate was appointed on the 14th April, 1910. The University was opened on the 14th March, 1911, when 60 students were matriculated. Provision has been made for a Correspondence Study department in connexion with the

institution, and at the request of the Brisbane branch of the Workers' Educational Association weekly lectures are given in History and Economics. At the present time there are 8 professors, with 10 independent lecturers, 3 assistant lecturers and demonstrators, and 4 miscellaneous assistants. The Correspondence department is under the control of a director and assistant. University extension lectures are delivered at important country centres.

(vi) *University of Western Australia.* The University of Western Australia was established under an Act which received Royal assent on the 16th February, 1911, and the first Senate was appointed on the 13th February, 1912. There are now 7 professors, in addition to 23 lecturers and demonstrators and 17 miscellaneous assistants. The Chair of Agriculture was endowed by Sir Winthrop Hackett. Students of the Perth Technical School and the Kalgoorlie School of Mines are admitted to the first year examinations in certain subjects provided they have matriculated. The institution was opened in March, 1913.

2. *Teachers and Students of Universities.*—The following table shows the number of professors and lecturers and the students in attendance at each of the State Universities during the year 1919 :—

UNIVERSITIES.—TEACHERS AND STUDENTS, 1919.

University.	Professors.	Lecturers and Demon- strators.	Students attending Lectures.		
			Matriculated.	Non- matriculated.	Total.
Sydney	32	133	2,153	644	2,797
Melbourne	19	74	1,840(a)
Adelaide	13	49	502	411	913(b)
Tasmania (Hobart) ..	7	13	147	23	170
Queensland (Brisbane) ..	8	13	229	34	263
Western Australia (Perth) ..	7	23	327	85	412

(a) Exclusive of 147 music students. (b) Exclusive of 521 music students.

Students at the Conservatorium of Music have been excluded in the case of Melbourne and Adelaide. The Conservatorium in Sydney, while attached to the Education Department, is not under the control of the University.

3. *University Revenues.*—The income of the Universities from all sources during the year 1919 was as follows :—

UNIVERSITIES.—REVENUE, 1919.

University.	Government Grants.	Fees.	Other.	Total.
	£	£	£	£
Sydney	67,203	21,353	37,113	125,669
Melbourne	26,983	54,538	10,049	91,570
Adelaide	12,913	15,745	5,839	34,497
Tasmania (Hobart) ..	8,525	2,166	875	11,566
Queensland (Brisbane) ..	16,400	5,700	4,540	26,640
Western Australia (Perth) ..	13,498	2,107	1,574	17,179

The column "Other" includes the receipts from private foundations. The extent to which the Universities have benefited by private munificence will be apparent from the following table :—

PRINCIPAL PRIVATE BENEFACTIONS TO AUSTRALIAN UNIVERSITIES.

University of Sydney.		University of Melbourne.		University of Adelaide.	
Donor.	Amount.	Donor.	Amount.	Donor.	Amount.
	£		£		£
J. H. Challis ..	250,750	Sir Samuel Wilson ..	30,000	Sir Thos. Elder ..	98,760
Sir P. N. Russell ..	100,000	James Stewart ..	25,624	Sir W. Hughes ..	20,000
Thos. Fisher ..	30,000	Hon. Francis Ormond ..	20,000	Hon. J. H. Angas ..	10,000
Edwin Dalton ..	8,000	John Hastie ..	19,140	R. Barr Smith ..	10,150
Hugh Dixon ..	8,050	Robert Dixon ..	10,837	Other donations	22,154
Hon. Sir W. Macleay ..	6,000	John Dixon Wyse-			
Mrs. Hovell ..	6,000	laskie ..	8,400		
Thos. Walker ..	6,200	David Kay ..	5,764		
Other donations ..	59,517	Henry Dwight ..	5,000		
		Wm. Thos. Mollison ..	5,000		
		Other donations ..	58,854		
Total	£ 474,517	Total	£ 188,619	Total	£ 161,064

In addition to the sum of £6,000 shewn above, the Hon. Sir W. Macleay also presented the Museum of Natural History to the University of Sydney.

The credit balances of some of the above endowments now amount to very considerable sums. For example, on the 31st December, 1919, the Challis Fund amounted to nearly £320,000, and the Fisher bequest to over £44,000. The cash balance at the end of 1919 on account of all private foundations to Sydney University stood at £588,206. In the case of Melbourne University the Stewart fund on the 31st December, 1918, stood at £30,440, the Hastie at £19,266, and the Dixon fund at £14,584.

In addition to the above there were various other bequests to Sydney University—e.g., collection of Egyptian antiquities, etc., by Sir Charles Nicholson, and Natural History collection by Mr. Geo. Masters, while the building for the Natural History Museum was given by Sir W. Macleay. Numerous prizes and scholarships have also been given to the various colleges. In Melbourne, the Hon. Francis Ormond's benefactions to Ormond College amounted to about £108,000. With a view to advancing the cause of education in agriculture, forestry and allied subjects, Mr. Peter Waite transferred to the Adelaide University in 1914 the whole of the valuable Urrbrae estate at Glen Osmond. The estate comprises 134 acres of land with a fine mansion. In 1915, he presented the estate of Claremont and part of Netherby, comprising 165 acres, adjoining Urrbrae, while in 1918 he transferred to the University 5,880 shares in a public company, to provide funds to enable the University to utilize the land for the purposes intended. Private benefactions to the University of Tasmania and the University of Queensland amount to £3,280 and about £16,000 respectively. In connexion with the latter, the trustees of the Walter and Eliza Hall Trust have endowed fellowships in engineering, economic biology, and pure and applied chemistry. The trustees also provided a Veterinary Science Research Fellowship at Melbourne University. In Western Australia the chair of Agriculture was founded by an endowment of Sir Winthrop Hackett, first Chancellor of the University, who made available also an annual sum of £900 for the establishment of a Department of Agriculture.

Recently by bequest of the late Sir S. McCaughey a sum estimated at £400,000 accrued to the funds of Sydney University, and about £200,000 to the Queensland University.

4. University Extension.—Extension lectures were instituted at Sydney University in 1886, but under a Statute of the Senate, approved of in 1892, a Board was appointed, which was empowered from time to time to recommend to the Senate the names of suitable persons for giving courses of lectures, and to hold examinations in the subjects

of the lectures. The Board receives and considers applications from country centres, and makes provision for engaging lecturers and managing the entire business connected with the various courses. The project has only met with fair success, no lectures having been given in some years, but lately there appears to be an awakening of interest in the matter. The Board also arranges for courses of lectures in other States. In 1919 the average attendance at extension lectures in New South Wales was 130.

University extension lectures in Victoria date from the year 1891, when a Board was appointed by the Melbourne University for the purpose of appointing lecturers and holding classes and examinations at such places and in such subjects as it might think fit. Interest in University extension has varied in Victoria, the attendance at the various centres being estimated at 150 in 1919.

The Adelaide University has also instituted short courses of extension lectures in Arts and Science, to which students are admitted on payment of a nominal fee. Public intimation of these lectures is made from time to time during the session.

The University of Tasmania provides for courses of extension lectures at various centres. Tutorial classes in Economics, History, Philosophy, and Literature are conducted in Hobart, and a class in Economics has been formed at Launceston. Attendance at extension lectures in 1919 numbered 209.

As pointed out previously, a correspondence study department has been inaugurated in connexion with the University of Queensland in order to overcome, as far as possible, the difficulties of students who desire to benefit by University teaching, but who for various reasons are unable to attend the lectures. At present the work of this department is confined to the Arts course.

In Western Australia provision has been made for the giving of courses of extension lectures in Perth and suburbs, and also—by arrangement with local committees—in country centres. The professor of agriculture visits the chief farming districts for the purpose of giving lectures to, and holding conferences with the primary producers. Special short courses for farmers are given at the University. Short courses of popular lectures are also given in the evening by various professors at the University.

5. Soldiers' Scholarships at British Universities.—A scheme was evolved under which men on active service with the military and naval forces of the Dominions might benefit by the facilities for special education afforded by British Universities and technological institutions. Funds were made available to allow selected disabled soldiers and sailors to commence work as soon as they were fit to take up their studies. The Earl of Selborne generously provided a number of scholarships, a large subscription was allotted from the Kitchener Memorial Fund, and the Rhodes' Trust set apart several scholarships, some of which have been given to Australians. At present a small number of Australian soldiers are studying at Oxford, Cambridge, and Leeds. The scholarships are of the annual value of £150 to £250, and cover all expenses, including tuition fees and cost of living. They are granted with the proviso that those who hold them will follow up in their future professions and occupations the line of study embraced in the scholarships. The South African Government offered twenty-five additional scholarships for South African soldier students.

6. Workers' Educational Association.—In 1913 Workers' Educational Associations were formed in all the States of the Commonwealth, and later in New Zealand. The movement has for its object the bringing of the University into closer relationship with the masses of the people and thereby providing for the higher education of the workers in civic subjects. The work of the Association is gaining in popularity year by year and the growth of the movement has been phenomenal. The Government of New South Wales at first granted the University of Sydney the sum of £1,000 to initiate a scheme for tutorial classes. There are now direct grants from all State Governments except Western Australia, and an additional University grant in New Zealand. The particulars of grants for classes are as follow:—New South Wales, £5,650, 51 classes; Victoria, £2,250, 18 classes; Tasmania, £2,105, 15 classes; South Australia, £1,600, 9 classes; Queensland, £1,000, 13 classes. The total number of students throughout Australia is approximately 4,000, the greater number of whom are taking three-year courses while working at their daily occupations. An analysis of these occupations showed that the great majority of the students were wage-earners. The principal subjects chosen in all States are Industrial

History, Economics, Political Science, and Sociology, but there is an increasing number of classes in other subjects such as Modern History, Psychology, Philosophy, Literature, Physiology, and Biology. Each University co-operates with the W.E.A. in the formation of a joint committee for tutorial classes, which appoints tutors and generally supervises the work with the assistance of a University officer with the title of Director of Tutorial Classes. In addition to the longer and more serious courses, a great many preparatory classes, study circles, and summer schools are organised by the Association, numerous courses of public lectures are delivered, educational conferences promoted, and an extensive book service is spreading educational literature throughout the Commonwealth. A strong feature of the work of the Association is the organization of a number of country branches to carry facilities for higher education to districts in which these have hitherto been lacking. This work has been particularly successful in New South Wales, Victoria, and Tasmania. In New South Wales the Association organised an important representative conference on "Trade Unionism in Australia" in 1915, the report of which has been issued in book form. Another conference on the "Teaching of Sex Hygiene" was held in 1916, the report of which has passed through two large editions. A Commonwealth Conference held at Adelaide in 1918 resulted in the formation of a federal organisation now known as "The Workers' Educational Association of Australia." Its central office is in the Education Department, Melbourne. The Federal Council co-ordinates the activities of the W.E.A. in all States, and has inaugurated a series of publications on sociological and economic subjects. It also publishes "The Highway," a monthly magazine now in its third year, which contains notes on the movement and general discussions on educational work.

§ 6. Technical Education.

1. **General.**—Although provision has been made in some of the States in respect to many necessary branches of technical education, the total provision made would imply that this branch of education has not been regarded as of great importance. As will be seen later on, the expenditure on technical education for the whole of Australia is comparatively insignificant. The question of apprenticeship is referred to in the section dealing with "Manufacturing Industries."

2. **New South Wales.**—The present organisation of technical education in this State dates from the year 1883, when a Technical Education Board was appointed as a result of suggestions made at the Technological Conference held in 1879. This Board continued its functions till November, 1889, when it was dissolved, and the work has thenceforward been carried on as a branch of the Public Instruction Department. The chief centre of activity is, of course, in Sydney, where the Technical College and Technological Museum are situated, the college having been opened for the reception of students early in 1892. Colleges were also erected in some of the chief country towns—at Maitland in 1890; Newcastle 1896; Bathurst 1898; Broken Hill 1898; Albury 1899; and Goulburn 1902. In other centres classes were established in various subjects whenever the prospects were sufficiently encouraging. Up to the year 1912 the provision for technical education is stated to have partaken more or less of the nature of successive accretions on the original humble beginnings, rather than to have aimed at development in accordance with a definite plan. With the systematisation of the other branches of education, the necessity for more effective organisation of the technical side became imperative, and in 1913 a rearrangement was effected. Under the new conditions Trade Schools supersede the branch Technical Colleges, with the exception of that at Newcastle. Entrance to the Trades Schools is conditional on a student being actively engaged in the trade concerned during the day and possessing a certain degree of preparatory knowledge. The latter qualification is assured by the possession of a certificate from a Commercial Superior Junior Technical School or an Evening Continuation Junior Technical School. The co-operation of both employers and employees has been sought and obtained, and while at first there was some diminution in the number attending the classes, this is counterbalanced by increased efficiency. At the beginning of 1913 a conference was held between the education authorities and leading employers and employees with a view to deciding on a scheme of organisation of the system of technical education. Sub-conferences were held for each trade or group of trades. In view of the information received, the

Director of Education submitted a scheme to the Minister, and the scheme was approved at the end of November. Under the new plan the instruction is given in two divisions—(1) Trade Courses; (2) Higher Technical Courses. Instruction in the trade courses will be really continuation trade instruction, *i.e.*, supplementary to actual workshop practice under an employer. Attempts to train youths to be tradesmen in the College have been abandoned, and only those actually engaged as apprentices or journeymen are admitted to the college classes. Entrance tests are prescribed so as to ensure that students admitted to the courses will possess sufficient preparatory knowledge to benefit by them, but journeymen desirous of improvement may join at any time. Advisory committees have been appointed for each trade or group of trades. The first two or three years' course of instruction is given in the Trade Schools, of which there are ten, and the last two or three years' at the Technical Colleges, of which there are three, one at Sydney, one at Newcastle, and one at Broken Hill. The higher courses embrace instruction in advanced trades work qualifying for the position of manager or foreman, but no attempt will be made to train for the professional standing. It is hoped, however, that the scheme will develop so that part of the graduates may proceed to the University. Admission to the higher courses will eventually be restricted to those who have either graduated in the Trade Schools of the Department, or who evidence possession of a similar standard of knowledge. In addition to the courses given in the Technical Colleges and Trades Schools, elementary instruction has been provided at various centres where there has been a demand for it, and provision has been made also for special courses of instruction by correspondence. A liberal scheme of scholarships has been provided for students passing from the day or evening Junior Technical Schools or Domestic Science Schools, to the Trades and Science Schools, as well as scholarships to the University at the close of the diploma course.

At the Aviation School, Richmond, a number of students secured pilots' certificates in 1918 and were sent abroad on active service. During 1919, instruction was restricted to the training of mechanics.

The table below gives some idea of the development of technical education in New South Wales during the five years 1915-19:—

TECHNICAL EDUCATION, NEW SOUTH WALES, 1915 TO 1919.

Year.			Number of Classes.	Number of Enrolments.	Average Weekly Attendance.	Number of Lecturers and Teachers.	Fees Received.
							£
1915	519	13,000	9,257	298	9,830
1916	529	14,188	10,077	321	9,989
1917	544	15,065	11,072	354	9,354
1918	572	15,986	12,156	369	9,422
1919	557	14,580	10,949	379	9,416

At the beginning of 1913 the Sydney Technical High School and the Hurlstone Agricultural High School were removed from the control of the technical branch and placed under the Inspector of Secondary Schools. Reference to the Agricultural Colleges will be found in the section dealing with Agriculture.

During the year 1919 large numbers of men were trained at the technical colleges at Sydney and Newcastle and in various suburban trades' schools under the vocational training scheme for returned soldiers. The total number in training at all centres was 1,488.

3. Victoria.—Technical instruction in mining has for many years received considerable attention in Victoria, the Ballarat School of Mines, which was established as far back as 1870, having achieved an Australasian reputation. Fine work was also done at the School of Mines in Bendigo, and later on excellent courses of training were evolved at the Working Men's College in Melbourne. The general scheme of instruction, however, lacked cohesion, and it was not until after the publication of the Report of the Royal Commission on Technical Education, which was appointed in 1899, that many defects were remedied. It is hoped that the Agricultural and District High Schools will serve as an effective connecting link between the ordinary State Schools and the Technical

Schools, as also the Junior Technical Schools established in and around Melbourne, and at Ballarat, Bendigo, Beechworth, Echuca, Geelong, Sunshine, and Warrnambool. At present there are 26 Technical Schools receiving State aid. The largest technical institution in Melbourne is the Working Men's College, founded in 1887. The College, in addition to giving instruction in a large number of technical subjects, is also a School of Mines. Six of the Schools, viz., the Working Men's College, and the Schools of Mines at Ballarat, Bendigo, Bairnsdale, Maryborough, and Stawell are classed as Certified Science Schools, and provide full courses in metallurgy and mining engineering, extending over three or four years. There are at the present time 19 Junior Technical Schools in existence, giving a two years' course of instruction to boys between the ages of 12½ and 15 years. Only one of these is an independent establishment, the others being worked in conjunction with Technical Schools.

Over 2,000 returned soldiers have been before the Vocational Training Committee and provision made for training and placing them in employment. At latest available date, instruction was being given in 34 trades, and the number is being added to as occasion demands. The staff and councils of the various Technical Schools have taken a great interest in the work of repatriation.

TECHNICAL EDUCATION, VICTORIA, 1915 TO 1919.

Year.				Number of Classes.	Number of Enrolments.	Average Attendance.	Fees Received.
							£
1915	110	10,782	6,852	14,992
1916	104	12,049	7,724	16,439
1917	106	12,139	8,736	18,836
1918	110	13,300	9,119	19,044
1919	110	12,785	9,102	18,351

4. **Queensland.**—Up to the passing of the "Technical Instruction Act of 1908," technical education in Queensland was controlled by local committees, the State simply providing financial aid. Under the provisions of this Act, the State took over the technical colleges at Brisbane, South Brisbane and West End, and formed therefrom a Central Technical College. By an amending Act in 1918, power was taken to assume the control of other technical institutions. At the end of 1919 there were fifteen technical colleges in operation, and 34 branches were located in small towns within convenient reach of the Colleges. Preparatory Day Trade Schools were established at Ipswich and Brisbane in 1916, and Domestic Science Day Schools at Brisbane and Ipswich in 1915, and at Townsville in 1918. Several Itinerant Domestic Schools have been opened to meet the needs of districts where the population is not sufficient to warrant the establishment of permanent classes. Vocational training for returned soldiers has been provided in Brisbane and at various country centres. The progress of technical education since 1915 is shewn in the following table:—

TECHNICAL EDUCATION, QUEENSLAND, 1915 TO 1919.

Year.				Number of Classes.	Enrolments.	Average Weekly Attendance.	Number of Teachers.	Fees Received.
								£
1915	358	7,522	6,258	271	10,761
1916	365	8,644	8,500	283	12,024
1917	388	9,632	7,800	310	15,274
1918	421	9,900	8,500	295	14,851
1919	423	9,864	(a)8,000	348	11,364

(a) Estimated.

Greater attention is being devoted to the development of trade classes, and the Technical College authorities have been assisted by the University professors in the preparation of a properly organised system of Trade instruction. Full time Commercial

Day Schools are in operation at Warwick, Ipswich, Brisbane, and Townsville. Preparatory Day Trade Schools have been established in connexion with the Central and Ipswich Technical Colleges. Trade Advisory Committees have been inaugurated in connexion with several of the subjects of instruction at the Central Technical College. Compulsory attendance at technical classes in various districts has been provided for by industrial awards, the decisions so far—with the exception of Printing—being confined to trades connected with Engineering and Metal Working. The Department now pays about £2,000 per annum to the Technical Colleges for the instruction of selected State School pupils in approved subjects. Tuition by correspondence is given by the Central Technical School. It is believed that the raising of the school age to fourteen years, coupled with the establishment of High Schools, will result in a more effective co-ordination between ordinary and technical education in the State.

5. **South Australia.**—Prior to the year 1917 the condition of affairs in regard to technical education in Australia was regarded by the Education Department as unsatisfactory. There was a School of Mines and Industries in Adelaide, and in addition Schools of Mines at Moonta, Port Pirie, Kapunda, Mount Gambier, and Gawler. While the Government bore the bulk of the cost of maintenance of these institutions, they were controlled by independent councils, and there was no regular co-ordination in regard to staffs, curriculum, etc. The Education Department has now taken over the administration of Technical Education. A Director of Technical Education was appointed in 1916, and the reorganization of the system was thereupon undertaken. The work of the existing country schools was continued in 1919 with the assistance of the local Councils, but satisfactory arrangements have still to be made in regard to the management of the chief Technical School. Four special schools for the vocational training of returned soldiers have been established at Wayville, Edwardstown, Parkside and Kintore Avenue, City.

TECHNICAL EDUCATION, SOUTH AUSTRALIA, 1915 TO 1919.

Year.				Number of Classes.	Enrolments.	Average Weekly Attendance.	Number of Teachers.	Fees Received.
								£
1915	228	5,402	3,645	126	3,272
1916	203	5,335	4,520	119	3,221
1917	195	6,273	5,307	105	3,974
1918	169	5,927	4,760	127	4,393
1919	207	6,819	4,453	134	4,177

6. **Western Australia.**—A Technical School was established at Perth in 1900, and since its opening has progressed rapidly. Extensive additions to the buildings were made in 1909, and the remodelled institution was opened in 1910. The school is affiliated to the University. There are branch institutions at Midland Junction, Fremantle, Claremont, Kalgoorlie, Boulder, Geraldton, Bunbury, Collie, Coolgardie, and Albany. In addition, Continuation Classes are held at various centres. The total number of students on the roll at the end of 1919 was 3,347, of whom 2,777 were in the Metropolitan District. The schools are all under the control of the Education Department, the officer entrusted with their supervision being styled Director of Technical Education. The Director also supervises the School of Mines at Kalgoorlie, which is controlled by the Mines Department. Advanced work at present is taken only in Perth, Fremantle, Boulder, and in Kalgoorlie by the School of Mines, the other branches dealing almost entirely with preparatory work, chiefly in Continuation Classes. Until the establishment of the local University, the Perth Technical School was affiliated with Adelaide University.

In 1918 a vocational training committee was formed to superintend the training of returned soldiers, and some 2,000 men were interviewed and advised by the Committee before a Special Selection Officer was appointed in October, 1919. Originally it was

proposed to train disabled men only, but later it was decided to extend the privilege to all returned soldiers who were under 20 years of age at the time of enlistment. Provision was made for accommodating the classes in the Technical School and in workshops and other premises built or rented in various parts of the metropolis. At the end of 1919 the trades classes contained nearly 600 men. It was proposed to transfer the control of the work in 1920 to the Defence Department.

At present pupils leaving the State Schools at the age of 14 to take up employment may by attendance at evening classes qualify for free admission to the Technical Schools. Those with leaving certificates from the eighth standard, and others able to devote their full time to study, may obtain day instruction at the Technical Schools in subjects bearing on their intended occupations, or may qualify for a more extended course, including graduation at the University. Returns for the last five years are embodied in the table hereunder:—

TECHNICAL EDUCATION, WESTERN AUSTRALIA, 1915 TO 1919.

Year.		Number of Classes.	Enrolments.	Individual Students.	Number of Teachers.	Fees Received.
						£
1915	..	313	3,184	1,920	96	928
1916	..	369	3,757	2,366	103	1,058
1917	..	439	5,100	2,767	120	1,083
1918	..	435	5,853	3,320	127	920
1919	..	463	5,713	3,337	130	842

7. *Tasmania.*—Provision for technical education dates from the year 1888, but in the report of the Commission appointed in 1916 to enquire into the condition of technical education in Tasmania, allusion was made to the want of co-ordination between existing institutions and the Education Department, and it was recommended that the schools should be taken over by the Government, and a trained technologist appointed as organising inspector. The inspector was appointed in 1917 and a Technical Education Branch was established in 1918. The scheme of technical education includes—(1) The establishment of junior technical schools; (2) Reorganisation of existing technical schools; (3) Establishment of senior classes in technical schools; (4) A domestic school for girls. The co-operation of employers and employees has been obtained and certain of the more advanced courses have been co-ordinated with the courses given at the University. There are Junior Technical Schools for boys at Hobart and Launceston, and for boys and girls at Queenstown and Zeehan. Senior Technical Schools are in operation at Hobart and Launceston organized into Departments of Engineering and Applied Science, Art, and Trade; and at Queenstown and Zeehan, courses in Metallurgical and Mining Engineering are undertaken. Vocational classes for returned soldiers have been established at Hobart and Launceston.

TECHNICAL EDUCATION, TASMANIA, 1915 TO 1919.

Year.			Number of Classes.	Enrolments.	Average Weekly Attendance.	Number of Teachers.	Fees Received.

{ b	6,302	8,083	10,180	3,586	569	..	28,720

(a) Maintenance. (b) Buildings.

The expenditure on maintenance for technical education in 1919 amounted to 1s. 3d. per head of the population of the Commonwealth, as compared with 17s. 8d. per head expended on maintenance for primary education, and apparently shews that technical education has not attained its proper place in the educational organization of Australia.

§ 7. Business Colleges and Shorthand Schools.

There has been considerable development in recent years both in the number and scope of privately conducted institutions, which aim at giving instruction in business methods, shorthand, typewriting, the use of calculating machines, etc. Particulars for all States excepting Queensland are given in the following table :—

BUSINESS COLLEGES, SHORTHAND SCHOOLS, ETC., 1919.

State.	Schools.	Teachers.	Students Enrolled.		Average Attendances.		Fees Received.
			Males.	Females.	Males.	Females.	
							£
New South Wales ..	16	123	3,086	4,439	883	1,918	31,490
Victoria ..	16	180	4,022	2,323	2,900	1,591	(b)
Queensland(a)
South Australia ..	5	50	859	952	604	608	11,040
Western Australia ..	17	120	1,532	624	(b)	(b)	14,752
Tasmania ..	3	15	187	170	174	112	1,950

(a) Included in private schools. (b) Not available.

The figures for New South Wales are exclusive of students instructed at home through the medium of correspondence classes.

In Victoria it is explained that the preponderance of male students is due to the larger enrolment of males in the correspondence classes.

§ 8. Diffusion of Education.

1. General Education.—A rough indication of the state of education of the people is obtained at each Census under the three headings, "read and write," "read only," and "cannot read." The grouping of the whole population, exclusive of aborigines, in these three divisions is given for each Census since 1861 :—

EDUCATION AT CENSUS PERIODS, 1861 TO 1911.

(COMMONWEALTH.)

State or Territory.		1861.	1871.	1881.	1891.	1901.	1911.

Cannot read ..	3,031	2,693	2,312	2,114	1,788	1,507

2. **Education of Children.**—The figures in the preceding tables refer to the entire population of the Commonwealth, and as the age constitution of those dwelling in the various portions of Australia underwent considerable modifications during the period dealt with, a far more reliable test of the diffusion of education will be obtained by a comparison of the Census returns in regard to children of school age. For comparative purposes this has been taken to include all children in the group over five and under fifteen years of age, and the degree of education of these at each Census will be found below :—

EDUCATION OF CHILDREN AT CENSUS PERIODS, 1861 TO 1911.

(a) Including Federal Territory prior to 1911.

(b) Including Northern Territory prior to 1911.

(c) Included in South Australia prior to 1911.

(d) Included in New South Wales prior to 1911.

In the case of Tasmania full details for the years 1861 and 1871 are not available, and the figures for those years are approximate. The variation in degree of education may be more readily seen by reducing the foregoing figures to the basis of proportion per 10,000, and the results so obtained are embodied in the following table, a glance at which is sufficient to demonstrate the remarkable strides that at least the lower branches of education have made since 1861. In that year, only 47 per cent. of the children of school age could read and write, while 26 per cent. were illiterate. The returns for 1911 shew that the proportion of those who could read and write had increased to over 90 per cent., while the totally ignorant had declined by nearly two-thirds.

(a) Including Federal Territory prior to 1911.

(b) Included in South Australia prior to 1911.

(c) Including Northern Territory prior to 1911.

(d) Included in New South Wales prior to 1911.

3. Education as shewn by Marriage Registers.—Another common method of testing the spread of education is to compare the number of mark signatures with the total number of persons married during each year of a series. The percentage of males and females signing with a mark to the total persons married in the Census years 1861 to 1901, and during each of the last nine years, was as follows. The figures refer to marriages in the Commonwealth in respect of which information was obtainable.

ILLITERACY SHEWN BY MARRIAGE SIGNATURES, 1861 TO 1919.

(COMMONWEALTH.)

Year.	Proportion Signing with Marks of Total Persons Married.			Year.	Proportion Signing with Marks of Total Persons Married.				
	Males.	Females.	Total.		Males.	Females.	Total.		
	Per cent.	Per cent.	Per cent.		Per cent.	Per cent.	Per cent.		
1861	..	18.50	30.69	24.60	1911	..	0.56	0.54	0.55
1871	..	10.58	16.40	13.49	1914	..	0.41	0.38	0.39
1881	..	4.34	6.78	5.56	1915	..	0.27	0.27	0.27
1891	..	2.27	2.40	2.34	1916	..	0.37	0.32	0.35
1901	..	1.35	1.29	1.32	1917	..	0.37	0.31	0.34
1909	..	0.05	0.02	0.04	1918	..	0.33	0.29	0.31
1910	..	0.56	0.59	0.58	1919	..	0.27	0.27	0.27

The table shows that there has been a large diminution in illiteracy, and judging from the figures for the last few years the proportion bids fair to practically disappear. Up to 1891 there was a higher proportion of illiteracy amongst females, but during the later years the rates have been very even.

§ 9. Miscellaneous.

1. *Scientific Societies.*—(a) *Royal Societies.* Despite the trials and struggles incidental to the earlier years of the history of Australia, higher education and scientific advancement were not lost sight of. Thus the origin of the Royal Society dates as far back as 1821, when it was founded under the name of the Philosophical Society of Australasia, Sir Thomas Brisbane being its first president. Scientific work was fitfully carried on by means of a Society whose name varied as the years rolled on. It was called the Australian Philosophical Society in 1850. In 1856 the old Australian Society merged into a resuscitated Philosophical Society of New South Wales, and its papers were published up to 1859 in the Sydney Magazine of Science and Art (2 vols., 1858-9). Its present title dates from 1866. Some of the papers of the old Philosophical Society were published in 1825 under the title of "Geographical Memoirs of New South Wales" (Barron Field), and contain much that is interesting in regard to the early history of Australia. One volume containing the Transactions of the Philosophical Society of New South Wales (1862-65) was published in 1866. The journal of the Society did not begin to bear a serial number, however (vol. 1), until the year 1867. "Transactions of the Royal Society of New South Wales" were issued in 1867, the title of the series being altered to "Journal" in 1878. Up to the end of 1920, 54 volumes had been published. The exchange list comprises the names of 332 kindred societies. At the present time the library contains about 30,000 volumes and pamphlets, valued at about £8,000. Income and expenditure for the year ended 31st March, 1921, were £1,571 and £1,661 respectively, and the Society had on the same date 362 members.

The Royal Society of Victoria dates from 1854, in which year the Victorian Institute for the Advancement of Science and the Philosophical Society of Victoria were founded. These were amalgamated in the following year under the title of the Philosophical Institute of Victoria, whilst the Society received its present title in 1860. The first volume of its publications dates from 1855. The earlier publications dealt largely with Physics, later on Biology became prominent, while at present a large number of papers deal with Geology. Up to 1920, 67 volumes of proceedings had been issued. The Society exchanges with 320 kindred bodies. The constitution of the Society states that it was founded "for the promotion of art, literature, and science," but for many years past science has monopolised its energies. The library contains over 12,000 volumes, valued approximately at £3,200. Income for the year 1920 amounted to £432, and expenditure to £429. There are 200 members on the roll.

The inaugural meeting of the Royal Society of Queensland was held on the 8th January, 1884, under the presidency of the late Sir A. C. Gregory. The Society was formed "for the furtherance of the natural and applied sciences, especially by means of original research." Shortly after its formation it received an addition to its ranks by the amalgamation with it of the Queensland Philosophical Society, which was started at the time when Queensland became a separate colony. At the end of 1920 the members numbered 101; publications issued, 32 volumes; library, 6,200 volumes; societies on exchange list, 170. Income and expenditure in 1920 amounted to £273 and £172 respectively.

The present Royal Society of South Australia grew out of the Adelaide Philosophical Society, which was founded in 1853, its object being the discussion of all subjects connected with science, literature and art. Despite this programme, the tendency of the papers was distinctly scientific, or of a practical or industrial nature. With the advent of the late Professor Tate the society became purely scientific. Permission to assume the title of "Royal" was obtained in 1879, the Society thenceforward being known as "The

Royal Society of South Australia." In 1903 the society was incorporated. In 1920 the number of members was 95. The income for the year 1920 was £527, and expenditure £459. Up to 1920 the Society had issued 44 volumes of proceedings and 8 parts of memoirs, exclusive of several individual papers published in earlier years. The exchange list numbers about 220, while the library contains 3,800 volumes and over 1,750 pamphlets.

Permission to assume the title of Royal Society was granted to the Natural History and Science Society of Western Australia in March, 1914. This Society has grown out of the Mueller Botanic Society, founded in July, 1897. The objects of the society are the study of natural history and pure science, promoted by periodical meetings and field excursions, the maintenance of a library, and issue of reports of proceedings. It numbers at present 115 members, whose subscriptions form its main source of revenue, the income and expenditure in 1919-20 being respectively £97 and £100. Five volumes of proceedings were issued as *Journal of the Natural History and Science Society of Western Australia*, and six as of the Royal Society. Its publications are exchanged with 122 institutions at home and abroad. The library contains 200 volumes, besides 350 unbound journals, pamphlets, etc.

The Royal Society of Tasmania (the first Royal Society outside the United Kingdom) was inaugurated by Sir Eardley Wilmot, Lieutenant-Governor of Van Diemen's Land, on the 14th October, 1843. It may be mentioned, however, that a scientific society had been formed as far back as 1838 under the presidency of Sir John Franklin, then Governor of the colony, and in 1841 the number of resident members was 31, and corresponding members, 38. The meetings of this parent society were held at Government House, and three volumes of proceedings were issued. A large portion of the Colonial Gardens, together with a grant of £400, was given to the Society. A library and museum were established in 1848. In 1885 the museum and gardens were given back to the State, the Society being granted room in the museum for its library and meetings. The names of Captains Ross and Crozier, of H.M.S. *Erebus* and *Terror*, appear in the list of the first corresponding members. The society, which, since 1844, has published 60 annual volumes of proceedings, possesses 150 members, 12 corresponding members, exchanges with 223 kindred bodies, and has a library containing 13,000 volumes, in addition to manuscripts, etc., valued at over £10,000. Income for the year 1920 was £317, and expenditure £316.

(b) *Other Scientific Societies.* The Australasian Association for the Advancement of Science, founded in 1888, has its headquarters in Sydney. It meets usually in each State biennially in turn. Its receipts at latest available date were about £14,000, including Government aid to the amount of £4,000. The library contains 4,000 volumes and parts, valued at £400. Up to 1921, 14 volumes of proceedings have been issued. The exchange list numbers about 140. The Linnean Society of New South Wales, with headquarters in Sydney, was founded in 1875, and possesses a library of 11,000 volumes, valued at £6,000. Up to date 44 volumes of proceedings have been issued. This Society maintains five investigators engaged in research work, and owes its development almost entirely to the benefactions of Sir William Macleay. The number of ordinary members at the end of 1919 was 159. Income for the year came to £1,334, and expenditure to £1,483. The special revenue for research purposes only was £3,075, and the expenditure £2,185. The British Astronomical Society has a branch in Sydney, and in some of the States the British Medical Association has branches.

The Chemical Society of Western Australia was founded in 1915, for the promotion of the study of Chemistry and the furtherance of the interests of professional chemists. Meetings are held monthly. There is a council consisting of seven members.

In addition to the societies enumerated above, there are various others in each State devoted to branches of scientific investigation, particulars respecting which are not at present available.

2. **Libraries.**—As far as can be ascertained the total number of libraries in the Commonwealth at the latest available date was about 1,800, and the number of books contained therein is estimated at about five millions. In each of the capital cities there is a well-equipped Public Library, the institutions in Melbourne and Sydney especially comparing very favourably with similar institutions elsewhere. The reading room at the Melbourne Library ranks amongst the finest in the world. It was opened in November, 1913, and has a diameter of 114 feet, with a similar height, and is capable of seating 320 readers at a time, all of whom are under efficient supervision from the centre of the room. The following statement gives the number of volumes in the Public Library of each capital city :—

METROPOLITAN PUBLIC LIBRARIES.

Number of Volumes in—				Total.
City.	Reference Branch.	Ordinary Lending Branch.	Country Lending Branch.	
Sydney	(a)308,557	(b)	23,535	332,092
Melbourne	267,590	37,145	..	304,735
Brisbane	41,403	41,403
Adelaide	108,341	35,563	..	143,904
Perth	110,682	14,046	..	124,728
Hobart	21,900	21,900

(a) Including 100,438 volumes in the Mitchell Library.

(b) The maintenance and control of the ordinary lending branch of the Public Library at Sydney were transferred in 1908 to the Municipal Council. At the end of December, 1919, the books numbered 32,676.

The Mitchell Library in Sydney consisted of over 60,000 volumes and pamphlets, and 300 paintings, principally relating to Australasia, valued at £100,000, and bequeathed in 1907 by Mr. D. S. Mitchell, together with an endowment of £70,000. The testator stipulated that the regulations of the British Museum were to be adopted as far as practicable, hence the library is the resort of specialists. There are now over 100,000 volumes in the library. During 1917 the Mitchell Library was further enriched by a donation of 3,676 printed volumes, 117 volumes of manuscript, and 235 pamphlets from the working library of the late John Tebbutt, of Windsor, the well-known astronomer. A very fine collection of New South Wales postage and fiscal stamps, estimated by philatelists to be worth at least £20,000, was presented to the trustees by Mr. H. L. White, of Belltrees, near Scone, in June of the same year. In 1921 this gift was supplemented by the presentation of a very fine collection of Queensland and Western Australian stamps, also valued by experts at about £20,000. The Fisher Library at the Sydney University contains 116,873 volumes, and the library attached to the Australian Museum, 22,850 volumes.

For some years past efforts have been made in South Australia to collect original documents likely to be of service in compiling a history of the State, and recently the question of founding a Public Records or Archives Office to house them has been under consideration. So far back as 1914 Professor Henderson, of Adelaide University, under commission from the South Australian Government, visited and reported on the system of keeping archives in England, France, Belgium, Holland, and Ceylon, and obtained valuable information also from the United States and Canada. A department of historical documents has now been created and valuable preliminary work done in connexion with the examination, classification, and permanent preservation of the available papers. A suitable building for housing the documents and the staff will shortly be available.

The library at Launceston, in Tasmania, contains 30,000 volumes.

The number of libraries in receipt of State or municipal aid, together with the estimated number of books contained therein, is given below for each State :—

SUBSIDISED LIBRARIES AND BOOKS THEREIN.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	N. Ter.
Number of libraries	(a)	480	215	220	258	23	3
Estimated number of books ..	1,450,000	1,240,000	386,000	612,000	272,000	104,000	4,000

(a) Not available.

The figures in the above table can be taken only as approximations, as in many instances returns were not received from various institutions. For New South Wales returns are not available for municipal libraries other than that in Sydney, or for libraries attached to Schools of Arts, Mechanics' Institutes and similar institutions. The Parliamentary Library in Sydney possesses over 52,000 books.

3. **Museums.**—The Australian Museum in Sydney, founded in 1836, is the oldest institution of its kind in Australia. In addition to possessing a fine collection of the usual objects to be met with in kindred institutions, the Museum contains a very valuable and complete set of specimens of Australian fauna. The cost of construction of the building was £79,000. The number of visitors to the institution in 1919 was 136,000, and the average attendance on week-days 411, and on Sundays 788. The expenditure for 1919 amounted to £11,190. A valuable library containing over 22,000 volumes is attached to the Museum. Representative collections, illustrative of the natural wealth of the country, are to be found in the Agricultural and Forestry Museum, and the Mining and Geological Museum. The latter institution prepares collections of specimens to be used as teaching aids in country schools. The "Nicholson" Museum of Antiquities, the "Macleay" Museum of Natural History, and the Museum of Normal and Morbid Anatomy, connected with the University, and the National Herbarium and Botanical Museum at the Sydney Botanic Gardens, are all accessible to the public. There is a fine Technological Museum in Sydney, with branches in six country centres, the combined institutions containing over 120,000 specimens. Valuable research work has been undertaken by the scientific staff in connexion with oil and other products of the eucalyptus. The number of visitors at the Technological Museums during 1919 was about 241,000.

The National Museum at Melbourne, devoted to Natural History, Geology, and Ethnology, is located in the Public Library Building. The National Art Gallery is also situated in the same building. The Industrial and Technological Museum, opened in 1870, contains about 9,000 exhibits. There is a fine Museum of Botany and Plant Products in the Melbourne Botanic Gardens. In addition to the large collection in the geological museum attached to the Mines Department in Melbourne, well-equipped museums of mining and geological specimens are established in connexion with the Schools of Mines in the chief mining districts.

The Queensland Museum dates from the year 1871, but the present building was opened in January, 1901. Since its inauguration the Government has expended on the institution a sum of £96,793, of which buildings absorbed £19,770, purchases £29,067, and salaries £47,956. The number of visitors during the year was 68,119, of whom 29,066 visited the institution on Sundays. The Queensland Geological Survey Museum has branches in Townsville, opened in 1886, and in Brisbane, opened in 1892.

Under the Public Library Act of 1884 the South Australian Institute ceased to exist, and the books contained therein were divided amongst the Museum, Public Library, and Art Gallery of South Australia, and the Adelaide Circulating Library. The Museum was attended by 88,000 visitors in 1919.

The latest available returns show that the Western Australian Museum contains altogether 91,000 specimens, of an estimated value of £79,000. The Museum is housed

in the same building as the Art Gallery, and the visitors to the combined institutions during the year reached 96,000. The expenditure for the year 1919-20 was £5,988, and the Government grants for the year amounted to £5,500, the figures in each case including returns for the Public Library.

There are two museums in Tasmania—the Tasmanian Museum at Hobart, and the Victoria Museum and Art Gallery at Launceston—both of which contain valuable collections of botanical and mineral products. The Tasmanian Museum received aid from the Government during 1918 to the extent of £700. The Hobart institution cost £9,500 to construct, and that at Launceston £6,000.

4. Art Galleries.—Information regarding the State collections of objects of art in the various capitals is in some cases very meagre, while the method of presentation does not admit of any detailed comparisons being made. The National Art Gallery of New South Wales originated in the Academy of Art founded in 1871. Cost of construction is returned at £94,000. The contents, which are valued at £155,000, comprise 464 oil paintings, 447 water colours, 701 black and white, 170 statuary and bronzes, and 458 ceramics, works in metal and miscellaneous. During 1919 the average attendance on week days was 344, and on Sundays 961, the figures being much smaller than usual on account of the influenza epidemic.

The National Gallery at Melbourne at the end of 1919 contained 597 oil paintings, 4,705 objects of statuary, bronzes and ceramics, and 14,296 water-colour drawings, engravings, and photographs. The Gallery is situated in the same building as the Museum and Public Library, the total cost of construction being £325,000. Several munificent bequests have been made to the institution. That of Mr. Alfred Felton, given in 1904, amounts to about £8,000 per annum. In 1913, Mr. John Connell presented his collection of art furniture, silver, pictures, etc., the whole being valued at £10,000. The Art Gallery at Ballarat contains over 200 oil paintings and 170 water colours, etc., while there are some valuable works of art in the smaller galleries at Bendigo, Castlemaine, Geelong, and Warrnambool.

The Queensland National Art Gallery, situated in the Executive Buildings, Brisbane, was founded in 1895, and contains a small, but well chosen, collection of pictures. At the end of 1919 there were on view 97 oil paintings, 24 water colours, 99 black and white, and 30 pieces of statuary, together with various prints, mosaics, and miniatures. Exclusive of exhibits on loan, the contents are valued at about £11,000.

The Art Gallery at Adelaide dates from 1880, when the Government expended £2,000 in the purchase of pictures, which were exhibited in the Public Library building in 1882. The liberality of private citizens caused the Gallery to rapidly outgrow the accommodation provided for it in 1889 at the Exhibition Building, and on the receipt of a bequest of £25,000 from the late Sir T. Elder, the Government erected the present building, which was opened in April, 1900. The Gallery also received bequests of £16,500 in 1903 from the estate of Dr. Morgan Thomas, and of £3,000 in 1907 from Mr. David Murray. At the latest available date there were in the Gallery 232 oil paintings, 68 water colours, and 24 statuary. Building and site are valued at upwards of £31,000. Visitors during the year 1919 numbered 76,000.

The foundation stone of the present Art Gallery at Perth in Western Australia was laid in 1901, the building and site being valued at £92,000. As is the case in Melbourne, the Public Library, Museum, and Art Gallery are all situated in the one structure. The collection comprises 113 oil paintings, 55 water colours, 561 black and white, and 800 ceramics, and miscellaneous. It is estimated that the collections in the gallery possess a value of £14,000.

In Tasmania the Art Gallery at Hobart was opened in 1887. Its present contents consist of 60 oil paintings, 82 water colours, 11 black and white, and 172 etchings, engravings, etc. The building is valued at £9,500.

The Art Gallery at Launceston was erected in 1888 at a cost of £5,000, and opened on the 2nd April, 1891. Only a small proportion of the contents belong to the Gallery, the bulk of the pictures being obtained on loan. At latest date there were on view 100 oil paintings and 50 water colours valued at £10,000. The building is valued at £6,000.

5. *State Expenditure on all Forms of Educational Effort.*—The expenditure from the Consolidated Revenue in each State and Territory on all forms of educational and scientific activity during each of the last five financial years was as follows :—

EXPENDITURE ON EDUCATION, SCIENCE, AND ART, 1915-16 TO 1919-20.

State or Territory.		1915-16.	1916-17.	1917-18.	1918-19.	1919-20.

	{ Per head	17/10	19/1	20/3	21/0	23/1

The comparatively heavy increases during the last five years are largely due to the greater cost of building, equipment, and maintenance, and in part also to increases in teachers' salaries and allowances.

SECTION XXIII.

PUBLIC JUSTICE.

§ 1. Police.

1. **Introductory.**—In previous issues of the Year Book a résumé was given of the evolution of the police force in Australia up to the passing of the Police Act of 1862 (25 Vic. No. 16) in New South Wales, but considerations of space preclude its inclusion in the present volume.

In general terms the police forces of Australia may be said to be satisfactory both in regard to physique and intelligence, while as regards methods of prevention and detection of crime it is believed that the system in vogue here compares very favourably with those of the older-settled countries of the world.

2. **Strength of Police Force.**—The strength of the police force in each State during the five years ended 1919 was as follows. It may be mentioned that the police forces are entirely under State control, but, by arrangement, the Commonwealth Government utilizes their services in various directions, such as the collection of particulars for Commonwealth electoral rolls, etc. :—

POLICE FORCES IN THE COMMONWEALTH, 1915 TO 1919.

State.	Area of State in Sq. Miles.	1915.	1916.	1917.	1918.	1919.
New South Wales	310,372	2,613	2,587	2,557	2,481	2,569
Victoria ..	87,884	1,737	1,638	1,650	1,558	1,719
Queensland ..	670,500	1,194	1,176	1,152	1,141	1,119
South Australia..	380,070	541	567	540	521	541
Western Australia	975,920	495	473	472	465	466
Tasmania ..	26,215	233	232	235	235	243
Northern Territory	523,620	26	27	27	28	32
Commonwealth	2,974,581	6,839	6,700	6,633	6,429	6,689

The figures for New South Wales for 1919 are exclusive of 39 "black trackers," i.e., natives employed in detection of offenders chiefly in outlying districts. In Queensland there were 89 native trackers and 4 female searchers. The South Australian returns for 1919 are exclusive of 10 "black trackers" and 1 female searcher. The Northern Territory had 27 "black trackers" in 1919. There are also 45 "black trackers" and 5 female searchers in Western Australia, and 2 female searchers in Tasmania, not included in the table.

Average Number of Inhabitants to each Police Officer. The average number of inhabitants to each officer in each State during the same period is as follows. In considering these figures, allowance must, of course, be made for the unequal area and unequal distribution of the population of the various States.

INHABITANTS TO EACH POLICE OFFICER, 1915 TO 1919.

(COMMONWEALTH.)

State.	Number of Persons per Sq. Mile, 1911 Census.	Inhabitants to each Police Officer.				
		1915.	1916.	1917.	1918.	1919.
New South Wales	5.31	716	719	732	771	780
Victoria ..	14.97	816	855	855	910	870
Queensland ..	0.90	570	569	598	603	648
South Australia..	0.46	810	762	800	845	865
Western Australia	0.29	642	653	656	669	712
Tasmania ..	7.29	863	862	868	867	892
Northern Territory	..	175	179	184	178	147
Commonwealth	1.50	721	728	739	775	784

The figures in the preceding tables shew a great disparity in the relative numbers of the population protected by each police officer in the various States, and also in the relative area of territory to each officer. Western Australia and South Australia exhibit the largest figures in the latter respect, this, of course, being due to the fact that extensive areas in each State are as yet unpeopled by white settlers.

3. Duties of the Police.—In addition to the ordinary employment attaching to their office, the police are called upon to perform many duties which in other countries are carried out by various functionaries. Thus, in Queensland, according to the Commissioner's report for 1920, no less than sixty-four subsidiary offices are held by the police. As far as the statistician is concerned, it is found that the expert local knowledge possessed by the police renders their services in the collection of such returns as those relating to the agricultural, pastoral and manufacturing industries, private schools, etc., more than ordinarily valuable. Then, again, the fact that their services are enlisted by such widely different departments as those dealing with mines, stock, agriculture, elections, registrations of births, deaths and marriages, forestry, fisheries, explosives, old-age pensions, lunacy, public works, labour, etc., greatly enhances their general alertness by widening the range of their experience. Occasionally the objection is heard in some quarters that these special tasks involve some degree of sacrifice of ordinary routine duties, but that the general intelligence of the Australian police is adequate to the obligation to perform these tasks, besides being most creditable, results in a great saving of the public money.

4. Cost of Police Forces.—The expenditure from Consolidated Revenue on the police forces in each State during the five years 1915 to 1919 is shewn in the following table:—

COST OF POLICE FORCES IN THE COMMONWEALTH, 1915 TO 1919.

State.	1915.	1916.	1917.	1918.	1919.
	£	£	£	£	£
New South Wales ..	603,347	649,093	709,649	722,754	977,506
Victoria ..	365,821	356,885	371,413	397,025	490,016
Queensland ..	302,209	322,422	337,259	363,362	415,680
South Australia ..	131,580	127,632	136,158	151,090	159,258
Western Australia ..	131,806	125,446	136,752	136,295	171,832
Tasmania ..	45,952	47,320	49,448	54,960	66,940
Northern Territory ..	10,216	10,260	10,210	10,200	11,435
Commonwealth ..	1,590,931	1,639,058	1,750,889	1,835,686	2,292,667

The total for New South Wales includes £77,000 payment to Police Superannuation Fund. Similar payments in Victoria and Queensland amount to £29,000 and £38,000 respectively, while smaller sums are included in the returns for other States. The cost per head of the population in each State for the period 1915 to 1919 was as follows :—

COST OF POLICE PER INHABITANT, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>	<i>s. d.</i>
New South Wales	6 6	7 0	7 6	7 6	9 9
Victoria	5 2	5 1	5 3	5 6	6 7
Queensland	8 11	9 8	9 10	10 6	11 6
South Australia	6 0	5 11	6 3	6 9	6 10
Western Australia	8 3	8 1	8 10	8 8	10 4
Tasmania	4 7	4 9	4 10	5 3	6 2
Northern Territory	44 9	43 0	41 2	42 8	48 7
Commonwealth	6 6	6 9	7 2	7 4	8 9

The relatively high cost per head in Queensland and Western Australia is due to the fact that there are in those States extensive areas of sparsely settled country, in which mounted patrols have to be maintained.

Increases in salary and in cost of supplies and equipment are responsible for the all-round rise which took place in 1919.

In view of the small number of its white population and the vast extent of country to be patrolled, the figures for the Northern Territory necessarily shew a very high average. The duties of the police, moreover, chiefly pertain to matters connected with the control of aborigines.

Expenditure in connexion with police patrol in Papua during 1919-20 amounted to about £15,300.

§ 2. Lower (Magistrates') Courts.

1. **Introductory.**—In considering the criminal returns of the various States, due allowance must be made on account of several factors, such as the relative powers of the courts, both lower and higher, etc. In the case of lower courts, the actual number of laws in each State, the breach of which renders a person liable to fine or imprisonment, must be taken into account. Again, the attitude of the magistracy and police towards certain classes of offences is a factor, for in the case of liquor laws, or laws connected with vagrancy or gaming, the views of magistrates, and instructions issued to the police, may be responsible for considerable variations in the returns. The strength and distribution of the police forces, and the age constitution and distribution of the State's population, also influence the results. In any consideration of criminal returns, due weight should also be given to the prevalence of undetected crime, but information on this point can only be obtained for the State of Victoria. It may be mentioned that each State has its own separate judicial system, the Commonwealth jurisdiction being confined to the High Court of Australia, which is largely a Court of Appeal intermediate to the Privy Council, although it has also original jurisdiction, and the Commonwealth Court of Arbitration and Conciliation. Full particulars regarding the judicial power of the Commonwealth will be found in Chapter III. of the Commonwealth Constitution (see page 19).

2. **Powers of the Magistrates.**—In New South Wales there is no general limit to the powers of the magistrates in regard to offences punished summarily, their authority depending in each case on the statute which creates the offence and gives them jurisdiction. Except in the case of a very few statutes, and excluding cumulative sentences, the power

of sentence is limited to six months. Imprisonment in default of payment of fine is regulated by a scale limiting the maximum period according to the sum ordered to be paid, but in no case exceeding twelve months. Actions for debt and damage within certain limits also come within magisterial jurisdiction. In cases of debts, liquidated or unliquidated, the amount recoverable is not exceeding £50 before a court constituted of a stipendiary or police magistrate at certain authorised places, and not exceeding £30 at any other place before a court constituted of a stipendiary or police magistrate or two or more justices of the peace. The amount in actions of damage is limited to £10, but may extend to £30 by consent of parties.

In Victoria, the civil jurisdiction of magistrates is restricted to what may be designated ordinary debts, damages for assault, restitution of goods, etc., where the amount in dispute does not exceed £50. No definite limit is fixed to the powers of the magistrates on the criminal side, and for some offences sentences up to two years may be imposed. The proportion of long sentences is, however, comparatively small.

In Queensland, generally speaking, the maximum term of imprisonment which justices can inflict is six months, but in certain exceptional cases, such as offences against sections 233 and 445 of the criminal code (betting-houses and illegally using animals), sentences of twelve months may be imposed. No limit exists as to the extent to which cumulative sentences may be applied, but in practice the term is never very lengthy.

In South Australia, under the Minor Offences Act, magistrates can impose sentences up to six months, and under the Summary Convictions Act, up to three months. The Police Act of 1916 gives power to sentence up to one year, with hard labour, in the case of incorrigible rogues: while under the Quarantine Act of 1877, and the Lottery and Gaming Act of 1875, sentences of two years may be imposed.

Under the Petty Offences Act of 1867, in Tasmania, any person charged with having committed, or with having aided or abetted in the commission of an offence, in regard to property of a value not exceeding £10, may, on conviction, for a first offence, before two or more justices in Petty Sessions, be imprisoned for any term not exceeding one year, and for a term not exceeding two years for a second or subsequent offence.

3. Persons Charged at Magistrates' Courts.—The total number of persons who were charged before magistrates in each State is given below for the five years 1915 to 1919 :—

**PERSONS CHARGED BEFORE MAGISTRATES IN THE COMMONWEALTH,
1915 TO 1919.**

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	86,576	82,036	71,666	76,870	78,103
Victoria ..	63,140	59,315	52,175	58,965	58,470
Queensland ..	30,047	25,206	24,243	25,006	21,926
South Australia ..	9,587	8,322	8,627	9,161	8,804
Western Australia ..	14,864	15,454	11,885	11,599	9,769
Tasmania ..	6,306	5,259	5,278	6,583	6,362
Northern Territory ..	287	313	239	301	221
Commonwealth ..	210,807	195,905	174,113	188,485	183,655

As the table shews, there was a large decrease in 1917 in charges in New South Wales, Victoria, Queensland, and Western Australia, small increases being recorded in South Australia and Tasmania. In 1918, increases were shewn in all States except Western Australia, while in 1919 a decline was experienced in all States except New South Wales.

Investigation of the returns shews, however, that considerable variations in the total for single States are occasioned by breaches of new Acts, or the more stringent enforcement of the provisions of existing Acts. For example, the increase in the Victorian figures for 1915 was due to the inclusion in the summons returns of over 10,000 cases in

connexion with the Commonwealth Electoral Act. Any deductions drawn from the total returns as to the increase or otherwise of criminality must, therefore, be largely influenced by a careful analysis of the detailed list of offences. (See also § 2, 1, *ante*.)

The figures given in the tabulation above include, of course, a number of people who were wrongly charged, and statistically are not of general importance. The actual number of convictions in connexion with the persons who appeared before the lower courts in each year of the period 1915 to 1919 is, therefore, given hereunder. A separate line is added shewing the committals to higher courts.

CONVICTIONS AND COMMITTALS AT MAGISTRATES' COURTS, 1915 TO 1919.

(COMMONWEALTH.)

State.		1915.	1916.	1917.	1918.	1919.

(a) Exclusive of four extradited.

4. Convictions for Serious Crime.—While the figures given in the preceding table refer to the entire body of convictions, the fact must not be lost sight of that they include a large proportion of offences of a technical nature, many of them unwittingly committed, against various Acts of Parliament. Cases of drunkenness and minor breaches of good order, which, if they can be said to come within the category of crime at all, at least do so in a very different sense to some other offences, also help to swell the list. The following table has, therefore, been prepared for the purpose of shewing the convictions at magistrates' courts for what may be regarded as the more serious offences, *i.e.*, against the person and property, either separately or conjointly, and forgery and offences against the currency:—

CONVICTIONS FOR SERIOUS CRIME AT MAGISTRATES' COURTS, 1915 TO 1919.

(COMMONWEALTH.)

State.		1915.	1916.	1917.	1918.	1919.
New South Wales	..	5,217	6,271	5,499	6,355	5,728
Victoria	..	2,994	2,736	2,830	3,162	2,976
Queensland	..	1,639	1,487	1,403	1,427	1,526
South Australia	..	607	522	490	534	629
Western Australia	..	1,005	1,014	845	884	995
Tasmania	..	558	441	390	479	594
Northern Territory	..	18	37	50	18	11
Commonwealth	..	12,038	12,508	11,507	12,859	12,459

Compared with the population the above figures give the following results per 10,000 inhabitants :—

CONVICTIONS FOR SERIOUS CRIME PER 10,000 INHABITANTS, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	27.9	33.5	29.4	31.2	29.1
Victoria.. ..	21.0	19.4	20.0	22.3	20.3
Queensland	23.9	21.9	20.6	20.7	21.4
South Australia ..	13.8	12.1	11.3	12.2	13.8
Western Australia ..	31.2	32.2	27.4	28.4	30.8
Tasmania	28.0	22.3	19.6	23.5	28.1
Northern Territory ..	40.9	76.3	100.8	36.0	22.9
Commonwealth ..	24.3	25.5	23.5	25.8	24.2

5. *Decrease in Crime.*—The figures quoted in the preceding table shew that during the last five years the rate of serious crime has decreased considerably, while if the comparison be carried back to 1881 the position is seen to be still more satisfactory. The rate of convictions at magistrates' courts per 10,000 of the population is given below for each of the years 1881, 1891, 1901, 1915, and 1919. Only the more serious offences, particularised in the preceding sub-section, have been taken into consideration.

RATE OF CONVICTIONS FOR SERIOUS CRIME IN THE COMMONWEALTH, 1881 TO 1919.

Year.	Convictions per 10,000 Persons.
1881	69.3
1891	44.8
1901	29.1
1915	24.3
1919	24.2

The figures already quoted refer to total convictions, and in respect of individuals necessarily involve a considerable amount of duplication, especially in minor offences, such as petty larcenies, etc., in which the same offender appears before the court many times in the course of the year.

6. *Causes of Decrease in Crime.*—The statistics given shew that there has been a considerable decrease in crime throughout Australia. The results so far quoted are restricted entirely to the lower or magistrates' courts. There has also been a gratifying decrease in regard to offences tried at the higher courts, as will be seen later.

Attempts have been made to account for this decline: *e.g.*, advance in education, enlightened penological methods, etc. Much depends upon what is meant by education. Many classed in census statistics as "educated" can barely read and write. In this connexion, moreover, it ought not to be forgotten that collaterally with the introduction of ordinary intellectual education certain people have departed from their pristine virtues. In regard to the deterrent effect of punishment, it may be said that in respect of many offences, notably drunkenness, vagrancy, petty larcenies, etc., it appears to be almost negligible. In general, punishment has declined in brutality and severity, and has improved in respect of being based to a greater extent upon a scientific penological system, though in this latter respect there is yet much to be desired. Recent advances in penological methods will be referred to in a subsequent sub-section. Here it will be sufficient to remark that under the old regime, a prisoner on completion of a sentence in gaol was simply turned adrift on society, and in many cases sought his criminal friends, and speedily qualified for readmission to the penitentiary. Frequently he was goaded to this by mistaken zeal on the part of the police, who took pains to inform employers of the fact of a man having served a sentence in gaol. For a long time any assistance to

discharged prisoners was in the hands of private organisations, such as the Salvation Army Prison Gate Brigade, but in some of the States, and notably in New South Wales, the authorities themselves look after the welfare of discharged prisoners in the way of finding work, providing tools, etc. Improvements in the means of communication and identification have been responsible for some of the falling-off noticeable in the criminal returns, the introduction of the Bertillon system having contributed to certainty of identification. In his report for the year 1910 the Inspector-General of Police in New South Wales states that "criminals have a wholesome dread of the finger print system, and I have not the slightest doubt that it is one of the principal causes of the diminution of serious crimes." Part of the improvement may no doubt be referred also to the general amelioration in social conditions that has taken place during the last fifty years.

As will be seen from the following table the restrictions on the consumption of intoxicants during the course of the war has been responsible for a great falling off in convictions for drunkenness.

7. **Drunkenness.**—The number of cases of drunkenness and the convictions recorded in connexion therewith during the period 1915 to 1919 will be found in the following table:—

CASES AND CONVICTIONS.—DRUNKENNESS, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.		1916.		1917.		1918.		1919.	
	Cases.	Convictions.	Cases.	Convictions.	Cases.	Convictions.	Cases.	Convictions.	Cases.	Convictions.
New South Wales	26,010	25,863	23,192	23,017	21,063	20,902	20,651	20,511	19,834	19,546
Victoria ..	13,453	7,086	11,316	6,049	7,575	4,101	5,987	3,049	6,237	3,000
Queensland ..	16,260	16,196	13,374	13,059	13,562	13,065	12,302	11,518	12,178	11,403
South Australia ..	4,060	4,027	3,451	3,433	3,097	3,072	3,308	3,298	3,197	3,171
Western Australia	5,675	5,645	5,045	5,009	4,623	4,598	4,058	4,020	3,612	3,595
Tasmania ..	628	612	488	480	415	407	433	426	485	474
Northern Territory	158	158	208	202	210	207	81	81	109	109
Commonwealth	66,244	59,587	57,074	51,249	50,545	46,352	46,820	42,903	45,652	41,298

The number of convictions is, as might naturally be expected, almost identical with the number of cases. Victoria, however, is an exception, but in this State it is explained that offenders are generally discharged on a first appearance, and no conviction is recorded, a similar procedure being also adopted in the case of those arrested on Saturday and detained in custody till Monday. The logic of excluding these cases from the list of convictions is certainly open to doubt.

The convictions for drunkenness per 10,000 of the population during each of the years from 1915 to 1919 are given hereunder:—

CONVICTIONS FOR DRUNKENNESS PER 10,000 INHABITANTS, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	138.2	123.1	111.3	107.2	99.3
Victoria ..	49.7	42.9	29.2	21.5	20.5
Queensland ..	235.7	192.7	192.0	167.3	159.9
South Australia ..	91.5	79.3	71.1	74.9	69.6
Western Australia ..	175.1	159.2	149.0	129.2	111.1
Tasmania ..	30.7	24.2	20.5	20.9	22.4
Northern Territory ..	358.8	416.6	417.5	162.2	226.7
Commonwealth ..	120.4	104.4	94.6	86.1	80.3

The convictions for drunkenness taken by themselves are not an altogether satisfactory test of the relative sobriety of the inhabitants of each State, inasmuch as several important factors must be taken into consideration. The age and sex constitution of the people, for example, is by no means identical in each State, Western Australia having by far the largest proportion of adult males. Owing to the smallness of the population the figures for the Northern Territory are, of course, abnormal. The avocations of the people affect the result, since persons engaged in strenuous callings are, on the whole, more likely to indulge in alcoholic stimulants than those employed in less arduous ones. The distribution of the population is also a factor, the likelihood of arrest or summons for drunkenness obviously being greater in the more densely populated regions, and lastly, allowance must be made for the attitude of the magistracy, the police, and the public generally in regard to the offence. Due account also must be taken of the recent legislation dealing with the limitation of hours during which liquor may be sold in hotels.

It is not unusual to supplement statistics of drunkenness by furnishing also the relative consumption of alcoholic beverages. Deductions drawn therefrom will be very misleading if they fail to take into account also the consumption of non-intoxicating beverages such as tea and coffee, and the general habits of the people. Throughout the greater part of Europe, tea and coffee are consumed but sparingly, while Australia, as is well known, is one of the greatest tea-drinking countries of the world.

The following table shews the consumption of spirits, wine, and beer per head of the population in the Commonwealth and in other countries at the latest date for which the information is available:—

CONSUMPTION OF ALCOHOLIC BEVERAGES IN VARIOUS COUNTRIES.

Country.	Consumption per Head of Population.			Country.	Consumption per Head of Population.		
	Spirits.	Wine.	Beer.		Spirits.	Wine.	Beer.
	Imp. Galls.	Imp. Galls.	Imp. Galls.		Imp. Galls.	Imp. Galls.	Imp. Galls.
United Kingdom (1916) ..	0.77	0.22	20.84	Canada (1918-19)	0.39	0.03	2.95
Commonwealth (1919-20) ..	0.45	0.50	13.39	Germany (1912)	0.64	0.68	23.32
New Zealand (1918) ..	0.49	0.11	9.21	France (1917) ..	0.41	26.84	4.48
				United States (1919) ..	0.79	0.50	7.88

8. *Treatment of Drunkenness as Crime.*—Though the problem of the correct method of dealing with dipsomania is by no means an easy one, it seems fairly clear that the present plan of bringing offenders before magistrates, and subjecting them to the penalty of imprisonment or fine, has little deterrent effect, as the same offenders are constantly reappearing before the courts. Further, the casting of an inebriate into prison, and placing him in his weakened mental state in the company of professional malefactors, doubtless tends to swell the ranks of criminals, and certainly tends to lower his self-respect. Examination of the prison records in New South Wales some years ago disclosed the fact that over 40 per cent. of the gaol population had commenced their criminal career with a charge of drunkenness. During the last few years the dangers of moral contamination in this way have been more accurately appreciated, and a system of classification of prisoners has been adopted whereby the petty offender is as far as possible kept from association with the more evilly-disposed. The Comptroller-General of Prisons in Queensland stated in his report for the year 1907 that “the drunken habit in many cases is merely one of many symptoms which jointly indicate the existence of a graver condition than simple habitual drunkenness.”

9. Remedial Treatment of Inebriates.—Legislation has been passed in each State providing for the commitment of inebriates to special Government institutions. The laws in the various States are as follows :—New South Wales, Inebriates Act 1912; Victoria, Inebriates Act 1915; Queensland, Inebriate Institutions Act 1896; South Australia, Inebriates Acts 1908, 1913, and 1920; Western Australia, Inebriates Acts 1912 and 1919; Tasmania, Inebriates Act 1885, Inebriate Hospitals Act 1892. Curative work was first undertaken by the Government of New South Wales in 1907. In most cases the institutes are connected with the gaols, and, naturally, custodial measures are still a strong feature in their management; nevertheless, the results of remedial measures have been encouraging. In Victoria an institute purporting to be wholly remedial was founded in 1907. It may be mentioned that there are private retreats in various places in the Commonwealth, but these are not officially subsidised or inspected.

10. Treatment of Habitual Offenders.—In New South Wales the Habitual Criminal Act of 1905 gives judges the power of declaring a prisoner, after a certain number of sentences, to be an habitual criminal, and as such to be detained until, in the opinion of the authorities, he is fit to be at large. At the end of 1919 there were 31 persons in prison under this Act, including 3 in the hospital for criminal insane. Since the passing of the Act 81 males and 1 female have been declared to be habitual criminals. The Indeterminate Sentences Act came into force in Victoria in July, 1908, and up to the end of June, 1920, 452 prisoners had been released on probation or parole. Of this number, 216 were classed as habitual criminals, of whom 66 satisfactorily completed probation and were not again convicted, 85 were convicted and returned to prison, 61 were still on probation or on parole, and 7 died while on probation. Since the passing of the Act 635 persons have been dealt with under its provisions. At the 30th June, 1920, the number under indeterminate detention was 135. The provisions of the Habitual Criminals Amendment Act of 1907 were put into force in South Australia in 1909, and 23 criminals had been declared to be habitual offenders up to the end of 1919. Of these, 19 had been released after serving the indeterminate portion of their sentence, 3 were serving the definite portion, and 1 the indefinite portion of their sentence. The Criminal Code Amendment Act of 1914, which makes provision for the detention and control of habitual criminals, was assented to in Queensland on the 3rd December, 1914, but up to the end of 1919 no prisoners had been brought under its provisions. Naturally it will be some time before the full effect of these measures on the prevalence of crime can be estimated. The Comptroller-General of Prisons in New South Wales states, however, that the system has exercised a wholesome deterrent effect on the criminal who is not a prisoner, while the Indeterminate Sentence Board in Victoria states that it has become impressed with the advantages which this form of sentence offers, both from a reformatory and deterrent standpoint, over the ordinary sentence. In Western Australia, under the Criminal Code Amendment Act of 1918, power is given to declare a prisoner after a certain number of convictions to be an habitual criminal. Eight prisoners were under preventive detention in 1919. During the period in which the Habitual Criminals and Offenders Act of 1907 has been in force in Tasmania, 92 men and 2 women have been released under its provisions, and the results, according to the Sheriff, have been satisfactory, only two prisoners having been reconvicted and sentenced to further imprisonment. Six male prisoners were released on parole in 1919.

11. Treatment of First Offenders.—In all the States and in New Zealand statutes dealing with first offenders have been in force for some years, the dates of passing the Acts being as follows :—New South Wales, 1894; Victoria, 1890, 1908, and 1915 (Crimes Act, sec. 340); Queensland, 1887; South Australia, 1887 and 1913; Western Australia, 1892; Tasmania and New Zealand, 1886. The method of procedure is practically the same in all cases, *i.e.*, with regard to most first offenders the magistrate or judge is empowered to allow the offender to go free on recognisances being entered into for his good behaviour for a certain period. In practice, this humane law has been found to work excellently, very few of those to whom its provisions have been extended having been found to relapse into crime.

12. *Children's Courts.*—Special courts for the trial of juvenile offenders have been established in New South Wales, Victoria, Western Australia, Tasmania, and New Zealand within the last few years, while Children's Courts, although not under that name, are practically provided for by the State Children's Acts of 1895 and 1900 in South Australia. The object of these courts is to avoid, as far as possible, the unpleasant surroundings of the ordinary police court.

13. *Committals to Superior Courts.*—In a previous section it has been pointed out that comparisons of criminality based on a consideration of the total returns from magistrates' courts are somewhat inadequate, seeing that the figures include numbers of cases which are merely technical breaches of laws having in some instances a purely local significance. The committals to higher courts give a better basis of comparison, although even in this connexion allowance must be made for the want of uniformity in jurisdiction. The table below gives the number of committals in each year from 1915 to 1919, with the proportion of such committals per 10,000 of the population. The rates are shewn on a separate line.

COMMITTALS TO SUPERIOR COURTS, 1915 TO 1919.

(COMMONWEALTH.)

State.		1915.	1916.	1917.	1918.	1919.
New South Wales	{ No.	1,633	1,707	1,383	1,308	1,680
	{ Rate	8.7	9.1	7.4	6.8	8.5
Victoria	{ No.	634	552	495	406	575
	{ Rate	4.4	3.9	3.5	2.9	3.9
Queensland	{ No.	411	304	312	207	255
	{ Rate	6.0	4.5	4.6	3.0	3.6
South Australia	{ No.	105	71	82	79	74
	{ Rate	2.4	1.6	1.9	1.8	1.6
Western Australia	{ No.	116 ^a	141	126	96	127
	{ Rate	3.6	4.1	3.6	3.1	3.9
Tasmania	{ No.	35	42	40	37	55
	{ Rate	1.8	2.1	2.0	1.8	2.6
Northern Territory	{ No.	1	3	3	6	3
	{ Rate	2.3	6.2	6.1	12.0	6.2
Commonwealth	{ No.	2,935	2,820	2,441	2,139	2,769
	{ Rate	5.9	5.7	5.0	4.3	5.4

(a) Exclusive of four extradited.

The above figures shew that the rate of committals for serious crime has decreased by 8.5 per cent. during the last five years, but if the comparison be carried farther back, it will be found that, as compared with the earlier years, there has been a considerable improvement. This will be evident from an examination of the following figures, which shew the rate of committals per 10,000 persons in Australia at various periods since 1861 :—

RATE OF COMMITTALS IN AUSTRALIA, 1861 TO 1919.

Year	1861.	1871.	1881.	1891.	1901.	1919.
Committals per 10,000 inhabitants	..	22	14	12	11	8	5			

The decline in proportion to population since 1861 has therefore been about 77 per cent.

§ 3. Superior Courts.

1. **Convictions at Superior Courts.**—The total number of convictions at superior courts, together with the rate per 10,000 of the population, is shewn below for each of the years 1915 to 1919 :—

CONVICTIONS AT SUPERIOR COURTS, 1915 TO 1919.

(COMMONWEALTH.)

State.		1915.	1916.	1917.	1918.	1919.
New South Wales	{ No.	843	815	661	622	762
	{ Rate	4.5	4.4	3.5	3.2	3.9
Victoria	{ No.	431	366	303	245	347
	{ Rate	3.0	2.6	2.2	1.7	2.4
Queensland	{ No.	351	266	226	193	254
	{ Rate	5.1	3.9	3.3	2.8	3.6
South Australia	{ No.	74	52	59	46	47
	{ Rate	1.7	1.2	1.4	1.0	1.0
Western Australia	{ No.	66	91	55	55	63
	{ Rate	2.0	2.9	1.8	1.8	1.9
Tasmania	{ No.	19	30	28	18	39
	{ Rate	1.0	1.5	1.4	0.9	1.8
Northern Territory	{ No.	1	1	1
	{ Rate	2.3	2.1	2.0
Commonwealth	{ No.	1,785	1,621	1,333	1,179	1,512
	{ Rate	3.6	3.5	2.7	2.4	2.9

The rate in 1901 was 4.6 per 10,000, and the decrease to the end of 1919 was, therefore, about 37 per cent.

In considering the above figures allowance must be made for the various factors enumerated in a preceding paragraph. Tasmania, it will be noted, shews the smallest proportion of serious crime, while the figures available shew that the island State is relatively the smallest consumer of alcoholic beverages. That a definite causal relation exists between the figures shewn by the respective tables is not, however, obvious.

2. **Offences for which Convictions were Recorded at Superior Courts.**—In the following table will be found a classification of the principal offences for which persons were convicted at the higher courts during each year of the period 1915 to 1919. Owing to lack of uniformity in the presentation of the returns for the several States the information is confined to the chief offences against the person only. In the case of Victoria the information is incomplete regarding the convictions on summons committals. The figures quoted refer to convictions in the Commonwealth during the period dealt with.

CONVICTIONS FOR SERIOUS CRIME, SUPERIOR COURTS, 1915 TO 1919.

(COMMONWEALTH.)

Offences.		1915.	1916.	1917.	1918.	1919.
Murder, and attempts at	24	21	21	14	34
Manslaughter	17	14	9	7	14
Rape, and attempts at	14	15	15	11	3
Other offences against females	77	78	79	75	66
" " " the person	226	193	239	155	220
Total	358	321	363	262	337

While the individual totals shew considerable fluctuations, the returns generally manifest considerable improvement. The general total of convictions for all offences against the person shews a decline since 1901 of nearly 22 per cent., and since 1915 of about 6 per cent.

3. **Capital Punishment.**—The table below gives the number of executions in each State during the period 1915 to 1919 :—

EXECUTIONS, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
New South Wales	2	2
Victoria	2	..	2	..
Queensland
South Australia	1
Western Australia	1
Tasmania
Commonwealth	1	4	2	2	1

In the early days of the history of Australia the penalty of death was attached to a large number of offences, many of which at the present time would be dealt with in the lower or magistrates' courts. With the growth of settlement, and the general amelioration in social and moral conditions, the list was, however, considerably curtailed, and the existing tendency is practically to restrict death sentences to cases of murder. It may be remarked that in cases of rape, which is a capital offence in some of the Australian States, the penalty has been but sparingly inflicted during the last few years. Juries are reputed to be loth to convict on this charge, owing to the uncertainty whether sentence of death will be pronounced.

During the period 1861 to 1880 the annual average number of executions in the Commonwealth was nine, from 1881 to 1900 the average was six, for the period 1901 to 1910 the figure stood at four, while the average for the last quinquennium was two.

§ 4. Prisons.

1. **Prison Accommodation and Prisoners in Gaol.**—The table below shews the number of prisons in each State and the accommodation therein at the end of 1919 :—

PRISONS AND PRISON ACCOMMODATION, 1919.

(COMMONWEALTH.)

State.	Number of Prisons.	Accommodation in—		Prisoners at End of Year.
		Separate Cells.	Wards.	
New South Wales	25	1,854	..	941
Victoria	15	1,505	672	665
Queensland	12	586	380	279
South Australia	13	760	463	222
Western Australia	22	455	899	158
Tasmania	2	100	..	72
Northern Territory	3	3	62	3
Commonwealth	92	5,263	2,476	2,340

The figures refer to prisoners under sentence, and are exclusive of aborigines.

The number of prisoners in gaol at the 31st December in each of the years 1915 to 1919, is given below. As stated above, the figures refer to prisoners under sentence, and are exclusive of aborigines. A separate line is added in each instance, shewing the proportion per 10,000 of the population.

PRISONERS IN GAOL, 1915 TO 1919.

Commonwealth	{ Number..	3,391	3,050	2,762	2,282	2,340
	{ Proportion	6.8	6.2	5.6	4.6	4.5

From the preceding table it will be seen that the proportion to population of prisoners in gaol has fallen by 34 per cent. during the last five years, but, if the comparison be carried farther back, the position is seen to be more favourable, the prisoners in gaol in the Commonwealth numbering as much as 16 per 10,000 of the population in 1891.

2. Improvement of Penological Methods.—During recent years Australia, in common with most other civilised countries, has introduced considerable modifications and improvements in methods of prison management. Under the old régime punishment partook more or less of the character of reprisal for wrongdoing, and the idea of constituting the prison as a reformatory agency was in the background. But in recent years there has been an earnest attempt at effecting a moral reformation in the unfortunates who lapse into crime. This aspect of prison management has been specially prominent in New South Wales. A short account of the re-organisation of the prison system in this State appears in preceding Year Books (see No. V., p. 922), but considerations of space preclude its repetition here. At the present time it is found that good results have followed the principles of scientific classification and restricted association of prisoners, together with the provision of separate institutions for the treatment of inebriates. Special efforts are put forward to provide reproductive work for prisoners, and no capable able-bodied man is engaged in labour that demeans him, but on the other hand is encouraged to take pride and pleasure in good work. The Parramatta gaol, which dates from 1842, was closed on the 15th September, 1918, and to provide for the prisoners transferred therefrom the gaol at Young was proclaimed as a place of detention for the treatment of habitual criminals in the indeterminate stage. Short sentence prisoners were sent to Tamworth gaol, and longer sentence men were accommodated in Bathurst and Maitland gaols and the State penitentiary at Long Bay. At Long Bay there is a well-designed reformatory institution for females, providing

for effective classification, and a penitentiary used as a distributing centre and a place of detention for short-term prisoners from the metropolis. Goulburn gaol is used for first offenders. The first-class minor gaols at Albury, Armidale, Broken Hill, Grafton, and Maitland are convenient centres for the reception of country prisoners, and also for the treatment of special cases. There are also several second-class minor gaols and police gaols where short-sentenced prisoners from the surrounding districts are dealt with. In New South Wales the system of carrying on afforestation by prison labour, somewhat after the manner of that in vogue for several years in New Zealand, has been introduced, and in 1911 a site near Tuncurry, on the Manning River, was selected for the purpose of initiating the scheme. Pine trees of various kinds have been planted, and at the end of 1919 over 1,000,000 trees, some exceeding 10 feet in height, were well established. So far the scheme appears to be a great success, the prisoners being healthy, cheerful, well-behaved, and industrious. Each prisoner has his own comfortable hut, where he takes his meals and sleeps, and may, if he so desires, write his letters. There are no armed or night guards at the camp. During the year 1914 a property of 107 acres was purchased, near the Emu Plains railway station, for the purpose of establishing a prison farm, and this was opened in April, 1915, with ten prisoners. This institution was disestablished in 1916, when it was taken over by the Department of Agriculture, and beyond selecting the prisoners for work on the farm, the Prisons Department had no further responsibility. The farm was again transferred to the control of the Prisons Department in November, 1917. Accommodation is provided for 42 prisoners, each of whom occupies a roomy, comfortable hut. The inmates consist principally of first offenders under the age of 25 years, and they receive a practical training in general farm work. The daily average in 1919 was 29. That there is some connexion between mental and physical health and crime is proved by the condition in which many persons are received into gaol. In a large number of instances prisoners are found to be suffering from contagious diseases. Under the Prisoners Detention Act, and its amendment of 1918, such persons may be kept in gaol until cured. A further reform, introduced in 1915, was the provision of the Shaftesbury Inebriate Institution for the treatment of non-criminal inebriates. In 1916 accommodation was provided for voluntary paying guests who wish to undergo treatment. A portion of the establishment has been set apart for the special treatment of returned soldiers convicted of minor offences, who on medical grounds are not suitable for farming or afforestation work.

Special attention is drawn by the Comptroller-General to the valuable work performed by the Prisoners' Aid Association in helping prisoners during the period of detention and after discharge.

In 1902 the system of finger-print identification of criminals was introduced, and by the year 1903 bureaux had been established in the various States for the exchange of records. Very successful results have attended the introduction of the system.

Space will not permit of more than a passing reference to the improvements brought about in prison management in the other States. In Victoria there is an excellent system of classification and allocation of prisoners in various grades to different gaols, while at the important penal establishment at Pentridge a careful segregation into several classes is carried out. In common with the other States the latest humane methods of accommodation and prison treatment have for some time been employed. An afforestation camp known as McLeod Settlement, French Island, was opened in 1916, and on the 30th June, 1920, there were 28 inmates. Since the establishment of the Camp about 2,300,000 trees have been planted by the prisoners for the Forests Department. It is stated that the experiment has resulted in improvement, both in demeanour and physique of prisoners, and it is hoped that in many cases it will be conducive to a return to honest citizenship. A prison farm has also been established about three miles from the prison at Castlemaine, and the inmates are taken to and fro daily. The number in confinement on the 30th June, 1920, was 51. Accommodation has been provided for housing a certain number of prisoners on the farm site. The orchard planted in connexion with the farm contains about 1,000 fruit trees. Provision has been made for practical instruction in carpentering and other work which will help

in securing employment for prisoners on release. During the year 80 male and 30 female cases under the Venereal Diseases Act were received, of whom 3 were treated at country gaols and the balance at the metropolitan prisons. The discharges after certificate by the Health Department numbered 118. Curative treatment is given during the period of incarceration and, if necessary, is continued afterwards outside the prison at places gazetted by the Health Department.

Queensland prisons have been considerably modernised during recent years. Amongst the principal reforms may be mentioned the reduction of the period of separate treatment undergone by prisoners sentenced to hard labour or penal servitude, a remodelling of the remission clauses and the provision of more liberal privileges in the way of correspondence and visits by friends. Electric light has been installed in the Brisbane prison, and prisoners are allowed to read up to 8 o'clock each evening. Careful classification of prisoners is carried out in the male and female divisions of Brisbane prison, at Rockhampton prison, and at the Stewart's Creek Penal Establishment. St. Helena Penal Establishment, which hitherto has been used for the accommodation of prisoners serving sentences of twelve months and upwards, is being converted into a farm colony. Well-conducted long-time prisoners will be sent to this establishment for special treatment during the latter stages of their sentences while qualifying for release. The regulations will be modified, as deemed expedient, in order to bridge the gulf between confinement and liberty. It is also intended to afford better facilities for the instruction of prisoners in trades, which will afford them the means of earning a livelihood on their release, as, naturally, men and women in this position will be less likely to relapse into crime.

Unusual circumstances have combined to keep crime at a low point in South Australia. In the first place there was never any transportation of criminals to the State, while in the earlier years of its history South Australian law breakers were transported elsewhere. The discovery of gold in the neighbouring colonies was also responsible for the drawing away of turbulent spirits who might later on have caused trouble. The present system of gaol administration was drafted mainly on English and European lines by the late W. R. Boothby, C.M.G., and has since been as far as possible adapted to modern penological procedure. At the Yatala Labor Prison, which is the largest in the State, the number in confinement on the 31st December, 1919, was 87. The prisoners are graded in three classes—first offenders, second offenders, and old offenders, the various classes being kept apart. The Adelaide Gaol, which had 60 prisoners in confinement at the end of 1919, is the next in point of importance. It is proposed to establish an afforestation camp prison at the Bangham Forest Reserve on similar lines to that at Tuncurry in New South Wales. Excellent work for the benefit and assistance of discharged prisoners is performed by the Prisoners' Aid Association.

A Royal Commission in 1911 recommended the adoption of various reforms in connexion with the prison system of Western Australia. The bulk of these were carried out, and included, amongst other things, an extension of the principle of separate treatment, improvement in prisoners' dietary scale, more satisfactory arrangements in regard to remission of sentences, and improvements in regard to hours of labour, leave of absence, etc., for the staff. Amongst other improvements recently introduced may be mentioned the grant of an eight hours' day to officers, enlargement and improved hygiene of cells, additional library facilities, assistance to discharged prisoners by provision of railway passes and monetary aid, appointment of committees to look after the welfare of discharged prisoners, and the remodelling of the "mark" system. The military method of control at Rottnest Island, coupled with considerable privileges to well-conducted prisoners, has proved very successful. Under the Prisons Act Amendment Act of 1918 a portion of Fremantle Prison was set aside as a reformatory prison in 1919, and first offenders are kept separate from other prisoners.

The daily average number of prisoners in confinement in Tasmanian gaols during the year 1919 was about 65, of whom 60 were confined in the penal establishment at Hobart and 5 at Launceston. There were no prisoners in the country gaols.

§ 5. Civil Courts.

1. **Lower Courts.**—The transactions of the lower courts on the civil side during each of the last five years are given in the table hereunder. As pointed out previously, the jurisdiction of the courts is by no means uniform in the various States.

LOWER COURTS.—CIVIL CASES, 1915 TO 1919.

(COMMONWEALTH.)

State.		1915	1916.	1917.	1918.	1919.
New South Wales	{ Cases No.	39,828	35,724	31,172	32,135	31,847

Commonwealth	{ Cases No.	137,717	125,551	108,214	104,457	106,892
	{ Amount £	576,347	468,422	400,138	419,350	436,485

The figures just given represent the returns from Petty Sessions Courts in New South Wales and Victoria, the Petty Debts Courts in Queensland, the Local Courts of South Australia and Western Australia, and the Courts of Requests in Tasmania.

2. **Superior Courts.**—In the next table will be found the transactions on the civil side in the Superior Courts during each of the years 1915 to 1919.

The New South Wales returns refer to the total amounts sued for, and not the sums actually awarded after trial in the District Courts, and are exclusive of judgments signed in the Supreme Court for which the amount is not available. Statistically the chief importance of the table consists in the fact that it shews a decline in litigiousness in Australia.

SUPERIOR COURTS.—CIVIL CASES, 1915 TO 1919.

	{ Amount £	467,132	472,005	425,112	440,886	537,473

(a) Exclusive of judgments signed, Supreme Court, the amount not being recorded.

3. **Divorces and Judicial Separations.**—The number of divorces and judicial separations in each State during the period 1915 to 1919 is shewn below. The figures which have been amended since the previous issue refer in the case of divorces to decrees made absolute in each year.

DIVORCES AND JUDICIAL SEPARATIONS, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.		1916.		1917.		1918.		1919.	
	Divorces.	Judicial Separations.	Divorces.	Judicial Separations.	Divorces.	Judicial Separations.	Divorces.	Judicial Separations.	Divorces.	Judicial Separations.
New South Wales ..	362	6	359	12	383	13	380	11	427	7
Victoria ..	218	1	206	1	202	..	233	3	346	12
Queensland ..	28	..	22	..	16	3	24	2	25	1
South Australia ..	12	..	15	..	20	1	17	..	30	..
Western Australia ..	42	2	36	..	51	..	63	..	45	..
Tasmania ..	7	..	2	..	7	..	4	..	6	2
Northern Territory ..	1
Commonwealth ..	670	9	640	13	679	17	721	16	879	12

The average annual number of divorces and judicial separations in the Commonwealth at decennial periods from 1871 to 1910 and for the eight years 1911–19 is as follows:—

DIVORCES AND JUDICIAL SEPARATIONS, 1871 TO 1919.

	1871–1880.	1881–90.	1891–1900.	1901–10.	1911–19.
Commonwealth ..	29	70	353	401	686

The bulk of the divorces and judicial separations refer, as the table shews, to New South Wales and Victoria, the Acts of 1899 and 1889 in the respective States having made the separation of the marriage tie comparatively easy. In some statistical works it is customary to compare the divorces in any year with the marriages in the same year. The comparison is, however, quite valueless, as there is no necessary connexion between the figures.

4. **Probates.**—The number of probates and letters of administration granted, together with the value of the estates concerned, is shewn below for each State for the period 1915 to 1919:—

PROBATES AND LETTERS OF ADMINISTRATION, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	{ Number 5,088 Value £ 10,813,889	{ Number 5,336 Value £ 11,687,910	{ Number 6,498 Value £ 11,923,328	{ Number 6,877 Value £ 11,827,552	{ Number 7,188 Value £ 17,131,131
Victoria ..	{ Number 4,449 Value £ 9,759,728	{ Number 5,448 Value £ 8,917,481	{ Number 5,835 Value £ 9,486,584	{ Number 6,935 Value £ 11,009,294	{ Number 7,404 Value £ 13,844,186
Queensland ..	{ Number 896 Value £ 2,720,896	{ Number 967 Value £ 3,041,514	{ Number 841 Value £ 2,796,692	{ Number 959 Value £ 2,335,848	{ Number 1,122 Value £ 3,733,964
South Australia ..	{ Number 1,515 Value £ 2,894,517	{ Number 1,661 Value £ 2,031,206	{ Number 1,646 Value £ 3,188,871	{ Number 2,321 Value £ 4,760,203	{ Number 2,319 Value £ 3,470,000
Western Australia ..	{ Number 682 Value £ 936,107	{ Number 957 Value £ 1,699,297	{ Number 1,176 Value £ 1,119,024	{ Number 1,574 Value £ 1,193,841	{ Number 1,353 Value £ 2,451,828
Tasmania ..	{ Number 418 Value £ 793,106	{ Number 423 Value £ 871,950	{ Number 513 Value £ 844,276	{ Number 435 Value £ 928,317	{ Number 564 Value £ 1,390,836
Commonwealth ..	{ Number 13,048 Value £ 20,918,243	{ Number 14,792 Value £ 28,249,358	{ Number 16,809 Value £ 29,358,775	{ Number 19,101 Value £ 32,055,055	{ Number 19,950 Value £ 42,021,945

As may naturally be expected, the figures in the above table, giving the value of property left each year, shew considerable variations.

5. **Bankruptcies.**—The returns in bankruptcy during each of the last five years are given in the following table.

For several reasons comparisons drawn from the figures in the following table are of little value. In the first place, the statements of assets and liabilities are notably

unsatisfactory, particularly in regard to the former. Then, again, there is wide dissimilarity in regard to the laws in force in the various States and the method of procedure thereunder in connexion with bankruptcy. Further, there are no means of knowing how many persons in each State who were in a bankrupt condition made private arrangements with their creditors either personally or by intervention of a solicitor. The figures quoted in the table exclude the private arrangements in Victoria and South Australia, and the liquidations and compositions in Queensland and Tasmania.

BANKRUPTCIES, 1915 TO 1919.

6. High Court of Australia.—Under the provisions of section 71 of the Commonwealth Constitution Act, the judicial power of the Commonwealth is vested in a Federal Supreme Court, called the High Court of Australia, and in such other courts as the Parliament creates or invests with federal jurisdiction. The Federal High Court possesses both original and appellate jurisdiction. The powers of the court are defined in Chapter III. of the Constitution Act and in the Judiciary Acts of 1903–15. At present the Court consists of a Chief Justice and five other judges. Sittings of the Court are held in the capitals of the various States as occasion may require. The following statement shews the transactions of the High Court for the quinquennium 1915–19 :—

COMMONWEALTH HIGH COURT TRANSACTIONS, 1915 TO 1919.

Items.	1915.	1916.	1917.	1918.	1919.
I. ORIGINAL JURISDICTION.					
Number of writs issued	126	141	106	76	93
Number of causes entered for trial	12	14	18	8	8
Verdicts for plaintiffs	6	7	6	4	3
Verdicts for defendants	6	3	5	1	..
Otherwise disposed of	40	60	47	10	5
Amount of judgments	£4,966	£4,479	£6,025	£3,463	£1,730
II. APPELLATE JURISDICTION.					
Number of appeals set down for hearing	85	67	72	67	54
Number allowed	23	23	31	33	20
Number dismissed	39	24	33	27	25
Otherwise disposed of	23	10	8	7	9

III. AMOUNT OF FEES COLLECTED.

Amount in each year	£808	£756	£619	£708	£502
---------------------------	------	------	------	------	------

During the year 1919 the Court dealt also with other matters as follows:—

Appeals from Assessments under the Taxation Assessment Acts ..	25
Special cases stated for the opinion of the Full Court ..	12
Applications for Prohibition	3
Applications under the Trading with the Enemy Act ..	1

7. Commonwealth Court of Conciliation and Arbitration.—A more or less detailed statement regarding the operation of this Court, which was established under the provisions of the Commonwealth Conciliation and Arbitration Act of 1904-18 will be found in Section XXVII.

§ 6. Cost of Administration of Justice.

The table below shows the expenditure from Consolidated Revenue during each of the last five years in connexion with the administration of justice in each of the States. Expenditure on police and prisons has been separately shewn. With regard to the figures quoted for "other" expenditure, a slight allowance has to be made for the fact that some extraneous expenditure has been included which it was found impossible to disentangle from the total, but the amount is in no instance large.

EXPENDITURE ON JUSTICE, 1915 TO 1919.

(STATES.)

Northern Territory	Police	10,216	10,260	10,210	10,200	11,435
	Gaols	2,123	2,875	2,972	3,048	2,663
	Other	1,463	2,744	1,991	2,196	1,925
Commonwealth	Police	1,590,931	1,639,058	1,750,889	1,835,686	2,292,667
	Gaols	238,132	236,591	233,021	240,542	282,207
	Other	735,439	735,149	706,398	717,018	832,679

The rise in expenditure during 1919 was due chiefly to increases in wages and salaries and heavier outlay on stores and supplies.

With the exception of that of the Northern Territory, the expenditure shewn in the foregoing table is that incurred by the State Governments only, and does not include expenditure in connection with the Federal High Court, which is shewn hereunder for the period 1914-15 to 1919-20:—

EXPENDITURE ON FEDERAL HIGH COURT, 1914-15 TO 1919-20.

Year.	Amount.	Year.	Amount.
	£		£
1914-15	31,037	1917-18	31,352
1915-16	31,447	1918-19	30,337
1916-17	31,780	1919-20	34,370

Other items of federal legal expenditure also not included in the table are:—Court of Conciliation and Arbitration £7,650, Crown Solicitor £16,942, and Secretary's office, £14,492. Excluding Patents and Copyrights, the total expenditure by the federal law authorities for the year 1919-20 was £78,686.

For the purposes of comparison the figures in the first table above have been reduced to a population basis, and the results are given in the table following:—

EXPENDITURE ON JUSTICE PER INHABITANT, 1915 TO 1919.

(STATES.)

Owing to the smallness of the white population, large area to be policed, and cost of supplies, transport, etc., the figures for the Northern Territory must necessarily appear somewhat abnormal.

The total expenditure in the Commonwealth in connexion with the administration of justice in the various States has risen from ten shillings per inhabitant in 1901 to twelve shillings and elevenpence in 1919. Police expenditure has increased by three shillings per head, the average for gaols is about twopence per head less, while the expenditure on courts and the remaining machinery of justice has increased by one penny per head during the same period. Increased salaries and allowances, and the heavier cost of materials and equipment, were responsible for the rise in the rate per head during the last few years.

SECTION XXIV.

PUBLIC BENEVOLENCE.

§ 1. Introductory.

1. **General.**—Charity and charitable effort in Australia may be classified under three headings, viz. :—(a) State; (b) public; (c) private. To the first belong all institutions wholly provided for by the State, such as the principal lunatic asylums in the various States, the Government hospitals in Western Australia, and the Government asylums for the infirm in New South Wales. The second class comprises public institutions of two kinds, viz. :—(i) those partially subsidised by the State or State endowed, but receiving also private aid, and (ii) those wholly dependent upon private aid. To the former division belong such institutions as the principal metropolitan hospitals. In the latter are included institutions established and endowed by individuals for the benefit of the needy generally. All charitable movements of a private character are included in the third group. A more or less accurate statistical account is possible in classes (a) and (b), but in regard to (c) complete tabulation is, for obvious reasons, impossible.

No poor-rate is levied in Australia, and Government aid without return is required only for the aged and disabled. Moreover, although Old-age Pensions, Invalid Pensions, and Maternity Allowances are paid by the Commonwealth, the payments are looked upon rather in the light of a citizen's right than as a charity. Reference to these matters will be found in Section xxxiv., *Miscellaneous*, § 4 and 5.

From time to time relief funds have been organised for famine-stricken territories (e.g., China, India, etc.), or for places where plague, flood, fire, or earthquake has shown the need of urgent relief. Special funds are also raised for persons disabled or bereaved through war. Complete statistical information in regard to these forms of charity is not, however, available. It may be mentioned that the daily Press frequently accepts the duty of collectorship in charity appeals. In regard to subscriptions to the various patriotic funds which have been instituted in consequence of the war, the total for Australia, up to 31st December, 1919, has been estimated to exceed £12,500,000 sterling.

§ 2. The Larger Charities of Australia.

1. **Hospitals.**—All of the State capitals have several large and well-equipped hospitals, and there is at least one in every important town. In large centres there are hospitals for consumptives, women, children, infectious diseases, incurables, etc. The number of hospitals in Australia, with the admissions, patients treated, deaths, and expenditure, is shewn in the following table. Only general hospitals are tabulated, since the working of "special" institutions is not properly comparable with those which treat every class of case.

HOSPITALS IN THE COMMONWEALTH, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.
Number of institutions ..	398	391	399	393	393
Number of beds ..	16,374	15,811	16,763	17,000	17,390
Admissions during year ..	169,892	166,588	164,889	174,379	193,920
Indoor patients treated ..	179,829	176,279	174,387	184,176	202,929
Deaths ..	12,809	13,128	11,885	12,494	15,758
Expenditure ..	£ 1,280,461	1,351,160	1,396,361	1,543,162	1,798,297

In addition to those admitted to the institutions there are large numbers of out-patients. The exact number of these cannot be given, but a rough estimate of distinct cases for 1919 places the total at about 300,000.

Fuller details of hospital statistics are given for 1919 in the tables below, the States and Northern Territory of the Commonwealth being shewn separately :—

(a) Year ended 30th June, 1919. (b) Including rents.

2. **Principal Hospitals in each State.**—The tables here given refer to general hospitals. In addition there are hospitals for "specials" (such as women's, children's, and infectious diseases hospitals), and institutions nearly allied to hospitals (such as consumptive sanatoria). Where the institutions carry on general hospital relief, they are included with those establishments.

(i) *New South Wales.* A Government hospital, with a staff of 23 medical officers and accommodation for about 600 patients, is established at Little Bay, near Sydney. Altogether, there are four hospitals for women, one for women and children, and three for children in the metropolis. The Royal Prince Alfred Hospital, with a medical staff of 80, and with 544 beds, is the largest metropolitan endowed institution. Amongst other large metropolitan hospitals may be mentioned the Sydney Hospital, with a medical staff of 59 and with 414 beds, St. Vincent's with 52 doctors and 190 beds, and Lewisham with 27 medical attendants and 164 beds. In extra-metropolitan areas the Waterfall Hospital for Consumptives, which is a Government institution, provides accommodation for 408 patients. The Newcastle Hospital has 188 beds and a medical staff of 20. At the Carrington Convalescent Home at Camden, 110 patients may be admitted. The hospital in the Broken Hill district can accommodate 162.

(ii) *Victoria.* There are several large metropolitan hospitals in Victoria. The largest of these, the Melbourne Hospital, has 350 beds; the Austin Hospital for Incurables has 290, the Alfred Hospital 168, St. Vincent's 138, and the Homœopathic 98. Amongst the country institutions, Bendigo has 222 beds, Geelong 217, and Ballarat 170.

(iii) *Queensland.* Of the metropolitan hospitals, the largest is the Brisbane General, which can accommodate 361 patients. The Children's Hospital has 218 beds, the Diamantina 174, and the Mater Misericordiæ 112. Ipswich Hospital, with 146 beds, is the largest of the country institutions, followed by Toowoomba with 130, Rockhampton with 108, Townsville with 105, Maryborough 96, Charters Towers 92, Bundaberg 92, Cairns 84, Mackay 80, and Mt. Morgan 71.

(iv) *South Australia.* Including the Consumptive Home and Infectious Diseases Block, the Adelaide Hospital can accommodate a total of 440 patients. The most important of the country hospitals are at Port Augusta, Port Pirie, and Wallaroo, with 72, 56, and 48 beds respectively. The Adelaide Children's Hospital has 96 beds.

(v) *Western Australia.* Information regarding the capacity of the Western Australian hospitals is not available, but some idea of their comparative importance may be gained from the figures relating to cases treated. In the metropolis, 4,764 cases were treated at the Perth Hospital in 1919, and 1,847 at the Perth Children's. Of the country hospitals, Kalgoorlie returned 1,269 cases, Fremantle 1,094, and Wooroloo 603.

(vi) *Tasmania.* There are well-equipped general hospitals in Hobart and Launceston. The former has a medical staff of 4 and can accommodate 225 patients, and the latter has 190 beds and a medical staff of 2. Hospitals for women have been established in both centres, and there is a sanatorium for consumptives at Newtown. Outside the metropolitan area, the Devon Cottage Hospital has a medical staff of 2, and beds for 74 patients; the Lyell District Hospital can accommodate 44 patients, and there are 9 other institutions in important country centres.

(vii) *Northern Territory.* In addition to the hospitals at Darwin and Pine Creek, arrangements have been made for the supply of medicines and first aid to outlying stations.

3. **Benevolent and Destitute Asylums.**—A marked increase has taken place in the amount of aid bestowed upon the aged. Two elements, each of them independent of the growth of population, have influenced this increase. One is, that the general age of the community has advanced—the large flow of immigration of sixty and seventy years ago having been mostly of persons in the prime of life; the other is the increased regard

paid in all British communities to the well-being of the helpless. The result in Australia has been that numerous establishments have been founded for the housing and protection of persons no longer able to care for themselves. The institutions are supported by Government and municipal aid, public subscriptions, charity performances, bequests, etc., and in many cases relatives of indigent and afflicted persons contribute to their maintenance.

The impossibility of an entirely satisfactory statistical tabulation in regard to all forms of charitable aid is especially marked in the case of benevolent institutions, since the conditions under which they have been established in the different centres in the Commonwealth have caused divergence in their development and in the classes of cases treated by them. For example, in Western Australia the Home for Destitute Women includes a maternity ward, for which the statistics are not separately kept. Since the predominating function of the institution is aid to the destitute, it has been included among benevolent asylums. In Victoria, nine of the hospitals are also benevolent asylums, and they are included wholly under the former. In South Australia, the Destitute Asylum includes lying-in and children's departments.

BENEVOLENT INSTITUTIONS.—REVENUE AND EXPENDITURE, 1919.

Total	118,769	52,183	25,881	38,239	25,074	14,263	274,409

(i) *Government Asylums for the Infirm, New South Wales.* There are five asylums for the infirm maintained by the Government—four for men and one for women. Rookwood, the largest of these, had in 1919 an average number resident of 1,219, Newington 701, and Liverpool 564. At the Cottage Homes, situated at two separate localities in Parramatta, the average number resident was about 410. The State Labour Depot and Refuge at Randwick had 928 inmates during 1919.

(ii) *Benevolent Asylums, Victoria.* Besides the asylums attached to hospitals, there are eight institutions in Victoria. In 1918–19, the average daily number of indoor patients was 1,884, and there were 392 distinct cases of outdoor relief.

(iii) *Benevolent Asylums, Queensland.* There are four institutions in Queensland, with 1,164 beds. The most important of these is at Dunwich (Stradbroke Island) with 1,046 beds, while there are small institutions at Nundah, Rockhampton, and Toowoomba. At the end of 1919 the inmates of the four institutions numbered 1,157.

(iv) *Destitute Asylum, Adelaide.* Outside of hospitals and lunatic asylums the destitute of South Australia are dealt with and relieved at the Destitute Asylum, Adelaide, and at the Aged Men's Home, Beaumont. The former institution includes lying-in and children's departments. In the asylum the number of inmates at the end of 1919 was 352; in the Beaumont Home it was 64.

(v) *Homes for the Destitute, Western Australia.* There are two of these homes in Western Australia supported by public funds. The Old Men's Home at Claremont had 651 inmates at the end of 1919, and the Women's Home, Fremantle, which receives children also, had 82 adult inmates. The children admitted during the year numbered 26.

(vi) *Charitable Establishments, Tasmania.* There are two principal Government charitable establishments in Tasmania. The New Town Infirmary and Consumptive Home, with 220 beds, had 189 inmates at the end of June, 1920, and the Home for Invalids, Launceston, with 24 beds, had 23 inmates on the same date.

4. *Orphanages, Industrial Schools, etc.*—The organisation of charitable effort varies greatly in regard to orphans and waifs. In many institutions shelter and some form of industrial training are offered to destitute children of all classes, whether orphans or not, while some of those styled orphanages do not confine their relief to orphans strictly so called. The figures in the next table are those for institutions where, it is believed, the principal effort is on behalf of those who are really orphans:—

ORPHANAGES IN COMMONWEALTH, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.
Number of Institutions	50	48	47	48	49
Admissions	2,376	2,118	1,400	2,679	2,397
Total number of inmates during year ..	4,503	5,061	5,754	7,451	7,330
Deaths	48	35	20	53	69
Expenditure (a) £	93,758	79,526	81,141	114,420	121,305

(a) Incomplete. Expenditure is not available for some orphanages.

(i) *New South Wales.* The care of destitute and neglected children is entrusted to the State Children's Relief Board, whose officers are charged with a strict supervision regarding the welfare of the children and the treatment of them by those to whom they are boarded out. Provision is made for instruction in various trades and callings. The number of children under the Board's supervision in 1919-20 was 15,776. The board's expenditure in that year was £257,366, or £16 6s. 3d. per child.

There are also orphanages, farm homes, country homes for children, etc., with upwards of 1,900 children under care.

There are several reformatories and industrial schools maintained by the State. At the Parramatta Industrial School for Girls, to which a Training Home was attached in 1912, there were on 31st December, 1919, 159 inmates. At the Farm Home for boys, Gosford, there were 86 boys at the end of 1919.

(ii) *Victoria.* There are ten orphanages in Victoria, with 1,756 beds. The daily average of the inmates was 1,737 in 1918-19. The expenditure in the same year was £39,990.

At the end of 1919 there were three industrial and five reformatory schools in the State. Of these, one in each class is wholly controlled by the Government, being used merely as a receiving and distributing depot. The children are sent thence to situations, foster homes, or other institutions dealing with State wards. The other schools are under private management, receiving an allowance for State wards. Many of the reformatory children are placed with friends, or licensed out. On 31st December, 1919, the wards of the State numbered 6,131—classed mostly as neglected children. There were also 25 children free from legal control, who, being incapacitated, were maintained by the State. By a Statute of 1919, certain children boarded out to their mothers ceased to be classed as wards of the State, but payments for their maintenance to the mothers continued. At the end of 1919 there were 6,206 such children. The total expenditure for 1919 was £192,096, of which £181,385 was borne by the Government.

(iii) *Queensland.* There are twelve orphanages in Queensland. The number under care on 31st December, 1919, was 1,107, and the expenditure for the year, £25,881.

There are also seven industrial and reformatory schools, which had 122 boys and 57 girls under detention at the end of 1919. The total number of children under State control at the end of 1919 was 7,770. The gross cost was £122,073, of which £113,601 was borne by the Government.

(iv) *South Australia.* The State Children's Department exercises a supervision over the probationary and industrial schools and the reformatories. The total number of admissions into these institutions in 1919-20 was 294. The number of inmates on the 30th June, 1920, was 229, in addition to which 1,614 were placed out, or had been adopted or apprenticed. There were no deaths amongst children in industrial schools and reformatories, and of those placed out and in other institutions nine died. The number of children under State control on 30th June, 1920, was 3,784, including 1,941 placed out with licensed fostermothers. The expenditure for 1919-20 was £42,178.

There are three orphan asylums. The number under care during 1919 was 375, of whom 261 were inmates on 31st December, 1918. There were no deaths during the year, and the expenditure amounted to £1,791.

(v) *Western Australia.* In Western Australia there were, at the end of 1919, four orphanages, four orphanages and industrial schools, and two industrial schools, containing 462 boys and 407 girls. There were also 8 boys and 14 girls at the Government Receiving Depot. The total number of children in charge of the State Children's Department at the end of 1919 was 1,345, and the net cost £26,493.

(vi) *Tasmania.* There are three industrial schools and one orphanage under benevolent institutions in the State. Admissions in 1919-20 numbered 27, and total inmates during the year 160. No deaths occurred. The expenditure was £4,223.

The New Town Training School for boys had 50 inmates at the end of June, 1920.

Under the boarding-out system upwards of 300 children are placed out. The total number of children under State control at the end of June, 1920, was 465, the net cost to the State of children's relief being £8,012.

(vii) *Neglected Children.* The following table summarises the number of neglected children under State Departments. Included in the figures are children boarded out with their own mothers, the numbers being, New South Wales 10,797, Victoria 6,206 Queensland 4,971, South Australia 324, Western Australia 665, Tasmania 4; the total for the Commonwealth being 22,967.

STATE RELIEF OF NEGLECTED CHILDREN.—TRANSACTIONS OF STATE DEPARTMENTS, 1919.

(a) For year ended 5th April following. (b) For the year ended 30th June, 1920.

(c) Details not available. (d) Exclusive of New South Wales.

5. **Lepers.**—Lazarets for the treatment of lepers have been established in New South Wales (Little Bay); Queensland (Peel Island, near Brisbane, and Dayman Island, Torres Strait); and the Northern Territory (Mud Island). Quarantine and isolation stations have also been used for the segregation of patients. Up to 1915, 545 cases of leprosy had been recorded in the Commonwealth. Later figures are not available.

6. **Hospitals for the Insane.**—The method of compiling insanity statistics has been fairly uniform throughout the States, but the various methods of observing the early stages of the development of insanity introduce an element of uncertainty which considerably reduces the value of comparison. In the total given below, licensed houses (except as regards expenditure) are included in the total for New South Wales and Victoria, but in the latter State the figures are exclusive of reception houses and observation wards in gaols:—

HOSPITALS FOR INSANE, COMMONWEALTH, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.
Number of institutions(a)	34	35	34	34	35
Number of beds	16,417	16,673	16,808	17,176	17,308
Admissions	3,118	3,268	3,054	3,192	3,323
Discharged as recovered, relieved, etc. .	1,491	1,451	1,456	1,406	1,565
Deaths	1,341	1,459	1,306	1,383	1,699
Expenditure £	815,200	861,258	875,963	951,439	1,116,676

(a) Exclusive of receiving wards at general hospitals and including licensed houses for insane in Victoria.

The proportion of insane, as well as the total number returned as under treatment, has changed very little during recent years. In the next table the number of insane under official care in Australia is given, and in the table following, the proportion of insane to population.

The number of insane persons in institutions in Australia at the end of each of the years 1915–1919 was as follows:—

INSANE PERSONS IN THE COMMONWEALTH, 1915 TO 1919.

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	7,063	7,240	7,340	7,581	7,544
Victoria	5,767	5,793	5,833	5,915	5,846
Queensland	2,441	2,517	2,590	2,623	2,703
South Australia ..	1,137	1,158	1,176	1,153	1,187
Western Australia ..	1,009	1,045	1,066	1,123	1,148
Tasmania	522	545	570	575	578
Commonwealth ..	17,939	18,298	18,575	18,970	19,006

For the period embraced in the tables Victoria shows the highest rate of insanity, roughly 1 in 250 persons. It is stated that this is chiefly owing to the proportionately greater number of old persons in that State. On the other hand, in South Australia a considerably lower insanity rate has prevailed, averaging about 1 in 330, Tasmania following closely with an average of about 1 in 370.

PROPORTION OF INSANE PER 1,000 OF THE POPULATION, 1915 TO 1919.

(COMMONWEALTH.)

State.	1915.	1916.	1917.	1918.	1919.
New South Wales ..	3.78	3.92	3.88	3.92	3.77
Victoria.. ..	4.04	4.15	4.13	4.13	3.91
Queensland ..	3.55	3.70	3.83	3.78	3.73
South Australia ..	2.58	2.67	2.70	2.59	2.54
Western Australia ..	3.13	3.38	3.44	3.58	3.46
Tasmania ..	2.62	2.72	2.80	2.75	2.67
Commonwealth ..	3.62	3.75	3.76	3.78	3.62

Consequent upon the development of a more rational attitude towards the treatment of mental cases, a greater willingness is being shewn to submit afflicted persons to treatment at an earlier stage than formerly. Hence an increase in the number of recorded cases does not necessarily imply an actual increase in insanity. It is important to bear this in mind, because the small progressive increase in the numbers in the first of the immediately preceding tables is probably to be attributed largely, if not solely, to this circumstance.

The leading features in regard to institutions for the care of the insane are given below for 1919 :—

HOSPITALS FOR THE INSANE.—NUMBER, STAFFS, ACCOMMODATION, 1919.

(COMMONWEALTH.)

Particulars.	N.S.W.	Vic.(a)	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.

Total	7,143	5,187	2,656	1,178	1,127	575	17,866
Number of patients on books at end of year per 1,000 of population—							
Males	4.28	3.85	4.56	2.95	4.49	2.58	4.03
Females	3.23	3.96	2.82	2.16	2.28	2.76	3.21
Persons	3.77	3.91	3.73	2.54	3.46	2.67	3.62
Average number of patients resident in hospitals for insane per 1,000 of mean population—							
Males	4.28	3.65	4.65	3.05	4.65	2.61	4.00
Females	2.98	3.44	2.74	2.17	2.21	2.84	2.95
Persons	3.63	3.54	3.73	2.53	3.48	2.72	3.47

(a) Exclusive of inmates of the Receiving House, Royal Park, and of Receiving Wards attached to the hospitals at Bendigo and Geelong, and of five private licensed houses.

In some of the States it is the practice to allow persons well advanced towards recovery to leave the institutions and reside with their relatives or friends, but they are nevertheless under supervision of the asylum authorities and are kept on the books. The figures for admission, etc., include absconders captured and readmitted. Very few escapees succeed in avoiding capture.

The revenue of Government asylums is small in comparison with their cost, and consists chiefly of patients' fees. The proportion of expenditure borne by the State amounts to about 88 per cent.

HOSPITALS FOR THE INSANE (GOVERNMENT ONLY), REVENUE AND EXPENDITURE, 1919.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.

(i) *New South Wales.* The latest return available shews that the average length of residence in the hospitals of persons who died was 4 years 8 months for males and 5 years 9 months for females; and that of persons who were discharged was 1 year 2 months for males and 1 year 7 months for females.

There are also two State reception houses, where suspected persons are confined for observation, being subsequently either discharged or transferred to lunatic asylums. In two of the gaols observation wards have been instituted, with similar functions.

(ii) *Victoria.* The average residence in the hospitals of those who died was 8 years 3 months for males and 12 years 11 months for females; that of those discharged, 1 year 3 months for males and 1 year 9 months for females.

There are lunacy wards in two of the general hospitals; also a State receiving house where persons are placed for observation, and subsequently discharged or transferred to asylums.

(iii) *Queensland.* The average residence in the institutions of those who died was 8 years 1 month for males and 9 years and 10 months for females; and of those who were discharged, 11 months for males and 1 year for females.

There are also three reception houses for insane, which act as depots to which patients are sent with a view to determining whether their mental illness is of a merely temporary character, easily relieved, or is of such a nature as to need further treatment at the State asylums.

(iv) *South Australia.* The average residence of those who died was 5 years and 2 months for males and 6 years 2 months for females; of those discharged, 1 year and 7 months for males and 1 year and 1 month for females.

(v) *Western Australia.* The period of residence of those who died during the year averaged 6 years 11 months for males and 5 years 8 months for females; of those who were discharged, 11 months for males and 1 year 2 months for females.

(vi) *Tasmania.* The period of residence of those who died was 3 years 10 months for males and 13 years 5 months for females; that of those discharged, 11 months for males and 18 months for females.

(vii) *Causes of Insanity.* The proportion of causes of insanity to the total of ascertained causes in Australia in the five years 1915–19 shews that hereditary influences have been the chief factor, more than one-fifth of the total ascertained causes coming under this head. Domestic troubles, adverse circumstances, etc., have also been a fruitful source. Cases due to intemperance in drink range from one in nine to one in twelve.

**PROPORTION OF ASCERTAINED CAUSES, ETC., OF INSANITY, COMMONWEALTH,
1915 TO 1919.**

Causes, Previous History, etc.	1915.	1916.	1917.	1918.	1919.

7. **Treatment of Inebriates.**—The treatment of inebriates is referred to in the section dealing with Public Justice hereinbefore. (See page 821.)

8. **Protection of Aborigines.**—For the protection of the aboriginal Australian race there are institutions, under the supervision of Aborigines Boards, where the blacks are housed and encouraged to work, the children receiving elementary education. The work is usually carried on at mission stations, but many of the natives are nomadic in habit of life, and receive food and clothing when they call, whilst others but rarely come under the notice of the Boards. The native race is extinct in Tasmania. The estimated average annual expenditure on maintenance, &c., for the last five years was—New South Wales, £25,000; Victoria, £4,000; Queensland, £21,000; South Australia, £21,000; Western Australia, £26,000; Northern Territory, £3,000; total for Commonwealth, £100,000. In New South Wales the average number receiving monthly aid in 1919 was 2,582; in Victoria there are about 300 under the care of the Aborigines Protection Board; in Queensland, at the end of 1919, there were 2,705 aborigines at the mission stations; in South Australia, there were 777 inmates at mission stations, while in Western Australia the aborigines and half-castes in the native institutions numbered 384. At the mission stations in the Northern Territory about 300 were in residence, but casual assistance and medical attendance are given to large numbers of natives every year.

9. **Royal Life Saving Society.**—In each of the State capitals, “centres” of the Royal Life Saving Society have been established. Life preservation is the object of the Society, and its immediate aims are (a) educative and (b) remedial. By stimulating the acquirement of the art of swimming in schools, colleges, clubs, etc., it is desired to bring about a widespread and thorough knowledge of natation and life-saving; while life-belts, reels, lines, and other first-aid appliances are provided on ocean beaches and at places where they are likely to be in demand. Upwards of 3,000 certificates of proficiency in various grades are annually issued after examination.

10. **Royal Humane Society.**—The Royal Humane Society of Australasia has for its objects (a) to grant awards for skill, promptness, and perseverance in life saving; (b) to provide assistance in cases of danger and apparent death; (c) to restore the apparently drowned; (d) to collect and circulate the latest information regarding approved methods and apparatus for life saving. Awards of medals and certificates are made numbering about 100 annually. Upwards of 350 lifebuoys have been provided at various places on the coasts, rivers, lakes, and reservoirs in the various States. Swimming is encouraged amongst school children, and awards are made for proficiency.

11. **Other Charitable Institutions.**—Owing to variety of name and function of other charitable institutions it has been found impracticable to give detailed results. The aid given in kind—food, clothing, tools of trade, etc.—is considerable, whilst the shelter and treatment afforded range from a bed for a night for casual callers in establishments ministering minor charity, to indoor treatment over long periods in those that exist for the relief of the aged and infirm. The institutions not so particularised include asylums for the deaf, dumb, and blind, maternity institutions and infant homes, homes for the destitute and aged poor, industrial colonies, night shelters, crèches, homes of hope, rescue homes, free kindergarten and ragged schools, auxiliary medical charities, free dispensaries, benevolent societies and nursing systems, ambulance and health societies, boys' brigades, humane and animals' protection societies, prisoners' aid associations, shipwreck relief societies, bush fires and mining accident relief funds, etc.

12. **State Expenditure on Charities.**—The table below gives the amount expended by Government on charities in each of the last five years, the figures for the various States being compiled, as far as possible, on the same basis :—

STATE EXPENDITURE ON CHARITIES, 1915 TO 1919.

State or Territory.	1915.	1916.	1917.	1918.	1919.
	£	£	£	£	£
New South Wales ..	779,303	876,767	863,713	962,901	1,148,360
Victoria.. ..	541,668	525,682	543,225	541,817	578,055
Queensland ..	307,899	324,143	372,342	417,743	516,944
South Australia ..	167,272	162,849	191,748	166,250	195,687
Western Australia ..	228,064	247,589	178,477	249,361	289,404
Tasmania ..	78,092	79,494	88,445	95,867	121,371
Northern Territory ..	4,864	5,649	4,488	4,156	6,178
Commonwealth ..	2,107,162	2,222,173	2,242,438	2,438,095	2,855,999

13. **Total Charitable Expenditure.**—The expenditure in the Commonwealth in money on hospitals, charities, and all forms of relief publicly given, comprising the amounts furnished by Government and those raised by public subscription, etc., but excluding old-age pensions, exceeds £4,600,000 annually.

SECTION XXV.

GENERAL GOVERNMENT.

§ 1. Scheme of Parliamentary Government.

1. **General.**—The legislative power of the Commonwealth is vested in the Federal Parliament, which consists of the Sovereign, the Senate, and the House of Representatives. The Sovereign is represented throughout the Commonwealth by the Governor-General, who, subject to the Constitution of the Commonwealth, has such powers and functions as the Sovereign is pleased to assign to him. In each State there is a State Governor, who is the representative of the Sovereign for the State, and who exercises such powers within the State as are conferred upon him by the Letters Patent which constitute his office, and by the instructions, which inform him in detail of the manner in which his duties are to be fulfilled. The Legislature in each State is also bi-cameral, and consists of (a) a Legislative Council and (b) a Legislative Assembly, or House of Assembly, the legislative powers of these chambers being delimited by the Commonwealth and the State Constitutions. The latter chamber, which is the larger, is always elective; the qualification for the franchise varies in character. The former chamber is, in the case of New South Wales and Queensland, nominated by the Governor-in-Council, but in the other States it is elective, the constituencies being differently arranged and some property or special qualification for the electorate being required. In the Federal Parliament, however, the qualifications for the franchise are identical for both Houses. A brief account of the constitutional history of each of the States was given in previous issues of this book (see especially Year Book No. 4, pp. 27 to 32).

2. **Number of Members of the Legislatures.**—The following table shews the number of members in each of the legislative chambers in the Commonwealth and in each State at 1st August, 1921:—

MEMBERS OF PARLIAMENT OF AUSTRALIA, 1921.

Members in—		C'wealth.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Total.
Upper House	..	36	68	34	59	20	30	18	265
Lower House	..	75	90	65	72	46	50	30	428
Total	111	158	99	131	66	80	48	693

The use of the expressions "Upper House" and "Lower House" in the above statement, though not justified constitutionally, is convenient, inasmuch as the legislative chambers are known by different names in the Commonwealth and in some of the States.

In the Commonwealth Parliament the Upper House is known as the Senate, and in the State Parliaments as the Legislative Council. The Lower House is known as follows :—In the Commonwealth Parliament as the House of Representatives, in the State Parliaments of New South Wales, Victoria, Queensland, and Western Australia as the Legislative Assembly, and in the State Parliaments of South Australia and Tasmania as the House of Assembly.

3. The Cabinet and Executive Government.—The Sections of the Commonwealth Constitution Act dealing with the Executive Government will be found on page 18 hereinbefore. In both the Commonwealth and the State Legislatures the forms of government have been founded on their prototypes in the Imperial Government, and the relations established between the Ministry and the representatives of the people are in accordance with those prevailing in Great Britain. The executive powers in the Commonwealth and in the State Governments are vested in the Governor-in-Council. The Executive Council in the Commonwealth and in the majority of the States is practically co-extensive with a group of departmental chiefs, who are usually spoken of as the Cabinet, and who change with the rise and fall of party majorities. In the Commonwealth Government, however, as well as in the States of Victoria and Tasmania, the Cabinet on leaving office remain members of the Executive Council, though they no longer attend its meetings, and it is in fact an essential feature of the Cabinet system of Government that they should not do so, except to assist the Governor in transacting purely formal business, or to advise on non-political questions.

(i) *The Executive Council.* This body is composed of the Governor and the Ministers of State holding office for the time being. The latter are sworn both as Executive Councillors and as Ministers controlling the different administrative departments. It should be observed that all persons living who have held Ministerial office under former Governments are also technically members of the Executive Council, and are thus liable to be specially summoned for attendance at meetings of that body. The meetings are official in character; they are presided over by the Governor-General (or Governor) and are attended by the clerk, who keeps a formal record of the proceedings. At these meetings the decisions of the Cabinet are put into official form and made effective, appointments are confirmed, resignations accepted, proceedings ordered, and notices and regulations published.

The official members of the Executive Council in August, 1921, have been previously specified (see page 30). In addition, all living members of past Ministries (see following pages) are technically liable to be officially summoned to attend meetings of the Executive Council.

Particulars of previous Commonwealth Ministries are given on pages 27 to 30 hereinbefore.

(ii) *The Cabinet.* The meetings of this body are private and deliberative. No one is admitted but the actual Ministry of the day, no records of the meetings transpire, and no official notice is taken of the proceedings. The members of the Cabinet, being the leaders of the party in power in Parliament, control the bent of legislation, and must retain the confidence of the people and also of the Governor-General (or Governor), to whom they act as an advising body. They also in effect wield, by virtue of their seats on the Executive Council, the whole executive force of the community. In summoning, proroguing, or dissolving Parliament, the Governor-General (or Governor) is usually guided by the advice tendered him by the Cabinet, though legally in no way bound to accept such advice. The following statement gives the names of the Ministers of State for the Commonwealth who have held office since the inauguration of the Commonwealth Government :—

MINISTERS OF STATE FOR THE COMMONWEALTH OF AUSTRALIA FROM 1st JANUARY, 1901, to OCTOBER, 1921.

HOME AND TERRITORIES.
(Prior to 14/11/16 known as External Affairs).

Name.	From—	To—
Rt. Hon. E. BARTON, P.C., K.C. (a) (b) ..	1/1/01	23/9/03

HON. J. B. HAYES.

Minister for Lands—

HON. A. HEAN, C.M.G.

Ministers without Portfolio—

HON. T. SHIELDS, M.L.C.

HON. H. HAYS.

4. **The Appointment of Ministers and of Executive Councillors.**(a)—Although it is technically possible for the Governor to make and unmake cabinets at his pleasure, under all ordinary circumstances his apparent liberty in choosing his Executive Council is virtually restricted by the operation of constitutional machinery. When a Ministry is defeated in Parliament or at the polls, the procedure both in the Commonwealth and the State Parliaments generally, though not invariably, follows that prevailing in the Imperial Parliament. The customary procedure in connexion with the resignation or acceptance of office by a Ministry is described fully in previous issues of the Year Book. (See No. 6, page 942.)

5. **Enactments of the Parliament.**—In the Commonwealth, all laws are enacted in the name of the Sovereign, the Senate, and the House of Representatives. The subjects with respect to which the Commonwealth Parliament is empowered to make laws are enumerated in the Constitution Act (see pp. 15 and 16 hereinbefore). In the States, laws are enacted in the name of the Sovereign by and with the consent of the Legislative Council and Legislative Assembly or House of Assembly. The Governor-General or the State Governor acts as Viceroy as regards giving the Royal Assent to or vetoing Bills passed by the Legislatures, or reserving them for the special consideration of the Sovereign. In the States, the Councils and Assemblies are empowered generally, subject to the Commonwealth Constitution, to make laws in and for their respective States, in all cases whatsoever. Subject to certain limitations, they may alter, repeal, or vary their Constitution. Where a law of a State is inconsistent with a law of the Commonwealth the latter prevails, and the former is, to the extent of the inconsistency, invalid.

(a) See Jenks' "Government of Victoria," pp. 269 *et seq.*

6. Powers and Functions of the Governor-General and of the Governors.—The Governor-General and the State Governors act under the authority of the Commissions by which they are appointed and the Letters Patent under the Great Seal of the United Kingdom, and according to instructions issued by the Colonial Office and passed under the Royal Sign Manual and Signet.

The office of Governor-General and Commander-in-Chief of the Commonwealth was constituted by Letters Patent issued on the 29th October, 1900, in pursuance of the provisions of the Commonwealth Constitution Act (see page 9 hereinbefore). The powers and duties of the Governor-General were further defined by Royal instructions issued on the same date. The principal and most important of his functions, legislative as well as executive, are expressly conferred upon him by the terms of the Constitution itself. He is the custodian of the Great Seal of the Commonwealth, and has the appointment of political officers to administer Departments of State of the Commonwealth.

His legislative functions are exercised with respect to proposed laws as finally passed by the Federal Houses of Parliament. Such Bills are presented to the Governor-General for his assent in the King's name, on receiving which they become law throughout the Commonwealth. The Governor-General may, however, withhold his assent, or may reserve any Bill for the King's pleasure. He may return to the House in which it originated any proposed law with suggested amendments. The King may disallow any law within one year from the date on which it was assented to by the Governor-General.

The Governor-General's executive functions are, under ordinary circumstances, exercised on the advice of his responsible Ministers. Various specific powers are vested in him by the Constitution; he may summon or prorogue Parliament and may dissolve the House of Representatives. He is the Commander-in-Chief of the military and naval forces of the Commonwealth, and is invested by the Crown with the prerogative of mercy in cases of offences committed against the laws of the Commonwealth.

The Governor-General is also invested with authority in certain matters of Imperial interest, such as the control of the naval and military forces of the Commonwealth; the observance of the relations of foreign States to Great Britain, so far as they may be affected by the indirect relations of such States to the Commonwealth; and the treatment of neutral and belligerent ships in Commonwealth waters in time of war.

The Governor-General may not leave the Commonwealth without having first obtained leave from the Imperial Government, to whom alone he is responsible for his official acts.

The powers and functions of the State Governors are, within their respective States, very similar to those exercised by the Governor-General for the Commonwealth, and are defined by the terms of their Commissions and by the Royal instructions accompanying the same. A State Governor is the official head of the State Legislature, and assents in the name of the Crown to all Bills passed by the Parliament, except those reserved for the Royal Assent. The latter include certain classes of Bills, which are regulated by the Constitution Acts and by the instructions issued by the Imperial Government. The Governors are, under ordinary circumstances, guided by their Executive Councils, the chief matters in which the exercise of discretion is required being the granting or withholding of a dissolution of Parliament when requested by a Premier; the appointment of a new Ministry; or the assenting to, vetoing, or reserving of Bills passed by the legislative chambers. The Governors are authorised, under certain restrictions, to administer the prerogative of mercy by the reprieve or pardon of criminal offenders within their jurisdiction, and to remit fines and penalties due to the Crown. All moneys to be expended for the public service are issued from the Treasury under the Governor's warrant.

In a publication* in which the above matters are exhaustively discussed, it is indicated that there are important functions in the hands of a Governor, and that his influence may extend beyond what is anticipated by those who are unfamiliar with the activities of actual government. This is, however, essentially a matter of individual character. A Governor is entitled to the fullest confidence of his Ministers, to be informed at once of any important decisions taken by his Cabinet, and to discuss them with the utmost freedom. He can point out objections, give advice, deprecate measures, and

* "Responsible Government in the Dominions," A. B. Keith, Oxford, Clarendon Press, 1912, Vol. I.

urge alterations, subject, however, to his remaining always behind the scenes. It should be remembered, moreover, that the State Executive Councils owe their existence to the Royal Letters Patent constituting the office of Governor and that, in law, the Governor is never bound to accept the advice of his Ministers. He cannot indeed do many things without their advice, for it is provided by law (either in the Constitution or Interpretation Acts, or by authoritative usage) that a Governor-in-Council must act on the advice of the Council. He cannot therefore perform any act in Council without a majority, though he can always refuse to act, and thus force his Ministers either to give way on the point at issue or to resign their posts. Even in the case of a ministerial act, he can forbid a Minister to take any action on pain of dismissal. Nominally a Governor will, of course, be justified in accepting the advice of his Ministers as being a correct statement of the facts and law, but he is not bound to be so satisfied, and in matters of law he must exercise his own judgment if he be in doubt. A Governor is not, however, entitled to refuse to act on the advice of his Ministers because he personally does not approve of their action or policy; his duty is not to his own conscience, but to the people of the State which he governs, and he should execute that duty independently of every other consideration.

Although the above furnishes a brief résumé of the powers of a Governor from a legal point of view, in practice the exercise of his powers is generally limited by his ability to persuade his Ministers as to the desirability of any particular course of action. Disagreement with Ministers is only justifiable in extreme cases, and even then it involves the responsibility of finding other Ministers, who must either shew that they have as much support as any other party, or be prepared to administer during a dissolution, pending an appeal to the people. It may be remarked that a Governor who cannot work with Ministers possessing the support of the people must be recalled, unless he has acted on Imperial grounds, and the dispute is not one between him and Ministers, but between the Imperial and State Governments.

It may also be pointed out that a Governor, besides acting according to law, has, within the range of what is lawful, to act according to the instructions of the Secretary of State. He is called upon to do so by the instruments which create his office and appoint him Governor, and he obeys the Secretary of State as the mouthpiece of the Crown. Historically, there have been many cases in which these instructions have placed Governors in opposition to their Ministers.

The present Governor-General is the Right Honourable LORD HENRY WILLIAM FORSTER OF LEPE, P.C., G.C.M.G. He assumed office on the 6th October, 1920. Particulars of previous Governors-General are given on p. 27 hereinbefore.

The following is a list of the Governors of the various States of the Commonwealth :—

New South Wales ..	SIR WALTER EDWARD DAVIDSON, K.C.M.G.
Victoria	Colonel the Rt. Hon. GEORGE EDWARD JOHN MOWBRAY ROUS, EARL OF STRADBROKE, K.C.M.G., C.B., C.V.O., C.B.E.
Queensland ..	Lieutenant-Colonel the Rt. Hon. SIR MATTHEW NATHAN, P.C., G.C.M.G.
South Australia ..	Lieutenant-Colonel SIR WILLIAM ERNEST GEORGE ARCHIBALD WEIGALL, K.C.M.G.
Western Australia ..	SIR FRANCIS ALEXANDER NEWDIGATE NEWDEGATE, K.C.M.G.
Tasmania	SIR WILLIAM LAMOND ALLAEDYOE, K.C.M.G.

7. Cost of Parliamentary Government.—The following statement shews the cost of parliamentary government in the Commonwealth and in each State, as well as the cost per head of population, for the year ended the 30th June, 1920. In order to avoid any incorrect conclusions as to the cost of the Governor-General's or Governor's establishment, it may be pointed out that a very large part of the expenditure (with the exception of item "Governor's salary") under the head of Governor-General or Governor represents official services entirely outside the Governor's personal interests, and carried out at the request of the Government.

COST OF PARLIAMENTARY GOVERNMENT, 1919-20.

* See preceding paragraph. (a) Including Lower House. (b) Included in Upper House. (c) Included in Miscellaneous. (d) See note (e). Ministers are allowed £1 per day when travelling. (e) £5,000 is paid to the Railway Department to cover issue of passes to State Governor and Staff, members of Parliament of Victoria and other States, and Executive Councillors. (f) Not available. Each member of both Houses has a pass for the whole of the State Railways. (g) Included in Electoral Office. (h) Exclusive of travelling expenses of members, free passes, special trains, etc. (i) Included in cost of elections. (j) Stationery included with miscellaneous. (k) Including referenda, alterations to Constitution. (l) Included in item Hansard.

§ 2. Parliaments and Elections.

1. Qualifications for Membership and for Franchise.—The conspectus in § 4 of this section in the previous issue of the Year Book gives particulars as to the legislative chambers in the Commonwealth and State Parliaments, and shews concisely the qualifications necessary for membership and for the franchise in each House. Disqualification of persons otherwise eligible, either as members or voters, are generally on the usual grounds of being of unsound mind or attainted of treason, being convicted of certain offences, and, as regards membership, on the grounds of holding a place of profit under the Crown, being pecuniarily interested in a Government contract, or being an undischarged bankrupt.

2. The Federal Parliament.—The Senate consists of 36 members, six being returned by each of the original federating States. Members of this chamber are elected for a term of six years, but by a provision in the Constitution a certain number retire at the end of every third year, although they are eligible for re-election. In accordance with the Constitution the total number of members of the House of Representatives must be as nearly as possible double that of the Senate. In the House of Representatives the States are represented on a population basis, and the numbers stand at present as follows:—New South Wales, 27; Victoria, 21; Queensland, 10; South Australia, 7; Western Australia, 5; Tasmania, 5—total, 75. The Constitution provides for a minimum of five members for each original State. Members of the House of Representatives are elected for the duration of the Parliament, which is limited to three years. In elections for Senators, each State is counted as a single electorate, but an elaborate scheme of subdivision had to be undertaken in order to provide workable electorates in each State for members of the House of Representatives. Members of both Houses are paid at the rate of £1,000 per annum. Further information regarding the Senate and the House of Representatives is given on pages 10 to 14 hereinbefore.

Particulars of Elections. There have been seven complete Parliaments since the inauguration of Federation. The dates of the opening and dissolution of these Parliaments are given on page 26. The fifth Parliament, which was opened on the 9th July, 1913, was dissolved on the 27th June, 1914, in somewhat unusual circumstances. Under Section 27 of the Constitution, it is provided that, should the Senate fail to pass, or pass with amendments, any proposed law previously passed by the House of Representatives, and should the latter House, after a specified interval, again pass the proposed law, with or without the amendments of the Senate, and the Senate for a second time reject it or pass it with amendments to which the lower House will not agree, then the Governor-General may dissolve the two Houses simultaneously. For the first time in the history of the Commonwealth this deadlock between the Senate and the House of Representatives occurred in the second session of the fifth Parliament, and, in accordance with the section of the Constitution referred to above, both Houses were dissolved by the Governor-General. The first session of the eighth Parliament opened on the 26th February, 1920. Particulars regarding Commonwealth elections may be found in the tables given hereunder:—

FEDERAL ELECTION, MARCH, 1901.

	1913	1,401,042	1,260,335	2,661,377	1,078,997	876,726	1,955,723	77.01	69.56	73.49
	1914	1,225,990	1,122,451	2,348,441	954,768	772,138	1,726,906	77.88	68.79	73.53
	1917	1,262,527	1,207,938	2,470,465	1,041,552	892,926	1,934,478	82.50	73.92	78.30
	1919	1,395,165	1,367,468	2,762,633	1,063,029	914,816	1,977,845	76.19	66.90	71.59

In the Senate the figures for the year 1906 shew that ballot-papers were issued to 50.21 per cent. of the electors, and are a slight improvement on those for the year 1903, when only about 47 per cent. of the electors visited the polls. There was, however, a substantial increase in the number of electors who voted at the 1910 elections, 62.16 per cent. of the persons on the rolls exercising the franchise. The elections of 1913 shewed a gratifying increase over those of 1910, no less than 73.66 per cent. of the persons on the rolls exercising their right to vote, while in 1914, the percentage was almost as high, viz., 72.64 per cent. It will be seen from the foregoing table that the electors of the Commonwealth are setting a higher value on the privilege of the franchise. The percentage of female voters in 1914, while still considerably below that of the males, shews a marked increase on that of female voters in the earlier years of Federation. At the elections in 1917, the proportion of voters of both sexes was the highest yet recorded. In 1919 the proportion is lower, approximating to the results of the 1913 and 1917 elections.

3. Commonwealth Referenda, 26th April, 1911.—Two proposed laws for the alteration of the Constitution were submitted to the people for acceptance or rejection on the 26th April, 1911. They were (a) The Constitution Alteration (Legislative Powers) 1910, and (b) the Constitution Alteration (Monopolies) 1910. If, in a majority of the States, a majority of the electors voting approve the proposed laws, and if a majority of all the electors voting also approve them, they are presented to the Governor-General for the King's assent. Particulars of the alterations proposed have already been given (see page 15).

Results of the Referenda of 1911 are given in the following table, which shews the number of electors enrolled, electors to whom ballot papers were issued, and the number of votes in favour of, and against, each of the proposed laws. As will be seen, neither of the proposed laws was approved by the people.

**COMMONWEALTH REFERENDA (LEGISLATIVE POWERS AND MONOPOLIES),
TAKEN ON 26th APRIL, 1911.**

4. Commonwealth Referenda, 31st May, 1913.—At the general elections that took place on 31st May, 1913, the question of altering the Constitution so as to extend the powers of the Commonwealth was again submitted to the people. The particulars of the proposed laws have been given on page 15 hereinbefore. The results of the Referenda of 1913 are given below, and, as will be seen, none of the proposed laws was approved by the electors.

COMMONWEALTH REFERENDA (LEGISLATIVE POWERS) TAKEN ON 31st MAY, 1913.

5. Commonwealth Referendum, 28th October, 1916.—A special referendum was held on the 28th October, 1916, when the following question with regard to military service was submitted to the people:—"Are you in favour of the Government having, in this grave emergency, the same compulsory powers over citizens in regard to requiring their military service, for the term of this War, outside the Commonwealth, as it now has in regard to military service within the Commonwealth?" In New South Wales, Queensland and South Australia the majority of voters were not in favour of the prescribed question; and in Victoria, Western Australia and Tasmania the majority of votes were cast in its favour, the net result being a majority of 72,476 votes not in favour.

COMMONWEALTH REFERENDUM (MILITARY SERVICE), TAKEN ON
28th OCTOBER, 1916.

6. Commonwealth Referendum, 20th December, 1917.—A further referendum was held on 20th December, 1917, the question being, "Are you in favour of the proposal of the Commonwealth Government for reinforcing the Australian Imperial Force overseas?" The proposal was that, while voluntary enlistment was to continue, compulsory reinforcements should be called up by ballot to make the total reinforcements up to 7,000 per month. In New South Wales, Victoria, Queensland and South Australia the majority of voters were not in favour of the prescribed question; and in Western Australia, Tasmania and the Federal Territories, the majority of votes were cast in its favour, the net result being a majority of 166,588 votes not in favour.

8. The Parliament of New South Wales.—The Legislative Council in this State is a nominee chamber, the Legislative Assembly being an elective body. Theoretically the Legislative Council may contain an unlimited number of members, but in practice the number is restricted to about sixty, the members at the latest available date being sixty-eight. The tenure of the seat is for life; four-fifths of the members must be persons not holding any paid office under the Crown, but this is held not to include officers of His Majesty's sea or land forces on full or half-pay, or retired officers on pensions. The

Legislative Assembly consists of ninety members, who hold their seats during the existence of the Parliament to which they are elected. Nine electorates return five members each, and fifteen return three members each. The duration of Parliament is limited to three years.

Particulars of Elections. Since the introduction of responsible government in New South Wales there have been twenty-five complete Parliaments, the first of which opened on the 22nd May, 1856, and was dissolved on the 19th December, 1857, while the twenty-fifth opened on the 27th April, 1920. The last mentioned Parliament was elected on the 20th March, 1920, under the proportional representation system. Particulars of voting at elections from 1894 to 1920 are given below :—

The franchise was extended to women (*Women's Franchise Act*) in 1902, and was exercised for the first time at a State election in 1904.

9. The Parliament of Victoria.—Both of the Victorian legislative chambers are elective bodies, but there is a considerable difference in the number of members of each House, as well as in the qualifications necessary for members and electors. The number of members in the Upper House in October, 1921, was 34, and in the Lower House, 65. In the Legislative Council the tenure of the seat is for six years, but one member for each province retires every third year, except in the case of a dissolution, when one half of the newly elected members hold their seats for three years only. Members of the Legislative Assembly are elected for the duration of Parliament, which is limited to three years. The franchise was extended to women by the *Adult Suffrage Act 1908*. An elector for the Legislative Assembly may vote only once, plurality of voting having been abolished in 1899; an elector, however, qualified in more than one district, may select that for which he desires to record his vote. A preferential system of voting (see Year Book No. 6, page 1182) was for the first time adopted in Victoria at the election held in November, 1911.

Particulars of Elections. Since the introduction of responsible government in Victoria there have been twenty-five complete Parliaments, the first of which opened on the 21st November, 1856, and closed on the 9th August, 1859, while the twenty-fifth closed on the 30th September, 1920. The first session of the twenty-sixth Parliament opened on the 10th November, 1920, and closed on the 7th January, 1921.

1920..	326,261	(a)	(a)	(a)	868,848	735,054	468,225	63.70

(a) Not contested.

As the table shews, the number of voters for the Legislative Council is considerably less than that for the Legislative Assembly.

10. **The Parliament of Queensland.**—No limit is set by the Constitution Act to the number of members of the Legislative Council of Queensland, the total at the latest available date being fifty-nine. Members are appointed by the State Governor, and it is provided that not less than four-fifths of the members must consist of persons not holding any office under the Crown, except officers of His Majesty's sea or land forces on full or half-pay, or retired officers on pensions. The members are nominated for life. The Legislative Assembly is composed of seventy-two members, and the State is divided into that number of electoral districts. A modified system of optional preferential voting is in operation in Queensland. (See Year Book No. 6, page 1183.)

Particulars of Elections. Since the establishment of responsible government in Queensland there have been nineteen complete Parliaments, the first of which opened on the 29th May, 1860, and dissolved on the 20th May, 1863, while the first session of the twentieth Parliament opened on the 12th July, 1915. At the elections held in May, 1915, the principle of compulsory voting was introduced for the first time in Australia. It will be seen that of the total number of electors enrolled, 88.14 per cent. went to the polls. Statistics regarding the last nine elections are given below :—

ELECTIONS FOR QUEENSLAND LEGISLATIVE ASSEMBLY, 1902 TO 1920.

(a) Incomplete; percentages based on available returns.

(b) Not available.

The election of 1907 was the first State election in Queensland at which women voted, the privilege being conferred under the *Elections Acts Amendment Act 1905*. Some of the returns did not separate the sexes in the figures respecting the number of electors who voted, and the percentage of males and females was therefore calculated on the total returns where the subdivision was made.

11. **The Parliament of South Australia.**—In this State there is a Legislative Council composed of twenty members and a House of Assembly with forty-six members, both chambers being elective. The State is divided into five districts, which return four members each to the Legislative Council. For the House of Assembly, eight districts return three members each, and eleven districts two members each.

Particulars of Elections. Since the inauguration of responsible government in South Australia there have been twenty-three complete Parliaments, the first of which was opened on the 22nd April, 1857, and dissolved on the 1st September, 1859, while the twenty-third was opened on the 25th July, 1918, and terminated on the 28th February, 1921. The first session of the twenty-fourth Parliament began on the 21st July, 1921. Particulars of voting at the different elections from the year 1900 are given below :—

(a) In contested districts.

It is interesting to note that South Australia was the first of the States to grant women's suffrage (under the *Constitution Amendment Act 1894*), the franchise being exercised for the first time at the Legislative Assembly election on the 25th April, 1896.

12. The Parliament of Western Australia.—In this State both chambers are elective. For the Legislative Council there are thirty members, each of the ten provinces returning three members, while the Legislative Assembly is composed of fifty members, one member being returned by each of the fifty electoral districts. At the expiration of two years from the date of election to a seat in the Legislative Council, and every two years thereafter, the senior member for the time being for each province retires. Seniority is determined (a) by date of election, (b) if two or more members are elected on the same day, then the senior is the one who polled the least number of votes, (c) if the election be uncontested, or in case of an equality of votes, then the seniority is determined by the alphabetical precedence of surnames and, if necessary, Christian names. Members of the Legislative Assembly are elected for three years.

Particulars of Elections. Since the establishment of responsible government in Western Australia there have been ten complete Parliaments, the first of which was opened on the 30th December, 1890, while the eleventh Parliament was elected on 12th March, 1921. Women's suffrage was granted by the *Electoral Act* of 1899. At the 1921 elections, the first woman member elected to an Australian Parliament was returned. The preferential system of voting in use in Western Australia is described in Year Book No. 6, page 1184. Particulars relating to the last eight Assembly and seven Council elections are given in the tables below:—

PARLIAMENTARY ELECTIONS, WESTERN AUSTRALIA, 1901 TO 1921.

13. The Parliament of Tasmania.—In Tasmania there are two legislative chambers—the Legislative Council and the House of Assembly, both bodies being elective. The Council consists of eighteen members, returned from fifteen districts, Hobart returning three, Launceston two, and the remaining thirteen districts sending one member each. There are five House of Assembly districts corresponding to the Commonwealth electoral districts, each returning six members, who are elected under a system of proportional representation which first came into force at the 1909 elections. (See Year Book No. 6, page 1185.) Women's suffrage was first granted in this State under the *Constitution Amendment Act 1903*.

Particulars of Elections. The first Tasmanian Parliament opened on 2nd December, 1856, and closed on 8th May, 1861. There have been nineteen complete Parliaments since the inauguration of responsible government. The first session of the twentieth Parliament opened on 22nd July, 1919. Particulars of the voting at the last eight elections are given hereunder:—

(a) Manhood suffrage, Act 64 Vic., No. 5. Universal adult suffrage, Act 3 Edward VII., No. 17, has been prescribed in all subsequent elections. (b) First election with six-member districts and single transferable vote.

During the same period, the percentages of informalities in Senate elections in Tasmania were 4.05, 4.48, 3.29, 6.15, and 3.72.

§ 3. Administrative Government.

In previous issues of the Official Year Book a conspectus was given in tabular form of the various departments in each State, together with a list of the principal Acts administered by them and the matters dealt with by them or under their control. See Official Year Book No. 12, pp. 924 *et seq.*

§ 4. Conspectus of Acts relating to the Constitutions of the Commonwealth and the Australian States.

The principal provisions of the Acts at present in force relating to the Constitution of the Commonwealth and the six States were given in summarized form in Official Year Book, No. 13, pp. 928 *et seq.* Some minor alterations have been made since the summary was prepared.

SECTION XXVI.

LOCAL GOVERNMENT.

§ 1. Introduction.

1. *Early History and Systems of Local Government.*—A description of the systems of Local Government and their development in the several States of the Commonwealth was published in 1919 by the Commonwealth Bureau of Census and Statistics in a separate work entitled "Local Government in Australia." The early history of Local Government in Australia was also dealt with. In addition, descriptions were given of the various systems of water supply and sewerage, fire brigades, harbour trusts and marine boards, together with the bodies controlling the same.

Limits of space preclude the incorporation of information regarding the constitution etc., of municipal and other bodies contained in the publication referred to except in cases where fresh developments have taken place.

§ 2. Local Government Systems.

1. *New South Wales.*—(i) *Present System of Local Government.* The law relating to local government in New South Wales is now contained in Act No. 41 of 1919; this Act, however, does not affect the special Acts applying to the City of Sydney. Practically the whole of the State, with the exception of the Western Division, has been brought under the operation of this Act, the total area incorporated at the end of 1919 being 183,530 square miles, of which 180,708 square miles are comprised within shires and 2,822 within municipalities. The areas incorporated comprise the whole of the eastern and central divisions of the State, with the exception of Lord Howe Island, the islands in Port Jackson, and the quarantine station at Port Jackson.

The Act No. 41 of 1919, which consolidated all previous Acts, came into operation on the 1st January, 1920; it provides for the continuation of existing shires and municipalities, for the creation of new ones, and for their reconstitution by uniting, dividing, altering, or converting areas.

(ii) *Municipalities.* Including the City of Sydney there were 183 municipalities in New South Wales at the end of 1919; of these, forty were in the suburbs of Sydney and eleven in the district of Newcastle and suburbs.

(a) *Capital Value, Area, Population, and Rates Levied.* The following table shows the improved capital value, the area, population, number of buildings, and amount of rates levied in municipalities for the years 1901 and 1915 to 1919:—

NEW SOUTH WALES.—MUNICIPALITIES, IMPROVED CAPITAL VALUE, AREA, POPULATION, NUMBER OF BUILDINGS, AND TOTAL RATES LEVIED, 1901 AND 1915 TO 1919.

(a) See note (a) to preceding table.

(b) See note (b) to preceding table.

(d) *Assets and Liabilities.* The financial position of the municipalities as at the 31st December, 1919, is shewn by the following statement of assets and liabilities of the various funds :—

NEW SOUTH WALES.—MUNICIPALITIES, ASSETS AND LIABILITIES, 1919.

Particulars.	Sydney.	Suburbs.	Country.	Total.
<i>Assets—</i>	£	£	£	£
General fund	11,578,854 (a)	454,640	561,387	1,016,027 (b)
Trading accounts	251,379	251,379 (b)
Special and local funds		54,570	1,904,682	1,959,252 (b)
Loan funds		165,348	652,805	818,153 (b)
Reserves and renewals account		1,138	28,660	29,798 (b)
Total	11,578,854 (a)	675,696	3,398,913	15,653,463
<i>Liabilities—</i>				
General fund	11,122,589 (a)	266,534	133,952	400,486 (b)
Trading accounts	107,192	107,192 (b)
Special and local funds		12,831	1,704,699	1,717,530 (b)
Loan funds		790,979	639,185	1,430,164 (b)
Reserves and renewals account		1,138	28,613	29,751 (b)
Total	11,122,589 (a)	1,071,482	2,613,641	14,807,712

(a) See note (a) to last table on preceding page.

(b) See note (b) to last table on preceding page.

(iii) *Shires.* The total area of the 136 shires constituted under the new system is 180,708 square miles, and the population on the 31st December, 1919, was 692,230.

The shires vary in area from 36 square miles in the case of Ku-ring-gai, immediately north of the metropolis, to 5,730 square miles in the case of Lachlan in the Condobolin district.

(a) *Valuation and Rates Levied.* The unimproved capital value of the shires in 1919 was £110,881,306, but it is not possible to give the improved capital value or the assessed annual value, as the shires are not compelled to make these valuations. The total amount of all rates levied in 1919 was £763,356.

(b) *Revenue.* The principal heads of revenue for the last five years are shewn in the following table :—

NEW SOUTH WALES.—INCOME OF SHIRES, 1915 TO 1919.

Particulars.(a)	1915.	1916.	1917.	1918.	1919.
<i>General Fund—</i>	£	£	£	£	£
General rates (including interest)	612,612	633,973	672,473	710,983	742,026

2. *Victoria.*—(i) *Present System of Local Government.* Local government is now administered under the Act of 1915 throughout the whole of the State (with the exception of French Island) which is divided into cities, towns, boroughs, and shires. Melbourne and Geelong, having been incorporated under special statutes prior to the establishment of a general system of local government, are not subject to the provisions of the Local Government Act except in a few comparatively unimportant details.

In addition to the endowment of £50,000, the municipalities received from the Government during the financial year 1919–20 a sum of £69,532 out of the Licensing Fund as the equivalent for (a) fees for licenses, (b) fees for the registration of brewers and spirit merchants, and (c) fines, penalties, and forfeitures incurred under the Licensing Act 1915.

(ii) *Boroughs and Shires.—Number, Population, and Value of Ratable Property.* The following table shows the number of cities, towns, boroughs, and shires, their estimated population, the number of ratepayers and dwellings, and the value of ratable property for the years 1901 and 1916 to 1920 inclusive :—

VICTORIA.—PARTICULARS OF MUNICIPALITIES, 1901 AND 1916 TO 1920.

(a) Including interest on loans.

4. *South Australia.*—(i) *Present System of Local Government.* The more settled portion is under the jurisdiction of municipal corporations under the Act of 1890 and its amendments, and of district councils under the Act of 1914, as amended in 1918. Subsidies of 25 per cent. on current rates collected are paid to corporations and to district councils. Votes are annually provided by Parliament of about £200,000, for payment to corporations and district councils as a contribution towards the cost of main roads throughout the State and other roads in newly-settled areas.

(ii) *Finances of Corporations and District Councils.* The subjoined tables shew the amounts of assessments and the revenue and expenditure of corporations and of district councils for the financial years 1901 and 1915 to 1919; the figures given are exclusive of the Main Roads Funds, particulars regarding which may be found in the section of this book on "Roads and Bridges."

1920 ..	23	56,462	155,813	(c)	(c)	34,336	194,157

(a) Census figures, 1901.

(b) Returns for thirty-nine municipalities only.

(c) Not available.

Complete particulars of improved or unimproved capital values are not available. In the year 1915 the capital value of ratable property in municipalities was £24,921,422; in 1916, £26,817,864; in 1917, £24,933,426; in 1918, £26,077,875; in 1919, £26,172,435; and in 1920, £26,280,406.

(iii) *Revenue and Expenditure of Municipalities.* The following table gives particulars as to the revenue and expenditure of municipalities during the years 1901 and 1915 to 1920 :—

WESTERN AUSTRALIA.—REVENUE AND EXPENDITURE OF MUNICIPALITIES, 1901 AND 1915 TO 1920.

Year ended the 31st October—	Revenue.				Expenditure.			
	From Rates.	From Govt. Grants.	From other Sources.	Total.	Works and Improvements.	Disbursements in respect of Loans.	Other Expenses.	Total.
	£	£	£	£	£	£	£	£

(a) Year ended 31st December. (b) Not available. (c) Including Loans raised during the year and interest on Sinking Fund investments.

(vi) *Boards of Health.* On the 31st October, 1920, there were twenty-six Local Boards of Health within municipalities, and on the 30th June, 1920, sixty-one under control of Road Boards, and twenty-eight extra-municipal Boards. In and after 1911, the financial year of Municipal Local Health Boards ended 31st October, and that of extra-municipal Boards, 30th June.

The following table shows particulars of the receipts and expenditure of the various Boards—both municipal and extra-municipal—during the years 1901 and 1915 to 1920 :—

WESTERN AUSTRALIA.—RECEIPTS AND EXPENDITURE OF LOCAL HEALTH BOARDS, 1901 AND 1915 TO 1920.

Year ended the 31st October—	Revenue.			Expenditure.		
	From Public Health Rate.	From other Sources.	Total.	On Sanitary Services.	Other Expenses.	Total.

(a) Exclusive of 13 inactive boards. (b) Exclusive of 8 inactive boards. (c) Exclusive of 10 inactive boards. (d) Exclusive of 8 inactive boards. (e) Including sanitary rates. (f) Including sanitary fees and charges. (g) Exclusive of 9 inactive boards. (h) Exclusive of 11 inactive boards.

6. *Tasmania.*—(i) *Systems of Local Government.* The whole State, with the exception of the cities of Hobart and Launceston, which were incorporated under separate Acts, was divided by the Local Government Act of 1906 into municipal districts. Amendments to that Act were made in 1908, 1911, 1918, 1919, and 1920.

(ii) *Annual Value, Revenue, and Expenditure of Municipalities.* The following table shows the annual value, total receipts, and expenditure of municipalities for the years 1915 to 1919 inclusive :—

TASMANIA.—ANNUAL VALUE, REVENUE AND EXPENDITURE OF MUNICIPALITIES, 1915 TO 1919.

Year.	Number of Municipalities.	Annual Value of Ratable Property.	Revenue.				Expenditure. (b)
			From Rates.	From Govt.	From other Sources. (a)	Total.	
		£	£	£	£	£	£
1915 ..	50	1,654,654	190,491	14,651	172,006	377,148	394,374
1916 ..	50	1,717,878	188,939	12,753	216,880	418,572	510,977
1917 ..	50	1,769,443	202,119	18,527	249,756	470,402	487,615
1918 ..	50	1,787,234	216,232	22,266	318,511	557,009	558,939
1919 ..	50	1,872,336	240,661	33,967	304,258	578,886	585,491

(a) Including sums derived from loans. (b) Including repayments of loans.

According to the latest estimate made by the Commissioner of Taxes the capital value of ratable property in 1919 was £37,121,328.

(iii) *Total Revenue and Expenditure of Local Bodies.* In addition to the local authorities already mentioned, seven Marine Boards and three Harbour Trusts have been established at ports in Tasmania for the purposes of constructing and maintaining wharves and jetties and of controlling all matters relating to shipping in the respective ports. Of the Water Trusts, seven maintain independent existence, and the remaining twenty-five are incorporated in the Municipalities. There are twenty-four

independent Cemetery Trusts. The subjoined statement shows the total revenue and expenditure for all local bodies, exclusive of all amounts contributed by the general Government, during each year from 1915 to 1919 inclusive:—

TASMANIA.—REVENUE AND EXPENDITURE OF ALL LOCAL BODIES, EXCLUSIVE OF AMOUNTS CONTRIBUTED BY THE GENERAL GOVERNMENT, 1915 TO 1919.

Particulars.	1915.	1916.	1917.	1918.	1919.

1919 ..	141,798	708,990	1,131.72	60.11	484,798	1,052
1920 ..	145,304	726,520	1,161.94	63.73	503,362	1,096

(iii) *The Hunter District Water Supply and Sewerage.* (a) *Water Supply.* The number of service reservoirs has been increased to seventeen, with a capacity of 14,849,260 gallons. Of these twelve are supplied by gravitation from the summit reservoir, four by repumping, and one by direct pumping. The total length of water mains has risen to 449 miles.

The capital debt of the Board to the Government at 30th June, 1920, in respect of water supply was £973,512.

In the subjoined table particulars are given as to the revenue and expenditure, and also as to the number of houses and population supplied in 1901 and 1916 to 1920 :—

PARTICULARS OF HUNTER DISTRICT WATER SUPPLY, 1901 AND 1916 TO 1920.

Year ended 30th June.	Revenue.	Working Expenses (including Interest).	Houses Supplied.	Estimated Population Served.	Supply.	
					Daily Average.	Total.
	£	£	No.	No.	1,000 gallons.	1,000 gallons.
1901	27,405	30,948	9,086	45,400	1,005	366,889
1916	79,507	58,436	22,056	110,280	3,507	1,283,754
1917	78,040	65,338	22,604	113,377	3,435	1,253,897
1918	80,607	73,949	23,257	116,285	3,442	1,256,628
1919	91,204	76,297	24,079	120,395	4,065	1,483,806
1920	97,469	88,488a	24,864	124,320	4,319	1,580,905

(a) Including £32,617; interest on capital debt, and £10,355, instalment to sinking fund for reconstruction of renewable works.

The average daily consumption of water for all purposes per inhabitant was 34.74 gallons during the year 1920, as against 33.76 gallons during the previous year.

(b) *Sewerage Works.* Considerable progress has been made by the Department of Public Works with the construction of the sewerage works for Newcastle and suburbs. Up to the 30th June, 1920, about 133 miles of sewers, connecting with 11,338 separate properties, were under the control of the Board. For the financial year 1919–20 the revenue was £28,050 and the expenditure £40,626, the latter amount including a £4,949 instalment to the sinking fund for the reconstruction of renewable works. The capital debt of the Board to the Government at 30th June, 1920, in respect of sewerage was £518,804.

(iv) *Water Supply and Sewerage in Country Towns.* The works of country water supply and sewerage are now carried on under the Local Government Act 1919, as amended in 1920. The operation of Part XIV. of the Principal Act commenced on 1st September, 1920, and until that date the Country Towns Water Supply and Sewerage Acts remained in operation.

(a) *Waterworks.* Up to the 30th June, 1918, 58 country municipalities had availed themselves of the privileges of the Acts as regards waterworks, all of which at that date had been completed and handed over by the Government. The capital debt of these works as gazetted was £1,466,751, and the total sums payable annually for various periods ranging up to 100 years was £55,306, including interest ranging from 3½ per cent. to 4 per cent. per annum, the first repayments having become due at various dates, starting from the end of the year 1893. In the calculation of these repayments the interest during construction on the sums actually expended has been added, and any payments by the councils, as well as sums remitted under the authority of the Acts, have

been deducted. It has recently been found necessary to increase the rate of interest from 4 to 5 per cent., and then $5\frac{1}{2}$ per cent. per annum. Under the present Local Government Act, the Government may from time to time fix the rate of interest which shall be payable upon the amount of capital debt remaining unpaid on these works, and may thereupon alter the instalments accordingly. Other schemes of water supply and extensions of existing works are in course of construction. A few other municipalities have constructed works out of their own resources. The water supply of Broken Hill with a loan expenditure of £481,795 was constructed under a special Act, and is administered by the Minister for Public Works. The Junee Water Supply has been placed under special administration and the Grafton Water Supply serving both Grafton and South Grafton is vested in a board composed of three members of each council.

(b) *Sewerage Works.* Only twenty municipal councils have taken advantage of the Act providing for the construction of sewerage and storm water drainage works in country towns. On the 30th June, 1920, the capital debt of these systems was £474,952, the amount payable annually to the Government being £19,965. Other sewerage systems, as well as extensions to existing systems, are in course of construction.

2. *Victoria.*—(i) *The Melbourne and Metropolitan Board of Works.* No alteration has been made in the constitution of the Board. Under the provisions of section 71 of the Melbourne and Metropolitan Board of Works Act 1915, however, and by consent of the Governor in Council given on 14th December, 1920, all land within thirteen miles of the General Post Office was included within the Metropolis for Water Supply and Sewerage purposes. This land area consisted of 434 square miles, and on 31st December, 1920, comprised 18 cities, 3 towns, and 1 borough and part of another, also 1 shire and parts of 13 others, a total of 37 municipalities or portions thereof. Control for water supply purposes is also exercised by consent of the Governor in Council over other parts of certain municipalities outside the thirteen mile radius, the Board supplying water to the Metropolitan Farm at Werribee, the outfall sewer area, and elsewhere. Various other shires also arrange for bulk supplies of water. The total estimated population served on the 31st December, 1920, was 795,851. The liability on Government loans on the 30th June, 1920, was £1,313,182, and for loans raised by the Board was £11,523,613. The Board is still empowered to borrow £303,139 before reaching the limit of its borrowing powers.

(a) *Total Cost of Water Supply and Sewerage.* The subjoined table shews the total cost of construction and maintenance of water supply and sewerage from 1853 to 1920:—

MELBOURNE AND METROPOLITAN BOARD OF WORKS.—TOTAL COST OF CONSTRUCTION AND MAINTENANCE OF WATER SUPPLY AND SEWERAGE, 1853 TO 1920.

Period ending 30th June.	Water Supply.			Sewerage.			Grand Total.
	Capital Cost.	Working Expenses.	Interest.	Capital Cost.	Working Expenses.	Interest.	
	£	£	£	£	£	£	£
1853 to 1891	3,378,246	420,833	1,021,676	4,820,755
1891 to 1901	336,957	367,506	1,021,181	3,307,764	114,268	919,017	6,066,693

(a) Credit by excess of stock distribution (£7,020) over purchases (£2,727).

(ii) *Melbourne Metropolitan Water Supply. (a) Development of System.* The following statement shows the development which has taken place in the water supply system of Melbourne during the 63 years since its inception :—

MELBOURNE WATER SUPPLY SYSTEM, 1857 TO 1920.

Year.	Estimated Population Supplied. (a)	Capital cost. (b)	Charge per 1,000 Gallons.	Rate in £.	Reticulation, Mains, etc., Mileage. (b)	Daily average of annual consumption of water.(a)
1857 (Dec. 31)	95,442	£ 748,974	10/- and 6/-	1/-	104	3,250,000
1920 (June 30)	795,851	4,968,317	1/-	6d.	1,723½	45,187,536

(a) 31st December.

(b) 30th June.

On the O'Shanassy scheme up to 30th June, 1920, the sum of £466,678 has been expended.

(b) *Quantity of Water, Number of Houses, and Population Supplied.* The following table gives various particulars for the years 1901 and 1916 to 1920, shewing the increase in the supply of water in Melbourne and suburbs :—

MELBOURNE WATERWORKS.—NUMBER OF HOUSES, POPULATION, AND WATER SUPPLIED, 1901, AND 1916 TO 1920.

Year. Ended 30th June.	Number of Houses Served.	Estimated Population Supplied.	Average Daily Supply.	Total Supply for the Year ended 30th June.	Average Daily Supply.		Rate Levied.	Assessments of Houses Served by Metropolitan Water Supply.
					Per House.	Per Head of Estimated Population		
	No.	No.	,000 Gallons.	,000 Gallons.	Gallons.	Gallons.		£

1919-20 ..	47,251	398,173	(k) 62,941	15.80	156,588	178,644
Total ..	4,968,317	9,894,664	1,685,855	..	4,276,230	3,932,579

(a) Works commenced in 1853. (b) Revenue commenced in 1854. (c) Returns for expenditure commenced in 1859. (d) First interest paid in 1856. (e) 1906-07. Water rates increased from 6d. to 7d. in the £. (f) Rate reduced from 7d. to 6d. in the £. (g) Not including renewals (£7,349) and special War expenditure (£7,728). (h) Not including renewals (£4,545) and special War expenditure (£4,689). (i) Not including renewals (£3,893) and special War expenditure (£3,632). (j) Not including renewals (£4,183) and special War expenditure (£1,888). (k) Not including renewals (£6,343) and War expenditure (£552).

(iii) *Melbourne Sewerage.* The movable pan system has been displaced by the water carriage system throughout the greater portion of the metropolis, and in other parts the work of reticulation is now proceeding.

(a) *Metropolitan Sewage Farm.* The farm originally contained 8,847 acres, situated on the western side of the Werribee River. Since 1911, 3,129 acres have been purchased, making the total area of the farm 11,976 acres at 30th June, 1920, its total cost to that date being £578,139. About 34,360,794 gallons of sewage had to be disposed of every 24 hours during the year 1919-20 in irrigating the fields. During the financial year 1919-20, 5,085 sheep were sold, the profit for the year being £4,582. Cattle to the number of 2,268 were sold, the profit for the year on cattle being £21,019.

(b) *Number of Houses Connected, Capital Cost, Revenue and Expenditure.* The following table gives particulars as to the number of houses connected to the sewerage system, the total capital cost, and the receipts and disbursements during 1901-2 and 1915-16 to 1919-20 :—

MELBOURNE SEWERAGE WORKS.—TENEMENTS CONNECTED, CAPITAL COST, REVENUE, MAINTENANCE, AND WORKING EXPENSES, 1901-2 AND 1915-16 TO 1919-20.

Year.	Number of Houses Connected.	Capital Cost.	Revenue.			Maintenance, Repairs and Renewals.
			From Rates.	From other Sources.	Total.	
	No.	£	£	£	£	£
1901-2 ..	47,172	3,610,225	126,725	10,968	137,693	24,336
1915-16 ..	143,737	7,135,580	307,625 (a)	50,487	358,112	52,402 (b)

1918-19 ..	155,238	7,718,958	341,053 (f)	38,847	379,900	69,777 (g)
1919-20 ..	158,735	7,877,246	362,136	46,921	409,057	75,094 (h)

(a) Rate reduced from 1s. 1d. to 11d. in the £. (b) Not including renewals (£3,424) and special War expenditure (£2,925). (c) Rate reduced from 11d. to 10d. in the £. (d) Not including renewals (£3,790) and special War expenditure (£2,635). (e) Not including renewals (£3,402) and special War expenditure (£2,609). (f) Rate increased from 10d. to 11d. (g) Not including Renewals (£3,383) and special War expenditure (£1,564). (h) Not including renewals (£3,775) and special War expenditure (£553).

(iv) *Water Supply in Country Towns and Districts.* Most of the country waterworks are controlled by the State Rivers and Water Supply Commission. Further information with regard to this Commission and to the works and districts under its control are given in the section in this book dealing with Water Conservation and Irrigation. There are, however, a number of other waterworks which are controlled by Waterworks Trusts or by municipal corporations.

The following table gives particulars as to the waterworks under the control of Trusts and municipal corporations for the years 1901 and 1916 to 1920 :—

VICTORIA.—COUNTRY WATERWORKS UNDER TRUSTS AND MUNICIPAL CORPORATIONS, 1901 AND 1916 TO 1920.

Year.	Waterworks Trusts.				Municipal Corporations.			
	Number of Trusts.	Capital Cost.	Capital Indebtedness.	Interest Outstanding.	Number of Corporations.	Capital Cost.	Capital Indebtedness.	Interest Outstanding.
	No.	£	£	£	No.	£	£	£
1901 ..	76	823,418	748,089	(a)	24	(a)	470,041	(a)
1916 ..	97	1,206,938	929,561	13,128	28	700,832	450,518	2,050
1917 ..	98	1,224,211	937,810	13,358	28	718,089	464,114	1,871
1918 ..	98	1,196,335	904,229	12,632	29	773,998	514,115	10,379
1919 ..	98	1,210,097	907,087	13,898	29	779,834	515,240	9,658
1920 ..	98	1,189,259	892,222	14,970	29	782,115	515,364	10,614

(a) Not available.

(v) *Geelong Waterworks and Sewerage Trust.* The cost of the works (water and sewerage) under the control of the Geelong Waterworks and Sewerage Trust to 30th June, 1920, was £800,700, the estimated population served 37,000, and the number of assessments 11,900. The revenue for the year amounted to £51,836.

3. *Queensland.*—(i) *The Metropolitan and Ipswich Water Supply and Sewerage Board.* (a) *General.* Since the publication of Year Book No. 12, the filtration works on Holt's Hill have been put into operation and the whole of the water supply in the Brisbane area is now filtered.

The second reservoir has been completed on Bartley's Hill, bringing the capacity of the service reservoirs to six and a half million gallons. A new reservoir is being constructed on Tarragindi Hill, a suburb of Brisbane, to contain approximately 14,000,000 gallons. It is anticipated that this reservoir will be completed during the year 1921.

(b) *Brisbane Waterworks and Sewerage Works under Construction: Cost, Revenue, Expenditure, and Interest.* The subjoined table gives particulars as to the total capital cost, the revenue and expenditure, and amount of interest and loan redemption during 1901 and each of the years 1915 to 1920 :—

**BRISBANE WATERWORKS AND SEWERAGE WORKS UNDER CONSTRUCTION.—
COST, REVENUE, EXPENDITURE, INTEREST, AND REDEMPTION OF LOANS,
1901 AND 1915 TO 1920.**

Year.	Capital Cost (including Sewerage Works from 1914).	Revenue from Rates and Sales of Water.	Working Expenses.	New Work Construction (including Sewerage Works from 1914).	Interest and Redemption of Loans.
	£	£	£	£	£
1901	694,973	60,120	17,462	7,535	42,426
1915	1,852,622	103,530	50,078	361,765	52,704
1916	2,136,699	111,066	53,879	284,078	53,995
1917	2,422,857	121,514	59,199	286,158	60,388
1918	2,683,846	134,121	65,653	259,132	64,039
1919	3,115,002	156,743	79,667	431,156	72,354
1920	3,661,580	216,620	94,070	546,578	88,033

(c) *Brisbane Waterworks: Length of Mains, Tenements and Population Served, and Water Consumption.* The following table shows the length of mains, the number of tenements connected, the population supplied, the total quantity of water supplied, the average daily supply, and the average daily supply per head of population during 1901 and each year from 1915 to 1920 :—

BRISBANE WATERWORKS.—PARTICULARS, 1901 AND 1915 TO 1920.

Year.	Length of Reticulation Mains.	Number of Tenements Connected.	Estimated Population Supplied.	Quantity Supplied.	Average Daily Supply.	Average Daily Supply per Head of Estimated Population.
	Miles.	No.	No.	,000 Gallons.	Gallons.	Gallons.
1901	198	15,652	78,260	1,536,260	4,208,931	53.78
1915	405	31,442	157,210	2,655,440	7,275,178	46.28
1916	414	31,770	158,030	2,629,108	7,183,354	45.46
1917	429½	33,082	165,410	2,827,836	7,747,498	46.83
1918	451½	34,450	172,250	3,159,105	8,655,082	50.24
1919	477½	36,998	178,620	3,628,478	9,941,036	55.65
1920	505	40,266	193,160	3,293,061	8,997,436	46.58

The total length of the trunk mains is 102½ miles.

(d) *Sewerage Scheme.* Sewerage works are under construction, by which the sewage will be treated by the activated sludge method. The survey work is being carried on, 20,268 houses having now been surveyed, and 77,368 lineal feet of main sewers, including a tunnel under the Brisbane River, have been constructed, while 19,224 lineal feet are under construction.

(ii) *Country Towns' Water Supply.* In addition to the city of Brisbane there were at the end of the year 1919 thirty towns in Queensland provided with water supply systems constructed by municipalities chiefly from Government loans. The subjoined statement gives particulars of all the water supply systems—exclusive of Brisbane—for the year 1919 :—

QUEENSLAND.—PARTICULARS OF COUNTRY WATER SUPPLY SYSTEMS, 1919.

		£			£
Cost of construction to 31/12/19..		1,010,024			
Receipts {	Rates and sales of water	107,530	Expenditure {	Office and salaries	.. 18,121
	Other(a)20,881			Construction 22,419
				Maintenance 38,694
				Interest & redemption 30,967
Total receipts ..		128,411	Total 135,004
Assets		799,977	Liabilities 580,208

(a) Including £9,864 from Government loans.

4. *South Australia.*—(i) *Adelaide Water Supply System.* The water supply system of Adelaide is under the control of the Public Works Department. The total capital cost up to the 30th June, 1920, was £2,172,518, the total revenue being £3,543,470, and the area served approximately 106,465 acres.

The following table gives various particulars relating to the water supply of Adelaide for the years 1916 to 1920 inclusive :—

ADELAIDE WATER SUPPLY.—LENGTH OF MAINS, REVENUE, EXPENDITURE, AND CONSUMPTION OF WATER, 1916 TO 1920.

Year ended 30th June.	Length of Mains.	Gross Revenue.	Working Expenses.	Net Revenue.	Percentage of Net Revenue on Capital Cost.	Total Consumption of Water. (a)
	Miles	£	£	£	%	Million of Gallons.
1916	873	103,947	35,412	68,535	3.42	3,223
1917	882	118,951	32,974	85,977	4.26	4,113
1918	901	118,985	34,298	84,687	4.15	4,266
1919	914	126,110	36,142	89,968	4.33	5,292
1920	947	137,488	43,410	94,078	4.33	5,626

(a) In the Adelaide Water District there are no governing meters. The quantities shewn above are as recorded by gaugings taken at the reservoirs, and include evaporation and absorption.

(ii) *Adelaide Sewerage System.* In connexion with the sewerage system of Adelaide, which is also under the control of the Public Works Department, about 363 miles of sewers had been laid in the city and suburbs up to the 30th June, 1920.

The following table gives particulars relating to the Adelaide sewerage system for the years 1916 to 1920 inclusive :—

ADELAIDE SEWERAGE SYSTEM.—REVENUE AND EXPENDITURE, 1916 TO 1920.

Year ended the 30th June.	Revenue.			Expenditure.			Net Revenue.	
	Rates and Interest.	Sewage Farm. Sales of Produce, etc.	Total.	Maintenance.	Sewage Farm. Working Expenses.	Total.	Total.	Percentage on Capital Cost.
	£	£	£	£	£	£	£	%
1916 ..	56,606	21,207	77,813	11,410	14,432	25,842	51,971	6.39
1917 ..	57,488	13,664	71,152	11,350	10,794	22,144	49,008	5.96
1918 ..	59,345	19,060	78,405	12,054	11,945	23,999	54,406	6.55
1919 ..	60,808	14,697	75,505	13,226	10,409	23,635	51,870	6.12
1920 ..	65,744	20,332	86,076	13,396	10,650	24,046	62,030	7.21

The seaside town of Glenelg is served by separate sewage disposal works, including a pumping station, septic tank, lucerne plots, and filter beds. The net revenue for the year ended 30th June, 1920, was £1,501, being 3.25 per cent. on the capital cost. Up to the same date 15½ miles of sewers had been laid.

The city of Port Adelaide has a sewerage system by which the sewage is pumped to the Sewage Farm. The capital cost of this work at 30th June, 1920, was £307,931. The revenue received for the year ended 30th June, 1920, was £6,460, the working expenses £4,064, leaving a net revenue of £2,396, representing 0.78 per cent. on capital cost. The length of sewers laid at the above date was 42½ miles.

(iii) *Water Supply in Country Towns.* In South Australia there is a number of country water works under the control of the Public Works Department, but there are no fresh additions to be made to the particulars supplied in Year Book No. 12 (page 965).

5. *Western Australia.*—(i) *Water Supply, Sewerage and Drainage Department.* This Department has the management of the undermentioned water supplies :—(a) The Metropolitan Water Supply, Sewerage and Drainage Undertaking. (b) The Goldfields Water Supply Undertaking. (c) Mines Water Supplies, boring and well-sinking in mining districts, formerly a branch of the Mines Department. (d) Water supplies, sewerage and drainage, well-sinking, boring, etc., in agricultural districts, etc., formerly a branch of the Public Works Department.

(ii) *The Metropolitan Water Supply, Sewerage and Drainage Undertaking.*—(a) *Water Supply.* The Metropolitan Water Supply Works were first opened by a private company in October, 1890. Under the provisions of the Metropolitan Waterworks Act 1896, however, the works were purchased by the Government at a cost of £220,000, and were placed under the control of a Board, the functions of which were exercised from 1904 to 1909 by the Minister for Works. By the Metropolitan Water Supply, Sewerage and Drainage Act 1909, all water and sewerage works formerly vested in the Metropolitan Board were transferred to a Minister of Water Supply, Sewerage and Drainage. In August, 1912, the administration was transferred to the Water Supply Department. The supply of water is derived from five sources—(I.) the Victoria Reservoir, (II.) Bickley Brook pipehead dam, (III.) the Mundaring Reservoir, (IV.) Narrogin Brook, and (V.) artesian bores. For the year ending 30th June, 1919, the total consumption of water was 2,174 million gallons, exclusive of water supplied to railways from Walters Brook, Victoria Reservoir, and Narrogin Brook—an increase of 329 millions over the previous year. The number of services at that date was 33,301, and the length of mains was 623 miles.

(b) *Financial Operations of Water Supply Branch.* The following table gives particulars of the financial operations of the Metropolitan Water Supply Branch for each year ending the 30th June from 1916 to 1920 inclusive:—

METROPOLITAN WATER SUPPLY BRANCH.(a)—PARTICULARS OF FINANCIAL OPERATIONS, 1916 TO 1920.

Year ended the 30th June.	Capital Cost of Works.	Depreciation.	Net Capital Cost.	Gross Revenue.	Cost of Maintenance and Management.	Ratio of Working Expenses to Revenue.
	£	£	£	£	£	%
1916	997,650	201,834	795,816	103,668	37,987	36.60
1917	1,019,388	220,750	798,638	95,451	36,075	37.79
1918	1,057,444	240,650	816,794	91,380	34,670	37.94
1919	1,080,876	261,520	819,355	89,215	35,881	40.22
1920	1,119,910	270,498	849,412	96,881	44,829	46.27

(a) Perth, Fremantle, and Claremont combined.

(c) *Consumption of Water.* The following table shews the total annual supply, the average daily supply, and the average daily supply per house and per head of population during each financial year from 1916 to 1920 inclusive:—

METROPOLITAN WATER SUPPLY BRANCH.—CONSUMPTION OF WATER, 1916 TO 1920.

Year.	Average Daily Supply in ,000 Gallons.			Water Supply for Years in ,000 Gallons.			Number of Houses Supplied.	Estimated Population Supplied.	Average Daily Supply.	
	From Reservoirs.	From Bores.	Total.	From Reservoirs.	From Bores.	Total.			Per House.	Per Head of Population.
1916	2,443	2,609	5,052	894,057	955,075	1,849,132	30,782	129,300	164	39.1

(a) Includes water supplies to Railways.

(b) From well.

(d) *Sewerage and Drainage in Perth and Fremantle.* The work of providing a sewerage system for Perth and Fremantle is still proceeding. Up to 30th June, 1920, 13,975 houses had been connected with the sewers. The revenue of the Sewerage and Drainage undertaking for 1918-19 was £54,457, as against £53,258 for the preceding year. The maintenance expenditure for the year amounted to £15,455, and interest and sinking fund charges to £48,871.

(iii) *Goldfields Water Supply Undertaking.* During the financial year 1919-20, the amount of water drawn for the Helena reservoir was 1,344,000,000 gallons, an increase on the previous year of 8,000,000 gallons. The gross revenue was £176,364, and the working expenses £93,238, leaving a surplus available towards interest and sinking fund of £84,126. The outlay for interest and sinking fund charges in respect of supplementary capital absorbed £33,523, leaving £50,603, payable to the State Treasury. During the financial year the State Treasury paid £168,813 interest and sinking fund on State loans in respect to these works, and the operations of the undertaking shewed a net deficiency of £118,210. Reticulation figures are as follows:—Towns reticulation, 238 miles; supply mains to towns, 80 miles; supply mains to mining centres, 72 miles; agricultural extensions, 480 miles; total mains, including main conduit, 1,221.

(iv) *Water Supplies for Towns.* Under the Water Boards Act 1904, the following water undertakings are administered by the Department:—Bridgetown, Brookton, Collie, Cue-Day Dawn, Geraldton, Leonora, Meekatharra, Menzies, Ora Banda, and Pingelly. Water supplies for Albany, Broome, Bunbury, Busselton, Carnarvon, Derby, Katanning, Port Hedland, Roeburne, Sandstone, Wagin, and Wyndham are administered by local boards under the supervision of the Department.

(v) *Mines Water Supplies.* At the present time the water stations under the control of the Chief Engineer for Water Supply number about 1,400, and are spread over an area of nearly 500,000 square miles. The principal works carried out by the Water Supply Department are as follows:—(a) Domestic supplies for mining towns and the supply of water for battery and general mining purposes. (b) Opening up the very remote portions of the State by means of tracks, of which there are about 4,000 miles. (c) The sinking of wells and bore-wells, also testing the country by means of boring to locate water, and thus enabling the mineral resources of the State to be systematically prospected. (d) Diamond drilling has also been carried out for the purpose of testing the country for minerals at depths unattainable with the ordinary boring plants. (e) Over 3,000 miles of stock routes have been opened up, and wells have been sunk at easy stages, capable of watering mobs of 400 head of cattle. Tanks, dams, and reservoirs have been made on the goldfields for the conservation of surface water, their total storage capacity being over 200,000,000 gallons, and their cost over £400,000.

(vi) *Water Supplies in Agricultural Areas.* Owing to the rapid development in agricultural districts in what a few years ago was practically unexplored country, and the consequent necessity for providing water for settlers, a large number of tanks were excavated, and wells sunk where suitable water had been proved by boring. Of 2,520 shallow bores put down, fresh water was obtained in 429, and stock water in 219, the others being salt or dry. The number of tanks excavated to 30th June, 1920, was 361; in addition, four tanks were enlarged, making a total approximate capacity of 131,956,000 gallons, and the number of wells sunk 299. The capital expenditure for the financial year ending June, 1920, was £9,673.

(vii) *Land Drainage.* Under the Land Drainage Act 1900 the drainage undertaking for the Torbay-Grassmere District, Wonnerup, and portion of Harvey and Waroona are

administered by the Department. Undertakings controlled by Boards under the same Act are East Jandakot, Harvey, Njookenbooroo, Stirling, Saidie, Wungong, Benger, and Wagerup.

6. *Tasmania.*—(i) *Hobart Water Supply.* The total capital cost to 30th June, 1921, was £368,789, but a considerable amount of reticulation work has been done out of revenue and not charged to capital account. The outstanding loans at 30th June, 1921, amounted to £317,805. At the same date the number of tenements supplied in the city and suburbs was 9,300, the population 43,905, and the length of reticulation mains 97 miles. The revenue and expenditure for the years 1916 to 1921 were as follows :—

HOBART WATERWORKS.—REVENUE AND EXPENDITURE, 1916 TO 1921.

Particulars.	1916.	1917.	1918.	1919.	1920.	1921.
	£	£	£	£	£	£
Revenue	24,801	21,677	24,160	26,832	28,287	29,570
Expenditure	27,676	28,794	26,490	27,468	30,696	32,175

(ii) *Hobart Sewerage System.* Up to 30th June, 1921, 74½ miles of sewers had been laid at a cost of about £196,943, and 7,319 tenements had been connected. The revenue for the year was £18,325. The suburb of New Town was amalgamated with the city on the 1st January, 1920, and the survey and plans for sewerage in this area are now being proceeded with. In connexion with the Queensborough District, now being sewerage, 9¼ miles of sewers were laid up to 30th June, 1921, at a cost with outfall of £65,602, and 76 tenements were connected.

§ 4. Harbour Trusts.

1. *Introduction.*—In the chief ports and harbours of the Commonwealth, administrative bodies have been created, in whom is vested the control and management of the port with respect to dredging, wharf and harbour accommodation, pilotage, harbour dues, etc.

Of these Trusts or Boards some are purely departmental, some are nominated by Government, while others are comprised of members appointed by the municipal and other associations connected with the port. In the latter case, the Government is usually represented on the Board by one or more nominated members. The Boards and Trusts mentioned hereunder are the only ones for which information is at present available.

2. *Sydney Harbour Trust.*—(i) *Revenue, Expenditure, and Capital Cost.* The subjoined table gives particulars of the revenue and expenditure of the Trust, and also shews the total capital debt for properties, etc., vested in the Commissioners, the

amount of interest payable on the debt, and the balance of revenue after deducting expenditure, interest, and the amount of the Commissioners' salaries :—

SYDNEY HARBOUR TRUST.—REVENUE, EXPENDITURE, CAPITAL DEBT, INTEREST, AND BALANCE, 1901 AND 1916 TO 1920.

Year ended the 30th June.	Revenue.				Expenditure.	Total Capital Debt.	Interest.(b)	Balance.
	Wharfrage and Harbour Rates.	Tonnage Rates and Berthing Charges.	From Other Sources.	Total.				
	£	£	£	£	£	£	£	£
1901(a)	42,784	3,208	12,324	58,316	11,275	4,692,782	55,554	— 8,513
1916..	274,551	17,630	197,540	489,721	171,951(c)	7,948,756	289,256	28,514
1917..	252,044	29,095	230,841	511,980	165,586(c)	8,598,939	330,954	15,440
1918..	280,476	26,862	269,121	576,459	170,854(c)	8,796,521	348,023	57,582

1916	2,092,918	28,253	3.24	46,581	11,268	58.05
1917	1,938,130	31,697	3.93	43,847	11,950	65.41
1918	1,319,455	26,780	4.87	36,577	16,367	107.39
1919	1,848,993	26,981	3.50	45,711	19,263	101.14
1920	1,345,287	37,140	6.62	42,292	25,547	127.95

3. *The Melbourne Harbour Trust.*—(i) *Construction and Development.* Particulars of the origin and constitution of this Trust will be found in Official Year Book No. 12, pp. 970 *et seq.* Since the publication of that volume, the port and harbour have been developed by the extension of existing works and the construction of new piers, wharves, &c. The river has been considerably widened throughout almost its whole navigable course, and has now three swinging basins. The depth at low water has been increased

to 27 feet. Further widening and deepening are being carried out, and additional wharves are being erected. Extensive shed accommodation is being provided on the Victoria Dock wharves, and a new central pier has been completed. The river and dock wharves carry sheds. The total length is 18,364 feet, covering an area of 987,580 square feet. The quantity of material raised by the dredging and excavation done in the improvement of the river and bay amounts to 69,000,000 cubic yards. During the ten years ending 31st December, 1920, the average cost of dredging per cubic yard was 2.96 pence and the cost of towing and depositing 4.28 pence, irrespective of depreciation of plant. The Trust has expended £334,774 in reclaiming land within its jurisdiction. The amount of material raised annually is about 2,652,000 cubic yards.

(ii) *Financial Operations.* The following table gives particulars of the revenue and expenditure of the Trust from 1916 to 1920 inclusive :—

MELBOURNE HARBOUR TRUST.—REVENUE AND EXPENDITURE, 1916 TO 1920.

4. Geelong Harbour Trust.—To the 31st December, 1920, this Trust had borrowed £591,000. The sinking fund at the same date stood at £27,954. The revenue receipts for the year 1920 were £50,020, and the disbursements £60,625.

5. Bundaberg Harbour Board.—The Harbour Board consists of eight members, instead of nine as heretofore, representing the district shire councils and the shipowners and exporters, with one Government nominee. The total exports for the year ending 31st December, 1920, amounted to 7,243 tons, as against 17,865 tons for the previous year. The decrease was owing to shipping troubles and prolonged drought. The principal items of export were:—Raw sugars, 235 tons; refined sugars, 2,196 tons; syrups and molasses, 444 tons; rum and spirits, 2,941 tons; copper ores, 120 tons. The revenue for 1920 amounted to £4,838, as against £5,470 for 1919; the expenditure for 1920 was £5,834 as compared with £6,751 for 1919. Dredging resulted in 28,500 tons of silt, etc., being lifted and deposited at sea.

6. Cairns Harbour Board.—For the year ended 31st December, 1920, the receipts from harbour and berthage dues and miscellaneous items amounted to £32,332, while the revenue from taxes and fixed rates was £30,257. The total income amounted to £34,826. The principal items of export were:—Raw sugar, timber, maize, fruit, meat, and tallow.

7. Rockhampton Harbour Board.—The principal items of export by water in 1920 were—wool, 26,215 bales; preserved and frozen meats, 6,776 tons; tallow, 1,420 tons; blister copper, 6,587 tons; and gold, £405,251 in value. For the year 1920 the receipts were £38,159, including loan advances, £14,835; and the expenditure was £43,554, including £8,991 interest on loans. The total net registered tonnage entering the port in 1920 was 422,105.

8. Bunbury (Western Australia) Harbour Board.—The Board was constituted in 1909, and consists of five members appointed by the Government. The jetty (including new extension of 700 feet) is 2,850 feet long, and can accommodate nine or ten vessels. The depth of water alongside ranges from 18 to 29 feet. Electric and steam gantry cranes are available. Water is laid on for shipping, and the jetty is lighted by electricity. The capital expenditure for the year ending 30th June, 1920, was £39,296, making the total capital expenditure to that date £377,688. The revenue for the year was £16,487, and the expenditure £8,013, the balance being paid into Consolidated Revenue to meet interest and sinking fund. The export tonnage for the year was made up as follows:—Jarrah timber, 87,246 loads of 50 cubic feet; wheat, 38,992 tons; coal (bunker), 16,314 tons; and miscellaneous goods, 747 tons; the total export value being £865,000. The total import tonnage was 8,235 tons.

9. **Fremantle Harbour Trust.**—For the year ended 30th June, 1920, the total revenue of the Fremantle Harbour Trust was £281,600, and the expenditure £130,740. The gross amount paid to the Treasury for the year was £149,686, being interest £73,872, sinking fund £19,301, renewals fund £2,000, and surplus revenue £54,513.

10. **Burnie and Table Cape (Tasmania) Marine Board.**—A breakwater has been constructed 1,250 feet in length with a depth alongside up to 42 feet at low water, together with three timber wharves, two 500 feet and one 400 feet long. The revenue for the year 1920 was £12,491, and the expenditure £18,015, including £13,473 interest on construction loan.

11. **Hobart Marine Board.**—The total capital debt on properties in connexion with the Harbour Trust vested in the Board is £106,350. The interest paid in 1920 amounted to £4,350, and the contributions to sinking fund, £1,235. The receipts and expenditure of the Board for the last five years were as follows :—

HOBART MARINE BOARD.—RECEIPTS AND EXPENDITURE, 1916 TO 1920.

Year.				Receipts.			Expenditure.		
				General.	Harbour Improvements, Debentures, etc.	Total.	General.	Harbour Improvements.	Total.
				£	£	£	£	£	£
1916	22,800	6,062	28,862	(a) 21,803	7,801	29,604
1917	17,294	6,627	23,921	(b) 17,247	5,212	22,459
1918	20,046	3,775	23,821	(c) 20,887	3,131	24,018
1919	21,505	367	21,872	20,303	108	20,411
1920	30,584	4,568	35,152	27,392	3,859	31,251

(a) Including £4,000 debentures purchased. (b) Including £938 transferred from General Account to Harbour Improvements. (c) Including £3,775 transferred from General Account to Harbour Improvements.

12. **Launceston Marine Board.**—The total capital debt on 31st December, 1920, was £263,718, of which £216,480 was incurred on the Tamar Improvement Scheme. The revenue for 1920 was £39,569 and the expenditure £40,865.

§ 5. Fire Brigades.

1. **New South Wales.**—*Receipts and Disbursements of Board of Fire Commissioners of New South Wales.* The subjoined table shews the actual receipts and disbursements of the Board for the past five years in respect of the Sydney Fire District :—

NEW SOUTH WALES BOARD OF FIRE COMMISSIONERS.—RECEIPTS AND DISBURSEMENTS FOR SYDNEY FIRE DISTRICT, 1916 TO 1920.

Year.	Receipts.						Disbursements.
	From Government.	From Municipalities.	From Fire Insurance Companies.	From Firms.	From other Sources.	Total.	
	£	£	£	£	£	£	£
1916	29,071	29,071	28,883	188	2,205	89,418	98,934
1917	34,283	34,283	33,562	721	4,103	106,952	103,539
1918	34,231	34,231	33,858	373	3,950	106,643	107,104
1919	34,198	34,198	33,819	379	4,339	106,933	115,637
1920	47,808	47,808	47,218	589	3,815	147,238	143,262

The Sydney fire district includes the City of Sydney and suburbs, comprising a total area of 258 square miles. On the 31st December, 1920, the Board had under its control in this district 64 stations, 311 permanent men, 167 partially paid firemen, 10 steam and 51 motor fire engines, 28 horses, 140,690 feet of hose, and 512 telephone fire-alarms. The length of wire used for telephone lines was 1,281 miles.

2. *Victoria.*—(i) *Metropolitan Fire Brigades Board.* On the 30th June, 1920, this Board had under its control 41 stations, 250 permanent men, 102 partially-paid firemen, 48 special service firemen, 6 motor drawn steam fire engines, 8 petrol motor fire pumps, 47 other petrol motor appliances, 2 steam fire engines, 100.872 feet of hose, and 343 fire-alarm circuits having 1,058 street fire alarms, 1,038 containing telephones. The following table gives particulars as to the financial operations of the Board during each year from 1915 to 1919-20 inclusive :—

**VICTORIA.—REVENUE AND EXPENDITURE OF METROPOLITAN FIRE
BRIGADES BOARD, 1915 TO 1919-20.**

Interest and sinking fund ..	11,442	13,397	13,610	14,971	12,970
Other expenditure ..	25,744	24,566	25,057	20,968	26,963
Total	89,819	93,575	97,567	96,854	106,993

(ii) *The Country Fire Brigades Board.* At the end of the year 1920 there were 111 municipal councils and 76 insurance companies included in the operations of the Act. All the brigades are volunteer brigades, but in the large centres a few permanent station-keepers and watchmen are employed. There were 135 registered brigades and 2,488 registered firemen at the end of the year 1920.

For the year 1920 the receipts of the Country Fire Brigades Board amounted to £18,816 and the expenditure to £18,544.

3. **Queensland.**—In the year 1919 there were thirty fire brigades organised in various towns in Queensland, and the following table gives particulars of revenue and expenditure for the year 1919:—

QUEENSLAND.—FIRE BRIGADES, 1919.

Receipts.			Amount.	Expenditure.			Amount.
			£				£
From Government	12,135	Salaries and wages	23,090
„ Local authorities	12,162	Building, repairs, etc.	4,937
„ Insurance companies	12,266	Plant, stores, clothing, etc.	4,938
„ Other sources	1,793	Other	5,676
Total	38,356	Total	38,641

At the end of the year 1919 the fire brigades staffs comprised 111 permanent men, 213 partially paid, and 100 volunteers. The Metropolitan Brigade at Brisbane and the South Brisbane brigade protect an area of 9½ square miles; their joint staffs comprise 70 men. They have three steam engines, four motor turbines, nine reels, consisting of four horse, two motor, and three hand reels, and 26,753 feet of hose. There are 2 telephone fire alarms and 199 call points.

4. **South Australia.**—The revenue of the Fire Brigades Board in 1920 amounted to £33,568. Brigades are established in the following municipalities, viz., Adelaide, Kensington and Norwood, Unley, Port Adelaide, Glenelg, Gawler, Kapunda, Moonta, Kadina, Port Pirie, Port Augusta, Wallaroo, Thebarton, Tanunda, and Balaklava. The strength of the brigades consists of 99 permanent firemen and 49 auxiliary firemen. The plant consists of 5 steam fire engines, 1 motor engine, 17 motor hose carriages, 1 floating fire engine, 4 hose reels, and 9 horses. The number of calls received during the year 1920 was 412, of which 16 were to fires of a serious nature. Of the total calls, 240 were in the metropolitan district.

5. **Western Australia.**—The receipts of the Western Australian Fire Brigades Board for the year 1920 amounted to £30,199, and the expenditure to £33,422. The whole of the brigades throughout the State are now controlled by this Board, and number four permanent, seven permanent and partially paid, six permanent and volunteer, one partially paid, and twenty-four purely volunteer brigades; making a total of forty-two. The staff includes a chief officer, deputy chief officer, third officer, motor engineer, electrical engineer, 11 other officers, 70 permanent firemen, 31 partially-paid firemen, and 555 volunteer firemen.

6. **Tasmania.**—The expenditure for the year 1920 for the Hobart Fire Brigade amounted to £4,790. There are also volunteer brigades under the control of local boards in most of the larger centres of population.

§ 6. Local Government Finance.

1. **Introduction.**—In the preceding parts of this section certain particulars have been given regarding local authorities in each individual State. It is proposed to give here in a comparative form for each State particulars regarding the financial operations of local governing bodies. The particulars given in the tables in the two next paragraphs

relate to financial years ending as follow :—New South Wales : for the calendar year 1919. Victoria : 30th September, 1919, except Melbourne, 31st December, and Geelong, 31st August, 1919. Queensland : calendar year 1919. South Australia : Corporations, 30th November, and district councils, 30th June, 1919. Western Australia : 31st October, 1919, except road districts, 30th June, 1919. Tasmania : calendar year 1919.

2. Number, Revenue, Expenditure, and Valuation of Local Authorities.—The following table gives particulars of the number, revenue, expenditure, and valuation of local authorities in each State and in the Commonwealth during the year indicated above. It should be noted that, excepting in Tasmania, the metropolitan water supply systems are not under municipal control; the particulars given of revenue and expenditure for the five States other than Tasmania do not, therefore, include revenue and expenditure on account of these systems.

NUMBER, REVENUE, EXPENDITURE, AND VALUATION OF LOCAL AUTHORITIES(a) IN EACH STATE, 1919.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.

SECTION XXVII.

INDUSTRIAL UNIONISM AND INDUSTRIAL LEGISLATION.

§ 1. Development of Trade Unions in Australia.

1. **Historical Development of Trade Unionism in Australia.**—A special article, reviewing the development of trade unionism since its inception, appeared in Year Book No. 9, pp. 937–41.

2. **Registration under Trade Union Acts.**—The benefits conferred by registering trade unions under the Trade Union Acts in force in the various States are not held in much repute; consequently the statistics of registered trade unions of employees not only do not represent the position of unionism, but, in addition, the statistics themselves for past years are so defective as to be practically valueless. The particulars furnish no reliable indication of the numerical and financial position of trade unions. Some of the registered unions fail to supply returns; this non-supply may lead to cancellation of the registration. Some of the unions have obtained the cancellation of their certificates of registration, the apparent reason being that they proposed registering under the Commonwealth Conciliation and Arbitration Act or a State Arbitration Act. In Queensland, some of the largest labour unions withdrew from registration during 1911, mainly on account of the necessity for closer restriction of their objects as set forth in their rules, consequent on legal decisions affecting trade unions. In Victoria and in South Australia very few of the existing unions are registered under the Trade Union Acts. It will be seen, therefore, that the available information is too meagre for statistical purposes.

3. **Registration under Industrial Arbitration Acts.**—Western Australia and New South Wales up to 30th June, 1908, were the only States with Industrial Arbitration Acts under which industrial associations could be, and actually were, registered. The number of registered unions in New South Wales shewed a gradual increase from 1902 to 1907, the figures in the latter year being 109 unions of employers, with 3,165 members, and 119 unions of employees, with 88,075 members. Under the Industrial Disputes Act, which succeeded the Arbitration Act of 1901, it was not necessary to furnish this information. Since the Act of 1908, industrial organisation proceeded rapidly, owing to a general desire on the part of the workers to obtain the status necessary to entitle them to the advantages offered by the Act. The Act of 1908 was repealed by the Industrial Arbitration Act of 1912, and in 1912 there were 117 industrial unions of employers and 192 industrial unions of employees on the register. On the 26th April, 1921, there were 126 industrial unions of employers, and 160 industrial unions of employees on the register. Registration had been granted to 3 of the 160 employees' unions subject to amendment of rules. In the Queensland Industrial Arbitration Act of 1916 provision is made for the registration of any industrial association or trade union of employees. The Act does not provide for the registration of employers' associations. On the 30th June, 1917, 50 unions of employees were registered, and the number on the register at the 31st December, 1920, was 74. In South Australia, provision is made in the Industrial Code 1920 for the registration of industrial unions. This Act came into operation on 1st January, 1921. In Western Australia, the employers' unions numbered 45, with 441 members, in 1904; and 46, with 968 members, in 1920. From 1904 to 1908 unions of employees were in a fairly stationary condition. At the end of 1904 and 1905 there were 140 unions, with 15,743 and 15,461 members respectively, and in 1920, 114 unions, with 35,607 members. Registration under Commonwealth

legislation began in 1906. In that and the four following years, there was but one union of employers; another was registered in 1911. The unions of employees registered were 20 in 1906, with 41,413 members. On the 31st December, 1920, there were on the register 6 organisations of employers, with 6,170 members, and 122 organisations of employees, with 549,285 members.

4. *Types of Trade Unions in Australia.*—The trade unions in Australia are very diverse in character, and range from the small independent association to the large interstate organisation, which, in its turn, may be merely a branch of a British or international union. Broadly speaking, there are four distinct classes of labour organisations, viz.:—(i) the *local independent*, (ii), the *State*, (iii) the *interstate*, and (iv) the *Australasian or International*, but a number of variations occur from each of these classes. The leading characteristics of each of these types were briefly outlined in Labour Report No. 2 (pp. 7 to 9) issued by this Bureau.

5. *Total Number of Unions, 1920.*—As already stated, the figures for trade unions registered under the Acts do not represent the position of unionism in Australia. In 1912 the Labour and Industrial Branch of the Commonwealth Bureau of Census and Statistics was established, and by the cordial co-operation of the officials of the labour organisations, comprehensive figures relating to the development of organised labour are now available. The following table gives particulars of the number of trade unions, the number of branch unions, and the number of members in each State, the Northern Territory and the Commonwealth at the end of 1920:—

TRADE UNIONS, BRANCH UNIONS, AND MEMBERS, STATES, NORTHERN TERRITORY, AND COMMONWEALTH, 1920.

State or Territory.				Number of Separate Unions.	Number of Branches.	Number of Members.
New South Wales	214	871	277,519
Victoria	158	453	187,100
Queensland	115	340	103,784
South Australia	104	139	55,958
Western Australia	121	172	44,054
Tasmania	81	81	15,220
Northern Territory	3	..	815
Total	796	2,056	684,450
Commonwealth(a)	388(b)	2,464(b)	684,450

(a) Allowing for interstate excess. (b) Number of distinct organisations and interstate groups of organisations in the Commonwealth—not the total number of organisations, which are practically independent and self-governing. (See next page).

In the preceding table the number of separate unions in each State refers to the number of unions which are represented in each State, exclusive of branches within a State. That is to say, each union represented in a State is only counted once, regardless of the number of branches in that State. Except in the last line, the number of branches indicates the number of branches of State head offices, which may, of course, themselves be branches of an interstate or larger organisation. In taking the total number of separate unions in the Commonwealth (see last line but one), it is obvious that, in the case of interstate and similar unions, there will be duplication, since each such union is counted once in each State in which it has any branches. In the figures given in the last line allowance has been made for this duplication. State branches of interstate or federated unions, as well as sub-branches within a State, are included under the heading "Branches"

in the third column—last line. It should be observed, however, that the scheme of organisation of these interstate or federated unions varies greatly in character, and the number of separate Commonwealth unions does not fairly represent the number of practically independent organisations in Australia. In some of these unions the State organisations are bound together under a system of unification and centralised control, while in others the State units are practically independent and self-governing, the federal bond being loose and existing only for one or two specified purposes. It may be seen, therefore, that there are 388 distinct organisations and interstate groups of organisations in the Commonwealth, having 2,464 State branches and sub-branches, and a total of 684,450 members.

6. Number and Membership of Unions in the Commonwealth in Industrial Groups, at the end of the years 1912 to 1920.—The following table shows the number of unions and members thereof in the Commonwealth at the end of the years 1912 to 1920. The number of unions specified refers to the number of different unions represented in each State; that is to say, interstate or federated unions are counted once in each State in which they are represented, but sub-branches within a State are not counted.

NUMBER AND MEMBERSHIP OF UNIONS IN THE COMMONWEALTH IN INDUSTRIAL GROUPS, AT THE END OF THE YEARS 1912 TO 1920.

Total	433,224	523,271	523,031	540,550	504,187	581,755	627,685	684,450

Particulars are given in Labour Report No. 11 (pp. 13-14) of the number of male and female members of unions and the percentage of such members on the total number of adult wage earners. Other tables in the same Report shew the classification of unions according to number of members and the number of central labour organisations. Information is also given below as to the development of trade unionism since 1901.

7. Development of Trade Unions in Australia, 1901 to 1920.—The following table shews for the years specified the total number of trade unions in the Commonwealth, and the number and membership of those unions for which returns are available.

NUMBER AND MEMBERSHIP OF TRADE UNIONS IN COMMONWEALTH, 1901 TO 1920.

Particulars.	1901.	1906.	1911.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Total number of unions	198	302	573	712	713	705	747	767	771	796
Number of unions for which membership available ..	139	253	542	712	713	705	747	767	771	796
Membership of these unions ..	68,218	147,049	344,999	523,271	528,031	546,556	564,187	581,755	627,685	684,450

These figures shew that while the number of unions in 1920 was more than double the number in 1906, the estimated membership during the same period increased nearly fourfold. During the last nine years the annual increase in membership was greatest in the year 1912, when it amounted to no less than 68,492, and least in 1915, when it was only 4,760.

8. Interstate or Federated Unions, 1920.—The following table gives particulars as to the number and membership of interstate or federated unions in 1920 :—

NUMBER AND MEMBERSHIP OF INTERSTATE OR FEDERATED UNIONS IN THE COMMONWEALTH, 1920.

Particulars.	Unions Operating in—					Total.
	2 States.	3 States.	4 States.	5 States.	6 States.(a)	
Number of Unions ..	15	14	14	16	40	99
Number of Members ..	19,494	52,556	53,448	123,258	294,622	543,378

(a) Certain Unions in this Group have, in addition to Branches in each of the six States, a Branch in the Northern Territory.

It appears, therefore, that 99 out of the 388 separate associations and groups of associations in the Commonwealth are organised on an interstate basis. The membership of these 99 unions amounts to 543,378, or no less than 79.4 per cent. of the total membership (684,450) of all unions.

9. Central Labour Organisations.—In each of the metropolitan towns, as well as in a number of other industrial centres, delegate organisations, consisting of representatives from a group of trade unions, have been established. Their revenue is raised by means of a per capita tax on the members of each affiliated union. In most of the towns where such central organisations exist, the majority of the local unions are affiliated with the central organisation, which is usually known as the Labour or the Trades Hall Council or the Labour Federation. In Western Australia a unified system of organisation extends over the industrial centres throughout the State. In this State there is a provincial branch of the Australian Labour Party, having a central council and executive, and metropolitan and branch district councils, to which the local bodies are affiliated. The central council, on which all district councils are represented, meets periodically. In the other five States, however, the organisation is not so close, and though provision usually exists in the rules of the central council at the capital town of each State for the organisation of district councils or for the representation on the central council of the local councils in the smaller industrial centres of the State, the councils in each State are, as a matter of fact, independent bodies.

The table below shows the number of metropolitan and district or local labour councils, together with the number of unions and branches of unions affiliated therewith, in each State at the end of the year 1920 :—

CENTRAL LABOUR ORGANISATIONS.—NUMBER, AND UNIONS AFFILIATED, 1920.

Particulars.	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tasmania.	C'wealth.
Number of Councils	3	5	4	3	10	1	26
Number of Unions and Branch Unions affiliated ..	144	183	50	67	181	27	652

The figures given in the preceding table as to number of unions do not necessarily represent separate unions, since the branches of a large union may be affiliated to the local trades councils in the several towns in which they are represented.

Between the trade union and the central organisation of unions may be classed certain State or district councils, organised on trade lines and composed of delegates from separate unions, the interests of the members of which are closely connected by reason of the occupations of their members, such, for example, as delegate councils of bakers, bread carters, and mill employees, or of unions connected directly or indirectly with the iron, steel, or brass trades, or with the building trades.

§ 2. Laws Relating to Conditions of Labour.

1. Tabular Statement of Statutes affecting Labour.—The statutes in force at the end of 1920 in the several States of the Commonwealth, which, more or less directly, affect the general conditions of labour, are shewn in the table hereunder :—

LABOUR LAWS.—TABLE OF STATUTES IN FORCE IN AUSTRALIAN STATES, 1920.

New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.
1. <i>General.</i> Factories and Shops 1912 Early Closing 1899, 1900, 1906, 1910, 1915 and 1919 Saturday Half-Holiday 1910 Eight Hours 1916, 1920 Sunday Trading (Refreshment Rooms) 1916	Factories and Shops 1915, 1919, 1920 (2)	Factories and Shops 1900, 1908, 1914, 1916 (2), 1920	Industrial Code 1920 Early Closing 1911, 1912	Factories and Shops 1920	Factories 1910, 1911, 1917 Shops Closing 1911, 1913

(b) At 30th June.

(c) Particulars for 1919. Figures for 1920 not available.

3. Comparative Statement of Factories Law in Australia.—The tables on pp. 994 to 999 of Year Book No. 11 shew at a glance the chief provisions of the Factories and Shops Acts in the Commonwealth. Since the issue of that edition, new Acts have been passed in some States and Amending Acts in others, the effect being briefly as follows :—

(i) *New South Wales.* Early Closing (Amendment) Act 1919. Tobacconists' and hairdressers' shops are to close on 4 days at 7 p.m., on one day (Wednesday or Saturday optional) at 1 p.m., and on Fridays at 10 p.m.

(ii) *Victoria.* Factories and Shops Act 1919. The hour for closing shops on Friday nights is altered from 10 p.m. to 9 p.m.

(iii) *South Australia.* Industrial Code 1920. This Code consolidates the previous Factories Acts, and makes some important alterations, the principal being that the minimum wage to be paid to any employee in a factory is 10s. per week, and the total number of hours of employment as regards women and boys over 14, when overtime is worked, is limited to 55 per week.

(iv) *Western Australia.* Factories and Shops Act 1920. A considerable number of alterations have been made in the provisions relating to factories and shops, the more important of those which relate to factories being (a) the number of hands constituting a factory is now four or more, instead of six; (b) no premium whatever may be demanded; (c) the age of admission of girls into factories is raised to 15 years; (d) the maximum number of working hours for boys under 16 years and females is reduced to 44 per week and 8½ per day, with not more than 4½ hours continuous for children under 14 years and women; (e) overtime is limited to two hours per day, on two days per week, which must not be continuous, and 52 days in a year, while overtime pay must be at the rate of time and a half; (f) the employment of women is prohibited for six weeks before or after childbirth; (g) girls under 16 must not be engaged in typesetting, nor persons under 16 in dry-grinding or match-dipping, nor girls under 18 in melting or annealing glass, nor persons under 18 in charge of a lift; (h) all factories must be registered annually.

• In shops the maximum number of hours which may be worked is reduced to 48 for male adults and to 44 for boys under 16 and women, while the latter may not be employed for longer than 8½ hours per day, except on one day a week when 9½ hours may be worked. There must also be at least one seat for every three women employed.

4. Mining Acts.—Under the Mining Acts the employment underground of all females and of boys under fourteen years is prohibited. A minimum age, usually seventeen, is fixed for employment as lander or bracedman at plats and landing places; no lander, bracedman, underground worker, or man in charge of motive power may be employed more than eight hours a day. A large number of scientific provisions for the protection of the lives and health of miners is also inserted in the Acts. Engine drivers must hold certificates of competency. Persons may be licensed to certify to the condition of boilers. Provision is made to enable injured persons or the relatives of persons killed to recover damages if the injury or death results from a breach of the regulations referred to above. Inspection of mines is fully provided for. Sunday labour is forbidden. In New South Wales and (since 1st February, 1910) Victoria still more advanced mining legislation exists; numerous sections are designed to ensure the well-being of the workers, such as limitation of hours, etc.

5. Employers' Liability and Workmen's Compensation Acts.—In each of the States, Acts have been passed allowing compensation to workers who have been killed or injured while engaged in industrial occupations. In the Commonwealth, one Act provides for compensation to all workers employed by the Commonwealth, and another to all seamen working on ships registered in Australia. In New South Wales, amendments of the Workmen's Compensation Act made provision for workmen exposed to dust and for Broken Hill miners. A conspectus of these Acts is given in the pages immediately following.

CONSPECTUS OF WORKMEN'S

HEADING.	NEW SOUTH WALES.	VICTORIA.	QUEENSLAND.	SOUTH AUSTRALIA.
<i>Name of Act</i> ..	Workmen's Compensation Act 1916 and 1920 (3).	Workmen's Compensation Act 1915	The Workers' Compensation Act 1916 (2) and 1918.	The Workmen's Compensation Act 1911, 1918, 1919, and 1920.
<i>Definition of Employer</i>	Includes any body of persons, corporate or incorporate, and the legal representative of a deceased employer.	Includes any body of persons, corporate or incorporate.	Includes persons, firms, companies and corporations employing workers.	Includes any body of persons, corporate or incorporate.
<i>Nature of work to which Act applies.</i>	Any person who is under contract of service or apprenticeship, whether by way of manual labour, clerical work or otherwise.	Manual workers. Other workers with incomes up to £250.	Any person (including a domestic servant) who works under a contract of service or apprenticeship, whether by way of manual labour, clerical work or otherwise, including tributaries in mines and jockeys.	Manual only, with incomes up to £5 a week.
<i>Workers expressly excluded.</i>	Casuals, outworkers, persons whose remuneration exceeds £525 per annum, and members of the employer's family dwelling in his house.	Workers other than manual earning over £250. Police, outworkers, members of employer's family.	Persons earning over £400. Casuals, police, subscribers to superannuation fund, members of employer's family, salesmen, canvassers, collectors, or persons in receipt of commission.	Persons earning over £8 a week. Outworkers, members of employer's family, seamen whose injury occurs outside jurisdiction, agricultural, horticultural, viticultural, dairying or pastoral workers where machinery is not used, clerks, domestic servants.
<i>Employer not liable to pay compensation for</i>	Injury disabling for less than one week.	Injury incapacitating for less than a week.	Injury incapacitating for less than three days.	First week of injury if disabled for less than two weeks.
<i>In event of insolvency maximum amount of compensation admitted as first charge on assets per individual.</i>	£200.	£200.	Insurance compulsory in State Accident Insurance Fund.	£100.
<i>Compensation in case of Death.</i>				
<i>If dependents left</i> ..	3 years' earnings, or £800, whichever larger; maximum, £500.	3 years' earnings, or £200, whichever larger; maximum, £500.	3 years' earnings, or £300, whichever larger; maximum, £600.	4 years' earnings, or £200, whichever larger; maximum, £300.
<i>If no dependents, maximum amount for medical attendance and funeral expenses.</i>	£20.	£50.	£50.	£20.
<i>Compensation in case of Incapacity.</i>				
<i>Weekly payment</i> ..	66% % of average weekly earnings; maximum, £3.	Half average weekly earnings; maximum, 30s.	Half average weekly earnings; maximum, £2, minimum, £1.	Half average weekly earnings; maximum, single man 30s., married man £2.
<i>Maximum total liability</i> ..	£750.	£500.	£750	£500.
<i>Compensation for Workers over 60 years of age who have entered into an agreement.</i>				
<i>Death, with dependents—Minimum</i>	£50.	..	£50.
<i>Incapacity—Minimum weekly payment</i>	5s., or quarter of weekly earnings, whichever larger.	..	5s.
<i>Maximum total liability</i>	£50.	..	£50.

<i>Period after which lump sum can be substituted for weekly payment.</i>	Six months.	Six months.	Any time.	Six months.
<i>Tribunal, if claim not settled by agreement.</i>	Committee representative of employer and his workmen, if existing, or arbitration, or Judge of District Court or by an authorised Stipendiary or Police Magistrate.	Judge of County Court or Police Magistrate.	Insurance Commissioner, Industrial Magistrate, Supreme Court.	Arbitrator. If arbitrator not agreed on within one month, special Magistrate. Appeals to Supreme Court.
<i>Regulations for worker leaving the State in which he was injured.</i>	If permanent incapacity likely, quarterly substituted for weekly payments in case of worker ceasing to reside in the State.	Same as South Australia.	If permanent incapacity proved, 156 times weekly payments substituted for weekly payments in case of worker leaving Commonwealth.	If permanent incapacity likely, quarterly substituted for weekly payments in case of worker leaving State.
<i>Proceedings for compensation not maintainable unless commenced within</i>	Six months.	Six months.	Six months.	Six months.

6. **Other Acts.**—Other legislation regulating conditions of labour has been enacted by the States. The British *Conspiracy and Protection of Property Act* (38 and 39 Vic., c. 86) has been adopted in all the States except New South Wales and Queensland. Servants' registry offices are placed under administrative control, and the rates of commission chargeable are fixed by regulation. Power is given to workmen to attach moneys due to a contractor who employs them, in order to satisfy a claim for wages, such wages being made a first charge on moneys due to a contractor. Workmen are given a lien for wages over material whereon they are working, even if it becomes part of other property. This is in addition to the common law lien, which ceases when possession of the property is parted with. Workmen's wages are protected from attachment. In Victoria, provision is made for the compulsory resumption of suburban lands to provide workmen's homes.

7. **General Results of Industrial Legislation.**—The results of the legislation described must be sought in the Reports of the Inspectors of Factories of the several States, and in the Reports issued by the Labour and Industrial Branch of this Bureau.

£100.	£100.
Average weekly earnings; maximum, 20s.	Average weekly earnings, maximum, 20s.	Same as New South Wales.	Same as New South Wales.
Three days.	None.	None.	One week. No compensation for first week unless incapacity lasts two weeks.
Six months.	Two months.	Six months.	Six months.
Local Court.	Commissioner (under Local Courts Act 1896) in Court of Requests.	Arbitrator or County Court.	Arbitrator or County Court.
Weekly payments continue in case of worker leaving State.	Same as South Australia.	If permanent incapacity likely, quarterly substituted for weekly payments in case of worker leaving Australia.	If permanent incapacity likely, quarterly substituted for weekly payments in case of worker leaving Australia.
Six months.	Six months.	Six months.	Six months, or 18 months if ship lost at sea.

Generally speaking, the perusal of these reports and of the reports of Royal Commissions which have inquired into the working of the Acts, affords satisfactory evidence that the Acts have, on the whole, effected their objects.

§ 3. Legislative Regulation of Wages and Terms of Contract.

1. *General.*—Two systems, based upon different principles, exist in Australia for the regulation of wages and general terms of contracts of employment. A "Wages Board" system exists in Victoria and Tasmania, and an Industrial Arbitration Court in Western Australia. In the industrial legislation of New South Wales, Queensland, and South Australia, both systems are embodied, Industrial or Wages Boards, as well as Industrial Courts, being instituted. In accordance with the provisions of the Acts in New South Wales and Queensland, the Industrial Courts in these States have been exercising the functions of Boards, and the work of the existing Boards has been greatly curtailed. Practically all the awards in these States during the last three years have been made by the Industrial Courts. In Victoria, Wages Boards' decisions may be reviewed by the Court of Industrial Appeals. In New South Wales, Industrial Arbitration Acts of 1901

and 1905 instituted an Arbitration Court. This court expired on 30th June, 1908, having delivered its last judgment on the previous day. Wages Boards were substituted under the Industrial Disputes Act 1908, and subsequent years; while the Act of 1912 introduced the mixed system. The Industrial Arbitration (Amendment) Act, assented to on 22nd March, 1918, amends the law for the regulation of the conditions of industries and industrial arbitration. The Act provides for the establishment of a Board of Trade and of special and deputy Courts of Industrial Arbitration, and also for the appointment of Industrial Boards on the recommendation of the Court. In South Australia the Industrial Code 1920 provides for the constitution of an Industrial Court, which may have the assistance of assessors. Provision is also made for the appointment of a Board of Industry having somewhat similar powers to the Board of Trade in New South Wales. There is also the Arbitration Court of the Commonwealth, which has power, however, to deal only with matters extending beyond the limits of a single State. The Arbitration (Public Service) Act was assented to on the 7th October, 1920. The Act provides for the appointment of an Arbitrator whose duties shall be to determine all matters submitted to him relating to salaries, wages, rates of pay, or terms or conditions of employment of officers or employees of the Commonwealth Public Service. The Industrial Peace Act 1920, which was assented to on 13th September, 1920, applies to industrial matters in relation to conciliation and arbitration for the prevention and settlement of industrial disputes extending beyond the limits of any one State. Provision is made that the Governor-General may appoint a special tribunal or tribunals for the prevention of and settlement of any industrial dispute or disputes.

The chief aims of the Wages Board system are to regulate hours, wages, and conditions of labour and employment, by the determination of a Board usually brought

TRIBUNALS FOR THE REGULATION OF

<i>Particulars.</i>	NEW SOUTH WALES.	VICTORIA.	QUEENSLAND.
<i>Name of Acts</i>	Industrial Arbitration Act 1912, 1916, 1918 (2), 1919, and 1920	Factories and Shops Act 1915, 1919, and 1920 (2)	Industrial Arbitration Act 1916
<i>Nature of Tribunals</i>	Court of Industrial Arbitration. Industrial Boards. Board of Trade	Court of Industrial Appeals. Wages Boards	Court of Industrial Arbitration. Industrial Boards
<i>How Tribunals are brought into existence</i>	Court constituted by Act. Industrial Boards by the Minister on recommendation of Industrial Court. Board of Trade constituted by Act	Court constituted by Act. Wages Boards by Governor-in-Council	Court constituted by Act. Industrial Boards by Minister on recommendation of Court
<i>Scope of Acts</i>	To any industry, etc., as the Minister on the recommendation of the Court may direct. Includes Government servants. Board of Trade declarations re living wage, apprenticeship, etc.	To any process, trade, business, or occupation specified in a resolution of both Houses of Parliament or Order in Council (as the case may be). Government servants are not included (a)	To all callings and all persons (including Government servants) except (1) State children; (2) domestic servants; (3) persons engaged in farming operations on dairy, fruit and agricultural farms
<i>How a trade is brought under review</i>	Reference by Court or Minister, or by application to the Board by employers (having not less than 20 employees) or industrial unions	Usually by petition to Minister	Upon reference by an industrial union or employer, or any twenty employees in any calling, or the Minister, or of the Court

(a) "The Railways Classification Board Act" 1919 provides for a special tribunal to regulate wages and hours of employment of railway employees.

into existence for any specified industry or group of industries by petition or application. Under the Industrial Arbitration Court system an industry does not technically come under review until a dispute has actually arisen. Most of the Acts, however, have given the President of the Court power to summon a compulsory conference. In Victoria, where the Wages Board system is in force, there is no provision against strikes, but in Tasmania, where that system has also been adopted, penalties are provided for a lock-out or strike on account of any matter in respect of which a Board has made a determination.

Particulars were given as to the historical development, mode of constitution and general provisions of Wages Boards and Arbitration Courts in Year Book No. 9, pages 960 to 966. These refer to the regulation of wages and working conditions, and the prevention and settlement of industrial disputes.

2. Comparative Statement of Tribunals for Regulating Wages in Australia.—The table on pages 916 to 913 shews at a glance the Acts which operate in fixing wages, the constitution and function of tribunals enacted under them, and the effect and extent of the tribunals' decisions. It will be seen that in all the States there is machinery for the regulation of wages.

Under the authority of the Commonwealth Government a War Precautions Coal Board appointed in November, 1916, to regulate wages, working conditions and other matters in the coal mining industry issued "Orders" during 1916 and 1918, but was inactive during 1917. Special tribunals to deal with the coal industry and the coke industry were appointed by the Industrial Peace Act of 1920.

<p>Penalty £500, or imprisonment for 3 months</p>	<p>Employer or Industrial Union, £100; other cases, £10</p>	<p>Organisations, £500; individuals, £20</p>	<p>Penalty, £1,000</p>
<p>Compulsory Conference. Registered agreements</p>	<p>Special Commissioner. Compulsory Conference. Registered agreements</p>	<p>None</p>	<p>Compulsory Conference. Court may temporarily refer to Conciliation Committee. Registered agreements</p>

§ 4. Operations under Wages Board and Industrial Arbitration Acts.

1. **General.**—Particulars regarding operations under the Commonwealth Arbitration Acts and the various State Acts for the regulation of wages, hours, and conditions of labour, shewing the number of boards authorised and constituted, and which had or which had not made any award or determination in each State; the number and territorial scope of awards or determinations, and the number of industrial agreements in force, were first compiled to the 31st December, 1913.

These particulars have from time to time been revised, and reviews to the end of approximately quarterly periods have been published in the periodical Labour Bulletins to the 30th June, 1917, and thereafter in the Quarterly Summaries to the 31st December, 1920. Information has also been compiled and included in the later issues of the Labour Bulletin and Quarterly Summary respecting the estimated number of work-people affected by awards or determinations and industrial agreements in each State. In addition, a brief quarterly epitome has been given of the number of awards and determinations made and industrial agreements filed under the Act in force in each State and the Commonwealth Conciliation and Arbitration and the Commonwealth (Public Service) Arbitration Acts. The following tabular statement gives particulars of the operations in each State and under the Commonwealth Statutes during each quarter of the years 1919 and 1920 respectively :—

AWARDS AND DETERMINATIONS MADE AND INDUSTRIAL AGREEMENTS FILED IN EACH QUARTER OF 1919 AND 1920.

Total ..	145	116	149	120	144	35	156	75	594	346

Owing to the prevailing drought conditions and the advent of war during the year 1914, varying restrictive measures were introduced either for the suspension or curtailment of the operations of industrial tribunals in each of the States. During the second quarter of 1915 these restrictions were somewhat relaxed in New South Wales and Queensland, and early in the third quarter operations gradually assumed normal conditions in all the States. During the third and fourth quarters of 1915 greater activity was evidenced in each State, and this activity continued during the subsequent years. The number of awards and determinations (594) made by the Commonwealth Conciliation and Arbitration Court, the State Industrial Courts and Wages Boards, during the year 1920, was higher than the number made during the previous twelve months, when 427 awards and determinations were issued, while the number of industrial agreements entered into during 1920 was 346, as compared with 282 during the year 1919. The number of awards issued by the Commonwealth Conciliation and Arbitration Court was 32, as compared with 21 during the previous year. The number of industrial agreements filed under the provisions of the Commonwealth Act shewed an increase in comparison with the number filed during the previous year, the number filed during 1920 being 183, as against 160 during the year 1919.

2. Boards Authorised, and Awards, Determinations, and Agreements in Force.—In the following table particulars are given for all States, excepting Western Australia, of the number of Boards authorised and constituted, and including operations under the Commonwealth and the Western Australian Arbitration Acts, of the number of awards, determinations, and industrial agreements in force in all States at the 31st December, 1913, and during the four quarters of 1920 :—

PARTICULARS OF BOARDS AND OF AWARDS, DETERMINATIONS, AND INDUSTRIAL AGREEMENTS IN FORCE AT 31st DECEMBER, 1913 AND DURING EACH QUARTER OF 1920.

Dates.	Boards Autho- rised.	Boards Con- stituted.	Boards which had made Awards or Deter- minations.	Awards or Deter- minations in Force.(a)	Industrial Agree- ments in Force.
31st December, 1913	505	501	387(b)	575(c)	401
31st March, 1920	508	502	471	935	923
30th June, 1920	523	518	490	970	1,011
30th September, 1920 ..	527	521	486	1,008	1,005
31st December, 1920	475(d)	470(d)	440(d)	1,041	972

(a) Including awards made by Arbitration Courts. (b) Owing to a number of awards made under the New South Wales Industrial Disputes Act (1908) being still in force, the Boards constituted for such industries under the Industrial Arbitration Act (1912) had not made any awards. (c) Excluding awards or determinations which expired in New South Wales (under the Act of 1908) on 31st December, 1913. (d) Reduction in the number of Boards authorized, etc., is due to the dissolution on the 9th December, 1920, by the Industrial Code 1920 of Wages Boards in South Australia appointed under the Factories Acts 1907 to 1915. Provision is made in the Industrial Code 1920 for the appointment of Industrial Boards.

It will be observed from the particulars set out in the above table that considerable expansion of the principle of the fixation of a legal minimum rate of wage and of working conditions took place during the seven years ending 31st December, 1920. At the end of 1920, 466 additional awards or determinations were in force in the Commonwealth. The number of industrial agreements* made and in force under the various Acts increased during the seven years under review by 571.

* The registration of industrial agreements is not provided for under the Act in force in Victoria, but such agreements may be registered and filed under the provisions of the Commonwealth Conciliation and Arbitration Act to operate in any or in all States.

In the following table particulars are given for each State and the Commonwealth of the number of Boards authorised, etc., at the 31st December of the years 1913 and 1920:—

BOARDS AUTHORISED AND CONSTITUTED, AWARDS, DETERMINATIONS AND AGREEMENTS IN FORCE AT 31st DECEMBER, 1913 AND 1920.

(a) The figures for New South Wales are exclusive of Demarcation Boards. (b) Including Boards which were subsequently dissolved owing to alteration in the sectional arrangement of industries and callings. (c) Reduction in the number of Boards is due to the repeal during 1917 by the Industrial Arbitration Act 1916 of Industrial Boards appointed under the Industrial Peace Act 1912. (d) Wages Boards appointed under the Factories Act 1907 to 1915, with the exception of those which had any matter part heard, were dissolved by the Industrial Code 1920 on the 9th December, 1920. Provision is made in the new Act for the appointment of Industrial Boards. (e) Omitting a number of awards which expired on the 31st December, 1913.

SECTION XXVIII.

DEFENCE.

§ 1. Military Defence.

1. **Development of State Military Systems.**—A detailed historical account of the Australian defence forces prior to federation will be found in the Official Year Book No. 2, pp. 1075–1080. See also Official Year Book No. 12, p. 999.

The strength of the military forces of the several States prior to federation was generally nearly up to establishments. On 31st December, 1900 (the eve of federation), it was:—New South Wales, 9,338; Victoria, 6,335; Queensland, 4,028; South Australia, 2,932; Western Australia, 2,696; Tasmania, 2,024; total for Commonwealth, 27,353. Cadets, reservists, and rifle club members are excluded.

2. **Development of Commonwealth System.**—Under the terms of the Constitution Act 1900, the Commonwealth took over control of defence matters in March, 1901. Particulars regarding development up to the initiation of the existing system will be found in Official Year Book No. 12, p. 999.

3. **The Present Military System.**—The defence of Australia at the present time is enacted and prescribed by the Defence Acts 1903–1918 of the Federal Parliament. The provisions of the Acts of 1903, 1904, and the regulations under them contain the main working principles of Australian defence, the necessary expansion being provided for in the amendments of 1909, 1910, 1911, 1912, 1914, 1915, 1917, and 1918. The main provisions of the Acts up to 1912 inclusive will be found in Official Year Book No. 6, pp. 1050 *et seq.* The principal provision of the Act of 1909 is the enactment of compulsory military or naval training, with regulations for registration, enrolment, and exemption. Statutes were passed subsequently, extending or modifying the legislative provisions, removing obstacles and difficulties, and, where necessary, providing machinery. (See also Year Book No. 12, pp. 1000 *et seq.*)

(i) **Military Population.** In connexion with the numbers available, the figures of male population are of interest. The total number at cadet age, *i.e.*, between 12 and 18, at the Census of 1911 (3rd April) was about 260,000; at citizen soldier age, *i.e.*, between 18 and 26, 366,000; these latter, with 330,000 at ages between 26 and 35, give 696,000 as the total males at the best period for military service. In addition, there were about 614,000 between 35 and 60.

(ii) **Record for Anthropometric Purposes.** In connexion with the medical inspection it has been arranged that the colour and character of hair, and the colour of eyes of those examined, shall be recorded for statistical purposes.

A systematic record of height, weight and chest measurement of each trainee is also made.

In Official Year Book No. 11, pp. 1203–1209, an analysis is given of the data collected for the year ended 30th June, 1912.

(iii) **Compulsory Training.** By the Defence Acts of 1903 and 1904 all male inhabitants between the ages of eighteen and 60 years were made liable to serve in Australia with the defence forces *in time of war*. The more recent Acts make training and service compulsory up to the age of twenty-six years *in time of peace*. By the Act of 1909 the principle of universal liability to be trained was made law for the first time in any English-speaking community. On 1st January, 1911, by proclamation, compulsory training was established. Details concerning the method of carrying out the scheme, with modifications suggested by the report of Lord Kitchener, will be found in Official Year Book No. 12, pp. 1001, *et seq.*, but owing to limits of space they have been omitted from the present Year Book.

(iv) *Rifle Clubs.* These form part of the Reserves. On the 31st December, 1920, there were 1,307 clubs with a membership of 55,853, and in addition 128 miniature rifle clubs having a membership of 4,092. Applications to form rifle clubs are made to the commandant of a district, and must be signed by not less than thirty male persons between the ages of sixteen and sixty, who are required to be natural-born or naturalised British subjects, and are not undergoing training under the universal clauses of the Defence Act. Persons, however, who are temporarily exempted from universal training may be permitted to join rifle clubs during the period of their temporary exemption. Members of rifle clubs must fire an annual course of musketry, but do not undergo any systematic drill.

(v) *Allotment of Units to Divisional Brigade, Battalion, and Training Areas.* The organisation is territorial, and the divisions based upon infantry units. There are 93 battalion areas, forming 22 brigades. The areas have approximately equal numbers of males of citizen soldier age (about 1,300), and each furnishes a battalion of infantry, and a proportion of other troops. The figures shewn in the following tables are approximate, and include the recruits (19–20) year, but not the 25–26 year men. (See also Year Book No. 12, p. 1005.)

ALLOTMENT OF UNITS TO BRIGADE, BATTALION, AND TRAINING AREAS. 31st DECEMBER, 1920.

31st DECEMBER 1914

State.	Brigade Areas.	Battalion Areas.							Training Areas.	
	No.	No. of Battalions.	Providing the undermentioned units.						Total Nos. in Training Areas.	No.
			Infantry and Engineers, A.S.C. and A.M.C.	Light Horse.		Field Artillery.				
				Squadrons.	Nos.	Batteries.	Nos.			
								Nos.		
New South Wales ..	8	32	36,228	28	1,770	15	1,474	39,472	69

Total ..	22	93	96,251	90	7,174	52	5,154	108,579	221	

(vi) *Instructional Staff.* The instructors provided for training consist of 298 officers and 806 warrant and non-commissioned officers of the instructional staff (permanent), and 218 area officers (temporary). They supervise the training of light horse, infantry, and senior cadet units, and instruct in the non-technical duties of specialist corps. Additional officers and non-commissioned officers of the permanent troops instruct in technical work.

(vii) *The Royal Military College, Duntroon, Federal Territory,* is established for the purpose of providing trained officers for the permanent forces. Admission is by open competitive examination, a definite number of vacancies being allotted to each State of the Commonwealth on a population basis. Between 20 and 25 staff-cadets are thus admitted annually, and, in addition to these, ten staff-cadets from New Zealand are nominated yearly by the Dominion Government, which pays £377 10s. per annum for each. The age for admission is between sixteen and nineteen years, though there is a provision in the regulations by which members of the forces over nineteen years of age who pass the prescribed examination, and are approved by the Governor-General-in-Council, may be admitted. The college was opened in June, 1911. The normal college course lasts for four years, and is followed by a tour of duty in England or India, after which graduates will be appointed to staffs or permanent troops in Australia and New Zealand. During the late war the course was temporarily modified. Over 158 staff-cadets were (June, 1918) specially graduated, and appointed to units serving

at the front with the Australian and New Zealand forces. No fees are charged for maintenance and instruction, each staff-cadet being credited with an allowance of 5s. 6d. per diem to meet expenses of necessary uniform, books, instruments, etc. The course of instruction comprises both educational and military work, the former being mainly completed in the first two years. Cadets are prepared for light horse, artillery, engineer, and infantry duties.

In December, 1920, the staff numbered—military, 31; civil, 19.

(viii) *Railways and Defence.* A War Railway Council, consisting of military and railway officers, was instituted in 1911. Its chief duties are to furnish advice and information regarding railway transport for military purposes, and to secure co-operation between the Commonwealth Defence Department and the States' Railway Departments in regard to concentration and mobilisation of troops. To prevent delay in the transport of troops, particularly that caused by the transshipment of baggage and implements of war, the Council has recommended the adoption of a uniform railway gauge on lines linking up the States' capitals. An Engineer and Railway Staff Corps has been instituted, and numbered 44 officers on 31st December, 1920. Fuller details will be found in Official Year Book No. 6, pp. 1070-1.

(ix) *The Universal Training System in Operation.* Details regarding the various stages in the operation of the system will be found in Official Year Book No. 12, p. 1007, but limits of space preclude their repetition in the present volume.

4. **Strength of Military Forces.**—(i) *Strength in each District, 1901 to 1919.* There was little alteration in the numbers serving in the Australian military forces from the institution of the Commonwealth to the year of the introduction of the compulsory training system. From 1913 to 1918, however, the annual increase was considerable. The following table shews the development:—

STRENGTH OF MILITARY FORCES, 1901 AND 1913 TO 1920.

(a) District.	1901. (b) 1/3/01	1913. 30/6/13.	1914. 30/6/14.	1915. 30/6/15.	1916. 30/6/16.	1917. 30/6/17.	1918. 30/6/18.	1919. 30/6/19.	1920. 30/6/20.
Headquarters	(c) 277	(c) 330	(c) 416	(c) 360	(c) 377	(c) 473	(c) 362	(c) 463

§ 2. Naval Defence.

1. **Naval Defence under the States.**—Information regarding naval defence systems prior to 1901 will be found in Official Year Book No. 12, p. 1011, but considerations of space preclude its insertion in the present volume.

2. **Development of Commonwealth System from 1901.**—Australian defence, in both its branches (naval and military), passed to the Commonwealth in 1901. Prior to 1905 a naval officer commanding administered the naval forces under the Minister. When the Council of Defence was established in that year, the Naval Board was constituted and took over the administration of the Commonwealth naval forces, thereby ensuring continuity of policy and administration.

3. **The Present System.**—(i) *Australian Naval Policy.* An outline of the development of Australian naval policy will be found in Official Year Book No. 3, pp. 1060–1061, and in No. 12, p. 1012.

(ii) *The Building of the Australian Fleet.* Skilled artisans were despatched from Australia to gain practical experience in naval shipbuilding, construction proceeding both in Britain and Australia. Sailors of all ratings were also trained for the Commonwealth service. The first instalment of the Australian fleet unit consisted of two torpedo boat destroyers, of British construction, commissioned in September, 1910, and named *Parramatta* and *Yarra*. A third destroyer, the *Warrego*, was shipped to Sydney in parts, and was re-erected at the Commonwealth dockyard, Cockatoo Island, Sydney, and commissioned on 1st June, 1912. A description of these and the other vessels of the fleet will be found in Official Year Book No. 6, pp. 1066–7.

The battle cruiser *Australia* was commissioned in June, 1913, and arrived in Australian waters in the following September. Two light cruisers, the *Melbourne* and *Sydney*, arrived in Australian waters in 1913, and two submarines in 1914. A third cruiser, the *Brisbane*, and three more destroyers, the *Swan*, *Huon* and *Torrens*, were built at the Commonwealth Naval Dockyard, Sydney. Another cruiser, the *Adelaide*, is under construction at the Commonwealth Naval Dockyard.

(iii) *Modifications Adopted and Proposed.* Certain modifications have been made in the original scheme. These have been prepared in tabular form, and are as follows:—

FLEET UNIT.—ORIGINAL ESTIMATED COST.

(Imperial Defence Conference, 1909.)

1 Battle cruiser	£2,000,000
3 Protected cruisers, £350,000 each	1,050,000
6 Destroyers (including 3 ordered before the Conference), £80,000 each	480,000
3 Submarines, "C" class, £55,000 each	165,000
Total	<u>£3,695,000</u>

AMENDED ESTIMATED COST.

(Consequent on Alteration of Type of Vessels on Admiralty Recommendation.)

1 Battle cruiser	£2,000,000
3 Protected cruisers, £450,000 each	1,350,000
6 Destroyers, £80,000 each	480,000
2 Submarines, "E" class, £105,000 each	210,000
Total	<u>£4,040,000</u>

LATER ESTIMATED COST OF FLEET UNIT, TOGETHER WITH COST OF VESSELS
NOT INCLUDED IN ORIGINAL FLEET UNIT.

1 Battle cruiser	£1,705,000
(a) 3 Protected cruisers	1,400,000
(a) 6 Destroyers	653,000
2 Submarines	233,500
Auxiliaries—					
1 Submarine depot ship	£160,000	
1 Oil tank vessel	120,000	
4 Oil fuel storage vessels (building in Australia)				75,766	
4 Hulks	25,000	
					380,766
Total	£4,372,266

The following additional amount has been approved for new construction outside the original fleet unit and for increase in cost over estimate					
	2,135,952
Total	£6,508,218

(a) Extra cost of building certain of these vessels in Australia is responsible for increase.

(iv) *Expenditure on Fleet Construction for the Royal Australian Navy.* The following is a statement of expenditure out of sums appropriated for construction of fleet:—

EXPENDITURE ON FLEET CONSTRUCTION, 1909 TO 1921.

Year.	Appropriation.	Expenditure.
		£
1908-9	Act No. 19 of 1908	24,855
1909-10	Act No. 19 of 1908	223,959
1909-10	Division No. 11A, New Works, etc.	60,000
1910-11	Act No. 18 of 1910	285,863
1910-11	Division No. 12, New Works, etc.	850,000
1911-12	Act No. 18 of 1910	1,108,494
1912-13	Act No. 18 of 1910	524,037
1912-13	Division No. 10, New Works, etc.	
1913-14	Division No. 12, New Works, etc.	637,606
1914-15	Division No. 13, New Works, etc.	467,296
1915-16	Division No. 13, New Works, etc.	396,073
1916-17	Division No. 17, New Works, etc.	374,249
1917-18	Act No. 30 of 1917, New Works, etc.	355,397
1918-19	War Loan Act No. 23 of 1917	533,694
1919-20	War Loan Act No. 13 of 1918	366,695
1920-21	Division No. 7, New Works, etc.	300,000(a)
Total	..	6,508,218

(a) Estimated.

(v) *Visit and Report by Admiral Sir Reginald Henderson.* At the invitation of the Government, Admiral Sir Reginald Henderson visited Australia to advise upon naval matters generally. A summary of his report will be found in Official Year Book No. 6, pp. 1067-8.

(vi) *The Compact with the Imperial Government.* The Australian Government is building its navy according to the terms of an official paper (cd. 5746-2) submitted to the Imperial Conference held in London in 1911, and on the plan formulated by Admiral Henderson (after an inspection of Australia's capitals and other ports and coast line, in

1911). There is no formal contract or agreement between the British and the Commonwealth Governments. The last actual agreement was that of 1903, already described in Year Book No. 12 (see p. 1012). Before the expiration of the time for which this agreement was made the Commonwealth began the work of fleet construction. Up to the year 1911-12, £200,000 was annually paid. For 1912-13, £175,000 was set down in the estimates, and £166,600 paid. The Commonwealth Parliament amended the *Naval Agreement Act 1903*, by No. 10 of 1912 (*Naval Agreement Act 1912*), providing that the Governor-General may, from time to time, arrange with the Imperial Government for the reduction of the Australian squadron, and for reduction in the naval subsidy. No amount under "Naval Agreement Act" will be found in the estimates for 1913-14 and later years. Some departures are made from Admiral Henderson's recommendations, but generally they have been adopted. The Commonwealth is now fulfilling the larger obligation of fleet-building, and is maintaining its own vessels. The establishment of naval bases and sub-bases required for the fleet unit is also proceeding.

As already stated, the present situation is not governed by a formal contract or agreement. The Commonwealth Government has, by regulations and orders, given effect to some, and intends giving effect to others, of the items submitted to the Conference.

(vii) *Naval College*. A naval college has been established at Captain's Point, Jervis Bay, consisting of numerous buildings necessary for the training of naval officers. The course is similar to that carried out in naval colleges in England. In December, 1920, there were 96 cadet midshipmen under training. There were also 17 officers, including naval instructors, and 68 members of the ship's company in residence at the college. A boy whose thirteenth birthday falls in the year in which the entrance examination is held, is eligible to compete provided he is the son of natural-born or naturalised British subjects. From amongst those qualified the Selection Committee chooses the number required. The Commonwealth Government bears the whole expense of uniforms, victualling, travelling, as well as that of the educational course.

(viii) *Training Ships*. H.M.A.S. *Tingira*, moored in Rose Bay, Sydney, was commissioned in April, 1912, to train boys for the *personnel* of the Royal Australian Navy. The age of entry is fourteen and a half to sixteen years. Only boys of very good character and physique are accepted, after a strict medical examination. The boys must engage to serve until they reach the age of 25. The training lasts about one year, and they are then drafted to a sea-going warship of the Australian fleet. Recruiting has been satisfactory, there being 138 boys under training on 31st December, 1920.

(ix) *The Naval Station of the Commonwealth of Australia*. The following are the limits of the Naval Station which, since 1st June, 1919, have been controlled by the Commonwealth Government, acting through the Naval Board:—North: From a point in 95 degrees East longitude and 13 degrees South latitude along that parallel to the Eastward to the meridian of 120 degrees East longitude; thence along that meridian to the Northward to 11 degrees South latitude; thence to an Easterly direction to the Southern termination of the Eastern boundary of Dutch New Guinea in about 141 degrees East longitude; thence along the meridian of the boundary to the Northward to the Equator; thence along the equator to the Eastward to 170 degrees East longitude. East: From a point on the Equator on the meridian of 170 degrees East longitude along that meridian to the Southward to 32 degrees South latitude; thence along that parallel to the Westward to the meridian of 160 degrees East longitude; thence along that meridian to the South Pole. South: The South Pole. West: From the South Pole by the meridian of 80 degrees East longitude to the Northward of 30 degrees South latitude; thence along that parallel to the Eastward to the meridian of 95 degrees East longitude; thence along that meridian to the Northward to 13 degrees South latitude.

(x) *Visit and Report of Lord Jellicoe*. At the invitation of the Government, Admiral of the Fleet Lord Jellicoe visited Australia in May, 1919, to advise the Dominion Authorities whether, in the light of the experience of the war, the scheme of naval organization which had been adopted or may have been in contemplation, required consideration, either from the point of view of the efficiency of that organization for meeting local needs, or from that of securing the greatest possible

homogeneity and co-operation between all the Naval Forces of the Empire; and, should the Dominion Authorities desire to consider how far it is possible for the Dominions to take a more effective share in the Naval Defence of the Empire, to give acceptance from the Naval point of view in drawing up a scheme for consideration.

The subjects, on which advice was requested, were:—The Naval strategical problem affecting Australian waters and the Pacific; future composition of the Australian Navy; Naval Bases and requirements in the Pacific and East Indian Waters; general organization and administration of the Naval Forces.

4. Vessels and Personnel of the Australian Navy.—The following table shews the vessels of the Royal Australian Navy:—

LIST OF SHIPS OF THE ROYAL AUSTRALIAN NAVY, MAY, 1921.

Vessel.	Description.	Displacement.	Power.
		Tons.	H.P.
<i>Adelaide</i>	Light Cruiser	5,500	25,000
<i>Anzac</i>	Flotilla Leader	1,660	36,000
<i>Australia</i>	Battle Cruiser	18,800	44,000
<i>Brisbane</i>	Light Cruiser	5,400	25,000
<i>Cerberus</i>	Turret Ship	3,480	1,660
<i>Countess of Hopetoun</i>	First Class Torpedo Boat ..	93	1,100
<i>Encounter</i>	Light Cruiser	5,880	12,500
<i>Franklin</i>	Yacht	370	350
<i>Geranium</i>	Sloop	1,250	2,000
<i>Huon</i>	T.B. Destroyer	700	11,300
<i>Mallow</i>	Sloop	1,200	1,800
<i>Marquerite</i>	"	1,250	2,200
<i>Melbourne</i>	Light Cruiser	5,400	25,000
<i>Parramatta</i>	T.B. Destroyer	700	9,000
<i>Penguin</i>	Depot Ship	1,130	..
<i>Pioneer</i>	Light Cruiser	2,200	7,000
<i>Platypus</i>	Submarine Depot Ship ..	3,460	2,611
<i>Protector</i>	Gunboat	920	1,600
<i>Stalwart</i>	T.B. Destroyer	1,075	27,000
<i>Success</i>	"	1,075	27,000
<i>Swan</i>	"	700	10,000
<i>Swordsman</i>	"	1,075	27,000
<i>Sydney</i>	Light Cruiser	5,400	25,000
<i>Tasmania</i>	T.B. Destroyer	1,075	27,000
<i>Tattoo</i>	"	1,075	27,000
<i>Tingira</i>	Boys' Training Ship	1,800	..
<i>Torrens</i>	T.B. Destroyer	700	10,000
<i>Una</i>	Sloop	1,438	1,350
<i>Warrego</i>	T.B. Destroyer	700	9,000
<i>Yarra</i>	"	700	9,000
FLEET AUXILIARIES—			
<i>Biloela</i>	Fleet Collier	5,700	2,300
<i>Kurumba</i>	Fleet Oiler	3,970	..
SUBMARINES, "J" CLASS—			
1, 2, 3, 4, 5, 7		1,900	1,400
		(submerged)	
		1,170	3,600
		(on surface)	

Practically the whole of this Fleet was assembled in Port Phillip on 28th May, 1920, and was reviewed there by H.R.H. the Prince of Wales.

Besides the Sea-going Forces, there is a R.A.N. Reserve, which is composed of Citizen Naval Trainees. The *personnel* of the Sea-going Forces, which was originally largely composed of Imperial officers and men, is now mainly Australian in character and will become more so as time goes on. Strength of Naval Forces at latest available date was :—

**STRENGTH OF NAVAL FORCES (PERMANENT AND RESERVES),
15th SEPTEMBER, 1921.**

Description of Force.	Numbers Borne.		
	In Training.	Officers.	Men.
Royal Australian Navy (Seagoing)	406	4,450
Cadet Midshipmen undergoing training at R.A.N. College ..	85
Boys undergoing training on H.M.A.S. <i>Tingira</i>	125
Royal Australian Naval Reserve (Seagoing)	44	..
Royal Australian Naval Brigade	65	3,318

§ 3. Expenditure on Defence.

1. **Expenditure, 1916-17 to 1921-22.**—The following table gives the expenditure on Defence from 1916-17 to 1920-21, and the estimate for 1921-22 :—

EXPENDITURE ON DEFENCE, 1916-17 TO 1921-22.

	1916-17.	1917-18.	1918-19.	1919-20.	1920-21.	1921-22. (Estimate.)
	£	£	£	£	£	£
Naval Forces	1,442,405	1,466,164	1,546,586	1,611,325	2,429,050	2,340,438
Military Forces	1,348,593	1,088,351	1,196,028	946,409	1,340,719	1,693,000
Air Services	12,156	14,660	4,151	26,813	58,155	(d) 100,000
Naval Works	594,134	44,377	8,120	7,663	25,484	199,000
Construction of Fleet	374,249	(a)	(b)	(b)	301,284	300,000
Military—Additions, New Works, etc.	164,839	45,684	31,430	9,004	153,553	583,261
Military Stores, etc.	183,091	87,894	57,467	80,004	539,702	550,990
Air Services—Works	19,991	(d) 77,040	(d) 400,000
Rent, Repairs and Maintenance	84,283	73,678	79,221	78,461	108,728	136,149
Sites for Defence purposes	129,809	(a)	(a)	(a)	(a)	(a)
Proportion Public Works Staff, Salaries and Contingencies	19,200	17,715	31,880	28,962	26,723	30,500
Supervision of Public Works by State Officers	2,831	1,138	1,630	1,801	2,094	2,200
Interest on Transferred Properties	129,570	129,548	136,699	130,470	122,325	123,410
Audit	12,389	22,565	10,118	16,104	17,298	14,800
Pensions and Retiring Allowances	1,089	1,277	1,391	1,202	2,162	2,271
Miscellaneous	2,801	12,507	35,530	50,572	53,753	61,425
	4,501,439	3,005,608	3,140,251	3,008,781	5,258,070	6,537,444
Buildings, Works and Sites provided from Loan Fund (excluding construction of Fleet)	(c) 717,088	414,430	566,853	401,286	542,000
War Expenditure	61,541,566	66,958,360	83,447,990	70,137,318	57,434,734	42,399,253
Total Expenditure on Defence	66,043,005	70,681,056	87,002,671	73,712,952	63,094,090	49,478,697

(a) Provided from Loan Funds for Works. The expenditure in respect of Construction of the Fleet in 1917-18, 1918-19, and 1919-20, was £355,397, £533,694, and £366,696 respectively. (b) Provided from War Loan Fund. See previous note. (c) Includes Construction of Fleet £355,397. (d) Includes Civil Aviation.

2. Expenditure for Defence Purposes, 1901-2 to 1920-21.—In the following table the Defence expenditure for the whole Commonwealth period 1901-2 to 1920-21, and the estimate for the year 1921-22 are given :—

ANNUAL DEFENCE EXPENDITURE.

Year.	Naval.			Military.			Total Defence Expendi- ture. (a) (b)
	Under Ordinary Votes and Appropriations.	Works, Arms, Equipment, etc. (provided under Estimates for New Works and Buildings).	Total Naval. (a)	Under Ordinary Votes and Appropriations.	Works, Arms, Equipment, etc. (provided under Estimates for New Works and Buildings).	Total Military. (a) (b)	
		£			£		
1901-2	178,819	..	178,819	777,620	2,640	780,260	959,079
1902-3	149,701	..	149,701	595,115	5,537	600,652	750,353
1903-4	240,005	86	240,091	502,517	113,156	615,673	855,764
1904-5	200,394	5,394	205,788	533,945	194,865	728,810	934,598
1905-6	250,273	1,743	252,016	548,439	169,890	718,329	970,345
1906-7	255,120	652	255,772	585,516	194,507	780,023	1,035,795
1907-8	259,247	250,958	510,205	634,579	189,960	824,539	1,334,744
1908-9	263,207	4,055	267,262	686,365	96,965	783,330	1,050,592
1909-10	269,051	60,688	329,739	928,393	277,273	1,205,666	1,535,405
1910-11	303,493	1,161,541	1,465,034	1,092,305	448,687	1,540,992	3,006,026
1911-12	461,546	1,172,920	1,634,466	1,667,103	780,279	2,447,382	4,081,848
1912-13	806,881	853,735	1,660,616	1,802,734	879,883	2,685,617	4,346,305
1913-14	1,006,424	980,677	1,987,101	1,941,285	820,902	2,765,199	4,752,300
1914-15	1,526,351	854,613	6,821,091	1,471,138	584,602	12,733,688	19,554,779
1915-16	1,550,012	972,733	8,470,036	1,501,840	724,043	27,491,041	45,961,077
1916-17	1,510,542	1,040,788	6,641,249	1,532,619	405,334	59,401,756	66,043,005
1917-18	1,544,590	44,377	3,767,226	1,268,403	133,578	66,913,830	70,681,056
1918-19	1,650,375	8,120	9,435,658	1,388,708	88,897	77,567,013	87,002,671
1919-20	1,728,327	7,663	5,645,374	1,136,979	89,008	68,067,578	73,712,952
1920-21	2,549,807	326,768	3,658,462	1,553,045	693,255	59,435,628	63,094,090
1921-22	2,465,158	499,000	3,453,158	1,939,035	134,251	46,025,539	49,478,697

(a) During the war years and subsequently, war expenditure and loan expenditure on works included in total. (b) Includes Air Force expenditure, as follows :—£2,072 in 1912-13; £3,012 in 1913-14; £6,742 in 1914-15; £10,503 in 1915-16; £12,156 in 1916-17; £14,660 in 1917-18; £121,294 (of which £117,143 was war expenditure) in 1918-19; £46,804 in 1919-20 (Air Force war expenditure in this year shewed a credit of £81,601); £135,195 in 1920-21; and £500,000 (estimate) in 1921-22. All these amounts were under ordinary Votes and Appropriations, except war expenditure, and the following under New Works and Buildings :—£19,991 in 1919-20; £77,040 in 1920-21; £400,000 (estimate) in 1921-22. In 1920-21 and 1921-22, Civil Aviation is included.

NOTE.—In the year 1900-1 the approximate Defence Expenditure made by the States was :—

Ordinary Services	£800,000
Works, Arms, Equipment, etc.	200,000
Total	£1,000,000

3. Special War Expenditure.—The special war expenditure for the years 1914-15 to 1920-21 and the estimate for 1921-22 will be found on page 930.

4. Expenditure in Various Countries.—The total expenditure on defence and the expenditure per inhabitant in various countries according to estimates made immediately prior to the late war, were as follows :—

ESTIMATED PRE-WAR EXPENDITURE ON DEFENCE.—VARIOUS COUNTRIES.

Country.	Year.	Army.	Navy.	Total.	Per Inhabitant.
		£	£	£	s. d.
Great Britain	1913-14	28,220,000	46,309,000	74,529,000	32 3
Germany	1913-14	73,833,000	24,012,000	97,845,000	30 2
France	1913	38,286,000	18,452,000	56,738,000	28 7
Italy	1913-14	14,546,000	9,068,000	23,614,000	13 7
Austria-Hungary	1913	16,500,000	3,100,000	19,600,000	7 8
Switzerland	1913	1,772,000	..	1,772,000	9 1
Russia	1913	64,136,000	22,817,000	86,953,000	10 5
Spain	1913	6,391,000	2,827,000	9,218,000	9 3
Portugal	1913-14	2,190,000	851,000	3,041,000	10 3
Norway	1913-14	867,000	337,000	1,204,000	9 11
Sweden	1913	3,063,000	1,447,000	4,510,000	16 0
Denmark	1913-14	1,081,000	544,000	1,625,000	11 5
Holland	1913	2,780,000	1,678,000	4,458,000	14 6
Belgium	1913	3,260,000	..	3,260,000	8 7
United States	1913-14	35,073,000	29,464,000	64,537,000	14 0
Canada	1912-13	1,872,000	..	1,872,000	5 2
Japan(a)	1913-14	7,815,000	4,224,000	12,039,000	3 6
Australia	1913-14	3,291,000	2,456,000	5,747,000	23 7

(a) Excluding extraordinary expenditure.

§ 4. Industrial Establishments and Remount Depot.

1. Commonwealth Factories.—There are seven factories established under the authority of the Defence Act in connexion with the Defence Department. The Commonwealth Harness, Saddlery, and Leather Accoutrements Factory at Clifton Hill, Victoria, was opened in September, 1911. On 30th June, 1920, there were 44 persons employed, including 8 females. A large quantity of harness and saddlery, leather and canvas equipment has been turned out for the Defence and other Commonwealth and State Departments. At the Cordite Factory at Maribyrnong, Victoria, cordite is manufactured for the cartridges required for military purposes. On 30th June, 1920, the employees numbered 152. The Clothing Factory at South Melbourne, Victoria, commenced operations on 3rd January, 1912. Since 1st July, 1912, a satisfactory output has been maintained. The number of employees on 30th June, 1920, was 254, of whom 202 were females. The establishment is able to supply the whole of the uniform clothing required for the Defence Forces and the Postmaster-General's Department, and much of that required by State Departments and local governing bodies. The Small Arms Factory at Lithgow, New South Wales, was opened on 1st June, 1912. The first instalment of Australian arms was delivered in May, 1913. Employees numbered 789 on 30th June, 1920. The Commonwealth Woollen Cloth Factory was established at Geelong, Victoria, for the supply of uniform materials and woollen fabrics, and commenced operations in the latter part of 1915; 316 persons, including 152 females, were employed on the 30th June, 1920.

The Acetate of Lime Factory at Bulimba, Brisbane, which manufactures acetate of lime (a raw material used in the production of acetone), commenced operations in September, 1918. On 30th June, 1920, there were 49 persons employed. This factory is run in conjunction with the Cordite Factory.

A seventh Commonwealth Factory was established at the Military Hospital, Caulfield, Victoria, for the manufacture of artificial limbs for returned soldiers. This factory has since been transferred to South Melbourne, Victoria, and branch factories established at Sydney, New South Wales; Windsor, Brisbane, Queensland; Keswick, South Australia; and Fremantle, Western Australia. The total number employed throughout Australia in these artificial limb factories was 106 on 30th June, 1920. The factories were taken over by the Repatriation Department from the Defence Department on 1st November, 1920.

2. Expenditure.—The expenditure up to 30th June, 1920, on land, buildings, machinery and plant, factory fittings and furniture in connexion with the factories now in operation was approximately as follows:—

Small Arms Factory	£207,598
Cordite Factory	172,565
Clothing Factory	21,009
Harness Factory	13,205
Woollen Cloth Factory	143,988
Acetate of Lime Factory	105,942

3. Remount Depot.—The Act of 1910 authorised the establishment and maintenance of horse depots, farms, and stations for the breeding of horses. Up to the present nearly 2,000 remounts have been purchased. They are primarily to supply the requirements of the Field Artillery Batteries, but are also available for the use of other mounted units. Remount depots have been purchased or are leased in each of the military districts, and veterinary hospitals have also been established in the larger States. In Victoria and South Australia stables have been built. A remount section of the Army Service Corps

has been formed for the purpose of breaking, training and looking after remounts generally. These sections were so organised as to be capable of rapid expansion in case of emergency, and when war was declared in 1914 little difficulty was experienced by the Remount Service in coping with the enormous task of obtaining and training horses for the mounted units of the A.I.F. and in providing for the shipment of horses to Egypt and India as required.

§ 5. Australian Contingents.

1. **General.**—In previous issues of the Year Book an account was given of the composition, etc., of the Australian contingents despatched for service in the New Zealand and Sudan Campaigns, in South Africa, China, and the Great War of 1914–18 (see Official Year Book No. 12, pp. 1019 *et seq.*). Owing to limits of space, however, this information has not been repeated in the present issue.

Up to the 31st March, 1921, the troops which had been despatched from Australia for service in the various theatres of the Great War numbered 329,883.

(i) *Casualties in Australian Imperial Force.*—The number of casualties announced by the Defence Department to 31st March, 1921, was as follows:—

CASUALTIES IN AUSTRALIAN IMPERIAL FORCE TO 31st MARCH, 1921.

	All Ranks.
Deaths from wounds or disease	(a) 59,330
Casualties from wounds or gas (gross total)	166,819
Sick (gross total)	87,957
Casualties not specified	(a) 218
Total	314,324

(a) These figures represent actual net totals after all corrections consequent upon erroneous and later advice, etc., have been taken into account. The wounded and sick represent totals reported by cable and are in excess of the actual number of men affected, because many were admitted to hospital more than once.

(ii) *The Expeditionary Force in the Pacific.* The operations against the German colonial troops resulted, within two months, in the capture of the whole of the enemy's possessions in the Pacific. The German Pacific wireless chain was broken. Samoa was occupied by a force from New Zealand. The German Pacific Protectorate (*Das Deutsches Südsee Schutzgebiet*) was terminated. It comprised German New Guinea, the Bismarck Archipelago, the two northernmost islands of the Solomon group (Bougainville and Buka), the choicest islands of the Samoan group (now occupied by New Zealand), the Marshall Islands (including Nauru), the Carolines, Pelews and Ladrões (except Guam, which belongs to America). Of these groups, the Bismarck Archipelago is the most important. It includes New Britain, New Ireland, New Hanover, and several small groups and islands, of which the Admiralty, Hermit, Ninigo, Witu and St. Matthias groups are the principal. All former German islands south of the Equator (except the Samoan group) are now occupied and administered by the Commonwealth. Those north of the Equator are under Japanese administration.

(iii) *The Australian Navy in the War.* In Year Book No. 12, pp. 1025 *et seq.*, an account was given of the part played by the Australian Navy in the War, but owing to limitations of space it has not been possible to reproduce this matter in the present issue.

(iv) *Special War Expenditure, 1914-21.* According to a return supplied by the Defence Department the special expenditure for war purposes during each of the years 1914 to 1921 was as set out hereunder:—(See also Table on p. 926.)

SPECIAL WAR EXPENDITURE, 1914-15 TO 1921-22.

	1914-15.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.	1920-21.	1921-22. Estimate.
	£	£	£	£	£	£	£	£
Special expenditure on Expeditionary and Australian Forces—								
Naval	3,527,904	5,093,530	2,737,890		5,443,599	2,451,078	698,052	200,000

(a) An agreement has been entered into between Australia and the Government of the United Kingdom whereby war debts due to the latter by Australia have been funded and the amount due for maintenance of Australian troops at the front and loans made to Australia for war purposes are included in this agreement. Provision is also made for half-yearly payments in reduction of the principal of Australia's War Indebtedness to the Government of the United Kingdom.

§ 6. War Gratuity.

In accordance with the War Gratuity Acts 1920 (assented to 30th April, 1920, and 29th May, 1920), a bonus, payable as an overseas war service gratuity, is authorized for sailors and soldiers who served in the Great War. The gratuity is in the nature of a free gift from the Commonwealth, in recognition of honorable services during the War, and is not claimable or recoverable as a matter of right. For members of the Naval Forces who served in a sea-going ship; members of the Naval and Military Expeditionary Force to New Guinea; members of the Australian Imperial Force who embarked from Australia on or before 10th November, 1918 (day preceding the Armistice); and Imperial reservists who served, the rate of gratuity is 1s. 6d. per day for the qualifying period. For members of the Naval Forces who did not serve in a sea-going ship; and members of the Military Forces who did not embark for overseas service the rate is 1s. per day. The qualifying period of service is that between the outbreak of War (4th August, 1914) and the Armistice (11th November, 1918). The period for which payment is to be made to individuals commences—for sailors, from the date of taking up duty on a sea-going ship; for soldiers

who served overseas, from the date of embarkation (or the first of them, if more than one); the terminating date in all cases being the date of Declaration of Peace (28th June, 1919). For sailors not having service in a sea-going ship, and for soldiers who did not embark, or who embarked after 10th November, 1918, payment will be made from date of taking up duty to date of discharge or Declaration of Peace. Deductions may be made for misconduct on service, and serious crime, military or civil, involves disqualification.

The gratuity is ordinarily payable in Treasury bonds, maturing not later than 31st May, 1924, and bearing interest at $5\frac{1}{2}$ per cent. In necessitous cases, payment will be made in cash, if so desired by the person entitled. The first gratuities were made available about the beginning of June, 1920. By the 2nd July, 1921, the sum of £5,157,110 was paid in cash, and bonds to the value of £20,585,746 were issued. Upwards of 360,000 payments will be made, the total amount being estimated at £30,000,000.

§ 7. Special Defence Legislation.

1. **War Precautions Acts.**—On the outbreak of war in Europe, the Federal Parliament passed an Act to enable the Governor-General to make regulations and orders for the safety of the Commonwealth during the state of war. The provisions of this Act, which was assented to on 29th October, 1914, will be found in Official Year Book No. 8, page 1092. Particulars of the *Enemy Contracts Annulment Act* will be found in the same issue of the Year Book, page 1095.

The War Precautions Act 1918 provided that the War Precautions Act 1914–16 should remain in force only until 31st July, 1919, or for a period of three months after the issue of a proclamation that the state of war has ceased, whichever period is the longer. All regulations made under the Act will lapse with it.

Under the powers conferred by the above Acts, the *War Precautions Regulations* were made. They provided for the appointment of competent naval or military authorities to exercise certain powers under the regulations, and other matters. The principal provisions of the regulations are given in Official Year Book No. 11, pp. 1035–1043.

The War Precautions Act Repeal Act of 1920 repealed the Act 1914–18, but certain of the regulations are still in force.

§ 8. Persons of Enemy Birthplace.

The following table shews the estimated number of males of enemy birthplace (natives of Germany, Austria-Hungary, Turkey, and Bulgaria, whether naturalised or otherwise, but exclusive of persons of British parentage), in each State at the 31st July, 1915, and the estimated number naturalised. While the States and military districts are not quite conterminous, they approximate sufficiently to admit of the comparison:—

MALES OF ENEMY BIRTHPLACE IN THE COMMONWEALTH AT 31st JULY, 1915.

State and Military District.			Male Enemy Subjects.(a)	Number Naturalised.(a)	Number not Naturalised.(a)
Queensland	1st Military District	..	8,080	6,640	1,440
New South Wales	2nd " "	..	6,460	4,330	2,130
Victoria	3rd " "	..	4,920	3,300	1,620
South Australia	4th " "	..	3,270	2,630	640
Western Australia	5th " "	..	3,190	1,280	1,910
Tasmania	6th " "	..	380	320	60
Total	26,300	18,500	7,800

(a) These figures are based on Census returns, and can only be considered as a rough approximation.

The number of females of enemy birthplace in the Commonwealth at 31st July, 1915, is estimated at about 12,000.

§ 9. Repatriation.

1. **General.**—In common with others of the late warring countries of the world, Australia has had to face the problem of the returned soldier—to find employment for the fit, to re-establish the disabled, to provide for the dependents of those who have died or of those who are no longer able to support themselves, and to supply medical and surgical treatment for disabilities due to or aggravated by war services.

During the early stages of the war this work was carried out mainly by voluntary effort, assisted by Government funds, and supplemented by private contributions. Disconnected and divergent schemes were extemporised to meet the pressing needs of soldiers and their families, with the result that there was overlapping in some directions and insufficiency in others. The Commonwealth Parliament therefore decided that Repatriation should become a national undertaking, and that a comprehensive scheme should be designed to meet the various claims in connection therewith. On 8th April, 1918, the Department of Repatriation, charged with this responsibility, was established, the first Minister being Senator the Hon. E. D. Millen.

2. **Organisation of the Department.**—The organisation of the Department provides for a Central Administrative Commission of three paid members, termed the Repatriation Commission, one of whom is chairman, and each of whom is a returned soldier. Its duties are to prescribe by regulation the nature and extent of the assistance that may be granted, and to hear appeals from decisions of the State Boards. Under the Amending Act of 19th May, 1920, the Repatriation Commission also takes over the administration of war pensions. Repatriation headquarters are in Melbourne. District branches have been established in the capital city of each State, and associated with these branches are State Boards, comprising three paid members, one of whom is chairman, and providing for the representation of returned soldiers. The permanent official at the head of each State organization is termed Deputy Commissioner. A network of local committees is connected with the district branches. The local committees are voluntary organisations possessing dual functions. They act as sub-agents under the control and direction of the Department so far as the disbursement of assistance specifically provided by the Department is concerned, and they are vested with discretionary powers in regard to the disbursement of supplementary assistance, organised and raised locally. Local Committees work within clearly defined territorial boundaries. Under this scheme every square mile of the whole continent of Australia is brought directly under the operation of the departmental policy.

3. **Policy of the Department.**—The policy of the Department is based upon four main principles :—(a) To secure the re-establishment of returned soldiers in the industrial life of the community to the fullest extent that circumstances permit; (b) to sustain these soldiers until an opportunity for such re-establishment is assured; (c) to provide for the care of the dependents of soldiers who have died on active service, as well as the dependents of soldiers who, on account of injuries sustained, are unable to provide for those formerly dependent upon them; and (d) to provide medical treatment after discharge for returned nurses, sailors and soldiers who are suffering from disabilities caused or aggravated by war service.

To give effect to these principles the Department undertakes :—

- (1) To provide suitable employment for those who are able to follow their previous occupation or one similar to it, and to pay sustenance until such opportunities are presented;
- (2) To restore to the fullest degree of efficiency possible, by means of vocational training, those who on account of war service are unable to follow their pre-war occupations, and during the period of such training to assure trainees adequate sustenance;
- (3) To maintain by pensions or in hostels totally and permanently incapacitated soldiers and their dependents, and soldiers' widows with children.
- (4) To supply gratis all necessary treatment, surgical aids, and medicaments; all hospital fees, and transport expenses thereto and therefrom, with allowances for certain classes for the period of treatment (where hospital treatment is not feasible the same may be given in the home or in such place as may be approved).

4. Activities of the Department.—(a) *Assistance and Employment.* The activities of the Department are classified under five sections—employment, vocational training, land settlement, housing, and assistance. Under assistance, a wide variety of benefits, including the provision of surgical aids, medical treatment, establishment in small businesses, furniture loans and grants, educational grants and equipment with tools of trade, are provided. In co-operation with the State Governments a land settlement scheme, whereby the Federal Government lends the States the necessary money to acquire the estimated number of holdings required, and to construct railways or other works necessary to their successful occupation, has been devised. Under this scheme the Commonwealth Government will also make available working capital up to £625 per settler. This will afford every soldier possessing the natural aptitude and fitness an opportunity of ultimately owning his own farm. With the exception of South Australia all the States have agreed to extend the benefits of the Land Settlement Scheme to munition and war workers to whom the Commonwealth advance of £625 will be available.

Under the provisions of the housing scheme, which is administered by the War Service Homes Commissioner, a returned nurse or soldier, a munition or war worker, a soldier's widow, or his dependents are entitled to a maximum advance of £800 for the purpose of acquiring a dwelling. According to the material of the house, the period of repayment will vary. Principal and interest are repayable as rent at the rate of 5 per cent. per annum.

(b) *After-war Treatment of War Service Disabilities.* For disabilities solely due to or aggravated by war service, discharged nurses, sailors and soldiers are entitled to free medical treatment, surgical aids, dressings, and necessary medicines. The expenses of unavoidable travel for any medical or surgical purposes are undertaken by the Department, which likewise defrays any necessary expenses in a hospital or other approved place. While undergoing such treatment and upon the certificate of a Departmental Medical Officer, a married soldier receives sustenance at the fixed rate of £2 17s. per week (inclusive of pension), with 3s. 6d. per week added for each child, up to a maximum of £3 9s. In a like situation a soldier without dependents receives sustenance at the rate of £2 2s. per week. By arrangement with the Pharmaceutical Society, upon the production of the medical officer's prescription to any pharmacist in the Commonwealth, such medicines, lotions or dressings as may be required will be immediately supplied free to the soldier. The following classes of after-discharge medical treatment are provided for—

- (1) Treatment in hospitals in metropolitan areas for cases of a class which cannot be effectively dealt with in a country hospital, or cases where continuity of treatment is desirable.
- (2) Treatment as out-patients in metropolitan areas and country centres.
- (3) Treatment in country hospitals in cases which do not present any complications, or in cases of emergency.
- (4) Treatment in homes in cases of emergency within country districts.
- (5) Treatment in convalescent homes and hostels.
- (6) Treatment of incurables, mentals, tuberculars, inebriates, alcoholics, and chronic epileptics in special institutions.

5. Sustenance Rates and Pensions.—The sustenance rate that may be granted to applicants awaiting fulfilment by the Department of certain specified obligations is:—(a) To a soldier without dependents a weekly income inclusive of pension of £2 2s.; (b) To a soldier with a wife a weekly income inclusive of their combined pensions of £2 17s. An additional allowance of 3s. 6d. per week is made for each child up to four, the maximum sum payable being £3 9s. per week.

Those who are eligible for this benefit are applicants awaiting employment; approved applicants waiting to take up land; blind soldiers undergoing training; students receiving training in commercial or professional occupations; trainees in technical schools; convalescents; and soldiers receiving medical treatment.

The general Pensions rates payable to Widow or Widowed Mother on Death of a Member of the Forces, or to a Member, or to the Wife of a Member, upon his total incapacity, are as follows:—

Rate of Pay of the Member per Day at Date of Death or Incapacity.	Fortnightly Pension Payable to Widowed Mother on Death of Member.	Fortnightly Pension Payable to Widow on Death of Member.	Fortnightly Pension Payable to Member upon Total Incapacity.	Fortnightly Pension Payable to Wife of Member who is Totally Incapacitated.
s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
6 0	2 0 0	2 7 0	4 4 0	1 16 0
7 0	2 3 0	2 7 0	4 4 0	1 16 0
9 0	2 9 0	2 9 0	4 4 0	1 16 0
10 0	2 12 3	2 12 3	4 4 0	1 16 0
10 6	2 13 9	2 13 9	4 4 0	1 16 0
11 6	2 16 0	2 16 0	4 4 0	1 16 0
12 0	2 17 3	2 17 3	4 4 0	1 16 0
13 0	2 19 6	2 19 6	4 4 0	1 16 0
17 6	3 10 0	3 10 0	4 4 0	2 0 0
22 6	3 17 6	3 17 6	4 5 0	2 2 6
30 0	4 9 0	4 9 0	4 15 0	2 7 6
37 6	5 0 9	5 0 9	5 5 0	2 12 6
45 0	5 12 3	5 12 3	5 15 0	2 17 6
50 0	6 0 0	6 0 0	6 0 0	3 0 0

In cases of (a) Widows with dependent children, and (b) Widows without children whose circumstances are such as in the opinion of the Commission justify an increase of the rates specified in this Schedule, and whose rate of pension, as specified in column three of this Schedule, is less than £4 4s. per fortnight, the Commission may, for such period as it thinks fit, increase the rate of pension to an amount not exceeding £4 4s. per fortnight.

A Special Rate of Pension amounting to £8 per fortnight, may be granted to members of the Forces who have been blinded as the result of War Service, and to members who are totally and permanently incapacitated (*i.e.*, incapacitated for life to such an extent as to be precluded from earning other than a negligible percentage of a living wage).

The Commission may grant a pension not exceeding the Special Rate of Pension to any member of the Forces who is suffering from tuberculosis, and who has been for at least six months an inmate of an establishment for persons so suffering, and has been discharged from that establishment.

The Special Rate of Pension shall not be payable to any pensioners who are maintained in an establishment at the public expense.

In the case of a member who has been granted the Special Rate of Pension, the wife of such member shall not be entitled to receive a pension exceeding the rate specified above.

The total number of pensions in force was 223,988, and the amount expended at end of February, 1921, was £4,954,986.

6. Summary of Work of Department from 8th April, 1918, to 28th February, 1921.—The following is a summary of the work of the Department from its inception to the latest available date:—(a) *Employment*.—Number of applications, 210,948; number of positions filled, 118,624. (b) *Vocational Training*.—Vocational training is designed for—(i) Soldiers incapacitated from following their usual occupations. (ii) Apprentices whose indentures were interrupted by war service. (iii) Widows without children. (In cases where a widow with children satisfies the State Board that adequate arrangements can be made for the care of her children during training hours, applications for vocational training may be approved.) (iv) Students whose studies were interrupted by war services. (v) Members of the A.I.F. who enlisted under the age of twenty years. Classes representing 95 trades and callings have been established, with results as follows:—Number of men completed training, 11,083; number in training, 18,742. (c) *Assistance other than Vocational Training and Employment*.—Applications received, 361,647; applications approved, 311,291. (d) *War Service Homes*.—The operations of the War Service Homes Commission to 30th June, 1921, were as follows:—Altogether 4,356 homes have been completed under the Commission, while 1,176 are at present under construction. Of this number 449 are being constructed under contract, while 727 are being erected by day labour. There have been 91 additional contracts let for houses upon which constructional work has not yet been commenced,

while tenders have been called for a further 15 houses, but these tenders have not yet been finally dealt with. The number of houses which the Commissioner has assisted to complete is 126, and a total of 10,196 existing houses has been purchased by the Commissioner on behalf of returned soldiers or dependents eligible under the Act, involving a total cost of £5,920,389. Mortgages lifted number 1,381, involving £670,643. The total applications approved by the Commissioner to 30th June, 1921, numbered 17,199, the amount involved being £10,523,190. The Commissioner has purchased approximately 2,751 acres upon which to erect homes for soldiers under the provisions of the War Service Homes Act.

7. Assistance Granted.—The table hereunder shews the sums granted by way of assistance during the period from the inauguration of the Department (8th April, 1918) to 28th. February, 1921 :—

DEPARTMENT OF REPATRIATION.—ASSISTANCE GRANTED FROM
8th APRIL, 1918, TO 28th FEBRUARY, 1921.

Co-operative businesses	740	..	740
Totals	6,265,216	1,289,280	1,249,749	8,804,245

8. Settlement of Soldiers on the Land.—In 1917 at the Premiers' Conference in Melbourne it was agreed that the States should undertake the work of settling soldiers on the land but that the Commonwealth should finance them for this purpose.

The classes of persons entitled to assistance as land settlers are :—

- (1) Members of the Australian Expeditionary and Naval Forces;
- (2) Members of the Naval and Military Forces of any part of the King's Dominions other than the Commonwealth if they resided in Australia prior to enlistment;
- (3) Munition workers and war workers who left Australia under engagement with the Imperial Government to undertake war work.

The original arrangement provided that the Commonwealth should take the responsibility of finding up to £500 per settler as working capital for improvements, implements, seed, etc., an amount which was subsequently increased to £625 per settler.

At the Premiers' Conference held in January, 1919, definite proposals were put forward by the States at the request of the Commonwealth Government and the latter agreed to finance the States to the extent shewn in the following table:—

PROVISION FOR SOLDIER SETTLEMENT, 1919.

State.	No. of Settlers.	Advances to Settlers.	Land Resumption.	Public Works.	Total.
	No.	£	£	£	£
New South Wales	8,405	5,253,125	1,208,408	5,792,658	12,254,191
Victoria	5,395	3,721,875	6,592,500	..	10,314,375
Queensland	2,826	1,766,250	200,000	415,664	2,381,914
South Australia	1,729	1,080,625	1,351,346	600,000	3,031,971
Western Australia	3,100	1,937,500	500,000	2,162,500	4,600,000
Tasmania	1,556	972,500	1,251,944	13,898	2,238,342
Total	23,011	14,731,875	11,104,198	8,984,720	34,820,793

As the number of applicants exceeded the estimates, the States sought further assistance from the Commonwealth. The basis of the agreement arrived at (Premiers' Conference, July, 1920) was that the Commonwealth Government should advance the States a flat rate of £1,000 per settler—£625 per settler (on the average) as working capital and £375 per settler (on the average) for resumptions and works incidental to land settlement, approved by the Commonwealth.

The numbers provided for to the 31st December, 1920, are as follow:—

SOLDIER SETTLEMENT, 31st DECEMBER, 1920.

State.	Quota to be Settled under Original Agreement.	No. Settled to 31st December, 1920.
	No.	No.
New South Wales	8,405	5,633(a)
Victoria	5,395	6,950
Queensland	2,826	3,977
South Australia	1,729	1,838
Western Australia	3,100	3,537
Tasmania	1,556	2,137
Total	23,011	24,072

(a) To 30th November, 1920.

The amounts reimbursed to the State Governments by the Commonwealth to the 31st March, 1921, are as follows:—

New South Wales	£6,015,135
Victoria	10,442,604
Queensland	1,805,120
South Australia	2,344,215
Western Australia	2,978,681
Tasmania	1,800,580
Total	£25,386,335

Prior to the occupancy of the land, the Repatriation Department may pay sustenance for a limited period and subject to certain conditions, and during the first two years of occupancy, sustenance may be paid for six months while awaiting actual production.

The fares of a man and his family to his place of settlement are paid by the Repatriation Department and a limited amount allowed towards the cost of removal of his household effects.

Where men are given rural training, the cost of maintenance is shared between the State Lands Department and the Repatriation Department acting on behalf of the Commonwealth.

9. *Conspectus of State Laws affecting Settlement of Returned Soldiers on the Land.*—In Official Year Book No. 13, pp. 1018 *et seq.*, will be found a table giving particulars of the laws of the various States relating to returned soldiers' land settlement.

Later modifications have been made with a view to simplifying procedure, and liberalising the conditions under which holdings may be acquired.

SECTION XXIX.

NEW GUINEA.

A. THE ISLAND OF NEW GUINEA.

1. **Geographical Situation of New Guinea.**—New Guinea, frequently described as the largest island in the world, lies to the north of Australia, between $0^{\circ} 25'$ and $10^{\circ} 40'$ S. latitudes, and between $130^{\circ} 50'$ and $150^{\circ} 35'$ E. longitudes. Its estimated area exceeds 300,000 square miles, the greatest length being 1,490 miles and the greatest breadth 430 miles.

A map shewing the Territory of New Guinea, Papua, and adjacent islands will be found on page 965.

2. **Discovery.**—The island was probably sighted by Abreus in A.D. 1511. The first visit by Europeans was apparently either that by the Portuguese Don Jorge de Meneses on his way from Goa to Ternate in 1526, or that by the Spaniard Alvaro de Saavedra in 1528. In 1606 Torres, having parted company with De Quiros at the New Hebrides, sailed, on his way to the Philippines, through the strait which separates the island from Australia, and which now bears his name.

3. **Colonisation.**—Little progress was made for many years in exploration and settlement. First the Portuguese, and afterwards the Dutch, who to a great extent replaced them as the principal European traders in the East, seem to have jealously excluded other traders and adventurers, and to have kept the knowledge of their discoveries to themselves. The coasts were visited by Roda, Schouten, Lemaire, Tasman, Dampier, Torres, Bougainville, and Cook; but the difficulties of navigation, the savagery of the islanders, and the tempting fields for enterprise in the more temperate regions further south, diverted the energy of traders and voyagers. Forrest describes a voyage by himself in 1774. In 1793, New Guinea was annexed by two commanders in the East India Company's service. Since that date the Dutch have made extensive surveys of the western portion, and the British and Germans have occupied and colonised the eastern. In September, 1914, German New Guinea was seized and occupied by Great Britain by means of a force raised and despatched by the Australian Government.

4. **Partition.**—The three colonising powers agreed to the partition of New Guinea, each having suzerainty over islands adjoining its own territory. The whole of the portion west of the 141st degree of longitude, comprising about 150,000 square miles, or nearly half the island, belongs to the Dutch. The eastern half was divided in almost equal portions between Great Britain and Germany, the area possessed by each (with adjacent islands) being about 90,000 square miles. An Anglo-German boundary commission, appointed for the purpose of defining the boundary between the territories of the two nations, started operations on 26th December, 1908, and completed the field-work on 27th October, 1909. The total length of boundary delimited was $66\frac{1}{2}$ miles. The work was both important and difficult. For a considerable portion of the survey, the country was exceedingly rough and mountainous, and the natives hostile. In one instance, the line was carried over a range at an elevation of 11,110 feet. The Dutch colony forms part of the residency of Ternate in the Moluccas, and has not been extensively developed. The German protectorate, where considerable commercial development had taken place, included the northern part of the eastern half of the mainland, known as Kaiser Wilhelm Land, and the large islands of the Bismarck Archipelago and the Solomon Group, as well as nearly 200 smaller islands. The south-eastern portion of New Guinea, nearest Australia, is a dependency of the Commonwealth of Australia. The German Pacific protectorate was terminated in 1914.

B. PAPUA.

§ 1. General Description of Papua.

1. **Australian Dependency of Papua.**—Surveys of the east coast of New Guinea by Stanley, Yule, Blackwood, Moresby, and others, brought home to Queensland, and to Australia generally, the danger to her commerce which would result from foreign possession of the islands and coasts opposite to Cape York, and from the holding by a hostile power of the entrance to the splendid waterway inside the Barrier Reef. The mainland opposite the shores of Queensland east of the 141st meridian was therefore annexed by that colony in 1883, but the action was disallowed by the British Government. In 1884, however, a British protectorate was authoritatively proclaimed by Commodore Erskine over the region lying east of the 141st meridian as far as East Cape, with the adjacent islands as far as Kosman Island. In the year following, an agreement with Germany fixed the boundaries between the possessions of the two countries, and to Great Britain was assigned the portion now known as Papua, lying between the extreme limits of 5° and 12° S., and 141° and 155° E. The British protectorate was subsidised by Queensland, New South Wales, and Victoria, and lasted until 30th September, 1888, when it was proclaimed a possession of the Empire. Its constitution was then that of a Crown colony, in association, however, with Queensland. Administration was in the hands of a Lieutenant-Governor, aided by an Executive and a Legislative Council, and advised by a Native Regulation Board. Port Moresby, on the south coast, was made the head-quarters of the official establishment; a supreme court was established there, and magisterial courts in the districts; and an armed native constabulary force (numbering 340 on the 30th June, 1919), under a European officer, was instituted for the maintenance of order. There were also, on the same date, 821 native village constables and 396 native interpreters, warders, boats' crews, etc., employed by the Crown.

2. **Annexation by Commonwealth.**—The Territory was placed under the authority of the Commonwealth on 1st September, 1906, by proclamation issued in pursuance of Letters Patent of the 18th March, 1902, and was accepted by the Commonwealth by the Papua Act 1905, which came into force by virtue of the proclamation aforesaid. The transfer was made under the authority of section 122 of the Constitution (see p. 24 hereinbefore). The Territory is now under the administration of the Commonwealth, but not included within it, and is divided into eleven magisterial districts.

3. **Physical Characteristics.**—Papua lies wholly within the tropics. The northernmost point touches 5° S. latitude: its southernmost portion, comprising Sudest and Rossel Islands, lies between 11° S. and 12° S. latitude. It is separated from Australia by Torres Strait. The length of Papua from east to west is upwards of 800 miles: towards either end the breadth from north to south is about 200 miles, but about the centre it is considerably narrower. The Territory comprises also the islands of the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups. The length of coast-line is computed at 3,664 miles—1,728 on the mainland, and 1,936 on the islands. The total area is about 90,540 square miles, of which 87,786 are on the mainland, and 2,754 on the islands. From the eastern end of the territory rises a chain of mountains, which forms a great central ridge and attains its greatest altitude, as it extends westwards, in the Owen Stanley Range, the highest points of which are Mount Victoria (13,200 feet), Mount Seratchley, the Wharton Range, and Mount Albert Edward. The western end of the possession is for nearly 300 miles generally low and swampy for some distance along the coast. The whole territory is well watered. The great mountains and a large portion of the lower country are covered with forest. The islands are mountainous, and, with the exception of the low coral islands of the Trobriand Group, part of Murua, and a few others of small dimensions, principally of volcanic formation. The highest is Goodenough Island, 8,000 feet. The largest rivers of the mainland flow into the Gulf of Papua. The Fly River, with its tributaries, drains an extensive area of the territory of the Netherlands, as well as of the British. Its length in British territory is about 620 miles, and it is navigable by a steam launch for over 500 miles. Other important rivers are the Turama and the Purari. There are many excellent harbours.

§ 2. Population.

The total white population of Papua on 30th June, 1920, was 1,096, made up of 693 adult males and 258 adult females (adults being persons over 16 years of age), and 81 male and 64 female children. The following table gives the white population of Papua for the last five years:—

WHITE POPULATION OF PAPUA, 1916 TO 1920.

YEAR ENDED 30TH JUNE.

1916.	1917.	1918.	1919.	1920.
992	1,036	962	971	1,096

The chief occupations of adult male Europeans were:—Government officials and employees, 106; planters (including managers and assistants), 145; storekeepers and clerks, 101; miners, 66. The number of missionaries is stated as 104.

It is not possible to make a reliable estimate of the number of natives, owing to the fact that much of the interior country is unexplored. It is generally assumed to be somewhere between 250,000 and 500,000. These speak many languages and dialects. The coloured population, other than Papuans, numbered on 30th June, 1920, 282, of whom 197 were mission teachers principally from Samoa, Fiji, Solomon Islands, and other South Sea Islands, while 20 were Torres Straits islanders. On the same date, half-castes, including Papuan half-castes, totalled 296. An Immigration Restriction Ordinance prohibits the immigration into the Territory of persons who fail to pass the dictation test, or who are persons of bad character, or likely to become a charge upon the public. Exemptions may, however, be granted by the Lieutenant-Governor to persons of special skill whom it is desired to employ as overseers or foremen.

At the Census of 3rd April, 1921, the European population was returned at 1,339, but this figure included the crew and passengers of the *Marsina*, numbering 87. There were also on the same date 3 Chinese, 10 Japanese, 60 Malays, 124 other Asiatics, 397 Fijians, Samoans, and other Oceanic races, and 159 half-castes.

§ 3. Native Labour, Taxation, Etc.

The rights of both employer and labourer are conserved by the Native Labour Ordinances. Service on the part of the native is voluntary, and he must be justly treated, and properly housed and fed. Employers may recruit personally, or obtain their natives through a licensed recruiter. Contracts of service must be in writing, entered into before a magistrate or other qualified officer, and the natives must be returned to their homes on completion of engagement. The labour question is complicated by the communistic system which prevails in the villages. Native custom demands that the friends or fellow-clansmen of the returned labourer receive a share in whatever he gets. The result is that the stimulus of individual interest is largely absent. During the period of service the recruiter or employer is personally responsible for the native's welfare. Refusal to work after engagement, or desertion from service, renders the labourer liable to imprisonment. On the other hand, a magistrate may terminate an engagement where unjust or harsh treatment by the employer is proved. The term of indenture must never exceed three years, and in the case of miners and carriers eighteen months is the limit, but re-engagements may be made. The magistrate must satisfy himself that the remuneration is fair, that the native is willing to undertake the service, and that there is no probability of unfair treatment or detention. Wages must be paid in the presence of an officer. A medicine chest, stocked with necessary drugs and first aid instruments, must be kept by all employers.

Just treatment, good food, and satisfactory remuneration for his labour have made the Papuan savage an excellent servant. With considerable natural aptitude and intelligence, he is able to understand readily what is required by his employer; consequently native labour is very largely engaged by the Administration for the construction of roads and public works, and by the private employer for the clearing and upkeep of plantations. While in some districts the natives manifest a marked

unwillingness to work, in other cases, inland villagers have offered themselves as labourers without suggestion from recruiters or other officers. Actual ill-treatment of native employees may be said to be non-existent.

In his Report for 1917-18 the Lieutenant-Governor drew attention to the adaptability shewn by some of the natives in the way of house-building, boat-building, the management of sailing vessels and oil launches, and in some cases as clerks.

The number engaged under contract of service during the year ended 30th June, 1920, was 6,397, as compared with 8,610 in the preceding year. Various causes have been assigned for the falling-off, the principal being the difficulty of obtaining rice, and the dislike of native labourers for the substituted foods. It is hoped to remove this by the cultivation of rice locally. At present a small quantity is grown in the Mekeo district and in other parts of the territory, and its cultivation is beginning to attract the attention of Europeans. Another cause is the decrease in the purchasing power of money, the monthly wage of 10s. not offering sufficient inducement for the natives to leave their villages. In addition, there were 1,652 natives employed for short periods who were not under contract of service, 1,172 armed constabulary and village constables, and 331 engaged in miscellaneous services such as interpreters, warders, boats' crews, messengers, etc. There were also on the same date 55 mandated children, nearly all of whom were under care of missionary agencies.

Under the Native Taxes Ordinance, passed in 1918, a tax not exceeding £1 may be imposed on natives, excepting native constables, mission teachers, natives unfit for work, and those who have not less than four living children. The proceeds of the tax are to be expended on education, or for such purposes having for their object the direct benefit of the natives as may be prescribed.

It is stated that the tax is very popular amongst the natives in many parts of the Territory, and that exemption from taxation is bitterly resented. The net receipts from the tax in 1919-20 came to £8,307, out of which small amounts were granted to the Anglican Mission and the London Missionary Society, further disbursements being contingent on the provision of a satisfactory scheme of distribution.

§ 4. Production.

1. **Papuan Products.**—The products of the territory are obtained from its agricultural, forestal, fishing, mining, and manufacturing industries. There is a Papuan court at the Imperial Institute, London, where, beside maps, handbooks and reports, a representative collection of products is shewn, additions being made to the exhibits from time to time. Displays of Papuan produce are also made at exhibitions held in the Commonwealth. The industries of Papua are not numerous, but they are becoming more diversified. In many cases, some years must elapse before the raw material is available for commerce.

2. **Agriculture.**—(i) *Soil and Rainfall.* The physical features of Papua are favourable to agriculture. Rich soils at varying elevations, and heavy and evenly-distributed rainfall, have ensured success in cultivating almost every tropical product of value. The Territory comprises immense areas of rich alluvial and volcanic soils along the coast, and equally fertile land at elevations up to 6,000 feet. Splendid rainfalls are recorded, except over a belt of country which runs back from the coast to the hills, and which has its dry season from May to November. This "dry" area is admirably suited for the production of tobacco, fibres, cotton, etc. There are 20 meteorological stations throughout the Territory. An economic museum and agricultural library have been established. By anticipating and removing many of the pioneering difficulties, the Government has made the task of the colonist an easy one. The feature of recent years has been the steady investment of capital in the development of large areas previously acquired. One of the principal difficulties of planters is the heavy growth of weeds, and the Government has undertaken experiments with the planting of grasses to take the place of weeds, and so keep down rank vegetation.

(ii) *Plantations.* On 31st March, 1920, there were 256 plantations. Agricultural settlement has been mostly in the Central and Eastern Divisions, though plantations are rapidly spreading in other districts. The total area planted was 62,162 acres, or an average of 243 acres for each plantation. The principal plantation industries entered upon up to the present are coconuts, rubber, and sisal hemp. Secondary agricultural industries are the cultivation of bowstring hemp, kapok, coffee, tobacco, vanilla, cocoa,

tapioca, cinnamon, tea, rice, and maize. The natives are compelled by an ordinance to plant coconuts for food supply. In the Kokoda district, which is not suitable for coconut planting, 8,000 rubber seeds and plants were distributed amongst the native villages in 1918. In addition to the coconuts in these plantations many more are planted over small and widely scattered areas by the older natives in accordance with custom. The following table shews the areas under the different cultures at the end of June, 1920 :—

	Acres.					
Coconuts	46,101
Rubber	8,363
Hemp	6,241
Coffee	85
Rice	21
Other cultures (including fruit trees)	1,351
Total	62,162

The quantity and value of the various products for the year ended 30th June, 1920, were as follows :—

Copra, 4,080 tons	£124,035
Hemp, 336 tons	12,284
Rubber, 242 tons	41,542
Total	£177,861

It was estimated in 1917 that over £1,000,000 had been expended in plantations, and, with the exception of two large British companies, practically the whole of the capital was subscribed in Australia and locally.

(iii) *Government Plantations and Experimental Stations.* At Orangerie Bay the Government coconut plantation covers an area of 1,171 acres, some of the trees being eight years old. Copra-making has been commenced, the production in 1920 being 74 tons, valued at £2,278. The Government rubber plantation on the Kemp-Welch River has an area of 230 acres, and contains over 4,000 trees large enough for tapping, but no action has been taken in this direction owing to the low price of rubber.

Sylvicultural nurseries have been established in connexion with the plantations with the object of supplying settlers with seeds and plants, which have been imported from the East and West Indies, Central America, tropical Australia, Ceylon, the Malay States, and the Solomon Islands. At the experimental stations, the suitability of the soil and climate for different products is tested, and correct methods of cultivation demonstrated. Large quantities of plants and seeds have been distributed to planters. A Government orchard, for supplying fresh fruit and vegetables, has been established at one of the stations, and yields considerable quantities of European fruit-foods.

(iv) *Indigenous Products.* There are many indigenous plants of great economic value. These comprise sandalwood and other timber trees, sugar-cane, cotton plants, rubber-both vine, nutmegs, ginger, bamboos, palms, bananas, bread-fruit, edible nuts, sago-palms, fruits, and vegetables. About 92,000 acres are held under timber licences, but little development has so far been undertaken. There are large areas of valuable timbers, but some of them are situated in mountainous country, difficult of access. The export of mangrove bark for tanning purposes amounted in 1919-20 to 1,400 tons, valued at £2,686. [See also § 4 hereinafter.]

3. *Live Stock.*—On 30th June, 1920, the live stock in the Territory consisted of 225 horses, 768 head of cattle, 44 mules, 6 donkeys, 463 goats, 117 pigs, and 4,786 poultry. A Government stud farm has been established for the breeding of horses. The introduction of rabbits, foxes, hares, and monkeys is prohibited.

4. *Forest Products.*—There is a large diversity of useful timbers in Papua. Of 120 varieties that have been catalogued, 16 are adapted to resisting heavy strains, and are suitable for girders, railway wagons, etc.; 10 for railway carriage and coach building; 15 for joinery, lining, flooring, etc.; 14 for butter boxes; 5 for boat building; 4 for piles, and 15 for cabinet work. Sandalwood is indigenous. It is largely used for cabinet work, and santal oil is distilled from its roots. Ebony is also produced for export. Rubber is

a promising industry. There are considerable areas of native rubber (*Ficus Rigo*); but the planters generally prefer the imported Para rubber. Guttapercha is obtained from a species of *palaquium*, which grows on the hills. Drugs, dyewoods, and spices are also obtained from indigenous plants. The mountain firs offer possibilities in the shape of turpentine oils and timbers, while the conifer *Agathis alba* yields a valuable resin. Saw mills have been established, but the output has not been sufficient to supply the local demand for building and other timber, and large quantities of sawn timber have been imported from Australia. Contracts have been made by residents to ship timber to Great Britain. The timber licenses in force during 1919 covered 92,000 acres.

5. **Fisheries.**—Pearl-shell fishing occupies an important place in the industries of Papua. A considerable number of luggers is licensed, but the returns are mostly credited to Queensland, whose boundary approaches to within a few miles of the Papuan coast. The species of tortoise which supplies the commercial tortoise-shell is also a native of the Territory. Bêche-de-mer and trochus are found along the shores and reefs. There is a dugong fishery on the coast of the Western Division. The value of fisheries exports in 1919-20 was £53,430, of which bêche-de-mer accounted for £612, pearls £25,577, trochus shell £24,255, turtle shell £136, and shell, other, £2,850.

6. **Mining.**—(i) *Variety of Minerals.* Minerals have been discovered in many places, and over an extremely wide range. Those discovered so far are—gold, copper, tin, lead, zinc, cinnabar, iron, osmiridium, gypsum, manganese, sulphur, graphite, chromite, brown coal, lignite, and petroleum. Indications of the existence of petroleum have been found at scattered intervals over an area of country covering about 1,500 square miles between Yule Island and the Purari Delta, in the Gulf Division of Papua. Quantities of oil and inflammable gas have been met with in the test bores put down, but not in sufficient bulk as yet for commercial purposes. Indications have also been noted in Dutch New Guinea, and in the portion of the Territory formerly under German control. According to one observer, the whole of the East Indian Archipelago forms one "petroliferous province," the statement being supported by the fact that the nature of the oil so far obtained in Papua is more comparable with Dutch East Indian oil than any other. Exploitation of the Papuan oil-fields by private companies is not permitted.

A scheme has been arranged under which the Imperial Government has entered into partnership with the Commonwealth Government in further exploitation of the field. Additional labour and machinery have been provided for, and the work will be under the control of a field manager selected in England.

Of precious stones, only the topaz and beryl have been obtained. Large beds of apparently good coal also exist. A geologist was added to the Government service at the beginning of the year 1911.

(ii) *Gold.* In 1888 the first gold was discovered. The search has now spread over every division, and finds have been recorded wherever the explorers have gone. Prospecting parties are subsidised by the Government. There are 69 white miners and 956 indentured and casual labourers, of whom 50 whites and 705 indentured labourers were working on the Louisiade field. This field was the chief producer in 1919-20 with 7,471 ozs. of reef gold and 1,000 ozs. of alluvial, valued respectively at £9,700 and £3,500. The Murua field returned 400 ozs., the Yodda 450 ozs., the Gira 200 ozs., and the Lake-kamu 500 ozs., the product in each case being alluvial gold. The total quantity, in fine ounces, and the value as returned of the gold yield for five years are given below:—

GOLD YIELD, PAPUA, 1915-16 TO 1919-20.

1915-16.		1916-17.		1917-18.		1918-19.		1919-20.	
Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
fine ozs. 10,181	£ 43,248	fine ozs. 8,943	£ 37,988	fine ozs. 7,752	£ 32,931	fine ozs. 6,376	£ 27,084	fine ozs. 11,751	£ 21,757

The alluvial gold included in the total for 1919-20 was estimated at 4,280 ozs., valued at £12,098, of which 1,000 ozs. were won on the Louisiade field and 500 ozs. at Lake-kamu.

Most of the rivers, with the exception of those flowing into the Gulf of Papua, have been declared open to gold-dredging, and good yields have been obtained from many of the rivers thus dredged. The total value of gold won to 30th June, 1920, was £1,556,009.

(iii) *Copper*. There were no exports of ore in 1920. On the Astrolabe field the production of ore at Laloki and Dabuna amounted to about 7,800 tons, estimated to possess a value of £31,000. The total amount shipped to the end of June, 1919, was 8,102 tons, valued at £112,965.

(iv) *Osmiridium*. During 1920 it is estimated that about 100 ozs. of this metal, valued at £3,300, were obtained, chiefly on the Gira goldfield. The existence of osmiridium had been known for some years, but no serious attempt was made to collect it, the alluvial gold miner even picking out the larger slugs of the metal from his gold parcel and throwing them away.

(v) *Other Minerals*. Some good samples of galena (sulphide of lead) have been obtained. Small quantities of cinnabar (sulphide of mercury), graphite (or plumbago), zinc-blende, native sulphur, and other minerals are also found.

A mineral laboratory and museum have been fitted up, and are available to prospectors and others interested.

§ 5. Statistical Summary.

1. *Revenue and Expenditure*.—The revenue and expenditure for 1919-20, under principal heads, are given below; also a summary covering a period of five years. In addition to the revenue collected during the year, amounting to £85,537, a sum of £30,000 was granted by the Commonwealth Government.

REVENUE AND EXPENDITURE OF PAPUA, 1919-20.

REVENUE.		£	EXPENDITURE.		£
Customs and Excise	56,631		Lieutenant-Governor and Civil list	4,279	
Post Office	2,315		Government Secretary	46,047	
Licenses	1,311		Treasury	23,630	
Fees, fines, etc.	(a)6,170		Lands, Mines, and Agriculture..	7,832	
Mining receipts	1,094		Public Works	19,658	
Land revenue	4,318		Medical	12,692	
Harbour dues	1,993		Department of Native Affairs..	2,209	
Miscellaneous receipts	3,960		Central Court	1,932	
Appropriation of former years ..	5,964		Legislative Council	157	
Sale of Government property ..	1,781				
Total	£85,537		Total	£118,436	

(a) Including Native Labour Fees, £2,015.

REVENUE AND EXPENDITURE OF PAPUA, 1915-16 TO 1919-20.

Item.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Revenue	49,311	63,568	72,594	73,121	85,537
Expenditure	77,913	83,740	103,176	102,962	118,436

The loans due to the Commonwealth by the Territory of Papua amount to £57,000.

2. Imports and Exports.—The value of imports and exports for the last five years is shewn in the table below:—

VALUE OF IMPORTS AND EXPORTS OF PAPUA, 1915-16 TO 1919-20.

Particulars.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Imports.. ..	223,040	271,640	285,792	258,112	422,741
Exports.. ..	125,428	156,535	220,599	176,247	270,481
Total Trade ..	348,468	428,175	506,391	434,359	693,222

As in all new countries, the imports consist chiefly of articles necessary for the primal needs of the community. Thus in 1919-20 the imports of agricultural products and groceries came to £136,000; drapery, £53,000; metals and machinery, £68,000; tobacco, £31,000; oils, paints, etc., £18,000; beverages, £15,000; wood, wicker, and cane, £9,000; drugs, £7,000. Government stores to the value of £40,000 were also imported. The chief items of export during the last five years are as follows:—

EXPORTS OF PAPUA, 1915-16 TO 1919-20.

Article.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£
Gold	43,249	37,988	32,931	27,084	21,757
Copra	19,051	40,882	68,225	53,264	124,035
Rubber	14,846	26,682	37,020	33,010	41,542
Hemp	11,999	11,463	17,682	12,532	12,284
Copper Ore ..	9,971	14,050	11,572	1,613	..
Pearl Shell and Trochus Shell ..	6,770	8,050	6,625	9,375	24,255
Pearls	1,000	2,400	19,250	21,550	25,577
Bêche-de-Mer ..	3,229	2,521	3,551	2,240	612
Bark	4,423	7,228	4,847	2,686

The development of the plantations is reflected above in the increased exports of copra, rubber, and hemp, and as greater areas come into bearing, these figures will, of course, increase. Up to the end of 1914-15 the copra exports were almost wholly native products. During 1919-20 there was also an export of osmiridium, amounting to 88½ ozs., valued at £2,930.

3. Postal and Shipping.—Considerable development has been shewn in means of communication—the postal returns, and the tonnage of vessels entered and cleared at ports, having largely increased. Particulars regarding postal matter are given hereunder:—

POSTAL STATISTICS OF PAPUA, 1915-16 TO 1919-20.

Year.	Letters.		Packets.		Newspapers.		Parcels.	
	Received.	Des-patched.	Received.	Des-patched.	Received.	Des-patched.	Received.	Des-patched.
1915-16 ..	157,218	112,572	30,054	2,460	100,464	13,302	2,904	876
1916-17 ..	127,296	106,836	14,724	4,476	98,016	33,900	3,108	1,044

The value of money orders issued in 1915-16 was £6,411; of those paid, £1,078. In 1919-20, the respective values were £6,441 and £2,166.

The following table shews the number, tonnage, and nationality of vessels entered and cleared at ports during the years 1915-16 to 1919-20 :—

SHIPPING.—FOREIGN-GOING VESSELS ENTERED AND CLEARED AT PORTS

Total ..	214	171	137	98	86	247,887	231,008	121,727	60,108	59,189

Throughout, the figures are exclusive of ships of war and Government vessels. The falling off in numbers and tonnage is, of course, due to the disorganization resultant on the war.

§ 6. Land Tenure.

1. *Method of Obtaining Land.*—(i) *The Land Laws.* The broad principles upon which the land laws of Papua are based are :—(a) No land can be alienated in fee simple ; (b) the rental of the land leased is assessed on the unimproved value of the land, and is subject to reassessment at fixed periods.

A detailed account of the method of obtaining land was given in Official Year Book No. 6, pp. 1083-4.

(ii) *The Leasehold System.* With a view of attracting pioneer settlers, an ordinance was passed in 1906 under which leases were granted on very liberal terms. No rent was payable for the first ten years, the heavy expense of survey was borne by the Government, and no charge was made for the preparation and registration of the leases ; that is to say, no payments whatever had to be made to the Government for 10 years. Under this system, the area under lease increased in four years from 2,089 acres to 363,425 acres ; about 140 plantations were started, and nearly 1,000 acres planted during that period.

After allowing free survey for three years, it was decided that all future applicants for agricultural leases exceeding in area 100 acres should be required to pay the cost of survey. It was also found desirable to check a tendency amongst a proportion of land applicants to obtain areas so great that the improvement conditions could not be carried out. It was therefore enacted that no leases should be granted after 1st June, 1910, exceeding 5,000 acres in extent, and that rent at the rate of 3d. per acre must be paid from the commencement on all leases exceeding 1,000 acres in area. As a result of these enactments, several leases have been forfeited. On the other hand, a stricter enforcement of improvement conditions has resulted in a substantial raising of the standard.

2. *Land Tenures.*—On 30th June, 1920, the lands of the Territory were held as follows :—

	Acres.			
Area of land held by the natives	57,000,908
Area of Crown land	691,605
Area of freehold land	23,085
Area of leasehold land	230,002
Area of Territory	57,945,600

Private sales of land in the Territory have now practically ceased. The Government buys from the natives, and then leases to planters, who are forbidden to have direct dealings in land with Papuans. The position as regards leasehold tenures may be seen from the following table :—

AREA HELD UNDER LEASE IN PAPUA, 1915-16 TO 1919-20.

Year ended 30th June.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
Land held under lease .. acres (as recorded)	228,013	227,476	224,010	218,951	230,002

Of the total area of 230,002 acres shewn above, the surveyed area was 201,365 acres, of which about 196,000 acres were agricultural leases, and about 5,000 acres were held under pastoral lease.

The area of land acquired by the Crown from the natives in 1919-20 was 9,654 acres.

The total area surveyed in the Territory is 22,524 acres of freehold, and 278,554 acres of leasehold.

§ 7. Progress of Papua.

1. Statistical View of Twelve Years' Progress.—As already stated (§ 2, *supra*) the Territory was placed under the Commonwealth control on 1st September, 1906. The following table indicates the progress that has been made since that date :—

STATISTICAL SUMMARY, PAPUA, 1907 TO 1920.

Items.	Year ended 30th June.	
	1907.	1920.
White population	690	1,096
Native labourers employed (exclusive of Crown servants) ..	2,000	8,049
Number of white civil servants	65	106
Armed constabulary	185	331
Village constables	401	841
Territorial revenue	£ 21,813	85,537
Territorial expenditure	£ 45,335	118,436
Value of imports	£ 87,776	422,741
Value of exports	£ 63,756	270,481
Area under lease acres	70,512	230,002
Area of plantations acres	1,467	62,162
Meteorological stations established	3	20
Gold yield fine ounces	12,439	11,751
Copper ore shipped tons	137	..
Live stock in Territory—		
Horses	173	225
Cattle	648	768
Mules	40	44

C. THE TERRITORY OF NEW GUINEA.*

§ 1. German Activities in the Pacific.

1. *German Colonies in the Pacific.*—About 1857 the Hamburg firm of Godeffroy established itself in Samoa. Although not pioneers, the Germans acquired in time the trade supremacy and considerable land claims, and Apia became the base of the wider operations which Theodor Weber, Godeffroy's representative and German Consul-General in the Pacific, was planning in his country's interest. In 1874 the firm placed a trading station on the island of Mioko (Duke of York Group, to the east of New Britain). At about the same time they penetrated both the Caroline and Marshall Islands, seeking trade in copra and pearls; and recruiting labour for their plantations in Samoa. In Fiji, also, German interests were large, and there was a considerable German trade. Keen disappointment was felt in Germany when, in 1874, these islands were annexed by Great Britain.

In 1879 the Hamburg firm of Robertson and Hensheim (afterwards Hensheim and Co.) established a trading station at Makada (Duke of York Group); later it opened stations at Matupi (Blanche Bay) and other places in New Britain and New Ireland. The same firm founded the German South Sea Trading Coy. (*Deutsche Südsee Handels- und Plantagen-Gesellschaft*, usually known as "D.H.P.G."), which took over the station of the Godeffroy firm at Mioko (Duke of York Group) after the latter's failure in 1879, and established a number of stations at which native-grown copra and other products were collected and native labourers recruited for its plantations in Samoa. In 1883, 700 natives from New Britain and New Ireland were employed in Samoa, besides 1,500 in Queensland and Fiji.

The German Government during these years shewed no desire for territorial acquisitions. Bismarck, who was opposed to a colonial dominion, with its expenses of administration and deficits falling on the Empire's Budget, repudiated the annexation of New Britain, where in 1878 the commander of the war-ship *Ariadne* hoisted the German flag. The Reichstag taking a similar view in 1880 refused financial backing to the German South Sea Trading Company, and declared against the annexation of Samoa, then in the first stages of the convulsions caused by conflicting foreign influences. At the same time Bismarck was not indifferent to the interests of German merchants, German war-ships were frequently sent to visit the Pacific Islands, and, when the project of a Panama Canal shewed the importance of some of these groups on the great trade routes, the German Government entered into treaties with the natives for coaling stations at Naiafu in Vavau (Tonga Islands) (1876), at Jaluit in the Marshalls (1878), and at Saluafata in Samoa (1879).

It was not until the early eighties that the colonial movement in Germany gained sufficient strength to overcome the reluctance of Bismarck and the indifference or opposition of the Reichstag. In the summer of 1884 Bismarck promised protection to any establishments made by the newly founded New Guinea Company (*Neu Guinea Kompagnie*), which was organizing an expedition to eastern New Guinea. For some time the Australian colonies had been apprehensive of the intentions of the German Government in regard to New Guinea and the neighbouring islands, and individually and collectively had urged on Great Britain the necessity of protecting their own and Imperial interests by the annexation of non-Dutch New Guinea. Finally in April, 1883, the Government of Queensland went so far as to annex the territory on its own authority; an act which the British Government did not confirm, but which led to renewed negotiations between Great Britain and the Colonies, and to the meeting of the Intercolonial Conference of December, 1883, the precursor of the Federation of Australia.

Great Britain, while not intending that Germany should annex any part of New Guinea, believed the fears of the Colonies to be unfounded, and hesitated to act, prolonging negotiations on the financial aspect of annexation. Conversations at Berlin in the summer of 1884 shewed that the Germans intended to annex the New Britain Islands; and the British Government then decided to proclaim a protectorate over at least the southern shore of non-Dutch New Guinea, leaving the question of the northern shore for further discussion with the German Government. But in November, 1884, the

* The information contained in the Foreign Office Handbook dealing with "Foreign German Possessions in the Pacific" was largely drawn upon in the compilation of this sub-section.

New Guinea Company's expedition raised the German flag, not only in the New Britain Islands, but also at several points on the northern shore of non-Dutch New Guinea: and Bismarck, though he said "he had not precisely ordered" this to be done, decided to accept the *fait accompli*, on the ground that the British Government had limited its protectorate to the southern shore, and that in any case British interests were not affected by a German protectorate over the northern. There had been a misunderstanding which, it seems, was not purely accidental, but the British Government could only blame its own hesitation and want of perception, and, in view of the general political situation, and more particularly of the Egyptian difficulty, thought it wisest to recognise the German protectorate. In notes exchanged between Lord Granville and Count Münster in April, 1885, the boundaries of the spheres of the two Powers in New Guinea were fixed as nearly as possible along the line of the watershed.

In August, 1885, the German flag was hoisted at Yap in the Carolines, but Spain claimed the sovereignty, and her claim was confirmed by the Pope, who mediated between the two Powers. When, in 1899, Spain, at the conclusion of the war with the United States, having lost the Philippine Islands, had little interest in retaining the Carolines, this group, together with the Pelew and Mariana Islands (except Guam, which Spain had ceded in 1898 to the United States), was bought by Germany for £337,500.

In October, 1885, Germany took possession of the Marshall, Brown, and Providence Islands, and of Choiseul in the Solomon Islands.

In 1886 an agreement was made between Great Britain and Germany, by which their respective spheres were defined. The German sphere included the northern Solomon Islands (Bougainville, Isabel, and others), as well as the territories over which Germany had already proclaimed her protection.

In 1888 a German protectorate was proclaimed over Nauru (Pleasant Island).

In 1899 a further agreement was made by which Germany transferred to Great Britain the northern Solomons (except Bougainville and Buka, which Germany retained); and Great Britain renounced in favour of Germany all her rights in Western Samoa.

Germany was thus in possession, prior to the outbreak of war in 1914, of the following islands, whose areas were approximately as follows:—

NEW GUINEA PROTECTORATE—

	Square miles.
The "Old Protectorate"—	
Kaiser Wilhelm Land	70,110
Bismarck Archipelago, with Bougainville and Buka ..	21,700
The "Island Territory"—	
Caroline and Pelew Islands	550
Mariana Islands (excluding Guam)	241
Marshall Islands (including Nauru)	176
SAMOA	1,000
Total	93,777

2. Occupation by Australian Troops.—Immediately after the outbreak of war, expeditions were organized in Australia and New Zealand to occupy the German possessions in the Pacific. The expedition from New Zealand occupied Samoa, and on the 17th September, 1914, the Acting Governor of German New Guinea signed terms of capitulation with the Officer Commanding the expedition from Australia, by which (not having authority to surrender any portion of the German possessions administered by him) he agreed that all military resistance to their occupation should cease, and that the armed German forces then in the field should be surrendered. The Australian Commanding Officer agreed, on his part, that during the military occupation by the Australian forces "the local laws and customs will remain in force so far as is consistent with the military situation."

The principal posts in the "Old Protectorate" and the island of Nauru were shortly afterwards occupied by the Australian forces: the islands north of the equator (that is, the former "Island Territory," excepting Nauru) were, by arrangement between the British and Japanese Governments, occupied by the Japanese Navy.

§ 2. General Description of the Territory of New Guinea.

1. **Geographical Position and Area.**—The present Territory of New Guinea comprises that portion of the German New Guinea Protectorate which lay south of the equator (excepting only the island of Nauru, see section xxxiv—Miscellaneous), and which was known in German times as the “Old Protectorate.” The principal islands (with their German names if these differ from those now in use) and their approximate areas are as follows:—

	Square miles.
Mainland of New Guinea (Kaiser Wilhelm Land)	70,110*
Bismarck Archipelago—	
New Britain (Neu Pommern)	9,200*
New Ireland (Neu Mecklenburg)	5,000*
New Hanover (Neu Hannover)	380*
Admiralty Islands	1,000†
Solomon Islands—	
Bougainville	3,500*
Buka	200*

According to the Foreign Office Handbook, the total area of the “Old Protectorate” is 91,810 square miles.

The most northerly of the islands (Anchorite Island) lies in about lat. 1° S.; the most southerly point of the Territory (the eastern part of its boundary with Papua) is in lat. 8° S.; its western boundary (with Dutch New Guinea) is the meridian of 141° E.; and its most easterly island (Bougainville) extends to longitude 156° E. From north to south its greatest extent is nearly 500 miles; from east to west over 1,000 miles. Rabaul, the capital, occupies a central position; its distances from some of the principal out-stations are: from Madang, 440 miles; Eitape, 630 miles; Kieta, 270 miles.

2. **Mainland of New Guinea.**—The mainland of New Guinea (Kaiser Wilhelm Land) is the northern section of eastern New Guinea. Its interior is rugged and mountainous, with heights reaching to over 11,000 feet, and is little known. The mountain ranges approach the coast, leaving comparatively little land near sea level, but this narrow strip is very fertile. All trade and communications are by sea along the coast, and the interior is left almost wholly to the native population.

The coast-line, which is about 750 miles long, is in parts fringed with coral reefs, and there are many small, lofty islands along its course. Except for Huon Gulf in the little-developed east of the country there are no deep inlets. Langemak Bay has commodious anchorage in deep water, and Finschhafen has landlocked anchorage for small vessels. In Astrolabe Bay are two or three sheltered harbours, including Konstantinshafen, Friedrich Wilhelm Hafen, and Alexishafen, which are the best on the coast. There are many other anchorages fit for schooners and small steamers in certain winds.

There are many rivers, of which the most important are the Sepik (Kaiserin Augusta) and the Ramu (or Ottilien). The Sepik rises near the junction of the boundaries with Dutch New Guinea and Papua, and flowing easterly reaches the coast in latitude 4° S. It has not been fully explored, but was found in September (not the wettest month) to be about 270 yards wide and 12 feet deep within 60 miles of the Dutch border. As it approaches the sea its tendency to divide and form islands, sandbanks, and lagoons reduces the depth to under 30 feet, but there is no actual sandbar. It is navigable for over 250 miles by vessels of 600 tons; and in the rainy season flat-bottomed paddle steamers can ascend for more than 400 miles.

The Ramu rises in the most southerly part of the Territory and, flowing northwards, enters the sea near the mouth of the Sepik. It is navigable by steamers for a considerable distance, and was expected by the Germans to prove of great value as a waterway.

* From Foreign Office Handbook.—The Report of the Royal Commission on German New Guinea gives the following areas:—New Britain, about 10,000 sq. miles; New Ireland, 4,600 sq. miles; Bougainville, 3,500 sq. miles; New Hanover, over 500 sq. miles. The Deutsches Kolonial Lexikon gives the area of New Britain as 13,100 sq. miles, and the total area of the Bismarck Archipelago as 18,100 sq. miles.

† From Deutsches Kolonial Lexikon.

3. **Bismarck Archipelago and Solomon Islands.**—The islands of the Bismarck Archipelago and the Solomons are in general mountainous, with level ground only near the coasts. The only low-lying islands are some of the Duke of York Islands and Admiralty Islands. The islands of Bougainville and Buka (Solomons) are equally rugged; Bougainville contains mountains reaching 10,000 feet. The soil is usually fertile, except on the low coral islands, where fresh water is scarce.

The coasts of the large islands generally rise fairly steeply from the water, with bold headlands; but as a rule there is a beach, often overgrown with mangroves. Sunken rocks and coral reefs fringe many of the coasts, especially of the low islands.

There are many good harbours, the chief being Blanche Bay, in New Britain, containing the good anchorages of Matupihafen and Simpsonhafen, and Kawieng Harbour, in New Ireland, Mioko in the Duke of York Islands, Peterhafen in the French Islands, Nares Harbour in the Admiralty Islands, and Queen Carola Harbour in Buka Island.

Most of the streams in these islands are too shallow and too rapid for navigation.

§ 3. Climate and Health.

1. **Climate.**—Throughout the Territory (except on the mountains) the climate is hot and moist all the year round. On the mainland, the mean temperature along the coast is about 80° F., with high humidity. There is no cool season, and rain falls in all months. In Astrolabe Bay and in the west of the country the heaviest fall is from November to March, a season during which north-westerly winds prevail. In the east, round Huon Gulf and Finschhafen, the rainiest season is from May to September. The annual rainfall on the coast is from 100 to 150 inches. In the Bismarck Archipelago the climate is much the same as on the mainland, except that during the prevalence of the south-east trades from May to September or October there is a comparatively dry season. November to March is the period of torrential downpour, accompanying north-west winds and occasional calms. The islands are outside the area of typhoons.

The following are results of observations taken at Rabaul during the period July, 1916, to December, 1920:—

	°F.			
Dry bulb (shade) temperature—				
Average monthly mean	84.2
Highest monthly mean	89.8
Lowest monthly mean	63.7
Highest reading	100.0
Lowest reading	61.0
Wet bulb (shade) temperature—				
Average monthly mean	77.4
Highest monthly mean	81.1
Lowest monthly mean	75.0
Average humidity	70.5
Rainfall—				
Yearly average (1917–1920)	85.6 inches
Highest in one month	27.5 inches
Lowest in one month	0.4 inches
Yearly average number of days on which rain fell	..			163 days
Greatest number of days on which rain fell in one month				23 days
Smallest number of days on which rain fell in one month				2 days
Greatest fall in 24 hours	8.76 inches

2. **Health.**—The Territory presents great opportunities for the sanitarian, and, until measures can be taken to check diseases now endemic, it will remain unhealthy for Europeans. Dysentery is prevalent among the natives, and epidemics are frequent; and there have been several outbreaks of small-pox with high mortality. Elephantiasis, a skin disease known as the Tokelau ringworm, venereal disease, and tuberculosis also occur among the natives. Malaria, dysentery, and blackwater fever are prevalent among the white population, and in the past the death rate has been high. For instance, during the years 1890 to 1898 the death rate among the whites averaged 62 per 1,000 per annum. In 1909, however, it was only 24, and in 1910, 21 per 1,000.

Apart from diseases, the climate on the mainland, and at many places in the Bismarck Archipelago, is enervating for Europeans. Much improvement, however, can be expected from systematic sanitation; and the mountains in this and the neighbouring Territories may, especially when flying has become easier, do much to solve the problem of residence for whites.

§ 4. German Administration.

1. German Colonial Policy.—Possession was taken of New Guinea as a protectorate (Schutzgebiet), and such it remained during the whole period of German rule. It was not until 1899 that the German Government assumed full control of the administration.

German colonial policy in its inception under the guidance of Bismarck took the form of "diplomatic guardianship," that is to say, the protection by the State of business interests created by German merchants. The Imperialistic idea of a field of employment for the educated talent of the Empire was a later growth. Hence, when the problem of organizing government in the new colonial possessions was first broached, Bismarck's idea was to administer them through chartered companies on the model of some of the English dependencies, thus leaving to the merchants the work of material development. This method commended itself to him not only because it did not commit the State so directly, but also on the ground of economy.

2. The New Guinea Company.—By Imperial charter of May, 1885, sovereign rights over New Guinea and the Bismarck Archipelago were conferred on the newly-founded New Guinea Company; and in December, 1886, the German Solomon Islands were added to its sphere. The company was to establish and maintain government and judicial organization, and in return received all regalian rights under the supervision of the German Government. Its path was not a smooth one; neither were its administration nor its attempts at economic development successful; and in 1889 the Imperial Government stepped in and took over the collection of taxes and duties, the Company meeting the cost. Three years later the Company resumed control and administered the possessions until 1899, when, convinced that the task was beyond its strength, it surrendered its sovereign rights for four million marks and certain other concessions, and became merely a privileged trading Company. Throughout it had lacked capital, prestige, and moral support. It had had misfortunes; it lost heavily in trying to arrange adequate shipping communications; and an epidemic in 1891 carried off half its officials. Its administration was marred by excessive centralization in the Berlin management; its service was unpopular; and incomplete cadres and continual changes in the staff produced a fatal instability in the local government, which may have been one reason for its failure to get into touch with the natives. Unsuccessful as it was, it must be remembered that it held a vast territory for Germany, while opinion at home developed in favour of a more active colonial policy.

On the economic side the Company carried out some of the explorations and experiments in the choice of places for settlements and plantations, which are the necessary preliminary work in colonization. It founded a number of stations—Stephansort (1888), Friedrich Wilhelm Hafen (now Madang), its capital (1891), and Berlinhafen (now Eitape) (1894); but its economic enterprises were often costly and attended with little success; and, while failing itself, it impeded private effort. In the Bismarck Archipelago, where the first German plantation had been established in 1882, improved administration produced better relations with the natives, and a firmer foundation was laid for subsequent expansion.

In the Marshall Islands also company government was established. In December, 1887, the firm of Robertson and Hernsheim and the D.H.P.G., which controlled the trade of the group, formed the Jaluit Company. In 1888 financial control was delegated by the German Government to this Company, and it was arranged that Imperial officials should carry on the administration, the Company defraying the cost and receiving in return exclusive authority and the monopoly of the pearl fisheries and of mining for phosphate rocks in the islands of the group (which included Nauru). A very simple administration was set up, with a Commissioner at the head, who was required to act with the advice of the Company. The arrangement worked well; there was no trouble with the natives; and the Company, confining itself chiefly to the copra trade, made good profits. In 1901 the privileges enjoyed by the Jaluit Company in the Marshall Islands were extended to the Eastern Caroline Islands.

3. Imperial Administration.—In 1899, when the Carolines and part of Samoa were annexed, and the New Guinea Company surrendered its sovereignty, the Imperial Government undertook the direct administration of all its Pacific possessions, except the Marshall Islands, where the Jaluit Company ruled as before until 1906. For administrative purposes they were divided into Samoa and New Guinea, which included all the German possessions in the Western Pacific. The system of government was simple and authoritative. The Governor, appointed by the Emperor, had wide powers, unrestricted by local legislatures, and assisted only by a Council which was little more than advisory. In New Guinea Old Protectorate (*viz.*, the Bismarck Archipelago, Solomon Islands, and Kaiser Wilhelm Land), he was assisted by two superior Judges, and the territories were divided into seven districts—Rabaul, Kawieng, Namatanai, Kieta, Friedrich Wilhelm Hafen, Eitape, and Morobe—administered by local magistrates. Order was maintained by a native police, commanded by German officers. The seat of government was at Rabaul, whither it was transferred from Herbertshohe in 1908-10. In the New Guinea island possessions—*viz.*, the Caroline and Marshall Islands—there were Vice-Commissioners acting under the Governor at Rabaul. The seat of government for the Eastern Carolines was at Ponape; for the Western, with the Pelew and Mariana Islands, at Yap; and for the Marshall Islands, at Jaluit. Samoa was divided into two administrative districts—Upolu and Savaii. The Governor resided at Apia, in Upolu, and was assisted by an Imperial Judge. There was a native High Chief and a native Council; and here, as also in New Guinea, some use was made of native chiefs in the administration.

The German Government sent some of the best men in the home and colonial services to its Pacific Protectorates. Several of the Governors were men of high distinction, and had highly trained staffs. The number of officials in the portions of the Protectorate of New Guinea now administered by the Commonwealth was, in 1911, 61, and in 1914, about 125.

4. Revenue.—The colonial revenue came mainly from Customs; and of the Customs revenue the greater part was derived from alcohol. Imperial subventions were necessary to enable the colonies to pay their way, though their financial position was improving with the growth of trade. Constitutionally the colonies were not integral parts of the German Empire; they did not belong to the Customs Union, and were not subject to general laws regulating taxation. Until 1893 they were charged import duties like foreign countries, but from that time they enjoyed most-favoured-nation treatment. They were at first administered by the Foreign Office, in which in 1890 a Colonial Department was established under a Colonial Director; in 1902 an unpaid advisory council of about 40 persons was formed. These arrangements did not work well, and in 1907 were superseded by the creation of a Colonial Office with large independent powers.

Throughout the period of the direct control of the German Government, the revenue was insufficient to balance the expenditure, and grants were made by the home Government. In 1904 the revenue (including that of the Island Territory) raised in the Protectorate was £10,550, the expenditure £74,100, and the Imperial subsidy £53,800; in 1913, the revenue was £87,750, the expenditure £166,100, and the Imperial subsidy £66,350. The Imperial subsidy granted to the Protectorate to 1914 amounted to about £950,000.*

§ 5. German Economic Development.

1. Produce and Crops.—The earliest traders contented themselves with the collection of native products (including copra), for which they exchanged "trade" goods. It was not until 1883 that the first plantation was laid out, at Ralun on Blanche Bay; the first plantation on the mainland was that of the New Guinea Company at Finschhafen, where the first settlement was placed in 1885.

The natives have been described as a people of peasant proprietors, and everywhere they practise a low form of agriculture. But their gardens afforded but a small amount of produce for oversea trade, and the exports of the Protectorate grew only as European plantations were made. Plantations extended but slowly, for the Protectorate is almost everywhere covered with forest, and the clearing of the land and its planting, even if labour can be had, is a slow task.

* It is interesting to notice that the grants and loans made, and other developmental expenditure, by the Australian Government before Federation, and afterwards by the Commonwealth Government to the Government of British New Guinea (Papua) amounted, up to 1914, to about £522,000, and to 1921, to about £952,000.

In the early years of the Protectorate the demand for copra was much smaller than recently, and it was not foreseen that this was to become the chief export. Experiments were accordingly made—principally by the New Guinea Company, which spent a large part of its capital in this work—with a number of tropical crops.

Tobacco was cultivated with success at Astrolabe Bay on the mainland, and in the Bismarck Archipelago. Plantation managers were brought from Sumatra, but the Dutch Government, fearing competition, forbade the New Guinea Company to take skilled native labourers to their new plantations. Labourers were ultimately obtained from China and the Straits Settlements, and by 1892 there were over 1,800 Malay and Chinese coolies on the mainland; but, owing to the heavy mortality, the number soon dropped to less than 1,000. By 1893 there were 500 acres under tobacco, and the export reached 77 tons. Tobacco of high quality, rivalling the best Sumatra leaf, is said to have been produced. Later, the growing of tobacco on European plantations was abandoned, partly, it is said, for want of intelligent labour, although it continued to be grown by the natives for their own use.

The New Guinea Company also experimented in the growing of cotton, and it is said that a product of high quality was obtained. In 1896 the export amounted to 60 tons, but in recent years this crop seems to have been almost abandoned.

Sisal hemp was more successful, and there has been a steady, although small export. The quantity exported in 1913 was 10 tons. Cocoa was successfully grown; in 1913, 137 tons were exported. Experiments with coffee were also successful, but there has been little production.

Several kinds of rubber-yielding plants are indigenous on the Mainland, and rubber (mostly of the *ficus* and *hevea* varieties) was cultivated in a few European plantations. In 1913, 17 tons, valued at nearly £6,000, were exported.

None of these crops made any important contribution to the progress of the Protectorate. Its mainstay, in an increasing degree, has been the coconut palm. Indigenous in most of the islands, the coconut palm yielded copra to the natives from the beginning of European trade, and the plantations, commenced in 1882, steadily extended in area and product, until, in 1913, three-fourths in value of the total exports of the Protectorate consisted of copra.

Besides the products of agriculture, there must be mentioned the exports of birds of paradise and feathers, which amounted in 1913 to over £62,000; and of mother of pearl and other shells and marine products, which in the same year amounted to over £11,000.

The imports amounted to £425,026 in 1913, of which £184,229 was from Germany, £21,042 from the United Kingdom, £123,259 from Australia, £73,805 from Asia, and £16,705 from America. The tariff was the same, whether the goods came from Germany or from any foreign country.

2. Land Policy.—The policy of the German Government regarding tenure of land shewed a preference for freehold tenure, in contrast to that in British possessions in the Pacific, in which settlers can usually obtain land from the Crown on lease only. On the mainland and in the larger islands of the Bismarck Archipelago land could easily be obtained by settlers of any nationality.

The authorities readily gave information as to available land, and assisted new-comers in obtaining labour. Good land was offered at about 2s. per acre, and payment might be spread over several years.

The German Government attempted to establish a colony of small planters, with 250 acres apiece, in the Baining district of New Britain. The project met with some success, but many of the settlers lacked the capital necessary to support the heavy initial expenses of cultivation in the South Sea Islands. It has been estimated that the cost of preparing forest land for agriculture amounts, on an average, to £60 per acre, and the small planter is further placed at a disadvantage by the interval that elapses before the most profitable crops, such as coconuts and cocoa, come to maturity. It appears, therefore, that the powerful company with large estates is destined to play the leading part in the agricultural development of the German possessions in the Pacific.

3. Land Alienated.—On 1st January, 1914, the total area alienated was 499,751 acres, of which 192,458 were on the mainland. The area cultivated was 84,488 acres, of which about 16,000 acres were on the mainland; and the area in bearing, 28,629 acres, of which 5,307 were on the mainland.

The areas under the most important crops on 1st January, 1914, were:—

Crop.	Bismarck Archipelago.	Mainland.
	acres.	acres.
Cereals—		
Maize	312	20
Rice	10	100
Tuberous plants—		
Arrowroot	35	..
Taro	100	62
Palms—		
Coconut	63,775(a)	13,970(a)
Oil palm	2	2
Indiarubber—		
Ficus	1,967	1,825
Hevea	912	365
Kastilloa	417	125
Fibre-yielding plants—		
Cotton	45
Sisal hemp	7	155
Cocoa	960	..
Coffee	152	..
Lemon and citronella grass	300	..

(a) Of which 20,380 in Bismarck Archipelago and 3,417 on the mainland were in bearing.

§ 6. Australian Military Occupation.

1. **General.**—German New Guinea remained in military occupation by the Australian Forces from September, 1914, until May, 1921. The Government of the country was carried on by the officer commanding, as Military Administrator, and all posts in the former civil administration were filled by members of the Forces. The Government was conducted on much the same lines as in German times, as the terms of the capitulation by which local laws and customs were to remain in force so far as consistent with the military administration, as well as the restrictions imposed by general practice on the powers of a military occupant, prevented any great changes from being made. It was accordingly the principal object of the Australian Government to maintain the existing state of affairs in the Territory, until its future control should be decided at the end of the war.

Both executive and legislative power in the Territory were vested in the Administrator, subject to instructions from the Minister for Defence. A large number of Ordinances were made by the Administrator in pursuance of his military powers, most of them concerned with the routine affairs of government. Perhaps the most noteworthy of the changes introduced by the Military Administration was in the treatment of native labourers (see § 8 hereinafter).

Germans resident in the Territory were, for the most part, allowed to remain during the military occupation. Civil officials were, however, allowed to return to Germany, but certain planters and others whose conduct was unsatisfactory were deported to Australia.

Most of the planters, and the large companies which owned plantations, carried on their business as usual; but they could not remit their profits to Germany, and accordingly, expended a large proportion of them in the Territory in making new plantations. The result was that the area under coconuts, 76,847 acres in 1914, grew by December, 1918, to 133,960 acres. The exports from the Territory were much interrupted by difficulties in shipping and marketing, but a very large increase over the amount in German times was becoming visible.

Imports to the Territory also grew rapidly. From £425,026 in 1913 the value increased to £588,793 in 1920; and with this increase grew the revenue of the Territory, of which Customs duties were the principal part.

In 1919 it was decided by the principal Allied and Associated Powers that the Territory of New Guinea, which Germany gave up as one of the terms of peace, should be entrusted under Mandate from the League of Nations to the Government of the Commonwealth. The issuing of the Mandate was, however, delayed; and it was not until 17th December,

1920, that its terms were settled, and the Mandate itself did not reach Australia until April, 1921. During this period the Government had to remain in form a military one, and subject to the limitations imposed by the terms of capitulation.

The Treaty of Peace provided that German nationals resident in her former colonies might be repatriated; and that the property rights and interests of German nationals in former colonies might be retained and liquidated by the Allies, the proceeds being credited to Germany in part payment of the reparation payable by her under the Treaty.

In pursuance of these powers, in September, 1920, the property of the principal German companies in the Territory, and in March, 1921, that of a large number of German planters, was vested in the Public Trustee: and the management of their businesses and plantations was entrusted (pending the sale or other disposal of the properties, which has not yet been authorized) to an Expropriation Board. The total value of the properties expropriated has been roughly estimated at from £4,000,000 to £5,000,000. About 80 Germans, who had lost their former employment with German companies or whose properties have been expropriated, had, up to September, 1921, left the Territory.

§ 7. Civil Government.

1. *Mandate.*—The Mandate for the Territory is as follows:—

THE COUNCIL OF THE LEAGUE OF NATIONS —

Whereas by Article 119 of the Treaty of Peace with Germany signed at Versailles on June 28th, 1919, Germany renounced in favour of the Principal Allied and Associated Powers all her rights over her oversea possessions, including therein German New Guinea and the groups of islands in the Pacific Ocean lying south of the Equator other than German Samoa and Nauru; and

Whereas the Principal Allied and Associated Powers agreed that in accordance with Article 22, Part I. (Covenant of the League of Nations), of the said Treaty, a Mandate should be conferred upon His Britannic Majesty to be exercised on his behalf by the Government of the Commonwealth of Australia to administer New Guinea and the said islands, and have proposed that the Mandate should be formulated in the following terms; and

Whereas His Britannic Majesty, for and on behalf of the Government of the Commonwealth of Australia, has agreed to accept the Mandate in respect of the said territory and has undertaken to exercise it on behalf of the League of Nations in accordance with the following provisions; and

Whereas, by the afore-mentioned Article 22, paragraph 8, it is provided that the degree of authority, control or administration to be exercised by the Mandatory not having been previously agreed upon by the Members of the League, shall be explicitly defined by the Council of the League of Nations,

Confirming the said Mandate, defines its terms as follows:—

ARTICLE 1.

The territory over which a mandate is conferred upon His Britannic Majesty for and on behalf of the Government of the Commonwealth of Australia (hereinafter called the Mandatory) comprises the former German Colony of New Guinea and the former German islands situated in the Pacific Ocean and lying south of the Equator, other than the islands of the Samoan group and the island of Nauru.

ARTICLE 2.

The Mandatory shall have full power of administration and legislation over the territory subject to the present mandate as an integral portion of the Commonwealth of Australia, and may apply the laws of the Commonwealth of Australia to the territory, subject to such local modifications as circumstances may require.

The Mandatory shall promote to the utmost the material and moral well-being and the social progress of the inhabitants of the territory subject to the present mandate.

ARTICLE 3.

The Mandatory shall see that the slave trade is prohibited, and that no forced labour is permitted, except for essential public works and services, and then only for adequate remuneration.

The Mandatory shall also see that the traffic in arms and ammunition is controlled in accordance with principles analogous to those laid down in the Convention relating to the control of the arms traffic, signed on September 10th, 1919, or in any convention amending the same.

The supply of intoxicating spirits and beverages to the natives shall be prohibited.

ARTICLE 4.

The military training of the natives, otherwise than for purposes of internal police and the local defence of the territory, shall be prohibited. Furthermore, no military or naval bases shall be established or fortifications erected in the territory.

ARTICLE 5.

Subject to the provisions of any local law for the maintenance of public order and public morals, the Mandatory shall ensure in the territory freedom of conscience and the free exercise of all forms of worship, and shall allow all missionaries, nationals of any State Member of the League of Nations, to enter into, travel and reside in the territory for the purpose of prosecuting their calling.

ARTICLE 6.

The Mandatory shall make to the Council of the League of Nations an annual report to the satisfaction of the Council, containing full information with regard to the territory, and indicating the measures taken to carry out the obligations assumed under Articles 2, 3, 4, and 5.

ARTICLE 7.

The consent of the Council of the League of Nations is required for any modification of the terms of the present mandate.

The Mandatory agrees that if any dispute whatever should arise between the Mandatory and another Member of the League of Nations relating to the interpretation or the application of the provisions of the Mandate, such dispute, if it cannot be settled by negotiation, shall be submitted to the Permanent Court of International Justice provided for by Article 14 of the Covenant of the League of Nations.

The present Declaration shall be deposited in the archives of the League of Nations. Certified copies shall be forwarded by the Secretary-General of the League of Nations to all Powers Signatories of the Treaty of Peace with Germany.

Made at Geneva the 17th day of December, 1920.

2. New Guinea Act.—In anticipation of the issuing of the Mandate, the Commonwealth Parliament had already, in September, 1920, passed the New Guinea Act 1920, by which the Governor-General was authorized to accept the Mandate when issued. The Territory was, by the Act, declared to be a Territory under the authority of the Commonwealth, by the name of the Territory of New Guinea.

The Act provided that there should be an Administrator, who should be charged with the administration of the Territory. The power to legislate for the Territory was to be exercised by the Governor-General; and no Council—legislative, executive, or advisory—was provided for.

The Act also provided for the observance of the safeguards in the interests of the natives set out in the Mandate, and by it forced labour was absolutely forbidden.

3. Establishment of Civil Government.—On receipt of the Mandate, arrangements were made by the Prime Minister, under whose control the administration of the Territory was placed, for the establishment of Civil Government; and on 9th May, 1921, a proclamation was issued in Rabaul that the military occupation had that day terminated. On the same day the first Ordinances made by the Governor-General under the New Guinea Act 1920 came into force. The most important of these was the Laws Repeal and Adopting Ordinance 1921, which provided that German laws should cease to apply to the Territory; that certain Acts of the Commonwealth should be applied to the Territory; that certain Statutes of Queensland and certain Ordinances of Papua should be adopted as laws of the Territory; that the Acts, Statutes, and laws of England in force in the State of Queensland, and the principles and rules of common law and equity in force in England, should, as far as circumstances allowed, be applied in the Territory; and that the Ordinances and other legislative acts of the Military Administration should remain in force.

The Ordinance also preserved the rights of natives in land, and the existing rights, privileges and customs of the natives in regard to cultivation, barter, hunting, and fishing; and it provided that tribal institutions, customs, and usages should continue, so far as they were not repugnant to the general principles of humanity.

Other Ordinances which came into force on the same day provided for the establishment of courts of law, and for the prohibition of the supply to natives of firearms, ammunition, intoxicating liquor, and opium.

Legislation relating to mining and lands is in preparation; and immediate measures are proposed to carry out the obligations undertaken by the Commonwealth under the Mandate to "promote to the utmost the material and moral well-being and the social progress of the inhabitants of the Territory."

For administrative purposes, the Territory is divided into ten Districts, named after the principal stations in them, as follows:—In New Britain: Rabaul, Talasea, and Gasmatta; on the Mainland: Morobe, Madang, and Eitape; in New Ireland and New Hanover: Kawieng and Namatanai; in Admiralty Islands and adjoining islands: Manus; in Solomon Islands: Kieta. Each District is under a District Officer, assisted by a small staff.

4. Revenue and Expenditure.—The revenue and the expenditure for the year 1921–22 are estimated to balance at £237,650. The principal items are:—

REVENUE.				EXPENDITURE.			
Customs	£105,000			Administrator's Office ..	£2,966		
Licences	8,000			Government Secretary's Department (including Printing and Motor Transport Departments)	12,450		
Business Tax	10,000			Justice	4,740		
Head Tax	25,000			Treasury (including Government Stores)	19,857		
Shipping Services	40,000			Audit	3,030		
Wireless	13,400			Lands and Survey	12,030		
Health Department	6,000			Native Affairs	11,720		
Land and Survey Department	9,000			Public Works (including Wharves, £18,450)	28,114		
Sale of Stores	4,250			Trade and Customs (and Post Office)	5,310		
Post Office	5,000			Agriculture	7,788		
Printing	1,000			Health and Sanitation	15,285		
Agriculture	4,000			Harbour Master and Ships	37,430		
Stamp Duties	3,000			Wireless	17,500		
Law Fees and Fines and Probate Duty	3,000			Advance to Treasurer	13,000		
Miscellaneous	1,000						
							£191,220
				<i>District Services.</i>			
				Kawieng	£9,350		
				Kieta	7,310		
				Madang	7,100		
				Manus	5,570		
				Namatanai	4,920		
				Eitape	6,820		
				Morobe	5,020		
				Talasea	2,700		
				Gasmatta	2,640		
							£51,430
				Total	£242,650		
				Less estimated savings	5,000		
				Total	£237,650		
			£237,650				

§ 8. Native Population.

1. **General.**—The natives of the mainland are for the most part mixed Papuans and Melanesians, split up into many tribes, between whom, where Government influence has not been established, there is continual strife. The Germans found them unwilling to work, and labourers for the plantations had to be imported from other parts of the Territory, as well as from Java and China.

In the islands, the natives are chiefly Melanesians, but there are many racial elements which differ from one another in appearance, manners, customs, and speech. The Admiralty Islanders shew a Papuan and perhaps Polynesian admixture, and the natives in the extreme west of the Archipelago have Malay or even Chinese affinities.

Most of the islanders are energetic, and of good physique, with the exception of those on some of the smaller western islands, and the inhabitants of the Gazelle Peninsula (New Britain), who are weak and much diseased.

The Buka Islanders were considered by the Germans to be the best workers, and were largely recruited for police duties. The Admiralty Islanders are also very virile and are good sailors.

Many languages are used in the Territory. The Germans made some attempt to encourage the use of German, but with little success. At the native school at Namanula, the dialect of the Blanche Bay natives was taught, with the idea of spreading it throughout the Protectorate, but this plan had made little progress when the school was closed in 1914. The "lingua franca" throughout the Territory was "bêche-de-mer" or "pidgin" English.

2. **Education of Natives.**—The education of the natives was left by the German Government to the missionaries, who were able to reach only a small proportion of the population. In 1907 the Government opened a school at Namanula, near Rabaul, to give elementary education and to train the natives in handicrafts. Pupils came from all parts of the Protectorate, and in 1914 they had increased to 121. By 1913 it had become possible to employ ex-pupils in the offices and works of the Government. At the outbreak of the war, plans were in preparation to establish a workshop at Rabaul for industrial training, and to open schools at out-stations. The results of the schools were of good promise, and encourage the hope that a considerable number of the natives may prove fit for training as clerks, artisans, motor drivers, and the like, if not for the lower grades of the professions.

3. **Control and Welfare of Natives.**—In their treatment of the natives, the Germans allowed practices not tolerated in British Colonies. Abuses occurred in connexion with the recruiting of labourers for the plantations; and employers were allowed to flog their labourers for offences in relation to their employment. There was, indeed, a fundamental difference in outlook towards the natives between the German Government and that of the Governments of British Possessions, such as that of Papua. The German Government seems to have looked upon the native as a means to an end, that end being the development of the country solely in the interests of the European settler; whereas in British colonies the welfare of the native is usually regarded as being in itself of the first importance. Nevertheless, the German policy has been described by a well-informed missionary as being, on the whole, just and progressive.

The control of the natives by the German Government was carried out by District Officers, who were stationed at head-quarters in the various Districts into which the Protectorate was divided. These District Officers dispensed minor justice, and organized patrols throughout their district for the purpose of collecting taxes in places where that was practicable, and of securing order amongst the native tribes, who were prone to wage war on each other.

It was the practice to ascertain the man of greatest influence in each community and appoint him "Luluai," or chief; a second native was chosen as "Tultul," or interpreter, through whom Government instructions were conveyed to the "Luluai," who was held responsible for their execution and for the general welfare of the people. There were very large areas, chiefly on the mainland, which were not under Government

influence, and of which little was known. Although Government influence was much extended during the military occupation, there are still large areas which have never been visited by white men.

When the Australian Forces occupied the Territory in 1914 they found the draft of an amending Native Labour Ordinance which the German Government was about to bring into force: and this formed the basis of the Native Labour Regulations enacted by the Military Administrator in 1915.

An important amendment in the German draft was, however, made by prohibiting the corporal chastisement of any labourer by any plantation owner or any person other than a Government official duly appointed in that behalf in pursuance of a Judge's order or the sentence of a Court. In 1919 the flogging of natives, under any circumstances whatsoever, was forbidden.

Other changes in regard to native labourers made during the Military Administration included the provision of additional safeguards in regard to recruiting; and attention was also given to the housing, food, clothing, medical attendance, and general comfort and well-being of natives working on plantations.

The welfare of the natives is directly connected with the economic future of the Territory, for, without their labour, little development can be expected in a country which is unsuited for white labourers, and to which coloured labourers of other races are not admitted. The Germans relied, in part, on force in recruiting native labourers and in compelling them to work. Despite the abolition of such methods under the military occupation, the number of native indentured labourers has largely increased. In 1914, according to the German returns, there were 17,529 labourers on plantations; in May, 1921, there were 30,849; and, during the same period, the cultivation of coconuts by natives for their own use and for sale of copra produced by themselves, largely increased.

§ 9. Asiatics in the Territory of New Guinea.

1. **General.**—Malays seem to have been the first Asiatics to be brought by the Germans to German New Guinea; 37 of them are recorded on the mainland in 1885. About 1889 the New Guinea Company began to bring Chinese, Malays, and Javanese in growing numbers from Singapore and Java to work on its plantations; by 1892 there were about 1,800 on the mainland. By 1898 the number had gone down to 300 or 400.

About ten years later, Chinese from China were brought to the Protectorate; in 1911 there were 555, in 1914, 1,377 and in 1921, 1,200. The number of Malays and Javanese decreased; in 1914 it was 163, and in 1921, 160.

In 1895 there were 2 Japanese in the Protectorate, in 1911 there were 25, in 1914, 103, and in 1921, 87. The total Asiatic population was 1,681 in 1914, and 1,447 in 1921. There were also 80 Caroline Islanders and kindred people, and 94 half-castes.

Under the German administration, Chinese, Malays, and other Asiatic labourers had a status somewhat superior to that of the natives. Japanese, although they had no rights under treaty (for the German-Japanese Treaty of Commerce and Navigation of 1911 did not apply to German New Guinea, as it was only a "Schutzgebiet"), had a status equal in many respects to that of Europeans. They could not, however, acquire land in freehold; but both they and Chinese (if able to read and write a European language) could obtain leases up to 30 years. Ordinances provided safeguards in the interests of Chinese and other non-indigenous natives brought to the Protectorate; the German Government welcomed Chinese labourers, whose numbers were increasing rapidly before the war. The Government did not look so kindly on the immigration of large numbers of Japanese or on their acquisition of important interests in the Protectorate, but no obstacle seems to have been placed in the way of their entering the Protectorate.

The Chinese provide the skilled artisans and domestic servants of the Territory, and many of them are small traders. There is only one Japanese firm of any size, but it is not a serious competitor with European firms; most of the Japanese residents are employed in its plantations, shipyards, and stores.

§ 10. Statistical Summary.

1. **European and Asiatic Population.**—The following tables shew the white and Asiatic populations from 1885 to 1921 :—

TERRITORY OF NEW GUINEA.—WHITE POPULATION, 1885 TO 1921.

1885	..	64	1893	..	190	1910	..	687
1886	..	97	1894	..	209	1911	..	723
1887	..	122	1895	..	203	1912	..	822
1888	..	148	1896	..	228	1913	..	968
1889	..	145	1897	..	251	1914	..	1,027
1890	..	164	1898	..	262	1917	..	818(a)
1891	..	179	1907	..	529	1921	..	1,265(b)
1892	..	186	1909	..	655			

(a) Does not include troops.

(b) Including 262 troops (engaged in Administration).

TERRITORY OF NEW GUINEA.—ASIATIC POPULATION, 1885 TO 1921.

	Chinese.	Malays and Javanese.	Japanese.	Others.
1885	..	37
1890	..	114
1892	..	1,085
1895	..	480	2	..
1898	..	156
1911	..	555	25	26
1914	..	1,377	103	38
1917	..	1,452	(a)	(a)
1921	..	1,185	160	87

(a) Not separately enumerated.

2. **Native Population.**—It has not yet been possible to make an enumeration, or even an estimate for the whole Territory, of the native population.

The latest figures published by the German Government were as follows, the numbers enumerated being those in the areas under Government influence. The estimate for other areas, it will be seen, is incomplete, as the mainland (most of which was not under Government influence) was not included.

TERRITORY OF NEW GUINEA.—NATIVE POPULATION, 1st JANUARY, 1914.

Island.	Enumerated.	Estimated.	Total (approx.).
New Britain	42,926	42,700	85,000
New Ireland	26,488	2,500	29,000
Duke of York Group	3,049	..	3,049
Witu or French Islands	2,523	..	2,523
Admiralty Islands	4,736	7,500	13,000
North-western Islands	992	..	992
New Hanover	6,539	..	6,539
Islands between New Ireland and New Hanover	811	..	811
St. Mathias, Squally Island, and Tench Island	2,160	800	3,000
Fisher and Gardner Islands	3,483	..	3,483
Lihir, Tanga, and Anir Islands	4,692	1,000	5,700
Nissan Island	1,562	..	1,562
Cartaret Island	391	..	391
Fead, Mortlock, and Tasman Islands	218	..	218
Buka and adjoining Islands	6,810	..	6,810
Bougainville	9,160	23,500	32,000
The Mainland	35,535	No estimate made	35,535(a)
	152,075	..	230,000(a)

(a) Not including any estimate for the portion of the mainland not under Government influence.

3. **Imports and Exports.**—The following tables shew the values of imports and exports for the years 1887 to 1920, details of exports from 1913 to 1920, and imports from and exports to various countries for 1913 to 1920 :—

TERRITORY OF NEW GUINEA.—IMPORTS AND EXPORTS, 1887 TO 1920.

Year.				Imports.	Exports.	Total.
				£'000.	£'000.	£'000.
1887				17	20	37
1888				20	17	37
1889				20	18	38
1890				20	19	39
1891				21	21	42
1892				22	20	42
1893				24	22	46
1894				32	24	56
1895				36	25	61

1920	727,011	189,000(a)	916,011

(a) 5,113 tons Copra to the United Kingdom.

4. **Export of Copra.**—The export of copra in 1884 reached about 1,300 tons, gradually increasing until 1898, when 2,500 tons were exported. By the year 1904 the figure had risen to 4,400 tons, and thenceforward increased until 1913, when a total of 14,000 tons was recorded. During the next few years the figures again increased; in 1918 nearly 21,000 tons were exported, and it is estimated that about 29,000 tons will be exported in 1921.

5. **European Plantations.**—The total area of European plantations for the year 1885 to 1918 is shewn in the following table:—

**TERRITORY OF NEW GUINEA. AREA OF EUROPEAN PLANTATIONS,
1885 TO 1918.**

Year.	Total Area.	Area in Coconuts (including Area not in Bearing).
	Acres.	Acres.
1885	148	(a)
1890	678	(a)
1895	2,152	(a)
1898	6,763	(a)
1909	45,064	39,595
1911	58,837	51,510
1912	63,300	56,133
1913	72,473	64,822
1914	84,488	76,847(b)
1918 (December)	133,960+(c)

(a) Not recorded.

(b) Of which 23,572 acres were in bearing.

(c) Of which 41,169 acres were in bearing. In addition it was estimated there were 49,000 acres of coconuts owned by natives; most of the produce of these was used as food.

The area of European plantations of coconuts in the various islands in December, 1918, was :—

7. **Revenue and Expenditure.**—The following tables shew the revenue and expenditure under German administration from 1904 to 1914 and under British administration from 1914 to 1921 respectively:—

PROTECTORATE OF GERMAN NEW GUINEA (INCLUDING NAURU AND THE ISLANDS HELD UNDER MANDATE FROM JAPAN).—REVENUE AND EXPENDITURE, 1904 TO 1914.

Year.	Customs.	Taxes.	Other Revenue derived from Protectorate.	Total Revenue from Protectorate.	Subsidy from Imperial German Government.	Expenditure.
	£	£	£	£	£	£
1904 ..	2,850	2,450	5,250	10,550	53,800	74,100
1905 ..	3,700	6,450	6,300	16,450	50,700	90,400
1906 ..	6,100	10,400	7,100	23,600	83,350	106,550
1907 ..	8,450	10,600	10,750	29,800	74,700	98,850
1908 ..	10,550	27,800	15,050	53,400	76,200	130,050
1909 ..	10,150	35,700	14,950	60,800	45,800	116,400
1910 ..	15,400	42,450	19,900	77,750	46,150	119,850
1911 ..	12,700	40,300	15,950	68,950	37,950	109,150
1912 ..	15,150	43,500	19,150	77,800	60,400	138,200
1913 ..	18,300	47,750	21,700	87,750	66,350	166,100
1914 ..	19,950(a)	57,500(a)	27,350(a)	104,800(a)	85,350(a)	191,700(a)

(a) These were the amounts in the estimates made by the German Governor to the Imperial German Government. According to another authority, the Imperial subsidy in 1914 was fixed at £136,000 and the expenditure £241,250.

TERRITORY OF NEW GUINEA.—REVENUE AND EXPENDITURE, 1914 TO 1921.

	Revenue.	Expenditure.
September, 1914, to 31st August, 1915	£39,607	(a)
1st September, 1915, to 30th June, 1916	77,287	(a)
1st July, 1916, to 30th June, 1917	115,559	(a)
1st July, 1917, to 30th June, 1918... ..	139,921	(a)
1st July, 1918, to 30th June, 1919	143,636	167,134(a)
1st July, 1919, to 30th June, 1920	202,158	160,407(a)
1st July, 1920, to 30th June, 1921	193,957	215,315(a)
1st July, 1921, to 30th June, 1922	237,650(b)	237,650(b)

(a) The Revenue during these years was applied in maintaining the Government of the country and (to the amount of £220,225) in part payment of stores, transport, etc., for the use of the Expeditionary Force which carried on the Government. The pay and allowances of the Force (£661,541) and the balance of the cost of stores, etc. (£254,535), making a total expenditure on military account of £916,076, were defrayed from Commonwealth funds.

(b) Estimate.

8. Asiatic Population of the South Pacific.—In the following table is given the number of Asiatics in the South Pacific at various dates :—

NUMBER OF ASIATICS IN THE SOUTH PACIFIC.

Group.	Chinese and Tonkinese.	Japanese.	British Indians.	Malays and Javanese.	Other Asiatics.	Total.

SECTION XXX.

PUBLIC HYGIENE.

§ 1. Introduction.

1. **General.**—Though the safeguarding of the public health as an organised department of governmental activity is of comparatively modern growth, few branches of administration have expanded more rapidly than the one relating to that subject. The loss of potential wealth incurred through preventable diseases and deaths is of grave concern to the nation, and is a matter which has received an increased amount of attention during the last few years both from the Commonwealth and State Governments and from the Health and other authorities in Australia. Numerous Acts of Parliament have been passed dealing with various aspects of the subject of public hygiene.

§ 2. The Public Health Acts.

1. **General.**—The most important statutes relating generally to the subject of public hygiene are the Commonwealth Quarantine Act and the Health Acts which have been passed in each State. The general trend of public health legislation has been referred to in previous issues of the Official Year-Book (see No. 12, pp. 1050-1).

2. **Commonwealth.**—The Commonwealth Department of Health, which was created on the 3rd March, 1921, and commenced its administration as from the 7th March, 1921, is controlled by the Commonwealth Minister of Health. The Department of Health was formed by the extension and development of the Commonwealth Quarantine Service, the Director of Quarantine becoming the Commonwealth Director-General of Health and Permanent Head of the Department.

The functions of the Department of Health are defined by an Order-in-Council gazetted on the 3rd March, 1921, page 415, as follows:—

The administration of the Quarantine Act.

The investigation of causes of disease and death and the establishment and control of laboratories for this purpose. The control of the Commonwealth Serum Laboratories and the commercial distribution of the products manufactured in those laboratories.

The methods of prevention of disease.

The collection of sanitary data, and the investigation of all factors affecting health in industries.

The education of the public in matters of public health.

The administration of any subsidy made by the Commonwealth with the object of assisting any effort made by any State Government or public authority directed towards the eradication, prevention, or control of any disease.

The conducting of campaigns of prevention of disease in which more than one State is interested.

The administrative control of the Australian Institute of Tropical Medicine.

The administrative control of infectious disease amongst discharged members of the Australian Imperial Forces.

Generally to inspire and co-ordinate public health measures.

Any other functions which may be assigned to it.

As a result of the creation of this Department, the Australian Institute of Tropical Medicine at Townsville, and the campaign in connexion with hookworm disease, are now under the control of the Commonwealth Department of Health. The organisation of the Department in respect of other functions is proceeding.

3. New South Wales.—The Department of Public Health is controlled by the Minister of Public Health. The Director-General of Public Health is the chief executive officer, and is assisted by various staffs—medical, bacteriological, chemical, veterinary, dairy inspection, meat inspection, sanitary, pure food, and clerical. Briefly put, the work of the Department extends over the whole of the State, and embraces all matters relating to public health and the general medical work of the Government. The Director-General of Public Health holding the position of Chief Medical Officer of the Government as well as being permanent head of the Department.

The Board of Health has certain statutory duties imposed upon it by various Acts of Parliament, and the Director-General is President of the Board. These duties consist largely in supervision of the work of local authorities (Municipal and Shire Councils), so far as that work touches upon public health matters connected with the following Acts:—Public Health Act 1902, Public Health (Amendment) Act 1915, Dairies Supervision Act 1901, Noxious Trades Act 1902, Cattle Slaughtering and Diseased Animals and Meat Act 1902, Pure Food Act 1908, and Private Hospitals Act 1908. The Board further possesses certain powers connected with public health matters under the Local Government Act 1919. The Board of Health is a nominee Board, created in 1881 and incorporated in 1894.

The Director-General of Public Health acts independently of the Board of Health as regards the State hospitals and asylums, and the various public hospitals throughout the State which receive subsidies from the Government.

4. Victoria.—In this State the Public Health Acts are administered by a Commission composed of the Chief Health Officer and six members appointed by the Governor-in-Council. The medical and sanitary staffs of the Commission consist of (a) the Chief Health Officer, who is also chairman, (b) four assistant health officers, (c) two engineering inspectors, (d) three building inspectors, and (e) five health inspectors. The main function of the Commission is to enforce the execution of the Health Acts by the local municipalities, but it has been found advisable to supplement this supervisory function by an active policy of inspection as to the sanitary condition of various districts, and the sampling of articles of food. The supervision of the sanitary condition of milk production is under the Dairy Supervision Branch of the Department of Agriculture, but distribution is supervised by the Commission. Acts administered by the Department of Public Health are:—The Health Acts, in which are now included the Adulteration of Wine Act, the Pure Food Act, the Meat Supervision Act, and the Cemeteries Act, in which is now included the Cremation Act. The Department administers also the Midwives Act, the Goods Act, and the Venereal Diseases Act. Under the last-mentioned Act it has been made compulsory for all persons affected with venereal disease to place themselves under the care of a duly qualified medical practitioner. Persons other than medical practitioners are prohibited from treating these diseases, or from supplying drugs or medicines. Registered pharmaceutical chemists may, however, dispense prescriptions to patients of medical practitioners. The Act contains various sections—with appended penalties for contravention—designed to check the spread of venereal diseases. A special clinic for the treatment of infected persons was opened in Melbourne in June, 1918. Between 17th June, 1918, and 22nd October, 1921, 7,425 males were treated, attendances numbering 259,907. At the same clinic (afternoon clinic for women) during the same period, 581 females were treated, attendances numbering 14,013. It may be mentioned that the Act provides a heavy penalty in the event of a medical practitioner failing to notify cases of these diseases.

5. Queensland.—The Public Health Acts 1900 to 1917 are administered by the Commissioner of Public Health under the Home Secretary. The executive staff of the Department includes a health officer, a medical officer for the tuberculosis bureau, two

medical officers for enthetic diseases, fourteen food and sanitary inspectors, one staff nurse, in addition to rat squads in Brisbane. Northern offices, in charge of inspectors, are located at Rockhampton, Townsville, Cairns, and Mackay. A laboratory of microbiology and pathology, in charge of a medical director, is controlled by the Department, and performs a wide range of microbiological work for the assistance of medical practitioners and the Department.

One function of the Department is to stimulate and advise local sanitary authorities on matters pertaining to the Health Acts, and, where necessary, to rectify or compel rectification, at the cost of the local authority, of sanitary evils produced by local inefficiency or apathy. Its powers and responsibilities were widely increased by the Amending Acts of 1911, 1914, and 1917.

Under statutory powers a scheme is in operation for dealing with venereal disease throughout the State. It includes compulsory notification, free treatment, and the free supply of salvarsan and allied remedies at all public hospitals. Compulsory segregation of venereally infective persons of either sex may be effected on occasion.

6. South Australia.—The Central Board of Health in South Australia consists of five members, three of whom (including the chairman, who is permanent head of the Department) are appointed by the Governor, while one each is elected by the city and suburban local Boards and the country local Boards. The Health Act 1898 provides that the municipal and district councils are to act as local Boards of Health for their respective districts. There are 183 of these local Boards under the general control and supervision of the Central Board. A chief inspector and two inspectors under the Health and Food and Drugs Acts periodically visit the local districts, and see generally that the Boards are carrying out their duties. There is also a chief inspector of food and drugs (under the Food and Drugs Act 1908), who, in company with an analyst, visits country districts, and takes samples of milk, which are analysed on the spot. There are two nurse inspectors employed in advising and assisting local Boards in connexion with outbreaks of infectious diseases. In the outlying districts there are fifteen inspectors directly responsible to the Board.

7. Western Australia.—The legislation in this State is the Health Act 1911, with the amending Acts of 1912(2), 1915, 1918, and 1919, which have been partly consolidated and reprinted as "The Health Act 1911-18." The central authority is the Department of Public Health, controlled by a Commissioner, who must be a qualified medical practitioner. The local authorities constitute:—(a) Municipal Councils, (b) Road Boards where the boundaries of a Health District are coterminous with those of a Road District, and (c) Local Boards of Health, composed of persons appointed by the Governor for a certain period. These Local Boards are only utilized where neither Municipal Councils nor Road Boards are available. Generally speaking, the Act is administered by the local authorities, but the Commissioner has supervisory powers, also power to compel local authorities to carry out the provisions of the Act. In cases of emergency the Commissioner may exercise all the powers of a local health authority in any part of the State.

All the usual provisions for public health legislation are contained in the Act, and in addition, provision is made for the registration of midwifery nurses, the medical examination of school children, the control of public buildings (*i.e.*, theatres, halls, etc.), the control of food, and the provision of standards therefor.

The amending Act of 1915 deals exclusively with venereal diseases. The main features are:—(1) that none but qualified medical practitioners shall treat these diseases; (2) that all patients shall promptly place themselves under skilled treatment; and (3) that advertisements of medicines and appliances for the treatment of these diseases, of sexual infirmities, etc., shall no longer be published. For the carrying out of these objects, the Act provides, *inter alia*:—(a) For the notification (without name and address) of cases to the Commissioner of Public Health; (b) for the notification to the Commissioner of patients who discontinue treatment before receiving a certificate of

cure; (c) for the exercise by the Commissioner, in certain circumstances, of compulsory powers against persons who neglect treatment; (d) for the provision of free treatment at hospitals, and at the hands of salaried or subsidised medical practitioners.

A penalty of £50, or imprisonment with hard labour for six months, is provided for any person who knowingly infects any other with any venereal disease, or does anything likely to lead to that result.

The 1918 amending Act includes important amendments to that part of the principal Act dealing with venereal diseases. The general principles remain unaltered, but details are much improved.

8. **Tasmania.**—Under the Director of Public Health Act 1920, the office of Director of Public Health is established, and the person holding the office of Chief Health Officer under the Public Health Act 1903 at the time of the passing of the former Act is the Director of Public Health. He is also the Permanent Head of the Department of Public Health. He is charged with very wide functions and powers, and in the event of the appearance of dangerous infectious disease (small-pox, plague, etc.) in the State, is vested with supreme power, the entire responsibility of dealing with such an outbreak being taken over by him from the local authorities. Local executive is vested in local authorities, who possess all legal requirements for the efficient sanitary regulation of their districts. Controlling and supervisory powers over these bodies are possessed by the Department of Public Health, whereby many of the powers conferred upon them may be converted into positive duties. One function of the Department is to advise local authorities on matters pertaining to the Health Act, and, where necessary, to rectify sanitary evils produced by local inefficiency or apathy. The Department has four full-time inspectors, who assist and instruct the local sanitary inspectors, but full-time district health officers are not provided for. The number of local authorities under the Public Health Act has been reduced to forty-nine since the Local Government Act 1906 came into force. All parts of Tasmania are now furnished with the administrative machinery for local sanitary government.

The Public Health Act 1917 deals with venereal diseases. Medical practitioners are required to report persons suffering from such diseases. Such notification, however, does not disclose the names or addresses of the patients, this information being given to the Department by medical practitioners only if patients fail to consult or attend for a period of six weeks.

Regulations under the Public Health Act 1903, as amended, for checking or preventing the spread of any infectious disease, came into force in February, 1918.

The Places of Public Entertainment Act 1917 is administered by the Director of Public Health under the Minister. This Act provides, *inter alia*, for the licensing and regulation of places of public entertainment, for the appointment of a censor or censors of moving pictures and for the licensing of cinematograph operators. Comprehensive regulations have been framed under the Act. Inspectors under the Public Health Act 1905 are Inspectors of Places of Public Entertainment under this Act.

§ 3. Inspection and Sale of Food and Drugs.

1. **Introduction.**—The importance of securing a pure and wholesome supply of food and drugs is recognised by both the Commonwealth and State Parliaments. Under the Acts referred to later, and the regulations made thereunder, the importation of articles used for food or drink, of medicines, and of other goods enumerated, is prohibited, as also is the export of certain specified articles, unless there is applied to the goods a "trade description" in accordance with the Act. Provision is made for the inspection of all prescribed goods which are imported, or which are entered for export.

2. **Commonwealth Jurisdiction.**—Under Section 51 (i) of the Commonwealth Constitution Act 1900, the Commonwealth Parliament has power to make laws with respect to trade and commerce with other countries and among the States. By virtue of that power, the Commerce (Trade Descriptions) Act 1905, and the Customs Act 1910, to which reference has already been made in another part of this book (see pp. 487, 488), were passed.

3. **State Jurisdiction.**—The inspection and sale of food and drugs is also dealt with in each State, either under the Health Acts or under Pure Food Acts. There is, in addition, in the several States, a number of Acts dealing with special matters, such as the adulteration of wine and the supervision of meat. The supply and sale of milk are also subject to special regulations or to the provisions of special Acts. A brief statement of the general objects of these Acts appeared in previous issues of the Year Book (see No. 12, p. 1054).

4. **Food and Drug Standardisation.**—Conferences aimed at securing uniformity in these matters were held in Sydney in 1910, and in Melbourne in 1913. The resolutions of the latter conference were submitted to the Premiers' Conference held in Melbourne in March, 1914, and in conformity with the determinations arrived at, each State issued regulations which have had the effect of ensuring uniformity throughout the Commonwealth.

5. **The Sale and Custody of Poisons.**—In Victoria, New South Wales, Western Australia, and Tasmania, the enactments for regulating the sale and use of poisons are administered by the Pharmacy Boards in the respective States. In South Australia, the sale of poisons is provided for by regulations under "The Food and Drugs Act 1908," administered by the Central Board of Health. In Queensland, the sale of poisons is under the control of the Health Department.

In New South Wales and Victoria the Government subsidises the Pharmacy Board. In order to enable it to carry out the provisions of the Poisons Act.

No persons, other than legally qualified medical practitioners and registered pharmaceutical chemists, are permitted to sell poisons without special licence from the bodies administering the legislation in the respective States. These licences are issued to persons in business distant from four to five miles from a registered chemist, on production of certificates from medical practitioners, police, or special magistrates or justices as to the applicant's character and fitness to deal in poisons. Annual licence fees, ranging from 5s. to 40s., are charged in the several States. By a new regulation, made in New South Wales on 17th December, 1920, provision is made for an annual licence fee of 10s. 6d. Prior to this, the Pharmacy Board issued licences free of charge. New poisons regulations were approved in Queensland on 1st April, 1920, amongst which are stringent restrictions on the sale of cyanide of potassium.

The special conditions attaching to the sale of poisons are alluded to on p. 1055 of Official Year Book No. 12.

Partial exemptions from the regulations are made in some States in the case of sales of poisons for agricultural, horticultural and photographic purposes in so far that any person may sell them subject to the restrictions as to the class of container and the manner in which they may be sold. The sale of what are generally known as industrial poisons, such as sulphuric acid, nitric acid, hydrochloric acid, soluble salts of oxalic acid, etc., is governed by regulations, as also is the sale of poisons for the destruction of rats, vermin, etc. Under the existing laws these poisons are allowed, in most of the States, to be sold by any one. The Victorian Parliament, in December, 1920, passed an amending Poisons Act, in which the word "wholesale" has for the first time been defined as meaning "sale or supply for the purposes of re-sale," providing for an annual fee of 10s. and the issuing of licences to dealers in exempted poisons. A new principle is introduced into the Victorian Poisons Act of 1920. Certain drugs are declared to be "potent drugs" and may only be sold by pharmaceutical chemists. These drugs include acetanilid, adrenalin, oil of tansy, pituitary extract, thyroid gland preparations, and any serum or vaccine for human use.

§ 4. Milk Supply and Dairy Supervision.

1. **General.**—In Official Year Book No. 12 and preceding issues allusion is made in general terms to the legislation in force in the various States to ensure the purity of the milk supply and of dairy produce generally, but limits of space preclude the repetition of this information in the present issue.

2. **Number of Dairy Premises Registered.**—The following table shews so far as the particulars are available the number of dairy premises registered and the number of cattle thereon. Compulsory registration is not in force throughout the whole area of the various States. The figures do not include unregistered dairies.

DAIRY PREMISES REGISTERED AND CATTLE THEREON, 1920.

Particulars.	N.S.W.	Victoria.	Q'land. (a)	S. Aust.	W. Aust.	Tasmania.
Premises registered ..	18,502	16,417	12,973	1,242	975	†(b)
Cattle thereon ..	729,317	157,345	(b)	7,750	10,280	(b)

(a) For year 1919–20.

(b) Not available.

3. **New South Wales.**—The provisions of the Dairies Supervision Act 1901 extend to the whole of the Eastern and Central Divisions of this State and to all important dairying districts further inland. Other districts are brought under the operation of the Act by proclamation from time to time. Every dairyman, milk vendor, and dairy factory or creamery proprietor is required, under penalty, to apply for registration to the local authority for the district in which he resides, and also to the local authority of every other district in which he trades. Registrations must be applied for before commencing to trade and must be renewed annually. The Chief Dairy Inspector is in charge of all inspectorial work under the Dairies Supervision Act 1901, and has assisting him fourteen qualified dairy inspectors, each in charge of a district. During 1919, samples of milk numbering 3,502, and of food and drugs numbering 822, were taken from the vendors for examination, and 10,717 dairy premises were inspected. Where necessary, warnings and prosecutions followed. A sum of nearly £2,000 was imposed in fines for adulteration, want of cleanliness, etc.

4. **Victoria.**—The inspection and supervision in Victoria of dairies, dairy farms, dairy produce, milk stores, milk shops, milk vessels, dairy cattle and grazing grounds are provided for by the Dairy Supervision Act 1915, administered by the Minister of Agriculture. Under the Health Act, however, the Department of Public Health is empowered to take samples of food (including milk, cream, butter, cheese, and other dairy products) for examination or analysis, and to institute prosecutions in case of adulterated or unwholesome food. By the end of the year 1920, 117 municipal districts, comprising about one-third of the area of the State, had been brought under the operation of the Dairy Supervision Act. The municipal councils have the option of carrying out the execution of the Act themselves or of electing for execution by the Department of Agriculture; up to the present all the municipalities in which the Act has been proclaimed have elected for Departmental execution.

5. **Queensland.**—The control and supervision of the milk supply and of dairies and the manufacture, sale, and export of dairy produce in Queensland are provided for by the Dairy Produce Act 1920, administered by the Department of Agriculture and Stock. These Acts and the regulations made thereunder apply only to prescribed districts, which comprise the whole of the coastal district from Rockhampton down to the New South Wales border, and the Darling Downs, Maranoa, Mackay, and Cairns districts.

6. **South Australia.**—The Food and Drugs Act 1908, and the Regulations made thereunder, provide for the licensing of vendors of milk and the registration of dairies, milk stores and milk shops. The Metropolitan County Board carries out the requirements of the metropolitan area. In the Country, the majority of local authorities have not made statutory provision for the licensing of vendors of milk and the registration of dairy premises; and, in consequence, the Central Board of Health provides for such under the Act.

7. **Western Australia.**—Control of dairies throughout the State is in the hands of the Public Health authorities under the provisions of the Health Act. The inspectors under the Act supervise the sanitary condition of the premises, the examination of herds being carried out by officers of the Department of Agriculture for the Health Department. Inspection of herds is made at regular intervals, and the tuberculin test is applied in cases of suspected disease.

8. **Tasmania.**—Local authorities are responsible for the dairies in their respective districts. By-laws for the registration and regulation of dairies have been drafted by the Public Health Department, and in the majority of cases have been adopted by the local authorities. By the Food and Drug Act, which came into force March, 1911, milk sampling is carried out by the local authorities. During 1913, attention was drawn by circular to the requirements of local authorities with regard to dairies, and a special report is now required before licences are granted. An Act also provides for the registration and inspection of dairies and other premises where dairy produce is prepared, and regulates the manufacture, sale, and export of dairy produce.

§ 5. Prevention of Infectious and Contagious Diseases.

1. **General.**—The provisions of the various Acts as to precautions against the spread and the compulsory notification of infectious diseases may be conveniently dealt with under the headings—(a) Quarantine; (b) Notifiable Diseases; and (c) Vaccination.

2. **Quarantine.***—Under the Commonwealth Quarantine Act 1908, the systems of State quarantine formerly in operation were abolished, and a branch of the Department of Trade and Customs, under the immediate control of a Director of Quarantine, was created on 1st July, 1909. Amending Quarantine Acts were passed in 1912, 1915, and 1920, correcting certain imperfections in the original Act, and conferring additional powers. The Quarantine Act is now administered by the Commonwealth Department of Health, which came into being on the 7th March, 1921, the Director of Quarantine becoming the Director-General of Health. Uniformity of procedure has been established throughout the Commonwealth in respect of all vessels, persons, and goods arriving from overseas ports or proceeding from one State to another, and in respect of all animals and plants brought from any place outside Australia. In regard to interstate movements of animals and plants, the Act becomes operative only if the Governor-General be of opinion that Federal action is necessary for the protection of any State or States; in the meantime the administration of inter-state quarantine of animals and plants is left in the hands of the States.

(i) *Transfer of Quarantine Stations.* The transfer from the States to the Commonwealth of the quarantine stations, for the purposes of human quarantine, at the following places, has been effected:—(a) *New South Wales.* North Head (near Sydney). (b) *Victoria.* Point Nepean (near Melbourne). (c) *Queensland.* Colmslie and Lytton (near Brisbane), and Thursday Island. (d) *South Australia.* Torrens Island (near Adelaide). (e) *Western Australia.* Woodman's Point (near Fremantle), Albany, and Broome. (f) *Tasmania.* Bruni Island (near Hobart). Animal quarantine stations in each of the States have also been transferred to the Commonwealth. New buildings

* From information furnished by the Commonwealth Director-General of Health.

and improvements are in course of construction at several of the transferred stations. New stations have been constructed at Darwin, Thursday Island, Townsville, and Bunbury.

(ii) *Administration of Act.* The administration of the Act in respect of the general division, i.e., vessels, persons, and goods, and human diseases, is under the direct control of the Commonwealth in all States except Tasmania. A medical chief quarantine officer, with assistant quarantine officers, has been appointed in each State. This officer is charged with responsible duties, and is under the control of the Director-General of Health. In Tasmania, the chief health officer of the State acts as chief quarantine officer, and payment is made to the State for his services. The administration of the Act in the Northern Territory has been combined with that of Queensland under the chief quarantine officer for the North-eastern Division. The administration of the Acts and Regulations relating to oversea animal and plant inspection and quarantine is carried out by the officers of the State Agricultural Departments acting as quarantine officers.

(iii) *Chief Provisions of Act.* The Act provides for the inspection of all vessels including air-vessels, from oversea, for the quarantine, isolation, or continued surveillance of infected or suspected vessels, persons, and goods, and for the quarantining and, if considered necessary, the destruction of imported goods, animals, and plants. The obligations of masters, owners, and medical officers of vessels are defined, and penalties for breaches of the law are prescribed. Power is given to the Governor-General to take action in regard to various matters by proclamation, and to make regulations to give effect to the provisions of the Act. Quarantinable diseases are defined as small-pox, plague, cholera, yellow fever, typhus fever, leprosy, or any other disease declared by the Governor-General, by proclamation, to be quarantinable. "Vessel" is defined as "any ship, boat or other description of vessel or vehicle used in navigation by sea or air." "Disease" in relation to animals means certain specified diseases, or "any disease declared by the Governor-General, by proclamation, to be a disease affecting animals." "Disease" in relation to plants means "any disease or pest declared by the Governor-General, by proclamation, to be a disease affecting plants." The term "plants" is defined as meaning "trees or plants, and includes cuttings and slips of trees and plants and all live parts of trees or plants and fruit."

(iv) *Proclamations.* The proclamations so far issued specify the diseases to be regarded as diseases affecting animals and plants; appoint first ports of landing for imported animals and plants and first ports of entry for oversea vessels; declare certain places beyond Australia to be places infected, or as places to be regarded as infected with plague; prohibit the importation (a) of certain noxious insects, pests, diseases, germs, or agents, (b) of certain goods likely to act as fomites, and (c) of certain animals and plants from any or from certain parts of the world; fix the quarantine lines, and define mooring grounds, in certain ports of Australia.

(v) *General.* At present, instead of all oversea vessels being examined in every State, as was formerly the case, those arriving from the south and west are now examined only at the first port of call, and pratique is given for the whole of the Commonwealth, except in cases of suspicious circumstances, while vessels arriving from the northern routes are examined only at the first and last ports. It is expected that the restrictions placed upon oversea vessels will be further removed as the machinery of quarantine is improved. The present freedom from certain diseases which are endemic in other parts of the world would, however, appear to justify the Commonwealth in adopting precautionary measures not perhaps warranted in the already infected countries of the old world.

3. *Notifiable Diseases.*—Provision exists in the Health Acts of all the States for precautions against the spread and for the compulsory notification of infectious diseases. When any such disease occurs, the Health Department and the local authorities must at once be notified. In some States notification need only be made to the latter body. The duty of giving this notification is generally imposed, first, on the head of the house to which the patient belongs, failing whom on the nearest relative present, and on his default on the person in charge of or in attendance on the patient, and on his default on the occupier of the building. Any medical practitioner visiting the patient is also bound to give notice.

(i) *Notifiable Diseases Prescribed in each State.* In the following statement those diseases which are notifiable in each State are indicated by a cross :—

DISEASES NOTIFIABLE UNDER THE HEALTH ACTS IN EACH STATE.

Particulars.	N.S.W.	Vic.	Q'land.	S.A.	W.A.(d)	Tas.(e)

Whooping cough	+
Yellow fever	+	+	+	..

(a) In metropolitan and certain proclaimed districts. (b) Under the Venereal Diseases Acts. (c) Thursday Island area only. (d) Other diseases enumerated as notifiable under "The Health Act 1911" of this State are pyæmia, and Malta, dengue, low and Colonial fevers. (e) Venereal diseases are notifiable under "The Public Health Act 1917." (f) Chicken-pox has been declared a notifiable disease to render certain its differential diagnosis from small-pox. (g) In South Australia influenza vera is notifiable, and any febrile toxic-septicæmic condition similar to influenza, including pneumonic influenza. (h) Notifiable in certain cases only. (i) Primary and secondary stages only.

(ii) *Duties of Authorities.* As a rule the local authorities are required to report from time to time to the Central Board of Health in each State as to the health, cleanliness, and general sanitary state of their several districts, and must report the appearance of certain diseases. Regulations are prescribed for the disinfection and cleansing of premises, and for the disinfection and destruction of bedding, clothing, or other articles which have been exposed to infection. Bacteriological examinations for the detection of

plague, diphtheria, tuberculosis, typhoid, and other infectious diseases within the meaning of the Health Acts are continually being carried out. Regulations are provided in most of the States for the treatment and custody of persons suffering from certain dangerous infectious diseases, such as small-pox and leprosy.

(iii) *New South Wales.* The proclamation and notification of infectious diseases are dealt with in Part III. of the Public Health Act 1902. Special provision is made by that Act for the notification of small-pox and leprosy, and for the custody and treatment of lepers. Special reports dealing with outbreaks and the aetiology of plague, leprosy, and small-pox have been published.

(iv) *Victoria.* Any infectious disease declared to be notifiable is notifiable throughout the State (Health Act 1919).

(v) *Queensland.* Under Part VII. of the Health Act 1900-1917, all cases of infectious diseases must be notified; special provision is made for notification of small-pox. Provision is made for the diagnosis of leprosy, and lepers are sent to Peel Island, Moreton Bay.

(vi) *South Australia.* In this State cases of infectious diseases must be reported to the local Board, under the provisions of Part VIII. of the Health Act 1898. The onus of notification is placed primarily on the head of the family, and, failing him, the nearest relative, the person in charge, or the occupier of the house; in any case, notification must be given by the medical practitioner attending.

(vii) *Western Australia.* The necessity for providing hospital treatment for infectious cases has been recognised by the Local Health authorities, and in several instances wards for the treatment of these cases have been erected.

(viii) *Tasmania.* Provisions regarding the prevention and notification of infectious diseases are contained in the Public Health Act 1903 and amending Acts.

4. **Vaccination.**—In the State of New South Wales there is no statutory provision for compulsory vaccination, though in all the other States of the Commonwealth such provision has been made. Jennerian vaccine for vaccination against small-pox is prepared at the Commonwealth serum laboratories in Melbourne. A considerable demand exists for the vaccine in the State of Victoria, but in the other States the normal requirements are small. During the years 1912, 1913, and 1914, the output of the vaccine in doses from the depot was respectively 65,000, 570,000, and 146,000. The number of doses issued in 1913 was, however, abnormal, and was due to the epidemic of small-pox which broke out in Sydney at the end of June, this being followed by large numbers of vaccinations in each State.

The following table shews, so far as particulars are available, the number of persons vaccinated in each State from 1915 to 1920 inclusive :—

NUMBER OF PERSONS VACCINATED IN EACH STATE, 1915 TO 1920.

Year.	N.S.W.(a)	Victoria.(b)	Q'land.	S. Aust.	W. Aust.	Tasmania.
1915	4,080(d)	24,186	58(e)	854	(c)	(c)
1916	2,618	20,916	(c)	531	(c)	(c)
1917	4,663	19,759	(c)	251	(c)	(c)
1918	(c)	15,306	(c)	36	(c)	(c)
1919	324	14,031	(c)	8	(c)	(c)
1920	377	4,327	(c)	20	(c)	(c)

(a) By officers of the Health Department and at public depots. (b) Children only, who were vaccinated under the Act, see (ii) below. (c) Returns not available. (d) Exclusive of the military. (e) At Health Department, Brisbane.

(i) *New South Wales.* Although there is no provision for compulsory vaccination in this State, public vaccinators have been appointed. No statistics are available as to the proportion of the population who have been vaccinated, but a report of the Principal Medical Officer of the Education Department states that out of 55,740 children medically examined during 1919, 9,487, or 17 per cent., had been vaccinated.

(ii) *Victoria.* Compulsory vaccination, subject to a "conscience" clause, is enforced throughout the State, under Part VII. of the Health Act 1919. From the year 1873 up to 31st December, 1918, it is estimated that 72 per cent. of the children whose births were registered were vaccinated. Free lymph is provided. The number of children vaccinated in Victoria during 1920 was 4,327.

(iii) *Queensland.* Although compulsory vaccination is provided for in this State under Part VII. of the Health Act 1900-1917, its operation has not been proclaimed. Vaccination thus being purely voluntary, medical practitioners do not notify vaccinations. In the early part of 1912, the Queensland Government sent a medical expedition to the islands in Torres Straits. Over 1,200 natives were vaccinated with a view to reducing the risk of the introduction of small-pox from New Guinea. Information as to vaccinations in recent years is not available.

(iv) *South Australia.* The Vaccination Act 1882, which applies to South Australia and the Northern Territory, is administered by the vaccination officer of the State. Under this Act vaccination was compulsory, but in 1917 an Act to abolish compulsory vaccination was passed. The total number of vaccinations in 1920 was 20.

(v) *Western Australia.* In this State vaccination is compulsory under the Vaccination Act 1878, which, however, remains almost a dead letter, seeing that under the Health Act 1911, a "conscientious objection" clause was inserted, which is availed of by the majority of parents. The number of children vaccinated is very small. All district medical officers are public vaccinators, but they receive no fee for vaccinations.

(vi) *Tasmania.* All infants in Tasmania are nominally required, under the Vaccination Act 1898, to be vaccinated before the age of 12 months, unless either (a) a statutory declaration of conscientious objection is made, or (b) a medical certificate of unfitness is received. Information in regard to vaccinations in recent years is not available.

5. Commonwealth Serum Laboratories.—The establishment for the preparation of Jennerian Vaccine situated at Royal Park, near Melbourne (formerly known as the "Calf Lymph Depot"), has been enlarged and extended. The institution is now designated the "Commonwealth Serum Laboratories," and forms a branch of the Commonwealth Department of Health. The list of bacteriological preparations produced by the Laboratories has been extended so as to cover practically the whole range of biological products, and the institution is now a valuable national provision for the protection of public health and for the treatment of human and animal diseases. Price lists of the various products have been issued, and the institution is in full working order.

6. Malaria and Bilharzia.—The Defence and Repatriation Departments have jointly requested the Commonwealth Department of Health to undertake the control of returned soldiers suffering from malaria and bilharzia after their return to civil life. By arrangement with the various State Health Departments, a scheme is now in active operation for the control of the infectivity of men suffering from these diseases, and, as a result of the success obtained in Egypt in the treatment of bilharzia by tartar emetic, arrangements have now been made for cases of this disease to be taken into hospital and treated by this method until a cure is effected.

7. Venereal Diseases.—The Commonwealth, recognising the importance of effective control of venereal diseases, has provided a subsidy of £15,000 per annum to the various States to assist in the work of providing hospital treatment for, and administrative control of, venereal diseases, the supervision of this work in so far as it relates to the expenditure of this subsidy being controlled by the Commonwealth Department of Health.

§ 6. Tropical Diseases.

1. **Introduction.**—The remarkable development of parasitology in recent years and the increase in knowledge of the part played by parasites in human and animal diseases have shewn that the difficulties in the way of tropical colonisation, in so far as these arise from the prevalence of diseases characteristic of tropical countries, are largely removable by preventive and remedial measures. Malaria and other tropical diseases are coming more and more under control, and the improvements in hygiene which science has accomplished lend an entirely new aspect to the question of white settlement in countries formerly regarded as unsuitable for colonisation by European races. In Australia the most important aspect of this matter is at present in relation to such diseases as filariasis, malaria, and dengue fever, which, although practically unknown in the southern States, occur in many of the tropical and sub-tropical parts of the Commonwealth.

2. **Queensland.**—(i) *Transmission of Disease by Mosquitoes.* The existence of filariasis in Queensland was first discovered about thirty-six years ago. The parasite of this disease (and probably of dengue fever also), is transmitted by *Culex fatigans*, the mosquito most prevalent in Queensland. The *Stegomyia fasciata*, conveyer of yellow fever, is another common domestic mosquito throughout Eastern Queensland during the summer, but so far has never been infected from abroad. Occasional limited outbreaks of malaria occur in the northern parts of the State; one at Kidston, in 1910, resulted in 24 deaths. The infection was traced to newcomers from New Guinea. Allusion to the efforts made to deal with the mosquito, under the Health Act of 1911, will be found in Official Year Book No. 12, p. 1063. By an Order in Council the Local Authorities are now responsible for the taking of measures for the destruction, and the prevention of breeding, of mosquitoes.

(ii) *Australian Hookworm Campaign.* The study and control of hookworm (*Ankylostoma duodenale* and *Necator americanus*) on a large scale in Australia and its dependencies began in Papua. The Commonwealth of Australia in 1916 invited the International Health Board of the Rockefeller Foundation to make a hookworm survey of Papua, and Dr. J. H. Waite, of the staff of the Board, was sent to conduct the investigation. Between 1st June and 1st September, 1917, 1,190 natives were examined, and 598, or 50.3 per cent., were found to be infected with hookworm. Among natives who had come recently from the villages the infection rate was 8.7 per cent., and among plantation labourers it was 63.1 per cent. This led to the conclusion that hookworm infection was being spread by the plantations, and that control measures were needed.

The work in Papua stimulated the interest in the situation in Queensland, where cases of hookworm disease had been reported in the medical literature since 1889. In 1918 a hookworm campaign was undertaken jointly by the State of Queensland and the International Health Board under the direction of Dr. Waite. The prevalence of hookworm disease and its effects in retarding growth and development were found to be greater than had been supposed. The mental retardation in heavily infected children was found to increase with age as follows:—

Age last birthday	..	10	..	11	..	12	..	13	..	14	..	15
Retardation in years	..	1.6	..	2.2	..	2.5	..	3.2	..	3.5	..	4.5

In the case of children, growth and development took place in a remarkable way as soon as a cure was effected. It was found that the disease was responsible for anæmia, dwarfing, retardation—physical and mental—and delay of sexual maturity.

In 1919 the direction of the work in Queensland was taken over by Dr. W. A. Sawyer, and on 1st October, 1919, there was begun the Australian Hookworm Campaign. The cost is to be borne jointly by the Commonwealth of Australia, the State of Queensland, the International Health Board, and other States and territories in which it is intended to conduct investigations.

Between 1st June, 1917, and 31st March, 1920, examinations have been made in Queensland, under the several projects, as follows:—

People listed in special census	48,152
Examined for hookworm disease	42,441
Found to be infected with hookworms	6,416 (15.1 %)
Treated	6,873 (a)
Found to be cured, on re-examination	2,293

(a) Including approximately 700 aboriginals treated without previous examination, on account of the high infection rate among them.

The number of cures will be greatly increased as the work of re-examining and treating is continued.

On 31st March, 1920, intensive work was in progress in districts with head-quarters at Ayr, Bowen, Mackay, and Nambour, in Queensland. Work had previously been done in the coastal region of Queensland from Cooktown to Townsville.

Surveys of South Australia, Victoria and Tasmania, which were carried out during the year 1920, show that these States are free from the disease.

It is proposed to extend the work of the Hookworm Campaign by attacking in association with the new Commonwealth Department of Health the problems of malaria and filaria.

(iii) *Institute of Tropical Medicine, Townsville.* The Australian Institute of Tropical Medicine was founded at Townsville in January, 1910. Since 7th March, 1921, the Institute has been administered by the newly created Commonwealth Department of Health. During the first two years after its establishment the Institute was subsidised by the Commonwealth and Queensland State Governments, and was controlled by a committee consisting of representatives of both Governments and of the three Australian Universities—Sydney, Melbourne, and Adelaide. A director was appointed to organise the activities of the Institute, and after having accomplished a survey of Northern Australia and New Guinea, to advise as to the best centre where the work could be carried out most expeditiously. The staff consisted at first of the director and one laboratory assistant, but soon the necessity arose of appointing an entomologist. In 1913, after two years of preliminary work, the Commonwealth decided to increase considerably the grant to the Institute, and to take over the financial administration, which was vested in the Department of External Affairs, and later in the Home and Territories Department. The representatives of the three universities were retained as scientific advisers. The decision to increase the scope of the Institute was greatly influenced by a resolution passed by the Australasian Medical Congress in Sydney in 1911, recommending an organised inquiry into the various aspects likely to affect the establishment of a working white race in Australia. The increased subsidy made the appointment of a larger staff possible. The services of three qualified assistants were secured, and the Institute was housed in a ferro-concrete building, situated within the precincts of the Townsville Hospital. During the first two years a survey of tropical diseases existent in North Queensland was carried out; the incidence of human and animal parasites was investigated; and a number of problems which required elucidation were attacked. Amongst other suggestions a hookworm survey of Cairns and surrounding districts was recommended. The staff undertook research on "nodules in beef" and made an important discovery, which at first seemed destined to advance our knowledge, by proving that living larvæ could penetrate through the unbroken skin of the beast and could be found under special conditions on the surface. Research in the consequent fate of the larvæ and the search for an intermediary host, in which the larvæ could undergo further development, proved fruitless, although many possibilities, such as biting flies, aquatic insects, etc., were considered and excluded after patient research. It was shewn that the parasites of wild animals, such as reptiles, birds, and small mammals resembled on the whole those found and described from other parts of the tropics, but no new general features of any importance could be discovered. Attention was drawn to the prevalence in the dry western parts of North Queensland of keratosis, a skin disease, characterised by a thickening of the horny layer of the skin, which

develops into a chronic ulcer, and is apt to give rise to skin cancers. The occurrence of similar conditions in old people with atrophic skin in other parts of the world has been well known, but in Queensland mostly young people become affected, and the condition has been attributed to the effect of sunlight and dry heat on a skin lacking in normal pigment. In the Torres Strait islands, the occurrence and prevalence of such diseases as malaria, filariasis, elephantiasis, yaws and others has been noted. The increase in the staff made more extended field work possible, and in the course of time different districts were visited in order to study the local prevalence of fever and disease. A survey of the whole of the coastal districts of British New Guinea was undertaken and yielded interesting results. The prevalence of the different types of malaria, of filariasis and of leprosy was mapped out, the existence of *agchylstomiasis* (caused by the American variety of the hookworm, which is widely distributed in the far East) was noted, and the occurrence of a number of hitherto undescribed diseases was observed. Amongst other diseases, a number of cases of *gangosa*, a condition that occurs not infrequently in some of the Pacific Islands, was encountered, and in the earliest stages of the disease a parasite was discovered which belongs to the genus *Blastomyces* and was named *Cryptococcus mutilans*, on account of the mutilation brought about by it. The etiology of chronic conjunctival affections, so prevalent in Western Queensland, was investigated, and it was proved that true trachoma existed in Western Queensland and that an acute conjunctivitis was the most important predisposing cause. The epidemiology and parasitology of the so-called "Mossman fever" were investigated, and it was found that the disease could be transmitted by direct inoculation of blood of patients in the early stage of the disease into monkeys. This observation indicated that this fever can be separated from other fevers which cannot be transmitted to these experimental animals. A survey of the tropical diseases amongst the Europeans and aborigines of the Northern Territory was undertaken, and with the exception of yaws and ulcerative granuloma, the comparative absence of any serious tropical disease was established. Malarial fever was almost entirely absent amongst the aboriginal population and, except in a few localities, rarely attacked the European population. Unfortunately the outbreak of the war greatly curtailed the activities of the Institute. The energy of several of the workers was directed towards duties directly connected with the war, and the staff was obliged to assist as far as possible in relieving the tension caused by the scarcity of medical men throughout North Queensland and Australia in general. Prior to the outbreak of the war the staff of the Institute had embarked on an enquiry on a larger scale into the physiological changes of a white race living under such climatic conditions as prevail in the coastal districts of tropical Australia. Special attention was paid to the blood conditions of the white population, to the metabolism and to the influence of exercise, in order to gain an insight into the effects of manual labour upon the human organism under tropical conditions. At the same time the economic conditions as expressed in statistics were studied, and information collected in order to ascertain whether climatic conditions could be held responsible for any alterations of social conditions in North Queensland. An examination of the blood condition of school children, who had resided during the whole or most of their lives in Townsville, was carried out in order to obtain definite evidence whether any deterioration had taken place, in other words whether there existed amongst the North Queensland school children an *anæmia* which could be directly attributed to climatic conditions. The result of the investigation proved that the blood condition, as far as formed elements and colouring matter were concerned, did not differ in any way from that considered as normal in children born and bred in a temperate climate. In one respect, however, namely, in the relative preponderance of a certain type of cells—neutrophile leucocytes with a comparatively small number of nuclei—a definite alteration could be ascertained; the significance of this discovery is not yet clear. A biochemical investigation into the metabolism of a white race living in the Tropics was undertaken by estimating the different excretory substances in the urine of a number of subjects who had lived for some time in the tropics, and only quantitative variations from the averages obtained in temperate climates have been found. An extensive inquiry into the body temperature of a number of subjects under varying conditions has been carried out, and it was shown that during complete rest the rectal temperature did not show any variations from the limits of those observed in Europe, but a considerable rise was produced by slight muscular work, which rise was maintained for some time after the work had ceased. Further experiments into the gaseous

metabolism, the mechanism of sweating, the influence of extreme wet bulb temperatures, etc., have been, and are still being carried out, and will in time furnish definite figures and facts in connexion with the solution of the question of the adaptation of a European race to conditions obtaining in the coastal districts of North Queensland. Researches have been carried out into diseases prevalent in North Queensland such as malaria, sprue, filariasis and others. A malarial survey of Cairns and the Innisfail district has been accomplished, and in the former case definite proposals have been submitted which when carried out faithfully would minimise the incidence of this infection. The staff of the Institute has also taken an active part in the hookworm campaign, undertaken by the Rockefeller Institute. A great deal of work has been done on the parasitic worms of men and beasts, and a great number of genera and species new to science have been described in various publications. General research has not been neglected, and a number of publications dealing with different subjects have been issued by the staff of the Institute. The entomological department has carried out a survey of mosquitoes and biting flies in Northern Australia and parts of British New Guinea. A special journey was made by the entomologist to the irrigation areas of New South Wales and Victoria, in order to ascertain the distribution of anophelines, to which genus the malaria-transmitting mosquito belongs. The purpose of this survey was to advise as to whether the settlement of malaria-infected returned soldiers in these areas would form a menace by setting up conditions for the spread of this disease. Prior to the outbreak of war definite arrangements had been made to hold annually a course in tropical medicine and parasitology, but war conditions made the course impossible. In connexion with the Institute, the Townsville Hospital has set aside two wards containing twenty beds, which are under the direct control of the staff of the Institute, and are reserved for patients suffering from tropical complaints. Since their establishment, a number of cases have been admitted, treated, and their complaints investigated; amongst others, a number of returned soldiers and sailors suffering from a severe form of malarial fever were sent to the Institute for observation and treatment. The results of the work of the Institute were published at first in the form of an annual report, but later in various scientific journals, and have been re-issued from time to time in the form of "Collected Papers," which contain a variety of scientific investigations. The equipment has lately been perfected by installing electric power and by providing additional accommodation for the breeding of small experimental animals, which are indispensable for the carrying out of scientific research. An extensive library on tropical medicine and other allied subjects has been collected since the inception of the Institute. The Institute extends hospitality to qualified workers who desire to investigate tropical disease or any problems in connexion with Northern Australia, and room and equipment are provided.

Further investigation on the effects of work under tropical conditions has been carried out on wharf lumpers working ships' cargo in the holds of vessels in Townsville during the summer months. These were controlled by readings of the dry and wet bulb thermometers and the katathermometer, both in the holds of ships and on the wharf, and at the same time rectal temperatures, blood pressure and pulse rate were taken. This investigation showed that climate has practically no effect on working men in the tropics. Further work on blood conditions in reference to the neutrophile leucocytes was carried out, this time on hookworm-infected children, and the results show that this infection has a definite effect in the blood formation and destruction. Work on the transmission of the dog filaria (*Dircoflaria immitis*) has been carried out, and it has been shown that dog fleas, as well as mosquitoes, are capable of acting as intermediate hosts. An extensive statistical inquiry into prevalence of diseases, birth rates and death rates in Queensland in comparison with Victoria and Tasmania was undertaken, and the result shows that Queensland is not more unhealthy than the southern parts of the continent. An examination of feces from a number of healthy individuals showed that there are a considerable number of carriers of *Entamoeba histolytica* (the dysentery amœba) in North Queensland; although there is practically no evidence that they cause disease, the findings are on the whole the same as in England. In the Entomological Department, considerable work has been done in extending knowledge of the distribution and breeding habits of mosquitoes and March flies. A physiologist was appointed, and took up his duties in September. He has begun work on the effects of the climate on apparently healthy individuals, in regard to metabolism, but has not yet had time to publish any results.

3. **Northern Territory.**—While the Territory is conspicuously free from most of the diseases which cause such devastation in other tropical countries, a slight amount of malaria exists, and, although such cases as occur very rarely end fatally, the Administration is taking measures for the destruction of mosquito larvæ wherever settlements or permanent camps are formed, while precautions are being taken to prevent the collection of stagnant water in such localities.

4. **Other States.**—In Western Australia it is stated that malaria is not known to exist south of the 20th parallel, while filariasis has never been discovered. Mosquito-borne diseases are unknown in Victoria, South Australia, or Tasmania, and it is stated that filariasis is uncommon in New South Wales, the only cases known being imported ones. Kerosene and petroleum have been successfully used to destroy mosquitoes at various places in these States, both by municipalities and private individuals.

§ 7. Supervision of Infant Life.

Reference has been made in general terms in preceding issues of the Official Year Book to the activities of the States in this direction (see No. 12, p. 1067).

The number of infantile deaths and the rates of infantile mortality in each State are dealt with in Section V. of this volume (see page 115), and it will be convenient to shew here particulars for the year 1920, classified according to metropolitan and other districts in each State.

INFANTILE DEATHS AND RATES OF INFANTILE MORTALITY FOR METROPOLITAN AND OTHER DISTRICTS, 1920.

Districts.		N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth. (b)
NUMBER OF INFANTILE DEATHS.								
Metropolitan	..	1,693	1,616	446	459	321	120	4,655
Other	..	2,051	1,053	835	351	217	256	4,763
RATE OF INFANTILE MORTALITY. (a)								
Metropolitan	..	74.03	83.82	70.39	74.57	76.14	74.81	76.99
Other	..	66.01	62.18	59.98	59.77	55.17	61.89	62.78

(a) i.e., the number of deaths of infants under one year of age per thousand births.

(b) Exclusive of Territories.

It will be seen that in each State the rates of mortality are higher in the metropolitan than in other districts. The causes of "preventable" deaths may generally be attributed to milk poisoning, want of knowledge on the part of mothers, inability to nurse, and lack of the necessary medical facilities.

The figures in the foregoing table do not, however, completely represent the hygienic aspect of the question. For every infant death recorded there are probably three or four survivors who have sustained more or less serious permanent physical damage, quite apart from injuries at birth or congenital causes. It is stated that the far-reaching influence of the first year or two of life upon the whole subsequent physical welfare of the individual cannot be recognised too clearly, and it has been alleged that many serious defects and diseases occurring in later life may be credited to results ensuing from infantile disease. This is particularly the case in respect of digestive diseases.

In previous issues a short account has been given of the principal Acts which have been passed in each State dealing with the subject of child-life, and of the principal functions of the States' Children's Departments. (See Year Book No. 6, p. 1011).

§ 8. Medical Inspection of School Children.

1. **General.**—Reference to early efforts in the direction of securing an adequate physical record of school children will be found in Official Year Book No. 12, pages 1068-9, while Official Year Book No. 11, pages 1203 *et seq.* contains an account of the anthropometric records taken in connexion with military trainees.

2. **New South Wales.**—In this State, arrangements were made in May, 1907, for the medical inspection of school children in Sydney, and later in the year the work was extended to Newcastle. In 1911 the scheme was extended to the South Coast District and to a number of inland towns.

In 1913, the scheme of school medical inspection was re-organised so as to embrace every pupil in the State whose parents desired such medical inspection of their children.

Since this reorganization was effected, two complete examinations have been made of the whole State, each school being revisited every three years. Of the 432,325 children examined, 263,232 (60 per cent.) were found to be suffering from physical defects needing treatment, which was obtained in 46 per cent. of those notified. Though this percentage of treatment as the direct result of medical inspection has risen during the two triennial periods from 40 per cent. to 53 per cent., nearly half of those requiring attention fail to be attended to by the ordinary facilities for treatment.

During the years 1918 and 1919, 70,003 and 55,740 children respectively were medically examined, exclusive of the number examined by the travelling hospital and the travelling dental clinics. The fall in the numbers for 1919 was due to the influenza epidemic, when the schools were closed for eleven out of the 42 working weeks of the school year.

Of the above totals, 44,205 (63.1 per cent.) and 35,826 (64.2 per cent.) were found suffering from physical defects. Of these 38,964 and 30,907 were treated, 21,098 and 16,374 being attended to by Departmental officers, while 17,865 and 14,533 were treated by outside agencies, including hospitals, lodge doctors, private practitioners, and dentists.

The number of children treated by the Departmental treatment schemes during 1918 and 1919 were as follows:—Travelling hospital, 2,281 and 2,539; six travelling dental clinics, 12,033 and 11,296; metropolitan dental clinic, 3,893 and 2,462; and the travelling ophthalmic clinic, 3,082 and 162; or a grand total of 21,289 and 16,459 respectively.

Full details of the system in operation will be found in Official Year Book No. 12 (pp. 1069, 1070).

3. **Victoria.**—Details regarding development of school medical inspection in this State are given in Official Year Book No. 12 (pp. 1070-1).

During the year ended 30th June, 1919, 3,954 children were examined, of whom 1,324 boys and 1,307 girls attended elementary and special schools, and 568 boys and 755 girls attended high schools. Teachers examined numbered 574, all of whom were women.

The appointment of bush nurses has proved a boon in remote localities beyond convenient reach of medical aid.

4. **Queensland.**—During 1919, 13,913 individual medical examinations were made; the number of children reported as suffering from physical defects being 2,296. (See also Official Year Book No. 12, p. 1071.)

The number of pupils dentally inspected during 1919 was 16,294.

While adenoids and enlarged tonsils appear to be the principal defects throughout all the State schools, the children in the Northern and Western districts suffer largely from defective vision and trachoma. The work of the Ophthalmic Inspector is chiefly confined to these districts. The conclusion has been arrived at, as a result of the examinations, that such climatic conditions as dust, glare, heat, etc., so prevalent in the Western districts, which are often looked upon as the direct cause of serious blight or trachoma, are only predisposing causes, and can be safely ignored, provided elementary precautions are taken. The report of the Dental Inspectors, while still disclosing an appalling percentage of defects in the teeth of the children, shews a marked improvement.

5. **South Australia.**—(See also Official Year Book No. 12, p. 1071.)

During the year 1919, 3,199 children were examined, shewing a considerable percentage with defects of sight, hearing, nose and throat, sufficiently serious to interfere with their educational progress. In addition, the teeth of more than 2,000 children required urgent attention, 481 having teeth in so bad a condition as to affect their general health. It was found that, while teeth were bad in all the schools examined, the other defects mentioned were exhibited in a considerably greater degree among the city children as compared with those living in country districts. In the Far North of the State, the teeth were better than in the metropolis; but the visual ailments were more numerous, the eye-condition of the children born in the arid areas being very unsatisfactory.

6. **Western Australia.**—During 1917, a medical officer for schools was appointed, and inspections were carried out in some of the schools in that and the following year. The number of children examined was 6,072 in 1917, 4,804 in 1918, and 3,316 in 1919. (See also Official Year Book No. 12, p. 1072.)

7. **Tasmania.**—The credit of being the first State in the Commonwealth to provide for the medical inspection of schools and school children in a systematic way rests with Tasmania, where, under the direction of the Chief Health Officer and the Director of Education, about 1,200 children attending schools in Hobart were inspected in 1906. (See also Official Year Book. No. 12, p. 1072.)

Under the scheme in operation, practically all the primary school children of the State come under medical examination at least once in every two years. The examination in 1919 covered about 7,900 children. During 1916 school dental clinics were established in Hobart and Launceston. In that year 3,282 individual children were examined, 4,573 in 1917, 4,449 in 1918, and 3,068 in 1919.

§ 9. Nursing Activities.

By means of various nursing organizations throughout the Commonwealth, the benefits of professional advice and oversight of trained nurses are conveyed to the homes of workers and settlers, where skilled assistance would probably be otherwise unprocurable. While charitable aid has been to some extent responsible for the inauguration and extension of these movements, the trend of the various undertakings is in the direction of eliminating the element of charity, and, by raising subscriptions on a co-operative basis, making the scheme self-supporting. Details of organization and administration vary in different localities. Since the first bush nurse was settled at Beech Forest, Victoria, in 1911, the system has made satisfactory progress. Government aid, in the shape of free railway travelling for nurses, small monetary grants for professional advice in schools, etc., is given. In 1920 the British Red Cross made available a sum of £150,000, of which £15,000 was placed at the disposal of the Red Cross in each State, the income to be applied to bush nursing for returned soldiers and sailors and their families. By the nursing organizations, baby clinics, etc., a vast amount of useful information and advice concerning diet, hygiene, etc., is disseminated throughout the Commonwealth.

SECTION XXXI.

THE COMMONWEALTH SEAT OF GOVERNMENT.

1. **Introductory.**—In Year Books Nos. 4 and 5, information was given in this section as to the events leading to the selection of the Federal Capital Territory, and as to the necessary legislation and the progress of operations in connexion with the establishment of the capital city. The physiography of the Territory was dealt with *in extenso*, and topographical and contour maps accompanied the letterpress, as well as reproductions of the premiated designs for the laying out of the city. Considerations of space, however, preclude the repetition of this information. On the 12th March, 1913, the official ceremony to mark the initiation of operations in connexion with the establishment of the Seat of Government was carried out. At this ceremony the selection of "Canberra" as the name of the capital city was announced.

2. **Progress of Work.**—The design for the laying out of the capital city having been approved, the survey of the main axial lines has been completed, and an area of about 800 acres has been subdivided into sections. A certain amount of road formation has also been effected, but the work is now in abeyance. Considerable progress has been made with the nursery in connexion with the afforestation scheme, and the horticultural work undertaken includes cultivating plants for the Continental Arboretum, red park plantation for Narrabundah, pink park plantation for Mount Ainslie, yellow park plantation for Mount Black, and white forest on Mugga-Mugga, for the extensive redwood, pinetum, cedar, and cork oak economic forests. In addition, the previous pine, wattle, and eucalypt plantations have been maintained, and the propagation of native trees in quantities for parkway embellishment undertaken. The power plant is supplying current to all the important points. Active progress with construction has been restricted for the present, and operations are practically being confined to maintenance work.

The following figures indicate the actual work done in road development since the roads were taken over:—

Forming and finishing	93½ miles
Gravelling and metalling	95½ miles
Clearing out, repairing culverts, etc.	162½ miles
General road repairs	178½ miles
Cutting water tables, drains, etc.	146½ miles

3. **Lands in the Territory.**—As a considerable portion of the Commonwealth lands within the Territory is not required in connexion with the establishment of the city, such areas are being made available for leasing under certain conditions. A large number of leases has been disposed of under conditions requiring the extermination of rabbits, noxious animals and weeds. 18,000 sheep and 600 head of large stock are on agistment on land that will be required for departmental use at a later date. Reference has already been made on page 211 to the area of alienated, acquired and leased land within the Territory. All areas are classified into three classes of agricultural and three classes of grazing lands, and about 24,000 acres of these lands are at present leased to returned soldiers for periods varying from five to twenty-five years.

4. **Lands at Jervis Bay.**—Sovereign rights over a certain area comprising about 28 square miles of land and water at Jervis Bay, to be used as a Port in connexion with the Federal Capital, have been granted by the New South Wales Government, and accepted by the Commonwealth. The Royal Australian Naval College has been established in this area on a site known as Captain's Point.

5. **Railways.**—The line from Queanbeyan to Canberra, 4 miles 75 chains long, was opened for goods traffic on 25th May, 1914, and is being worked by the New South Wales Railways Commissioners. This line has been extended on to the power house, and is at present only used for departmental purposes; the total length is approximately 5½ miles. A trial survey of the Canberra-Jervis Bay line has been completed, and plans have been prepared sufficient to enable an approximate estimate of the cost of the line to be arrived at. The trial survey from Canberra to the boundary of the Federal Territory (towards Yass), a distance of 11 miles, has been completed, as well as the survey of the line by the New South Wales Government from Yass to the Territory boundary, 32 miles.

6. **Population and Live Stock.**—The estimated population on 30th June, 1921, was 2,583. The live stock in the Territory, according to the latest returns, comprises:—Horses, 1,312; cattle, 9,039; sheep, 151,666; pigs, 103; and goats, 20.

7. **Educational Facilities.**—Arrangements have been made for the New South Wales Education Department to continue, for the time being, the administration of education in the Territory, the expenditure involved to be refunded annually by the Commonwealth to the State.

8. **Revenue and Expenditure.**—The net expenditure in the Federal Territory subsequent to the passing of the "Seat of Government Acceptance Act 1909," and up to the 30th June, 1919, was for 1910–11 £20,319, 1911–12 £64,772, 1912–13 £135,270, 1913–14 £251,669, 1914–15 £212,506, 1915–16 £166,052, 1916–17 £105,971, 1917–18 £32,111, 1918–19 £931, 1919–20 £2,977, making a total of £992,578. A detailed statement of the various items of expenditure since 1910 is given in the following table:—

**COMMONWEALTH SEAT OF GOVERNMENT.—ADDITIONS, NEW WORKS,
EXPENDITURE TO 30th JUNE, 1920.**

Item.	Total Expenditure to 30th June, 1919.	Expenditure (or Credit), 1919–20.		Total Expenditure to 30th June, 1920.
		Dr.	Cr.	
Afforestation	£ 15,848	£ ..	£ ..	£ 15,848
Bridges, Roads, and Culverts	82,743	82,743
Buildings, Repairs, etc.	124,139	552	..	124,691
Brickworks	45,797	..	7	45,790
Cement and Quarrying	5,111	5,111
Electric Lighting (Mains and Plant only)	75,550	597	..	76,147
Fire Brigade	1,267	1,267
Fencing	3,637	3,637
General Expenditure (including Ad- ministrative Charges)	153,148	74	..	153,222
Manufacturing Accounts	Cr. 5,154	2	..	Cr. 5,152
Maintenance Accounts	1,878	1,878
Motor Cars and Upkeep	9,214	9,214
Medical Services	11,842	11,842
New South Wales Government (Services Rendered)	15,039	15,039
Plant, Instruments, etc.	19,835	3,099	..	22,934
Railways	65,906	65,906
Rabbit Destruction	20,104	20,104
Stock (Material)	43,552	..	2,177	41,375
Sewerage, Mains, etc.	38,414	..	7	38,407
Water Supply	254,869	844	..	255,713
Wire Netting Lessees	6,862	6,862
Total	989,601	5,168	2,191	992,578

The revenue of the Federal Territory for the year ended 30th June, 1920, was £29,154, including £2,256 from rates.

9. **Military College.**—In June, 1911, a Military College was opened at Duntroon for occupation by the cadets and staff. Particulars regarding the establishment of this College may be found in Year Book No. 4 (p. 1159). Previous reference has been made to it in the section of this book dealing with Defence (see page 918).

10. **Naval College at Jervis Bay.**—See section of this book dealing with Defence, page 924.

SECTION XXXII.

THE NORTHERN TERRITORY.

§ 1. Area and Population.

1. **Introductory.**—Upon the extension of New South Wales westward to the 129th meridian in 1827, the Northern Territory was comprised within that colony (see Year Book No. 4, page 16), and in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911.

2. **Area and Boundaries.**—The total area of this Territory is 523,620 square miles, or 335,116,800 acres. Its length from north to south is about 900 miles, while its breadth from east to west is 560 miles. Its eastern boundary, dividing it from Queensland, is the 138th meridian of east longitude; and its western boundary, separating it from Western Australia, the 129th meridian. Its southern boundary is the 26th parallel of south latitude, dividing it from South Australia. The northern boundary is the coast line of those parts of the Indian Ocean known as the Timor and Arafura Seas. Near the mouth of the Wentworth River, in the Gulf of Carpentaria, the coast line is met by the eastern boundary; at Cape Domett, near Cambridge Gulf, the western boundary cuts the northern coast line. The length of coast line is about 1,040 miles, or 503 square miles of area to one mile of coast line; an exact survey has, however, not yet been made.

3. **Population.**—(i) *Character.* In 1881 there were 670 Europeans in the Territory, and at the end of 1913 the number was estimated at 2,143. The Chinese population, at its maximum during the years of railway construction, 1887 and 1888, has gradually dwindled, the estimate for 1914 being 1,033. Japanese, first recorded in 1884, increased up to the year 1898, falling again after five years. The highest recorded population, excluding aborigines, was 7,533 in 1888; the estimate for 1920 was 3,992. The year 1911 was the first in which the population was dominated by the European race. A thirty years table of population, distinguishing races, will be found on page 1156 of the Commonwealth Official Year Book No. 5. Subsequent to the Census of 1911, a revision of the estimates, back to 1901, was made. The results are incorporated in the following table:—

POPULATION OF NORTHERN TERRITORY (EXCLUSIVE OF ABORIGINES),
1901 TO 1920.

Year ended 31st December.	Male.	Female.	Total.	Year ended 31st December.	Male.	Female.	Total.
1901 ..	3,999	674	4,673	1911 ..	2,644	589	3,233
1902 ..	3,847	627	4,474	1912 ..	2,807	628	3,435
1903 ..	3,582	652	4,234	1913 ..	2,926	690	3,616
1904 ..	3,514	692	4,206	1914 ..	3,165	738	3,903
1905 ..	3,368	678	4,046	1915 ..	3,586	898	4,484
1906 ..	3,248	656	3,904	1916 ..	3,712	954	4,666
1907 ..	3,095	642	3,737	1917 ..	3,748	1,055	4,803
1908 ..	2,963	609	3,572	1918 ..	3,499	1,141	4,640
1909 ..	2,927	576	3,503	1919 ..	3,376	1,171	4,547
1910 ..	2,738	563	3,301	1920 ..	2,911	1,081	3,992

The census population (4th April, 1921) was 2,821 males, 1,049 females; total, 3,870. The estimate for 31st December, 1920, gives 2,911 males, 1,081 females, a total of 3,992.

(ii) *Movement of Population.* The following is a summary of movement of population in 1920 (excluding overland migration):—

MOVEMENT OF POPULATION, NORTHERN TERRITORY, 1920.

Inwards	606	Outwards	1,161	Excess of immigration over emigration ..	—555
Births	63	Deaths	63	Excess of births over deaths ..	Nil
<hr/>					
Increase	669	Decrease	1,224	Net result	—555

NOTE.—(—) signifies decrease.

The immigration and emigration of the Territory in five-year periods from 1881 to 1910, and for each of the years 1911 to 1920, are shewn in the following table:—

MIGRATION, NORTHERN TERRITORY, 1881 TO 1920.

Year.	Immigra- tion.	Emigra- tion.	Year.	Immigra- tion.	Emigra- tion.	Year.	Immigra- tion.	Emigra- tion.
1881-5 ..	3,683	3,787	1911 ..	412	431	1916 ..	1,389	1,159
1886-90 ..	9,208	7,250	1912 ..	846	610	1917 ..	1,501	1,370
1891-5 ..	1,958	2,353	1913 ..	1,033	840	1918 ..	1,259	1,450
1896-1900	2,538	2,259	1914 ..	1,102	792	1919 ..	1,159	1,273
1901-5 ..	2,211	2,932	1915 ..	1,904	1,287	1920 ..	606	1,161
1906-10 ..	2,559	3,125						

(iii) *The Aborigines.* An account of the Australian aborigines, by Dr. W. Ramsay-Smith, was given in Year Book No. 3 (pp. 158-176). The interior of the continent is the most thickly populated by the natives, but it is believed that they are rapidly dying out. In these regions, remote from contact with other races, the native has maintained his primitive simplicity, and furnishes an interesting subject of study to the anthropologist and ethnologist. At the census of 1911, full-blooded aboriginals in the employ of whites and those who are living in a civilised or semi-civilised condition in the vicinity of European settlements, were enumerated—the males being 743, females 480; total, 1,223. Estimates of the total black population of the Territory vary from 20,000 to 50,000. The interests of the natives are looked after by a Protector of Aborigines, with head-quarters in Darwin. On the 16th October, 1920, aboriginal reserves and mission stations in existence, or proposed, covered an area of nearly 33,000 square miles. The greatest difficulty which confronts the Administration in dealing with the natives is due to the circumstance that they are nomads without fixed abode, merely wandering about hunting for native food within the limits of their tribal boundaries, and making no attempt at cultivation or other settled industry. In their natural state, compared with those of other tropical countries the natives are very healthy, but in contact with new settlers, white or Chinese, they rapidly fall victims to disease, and to degradation from drink or opium.

§ 2. Legislation and Administration.

1. *Transfer to Commonwealth.*—(i) *The Northern Territory Acceptance Act.* A short historical sketch is given in Year Book No. 6, pp. 1113-4. On 1st January, 1911, the Territory was transferred by South Australia to the Commonwealth, upon terms previously agreed upon by the respective Cabinets, and ratified by the Commonwealth *Northern Territory Acceptance Act* (No. 20 of 1910). It is enacted that laws and courts of justice remain in operation, powers and functions of magistrates and officials remain vested; estates and interests continue upon the same terms; trade with Australian

States is declared free. The Commonwealth assumes responsibility for the State loans in respect of the Territory, paying the interest yearly to the State, providing a sinking fund to pay off the loans at maturity, and paying off the deficit in respect of the Territory. It also purchases the Port Augusta to Oodnadatta railway, and agrees to complete the construction of the transcontinental railway from Port Darwin to Port Augusta.

(ii) *The South Australian Surrender Act.* The State Act approves and ratifies the agreement surrendering the Territory.

(iii) *The Northern Territory (Administration) Act 1910.* The Act provides for Government authorising the appointment of an Administrator and officials. South Australian laws are declared to continue in force as laws of the Territory, and certain Commonwealth Acts to apply. Power is given to the Governor-General to make Ordinances having the force of law.

(iv) *Administration.* A Resident Administrator, vested with supreme authority in internal affairs, was appointed in the Department of the Minister for External Affairs in February, 1912. Many other important administrative offices have also been filled.

(v) *Legislation.* The main provisions of the Ordinances passed are as follows:—The powers and duties of the Administrator vested in the appointee, include custody of the public seal, appointment and suspension of officials, and execution of leases of Crown lands. A Supreme Court with original and appellate jurisdiction is instituted, the method of appointment of the Judge is prescribed, and provision is made for trial by jury, and for the registration and summoning of jurors. A Sheriff, a Registrar-General, and a Health Officer are provided for, also the registration of births, marriages and deaths, and of deeds and documents. Custody and control of aborigines, with extensive powers of supervision, are vested in the Chief Protector. Provision is made for the control of fisheries. Birds protected during the whole or part of the year are scheduled. Crown lands are classified, and their mode of acquisition, entry and holding defined. The prevention and eradication of diseases in plants have been provided for. Under the Stock Diseases Ordinance the Chief Inspector of Stock has wide powers in regard to the movements of stock, prevention and control of diseases, etc. Shop assistants are to have a weekly half-holiday, and the establishments must be closed at a certain time. A town council has been constituted for Darwin, and provision made for assessments, rates, etc. Mining is encouraged by the provision of rewards for the invention of new processes, and the discovery of valuable deposits and of new mineral fields; subsidisation of the industry and the issue of prospecting licenses are also provided for. Licenses to search for mineral oil, and leases for working, are available. Provision has been made for the granting of leases for oyster culture. A Board is constituted for the purpose of making advances to settlers who intend to improve and stock their holdings, to purchase farm implements, plant, etc., or to pay off mortgages, the rate of interest and terms of repayment being set out. Advances in aid of the erection of workmen's dwellings have also been provided for. A Council of Advice has been appointed, consisting of a chairman and seven members—four being non-official—the object of the Council being to advise the Minister on matters affecting the welfare of the Territory. Provision has been made for the compensation of injured workers, for controlling the sale, &c., of necessary commodities, for the appointment of a public trustee, and for amendment of the "Taxation Act 1884" of South Australia in its application to the Territory. Reference to the Liquor Ordinance will be found hereunder.

(vi) *Liquor Traffic.* By the Liquor Ordinances of 1915–17–18, the Commonwealth Government assumed the control of the importation, manufacture, and sale of liquor in the Territory. There is a liquor store at Darwin and three hotels, and a hotel at Pine Creek. The Department directs its energies to the minimising of excessive drinking and the prevention of illicit trading in intoxicants.

It has recently been decided to lease the hotels to private tenderers.

(vii) *Schedule of Ordinances.* A schedule of the ordinances promulgated up to the end of 1920 is given hereunder:—

1911.—1, Northern Territory Government; 2, Council of Advice; 3, Sheriff; 4, Tin Dredging; 5, Marine; 6, Registration of Births, Marriages, and Deaths; 7, Interpretation; 8, Stamp Duties Abolition; 9, Supreme Court; 10, Registration; 11, District Council Assessment; 12, Registration; 13, Fisheries; 14, Lands Acquisition; 15, Interpretation; 16, Aborigines.

- 1912.—1, Native Birds Protection ; 2, District Council Assessment ; 3, Crown Lands : 4, Supreme Court ; 5, Health ; 6, Thorngate Estate ; 7, Jury ; 8, Crown Lands ; 9, Early Closing.
- 1913.—1, Mineral Oil ; 2, Birds Protection ; 3, Registration of Births ; 4, Encouragement of Mining ; 5, Advances to Settlers ; 6, Public Service ; 7, Crown Lands ; 8, Marriage Validating.
- 1914.—1, Brands ; 2, Crown Lands.
- 1915.—1, Licensing ; 2, Birds Protection ; 3, Roads ; 4, District Council ; 5, Health : 6, District Council Amendment ; 7, Darwin Town Council ; 8, Liquor.
- 1916.—1, Liquor Amendment ; 2, Eradication of Noxious Weeds.
- 1917.—1, Crown Lands Amendment ; 2, Darwin Town Council Amendment ; 3, Marriage ; 4, Appointment of Acting Administrator ; 5, Education ; 6, Crown Lands Amendment ; 7, Prevention and Eradication of Diseases in Plants ; 8, Liquor Amendment ; 9, Stamp ; 10, Darwin Pound ; 11, Crown Lands Amendment.
- 1918.—1, Supreme Court Amendment ; 2, Crown Lands Amendment ; 3, Darwin Town Council Amendment ; 4, Darwin Pound Amendment ; 5, Plant Diseases ; 6, Liquor Amendment ; 7, Oyster Culture Leases ; 8, Liquor Amendment ; 9, Aborigines ; 10, Stock Diseases ; 11, Liquor Amendment ; 12, Supreme Court Amendment ; 13, Real Property ; 14, Crown Lands Amendment ; 15, Closing of Roads.
- 1919.—1, Interpretation (Amendment of No. 2, 1911) ; 2, Bush Fires ; 3, Jury Amendment ; 4, Bank Holidays ; 5, Workmen's Dwellings ; 6, Supreme Court Amendment ; 7, Jury Amendment (No. 2) ; 8, Council of Advice Amendment ; 9, Justices' Appeals ; 10, Deputy Administrator ; 11, Deputy Administrator, No. 2 ; 12, Justices' Appeals, No. 2 ; 13, Supreme Court, No. 2.
- 1920.—1, Tin Dredging (Amendment of No. 4, 1911) ; 2, Birds Protection (Amendment of No. 2, 1913, and No. 2, 1915) ; 3, Workmen's Compensation ; 4, Dog (Amending "Dog Act 1884," South Australia) ; 5, Pastoral Leases ; 6, Necessary Commodities ; 7, Lunacy ; 8, Public Trustee ; 9, Supreme Court (Amending No. 9, 1911, Nos. 1 and 12, 1918, Nos. 6 and 13, 1919) ; No. 10, Taxation ; No. 11, Examination of Engine-drivers.

(viii) *Representation.* Section 122 of the Commonwealth Constitution provides that "the Parliament may make laws for the government of any territory . . . and may allow the representation of such territory in either house of the Parliament to the extent and on the terms which it thinks fit." Dissatisfaction has been expressed by the residents of the Territory because so far this provision has not been applied, but it is hoped that the disability will shortly be removed by providing for the election of a representative in the Federal Parliament.

§ 3. Physiography.

1. *Tropical Nature of the Country.*—The Territory is within the torrid zone, with the exception of a strip $2\frac{1}{2}$ degrees wide, which lies south of the Tropic of Capricorn.

2. *Contour and Physical Characteristics.*—The low flat coast line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl, and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

The principal features of the coast line are enumerated in Year Book No. 1, p. 66 ; the rivers in Year Book No. 2, p. 76 ; the mountains in Year Book No. 3, p. 67 ; the lakes in Year Book No. 4, p. 77 ; the islands in Year Book No. 5, pp. 71, 72, and the mineral springs in Year Book No. 6, p. 65.

Inland, the country generally is destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea, and those that form the scanty supply of the interior systems. Towards the centre of the continent, the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

§ 4. Climate, Fauna and Flora.

1. **The Seasons.**—There are two main climatic divisions—the wet season, November to April, and the dry season, May to October, with uniform and regular changes of weather. Nearly the whole of the rainfall occurs in the summer months. Fuller particulars will be found in Year Book No. 6, p. 1116.

2. **Fauna.**—The ordinary types of native Australian fauna inhabit the territory. As elsewhere on the continent, the higher *Theria* are rare, but marsupials, birds, crocodiles, fresh-water tortoises, snakes (mostly non-venomous), and frogs abound. There are many varieties of freshwater fish and littoral mollusca. Butterflies and beetles are strongly represented. The white ant is a pest, anthills in the Territory sometimes attaining great dimensions. Mosquitoes and sandflies are very troublesome, particularly in the wet season. Native fauna are in some cases protected. The domesticated animals have been introduced, and buffalo also exist in large herds.

3. **Flora.**—The vegetation is North Australian in type, but a number of the forms belong to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. On the wide expanses of plain country of the interior, there is little vegetation. The principal orders represented in the Territory are:—*Euphorbiaceæ*, *Compositæ*, *Convolvulaceæ*, *Rubiaceæ*, *Goodeniaceæ*, *Leguminosæ*, *Urticæ*.

Fuller particulars regarding fauna and flora are given in Year Book No. 6, pp. 1116-7.

§ 5. Production.

1. **Agriculture.**—Up to the present, agriculture has made little progress in the Territory, although it has been demonstrated that rice may be grown as an ordinary crop suitable for chaff as fodder, and in certain situations for milling; while maize, cowpeas, sorghum, amaranth, millets of various kinds, and sugar-cane can also be cultivated. The drawbacks to success at the present are lack of suitable labour, deficient means of communication, and periodicity of the rainfall. Purely tropical products such as cotton, tea, coffee, sisal hemp, and cigar tobacco can flourish, but their profitable cultivation depends on a supply of cheap labour, which is unobtainable. The Commonwealth Government established demonstration farms at Daly River and Batchelor, but these have been converted into aboriginal compounds. During the dry season considerable trouble is caused by the depredations of white ants.

2. **Stock.**—(i) The spacious, well-grassed "runs" of the Territory are, with adequate water supply, suitable for horse and cattle breeding. According to the Report of the Acting Administrator, the area under pastoral lease on the 30th June, 1920, was 166,641 square miles. Large numbers of cattle are overlanded to neighbouring States, which also take considerable quantities of horse hides. Five gazetted stock routes aggregate a distance of 2,121 miles, and with the completion of the present contract for bores there will be a good supply of permanent water thereon. There are Government cattle stations at Oenpelli (2,000 square miles), Mataranka (864 square miles), and Batchelor (243 square miles), carrying altogether about 2,000 cattle and 300 horses, these figures representing only about one-fifth of the present estimated capacity of the stations.

An experiment with sheep on Mataranka Station was not very successful owing to unsatisfactory lambing and the dingo and hawk pests, and the flock was disposed of to a private purchaser. The estimated number of stock in the Territory on 31st December, 1919, is given in the appended statement:—

LIVE STOCK, NORTHERN TERRITORY, 31st DECEMBER, 1919.

Horses.		Cattle.		Sheep.		Pigs.
35,539	..	610,534	..	8,811	..	1,675

In 1919 there were also 12,582 goats, and small numbers of camels, mules, and donkeys.

The dairying industry has not been developed, although it has been shown that it is possible to make butter of good quality. A sample from Oenpelli has been very favourably reported on by the Chief Dairy Produce Expert. Fresh milk is procurable in Darwin from the Government dairy, which was leased to a private supplier in 1914. It is found that the rank indigenous grasses in some localities are greatly improved by constant stocking, and become largely replaced by shorter and sweeter varieties.

Herd of wild buffaloes are found on the mainland and on Melville Island, and are descendants of swamp buffaloes, introduced in the early part of last century. The numbers have, however, been greatly depleted by buffalo shooters. During the 25 years ending in 1911 about 4,000 hides per annum were exported. It is stated that the number of buffaloes left in the Territory is now only about 20,000. The flesh of the animal is said to be remarkably free from disease and to equal beef in food value, while buffalo milk is twice as rich in butter fat as ordinary cow's milk.

(ii) *Meat Preserving Works.* By agreement with the Government an extensive meatworks under private ownership was established in the vicinity of Darwin, and commenced operations in April, 1917. During fourteen weeks of this year the number of cattle treated was 19,000. In 1918 and 1919 operations again started in April and lasted for sixteen weeks in each year, the "kill" in the former year being 29,000, and in the latter 22,000. Owing to difficulties occasioned chiefly by the dearth of shipping the works were forced to close down in 1920.

3. *Mining.*—Small quantities of the precious and commercial metals are mined. The discovery of gold and tin in various localities, and the measure of success that has attended their working, indicate scope for development. An important discovery of tin at Maranboy Springs was made in 1913, and this field is now the most productive in the Territory. It is stated that better results could be obtained by amalgamating the smaller properties, and working on a larger scale, with more modern methods. Attention has also been called to the damage done to many promising gold-bearing areas through the improper methods of working adopted by Chinese miners.

The copper mining industry was hampered in 1918-19 by the decline in the price of the metal. Production at Mount Diamond for the latest year available amounted to 63 tons.

Wolfram is produced at the Wauchope and Hatches Creek fields in the Davenport Ranges and at Yenberrie and Wolfram Creek.

Two salt areas have been taken up, and are being worked at Darwin and the Foelshe River respectively.

(i) *Mineral Production.* Both alluvial and reef gold are found, and there are several batteries and cyanide plants. Other minerals are also raised. The following table shows the total mineral production for the last five years:—

VALUE OF MINERAL PRODUCTION, NORTHERN TERRITORY, 1914 TO 1918-19.

Year.	Gold.	Tin Ore.	Wolfram.	Silver-Lead Ore.	Copper Ore.	Total Value.
	£	£	£	£	£	£
1914	10,757	15,200	4,025	545	4,860	35,807
1915	4,182	13,245	5,278	1,073	10,710	34,498
1916	2,554	27,120	20,269	275	5,517	55,780
1917-18	2,229	41,432	38,788	200	9,648	92,730
1918-19	4,234	30,021	34,805	132	2,349	71,697 (a)

(a) Including mica, £150; molybdenite, £6.

The falling off in 1918-19 is more apparent than real, as large parcels of dressed and bagged wolfram ore from Wolfram Creek, Hatches Creek, and Wauchope Creek fields were unsold at the end of the year.

(ii) *Employment of Miners, 1914 to 1918-19.* The following table shews the average number employed in mining during the last five years, distinguishing Chinese :—

MINERS, NORTHERN TERRITORY, 1914 TO 1918-19.

Year.				Europeans.	Chinese.	Total.
1914	136	462	598
1915-16	137	371	508
1916-17	141	350	491
1917-18	194	282	544(a)
1918-19	194	260	470(b)

(a) Including 68 aborigines and other coloured men. (b) Including 16 aborigines.

(iii) *Mining Accidents, 1911 to 1918-19.* In 1911 five mining accidents were recorded, four resulting in death. There were no serious accidents in 1910, 1912, and 1913, and only one, resulting in death, in 1914, and one in each of the years 1915, 1916, and 1917-18. No mining accidents were recorded in 1918-19. During the nine years preceding (1901-1909), nine fatal accidents and seven cases of serious injury were recorded. The majority of the victims were Chinese.

4. *Pearl, Trepang, and Other Fisheries.*—In 1884 mother-of-pearl shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. Subsequently, however, the opening up of new patches led to a revival, but the outbreak of war gave the industry a setback for a time and, owing to the limited demand in the home markets, operations are still on a restricted scale. The latest figures available refer to the year ended 30th June, 1920, when 11 boats were engaged, and 56 men were employed, all of whom, with the exception of 4 Europeans, were Japanese and Koepang natives. Thirty tons of pearl shell were obtained.

About 56 tons of bêche-de-mer were exported during the year, 14 boats being engaged in the fishery, the Europeans employed thereon numbering 21.

It may be mentioned that the territorial waters abound in marketable fish, and, given transport facilities, it would be possible to establish a trade in fish dried or otherwise preserved.

§ 6. Commerce and Shipping.

1. *Trade.*—The following table shews the total trade of the Territory for 10 years from 1901 to 1910 :—

VALUE OF TOTAL IMPORTS AND EXPORTS, NORTHERN TERRITORY, 1901 TO 1910.

Items.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.	1909.	1910.
	£	£	£	£	£	£	£	£	£	£
Imports ..	108,886	107,217	125,244	113,461	86,878	74,659	78,996	68,905	57,994	52,398
Exports ..	302,931	191,558	178,266	235,650	216,279	254,222	345,721	241,028	278,555	269,063
Total Trade	411,817	298,775	303,510	349,111	303,157	328,881	424,717	309,933	336,549	321,461

No record is now kept of the direction of trade between the Commonwealth States and Territories. It is, therefore, impossible to give the total imports and exports of the Northern Territory for years later than 1910. The value of the direct oversea trade for 1901, and for each of the years 1915-16 to 1919-20, is given hereunder :—

**VALUE OF DIRECT OVERSEA TRADE, NORTHERN TERRITORY,
1901 AND 1915-16 TO 1919-20.**

Items.	1901.	1915-16.	1916-17.	1917-18.	1918-19.	1919-20.
	£	£	£	£	£	£
Imports	37,539	74,424	82,775	32,287	25,140	29,056
Exports	29,191	20,953	13,251	268,419	377,258	277,627
Total	66,730	95,377	96,026	300,706	402,398	306,683

The principal items of oversea export in 1919-20 were beef, preserved by cold process, £227,815; tallow, £31,712; hides, cattle, £5,741; hides, other, £3,179; fish, smoked or dried, £4,988; horns, £1,957; and pearl shell, £750. The large increase in 1917-18 and 1918-19 as compared with previous years is due to the operations of the meat preserving works at Darwin. Owing to the closing down of these works in 1920 the figures for the year shew a considerable decline as compared with those for the previous year.

2. **Shipping.**—The Territory is dependent for its shipping facilities chiefly on the services of the “Montoro” and “Mataram,” trading between Sydney and Singapore. The vessels of the Eastern and Australian Co. and Japanese and other vessels make occasional visits, while a quarterly service between Fremantle and Darwin is carried out by the “Bambra,” belonging to the West Australian State Shipping Service.

SHIPPING, NORTHERN TERRITORY, 1881 TO 1919-20.

Period.	Arrivals.		Departures.	
	No. of Vessels.	Tonnage.	No. of Vessels.	Tonnage.
1881-1885 (Annual Average) ..	72	71,814	72	71,692
1886-1890	95	94,452	103	94,724
1891-1895	75	81,128	73	81,090
1896-1900	71	88,284	70	88,244
1901-1905	63	93,751	63	91,556
1906-1910	87	128,502	88	128,408
1915-16	91	208,441	91	208,441
1916-17	70	161,636	68	161,313
1917-18	51	115,288	50	107,497
1918-19	43	88,928	42	88,806
1919-20	41	83,086	43	83,264

The Government owns two small vessels, the “Sir John Forrest” an auxiliary ketch of 122 tons, and the “John Alce,” 33 tons.

§ 7. Internal Communication.

1. **Railways.**—Under the agreement ratified by the Act, the Commonwealth is to construct the Northern Territory portion of the transcontinental railway line (connecting Adelaide and Darwin, via Port Augusta).

The Northern line from Adelaide terminates at Oodnadatta, about 100 miles south of the southern boundary of the Territory. The only line at present in the Territory is one from Darwin to Katherine, a length of 200 miles, of 3 ft. 6 in. gauge. The line to connect Katherine River with Oodnadatta (about 1,010 miles) has been surveyed, the

greater part of the survey being exploratory in character. The completion of the gap would also permit of the development of the broad belts of pastoral and mineral country towards the centre of Australia. The Commonwealth also acquired on 1st January, 1911, the property in the line from Port Augusta to Oodnadatta (478 miles).

2. Posts.—The principal mail services are as follows :—

(i) *Marine.* Postal communication is maintained monthly to and from Sydney and via Queensland ports by vessels belonging to Burns, Philp, and Co. The same company maintains a monthly service between Sydney and Singapore via Queensland ports and Darwin. In addition, the vessels belonging to the State Steamship Service of Western Australia give a service once every sixty days between Fremantle and Darwin.

(ii) *Inland.* Posts are also despatched into the interior of the Territory. For example, there is a fortnightly mail each way between Oodnadatta and Alice Springs, a distance of 306 miles, a monthly service between Horse Shoe Bend and Hermannsburg, 176 miles, and between Alice Springs and Arltunga, 65 miles, and so on. Limits of space preclude the insertion of a complete list of the inland services to various points in the Territory and to Camooweal in Queensland, and for these the reader is referred to pp. 35 and 36 of the Administrator's Report for the year ended 30th June, 1920.

3. Telegraphs.—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on the 22nd August, 1872, at a cost of nearly half-a-million sterling. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, via Banjoewangie (Java), Singapore, and Madras.

Between Darwin and Banjoewangie the submarine cable is duplicated.

§ 8. Finance.

1. Revenue and Expenditure, 1919-20.—In the Commonwealth finance statements separate accounts are given for Northern Territory administration. The following shews the receipts and expenditure for the financial year :—

REVENUE AND EXPENDITURE, NORTHERN TERRITORY, 1919-20.

REVENUE.	£	EXPENDITURE.	£
Customs and Excise ..	3,995	Salaries and Contingencies ..	129,151
Postal, Telegraph, and Telephone	10,922	Darwin-Katherine Railways—	
Darwin-Katherine River Railway	31,783	Working Expenses ..	50,647
Territorial	18,846	Melbourne Administrative Services	3,182
Land and Income Tax ..	6,445	Royal Commission	4,662
Miscellaneous	12,849	Interest and Sinking Fund, Commonwealth Stock, issued for Redemption of Loans, Railway Construction, etc.	30,860
Quarantine	31	Interest on Treasury Bills, issued for Redemption of Loans, Railway Construction, etc.	40,439
Lighthouses and Light Dues ..	1,124	Interest and Sinking Fund, Northern Territory Loans ..	74,672
Stamp Duties	740	Interest on Loans, Loss on Working, etc., Port Augusta Railway	104,043
Deficiency on year's transactions	375,529	New Works, Artesian Bores, Roads, etc.	17,417
		Miscellaneous	7,191
Total	462,264	Total	462,264

2. **Northern Territory Debt.**—The items making up the total debt of the Territory as at 30th June, 1920, are as follows:—

	£	£
Debt at date of transfer to the Commonwealth, 1st January, 1911	3,931,086
Redeemed under Commonwealth Loan Acts ..	1,037,353 }	1,497,978
Redeemed from Consolidated Revenue ..	460,625 }	
Balance, 30th June, 1920	2,433,108

In addition, the balance of the Port Augusta—Oodnadatta Railway Loans taken over from South Australia amounted at the same date to £1,759,003, making a total of £4,192,111. Under the provisions of the "Northern Territory Acceptance Act 1910" a sinking fund has been established in connexion with the transferred loans.

§ 9. Land Tenure.

1. **Present Policy.**—A description of the system of land settlement in force in the Territory will be found in the chapter "Land Tenure and Settlement," see pages 179 and 180 *supra*. Prior to the transfer of the Territory to the Commonwealth on 1st January, 1911, the sale and occupation of lands were regulated by the South Australian Legislature in Statutes applying particularly to the Territory. Under the Commonwealth Government a complete reorganisation was effected, and the system adopted was embodied in the Crown Lands Ordinances of 1912 to 1918. A leasehold system only is provided for, and no further alienation of Crown lands is permitted, except in pursuance of existing agreements. The land is classified and appraised, and leased in blocks, the maximum areas ranging from 300 square miles of first class pastoral (or 600 square miles of second class pastoral, or 1,500 square miles of third class pastoral), to 1,280 acres of first class agricultural land. The terms for pastoral leases are for Class 1, 21 years; Classes 2 and 3, 42 years; and for any miscellaneous lease, 21 years. All other leases are to be in perpetuity, making them almost equivalent to freeholds, but with re-appraisal of rent values every 14 years in the case of town lands, and every 21 years in the case of agricultural and pastoral lands. The conditions are of a very favourable nature, with low rents and elastic conditions of tenure. In order to provide for cases where allottees on inspection of their blocks have reasonable grounds for preferring another block, the Administrator is empowered to revoke leases, under certain conditions. Under the Advances to Settlers Ordinance 1913, provision was made for giving settlers financial assistance in the pioneering years. Repayment of loans can be extended over a period of 30 years. Owing to the high evaporation rate, the surface waters in the Territory dwindle rapidly during the dry season, and, except in favoured localities, sub-artesian supplies must be resorted to where obtainable. In order to encourage the provision of water supply, it is proposed, in granting leases, to allow minimum rentals in the case of lessees who make satisfactory provision by means of bores, wells, or dams.

The revenue from pastoral leases and permits for the year 1919–20 was about £15,700, and from grazing licences £1,300.

2. **Number of Holdings.**—The table on page 180 *supra* shews the total area under lease, license, and permit in 1901 and in each year from 1915 to 1920. On the 30th June, 1920, there were in existence 402 pastoral leases covering 166,641 square miles, 122 grazing licences covering 36,571 square miles, and 54 miscellaneous leases and 17 pastoral permits embracing areas respectively of 1,406 and 7,328 square miles.

SECTION XXXIII.

LABOUR AND INDUSTRIAL STATISTICS.

§ 1. Introductory.

1. **General.**—In Year Book No. 7 (pages 992–3), a résumé was given of the functions and scope of the Labour and Industrial Branch of the Commonwealth Bureau of Census and Statistics. Owing to limitations of space, this information is not repeated in the present issue of the Year Book.

§ 2. Fluctuations in Employment and Unemployment.

1. **General.**—The particulars shewn in the following tables are based upon information furnished by the secretaries of trade unions in the several States of the Commonwealth. It will be seen from the tables that the membership of unions regularly reporting has exceeded 300,000 since 1918. Unemployment particulars are not collected from those unions whose members have permanency of employment, such as railway and tramway employees, and public servants, or from unions whose members are casually employed (wharf labourers, etc.). Very few of the unions pay unemployment benefit, but the majority of the larger organizations have permanent secretaries and organizers who are closely in touch with the members and with the state of trade within their particular industries. In many cases unemployment registers are kept, and provision is also made in the rules for members out of work to pay reduced subscriptions. Taking these facts, and also the large membership of the numerous unions from which regular quarterly returns are being received, into consideration, it will be realized that percentage unemployment results based on trade union information may be taken to shew the general trend of unemployment existing in the several States. The tables do not furnish a complete register of unemployment, but for the purpose of making comparisons and shewing tendencies over a period of years, the percentages returned as unemployed, though not exact, are the most satisfactory available. The investigation for past years was limited to a record of the numbers unemployed at the end of each year. The results are subject to certain limitations, inasmuch as they do not take into account variations in employment and unemployment throughout the year due to seasonal activity and other causes. For the above reasons it is not safe to conclude that the actual percentage returned as unemployed in past years by trade unions at the end of each year is equal to the average percentage unemployed during the year. It may be mentioned that, in order to overcome the difficulties alluded to in regard to seasonal fluctuations, returns as to numbers unemployed have been collected from trade unions for each quarter since the beginning of the year 1913.

2. **Number Unemployed in Various Industries, 1891 to 1920.**—The following table shews for each of the years specified :—(a) The number of unions for which returns as to unemployment are available; (b) the number of members of such unions; (c) the number of members unemployed, and (d) the percentage of members unemployed on the total number of members of those unions for which returns are available.

**UNEMPLOYMENT.—NUMBER OF UNIONS AND MEMBERS REPORTING AND
NUMBER AND PERCENTAGE UNEMPLOYED, 1891 TO 1920 (4th QUARTER).**

Particulars.	Unions.	Membership.	Unemployed.	
			Number.	Percentage.
1891	25	6,445	599	9.3
1896	25	4,227	457	10.8
1901	39	8,710	574	6.6
1906	47	11,299	753	6.7
1907	51	13,179	757	5.7
1908	68	18,685	1,117	6.0
1909	84	21,122	1,223	5.8
1910	109	32,995	1,857	5.6
1911	160	67,961	3,171	4.7
1912	464	224,023	12,441	5.5
1913	465	251,207	13,430	5.3
1914	439	250,716	27,610	11.0
1915	465	273,149	18,489	6.8
1916	470	292,051	19,562	6.7
1917	459	296,937	21,989	7.4
1918	475	308,850	16,919	5.5
1919	459	317,413	16,637	5.2
1920, 1st Quarter	461	329,127	18,396	5.6
2nd " " " " "	449	343,144	21,186	6.2
3rd " " " " "	426	344,582	21,375	6.2
4th " " " " "	450	351,013	27,463	7.8

NOTE.—For years prior to 1920 the figures refer to the end of the year only; similar figures for each of the four quarters of the years since 1912 will be found in the Labour and Industrial Reports. The quarterly figures show the number of persons who were out of work for three days or more during a specified week in each quarter; they do not include persons out of work through strikes or lockouts.

The figures show that the percentage of unemployment in the fourth quarter of 1920 (7.8 per cent.) was higher than in the same period of any other year since 1914, which closed with a proportion of unemployment of 11.0 per cent.

3. Unemployment in Different Industries, 1920.—The following table shows the percentages unemployed in several of the fourteen industrial groups. It may be observed that for those industries in which employment is either unusually stable or, on the other hand, exceptionally casual, information as to unemployment cannot ordinarily be obtained from trade unions. Hence, certain industries such as railways, shipping, agricultural, pastoral, etc., and domestic, hotels, etc., are insufficiently represented in the returns. Particulars are not, therefore, shown separately for those groups, such returns as are available being included in the last group, "Other and Miscellaneous."

UNEMPLOYMENT IN DIFFERENT INDUSTRIES AT THE END OF YEAR 1920.

Industrial Group.	Number Reporting.		Unemployed.	
	Unions.	Members.	Number.	Percentage.
I. Wood, Furniture, etc. ..	17	17,232	756	4.4
II. Engineering, Metal Works, etc. ..	60	44,058	1,894	4.3
III. Food, Drink, Tobacco, etc. ..	60	35,882	7,255	20.2
IV. Clothing, Hats, Boots, etc. ..	26	36,549	2,650	7.3
V. Books, Printing, etc. ..	27	13,425	344	2.6
VI. Other Manufacturing ..	71	32,307	3,237	10.0
VII. Building ..	52	33,125	704	2.1
VIII. Mining, Quarrying, etc. ..	21	28,504	1,717	6.0
X. Other Land Transport ..	13	10,988	401	3.6
IX., XI., XII., XIII., and XIV., Other and Miscellaneous ..	103	98,943	8,505	8.6
All Groups	450	351,013	27,463	7.8

4. **Unemployment in each State, 1920.**—Any deductions which can be drawn from the data collected as to the relative degree of unemployment in the several States are subject to certain qualifications (in addition to those already stated on page 998), inasmuch as the industries included in the trade union returns are not uniform for each State. In comparing the results for the individual States, it must therefore be borne in mind that, to some extent at least, comparisons are being drawn between different industries and not only between different States. Nevertheless, since the industrial occupations of the people vary considerably in the several States, all comparisons between the States based on comprehensive data as to unemployment must, to some extent, suffer from the defect indicated.

UNEMPLOYMENT IN DIFFERENT STATES AT THE END OF YEAR, 1920.

State.	Number Reporting.		Unemployed.	
	Unions.	Members.	Number.	Percentage.
New South Wales	127	144,700	10,049	6.9
Victoria	99	105,786	7,739	7.3
Queensland	57	42,724	6,982	16.3
South Australia	56	23,498	1,202	5.1
Western Australia	68	25,505	1,229	4.8
Tasmania	43	8,800	262	3.0
Commonwealth	450	351,013	27,463	7.8

§ 3. Current Rates of Wage in Different Occupations and States.

1. **Minimum Rates of Wage.**—The collection of material respecting the current rates of wage payable in different callings and in occupations in various industries carried on in each State of the Commonwealth was first undertaken by the Commonwealth Bureau of Census and Statistics in the early part of the year 1913. The particulars acquired were obtained primarily from awards, determinations and agreements under Commonwealth and State Acts, and therefore shew the minimum rates prescribed. In cases where no award, determination, or agreement is in force, particulars are given, where possible, of the ruling union or predominant rate as furnished by employers or secretaries of Trade Unions.

An extensive tabular presentation of the minimum rates of wage for adult male and female workers in the main occupations in the capital city of each State will be found in the Labour Report, No. 11. Space will not permit of the inclusion of the detailed tables in this volume.

2. **Weighted Average Nominal Weekly Rate of Wage Payable to Adult Male Workers in each State, 31st December, 1920.**—The following table shews the weighted average nominal weekly rate of wage payable to adult male workers for a full week's work in each State and the Commonwealth. Taking the average for the whole Commonwealth as the base (=1,000), index-numbers for each State are also shewn. The number of occupations upon which these results are based amounts in the aggregate to no fewer than 3,948.

WEIGHTED AVERAGE NOMINAL WEEKLY RATE OF WAGE PAYABLE TO ADULT MALE WORKERS FOR A FULL WEEK'S WORK, AND WAGE INDEX-NUMBERS IN EACH STATE AND COMMONWEALTH, 31st DECEMBER, 1920.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
Number of Occupations included	874	909	627	567	489	482	3,948
Weighted Average Weekly Rate of Wage	94s. 0d.	86s. 1d.	91s. 6d.	82s. 8d.	89s. 9d.	85s. 9d.	89s. 10d.(a)
Index-Numbers	1,047	958	1,018	920	999	955	1,000(a)

(a) Weighted average.

The results show that the weighted average nominal weekly rate of wage was highest in New South Wales, followed in the order named by Queensland, Western Australia, Victoria, Tasmania, and South Australia.

3. **Weighted Average Nominal Weekly Rate of Wage Payable to Adult Male Workers in each Industrial Group, 31st December, 1920.**—The following table gives similar particulars in regard to the several industrial groups and to the weighted average for all groups combined. In computing the index-numbers the weighted average for all groups is taken as base (=1,000).

WEIGHTED AVERAGE NOMINAL WEEKLY RATE OF WAGE PAYABLE TO ADULT MALE WORKERS FOR A FULL WEEK'S WORK, AND WAGE INDEX-NUMBERS IN EACH INDUSTRIAL GROUP, 31st DECEMBER, 1920.

Industrial Group.	No. of Rates Included.	Weighted Average Weekly Wage (for Full Week's Work).	Index Numbers.
		<i>s. d.</i>	
I. Wood, Furniture, etc.	270	95 1	1,058
II. Engineering, Metal Works, etc. ..	636	92 5	1,029
III. Food, Drink, etc.	576	89 3	994
IV. Clothing, Boots, etc.	124	86 5	963
V. Books, Printing, etc.	205	99 6	1,108
VI. Other Manufacturing	875	88 11	990
VII. Building	190	95 7	1,064
VIII. Mining	161	103 10	1,156
IX. Rail and Tram Services	224	93 1	1,037
X. Other Land Transport	70	87 3	971
XI. Shipping, etc.	198	88 0(b)	980
XII. Pastoral, Agricultural, etc. ..	72	87 1(c)	969
XIII. Domestic, Hotels, etc.	114	80 6(d)	896
XIV. Miscellaneous	233	84 11	945
All Groups	3,948	89 10	1,000(a)

(a) Weighted average.

(b) Including the value of victualling and accommodation where supplied.

(c) Including the value of board and lodging, where supplied. (d) Including the value of board and lodging, where supplied, as follows:—In Sydney 11s. to 23s. (according to class of establishment); in Melbourne 20s.; in Brisbane 17s.; in Adelaide 16s. (Restaurants) and 15s. (Hotels and Clubs); in Perth 22s.; and in Hobart 15s. per week.

From the above table it may be seen that the highest weighted average wage was that paid in Group VIII. (Mining), 103s. 10d. per week, or approximately 16 per cent. above the weighted average for all groups. The rates of wage range from 103s. 10d. per week down to 80s. 6d. per week, in Group XIII. (Hotels, etc.), which is approximately 10 per cent. below the average of all groups.

4. **Weighted Average Nominal Weekly Rate of Wage Payable to Adult Female Workers in each State, 31st December, 1920.**—The following table shews the weighted average nominal weekly rate of wage payable to adult female workers for a full week's work in each State and the Commonwealth. Taking the average for the whole Commonwealth as the base (=1,000), index-numbers for each State are also shewn:—

WEIGHTED AVERAGE NOMINAL WEEKLY RATE OF WAGE PAYABLE TO ADULT FEMALE WORKERS FOR A FULL WEEK'S WORK, AND WAGE INDEX-NUMBERS IN EACH STATE AND COMMONWEALTH, 31st DECEMBER, 1920.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
Number of Occupations included	85	87	37	47	24	28	308
Weighted Average Weekly Rate of Wage	46s. 0d.	43s. 1d.	44s. 11d.	40s. 7d.	52s. 11d.	41s. 10d.	44s. 6d.(a)
Index-Numbers	1,035	969	1,009	913	1,189	940	1,000a

(a) Weighted average.

It will be seen that the weighted average nominal weekly rate of wage for adult female workers was highest in Western Australia, followed in the order named by New South Wales, Queensland, Victoria, Tasmania, and South Australia.

5. **Weighted Average Nominal Weekly Rates of Wage Payable to Adult Female Workers in Industrial Groups, 31st December, 1920.**—The following table gives separate particulars regarding the weighted average nominal weekly rates of wage of females in the chief industrial groups in which they are employed, and also shews the weighted average for all groups combined. Index-numbers based on the average for the Commonwealth as the base (=1,000) are also given :—

WEIGHTED AVERAGE NOMINAL WEEKLY RATES OF WAGE PAYABLE TO ADULT FEMALE WORKERS FOR A FULL WEEK'S WORK, AND WAGE INDEX-NUMBERS IN INDUSTRIAL GROUPS, 31st DECEMBER, 1920.

Industrial Group.	No. of Rates Included.	Weighted Average Weekly Wage (for Full Week's Work).	Index-Numbers.
		s. d.	
III. Food, Drink, etc.	35	41 10	940
IV. Clothing, Boots, etc.	114	43 5	976
I., II., V., VI., All Other Manufacturing combined	84	44 0	989
XIII. Domestic, Hotels, etc.	57	46 3(a)	1,039
XIV. Shop Assistants, Clerks, etc.	18	46 2	1,038
All Groups	308	44 6	1,000(b)

(a) See footnote (d) on preceding page.

(b) Weighted average.

6. **Relative Hours of Labour and Hourly Rates of Wage, 1914 to 1920.**—The rates of wage referred to in the preceding paragraphs of this section relate to the minimum rates payable for a full week's work. It should be observed, however, that the number of hours which constitutes a full week's work differs in many instances, not only as between various trades and occupations in each individual State, but also as between the same trades and occupations in the several States. In order to secure what may be for some purposes a more adequate standard of comparison, it is desirable to reduce the comparison to a common basis, viz., the rate of wage per hour. Particulars are given in the following table, classified according to States, for male and female occupations separately, at the end of the year 1914, and from 1916-20. These particulars relate to (a) the weighted average nominal weekly wage, (b) the weighted average number of working hours constituting a full week's work, and (c) the weighted average hourly wage. It should be observed that the weighted average weekly wage relates to all industrial groups combined, and includes the value of board and lodging, where supplied, in land occupations, and the value of victualling in marine occupations* ; whereas the number of working hours and the hourly wage relate to all industrial groups other than Groups XI. (Shipping), and XII. (Agricultural, Pastoral, etc.). Owing to the fact that many of the occupations included in these two groups are of a casual or seasonal nature, and that the hours of labour in these occupations are not generally regulated either by awards or determinations of industrial tribunals or otherwise, the necessary data for the computation of the average number of working hours are not available.

The general effect of reducing the rates of wage to a common basis (i.e., per hour) is to decrease the amount of the difference shewn when comparing the weekly wage in the several States.

* See footnote to table on page 1001.

(a) Weighted average weekly wage in all industrial groups combined. (b) Weighted average working hours per week, and computed hourly rates of wage for all industrial groups excepting Groups XI. (Shipping, etc.), and XII. (Agricultural, Pastoral, etc.). Working hours have not been generally regulated by industrial tribunals for occupations classified in industrial groups XI. and XII.

From the foregoing table it may be seen that there has been a diminution in each of the States in the number of working hours constituting a full week's work for male and female occupations. The effect of these changes on the hourly rate of wage as compared with the general increase in the weekly wage is readily seen from the comparative index-numbers given in the following table. In each instance (male and female occupations separately) the basis taken is the weighted average for the Commonwealth at the 30th April, 1914, as base (=1,000)

RELATIVE INDEX-NUMBERS FOR WEEKLY AND HOURLY WEIGHTED AVERAGE WAGE, 30th APRIL, 1914, 31st DECEMBER, 1914 TO 1920.

NOTE.—Weighted Average for the Commonwealth at 30th April, 1914, as base (=1,000).

§ 4. Variations in Nominal and Effective Wages.

1. Variations in Wage Index-Numbers in Various Industries, 1901 to 1920.—The total number of different occupations for which particulars as to wages are available back to 1901 is 652. In 1913 the number of occupations was increased to 3,948. These wages relate generally to award rates, but in a few cases, more especially for the earlier years, when there were no award rates fixed, predominant or most frequent rates have been taken. The occupations have been distributed over the fourteen industrial groups

already specified, and index-numbers computed for each group for the whole Commonwealth. The wages refer generally to the capital town of each State, but in industries such as mining and agriculture, the rates in the more important centres have been taken.

The following table shews wage index-numbers for the whole Commonwealth in each of the fourteen industrial groups during the years specified. Rates of wage for females are not included. The index-numbers are "weighted" according to the number of persons engaged in different industrial groups in each State and the Commonwealth (see Report No. 11, page 76). In the tables of index-numbers given in this Section, the weighted average wage in 1911 for all States or industries, as the case may be, is taken as base (= 1,000). The result is that the index-numbers are comparable in all respects, that is to say, they shew not only the variations in wages from year to year in each State or industrial group, but they also furnish comparisons as to the relative wages in each State or industry, either in any particular year, or as between one year and another, and one State or industry and another.

VARIATIONS IN NOMINAL WAGE INDEX-NUMBERS IN DIFFERENT INDUSTRIES IN THE COMMONWEALTH, 1901 TO 1920. (WEIGHTED AVERAGE FOR ALL GROUPS IN 1911 = 1,000.)

Particulars.	Number of Occupations Included.		1901.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

X. Other Land Transport	9	70	795	910	993	996	1,026	1,041	1,128	1,210	1,237	1,431	1,702
XI. Shipping, etc.	74	198	751	871	942	953	972	1,026	1,153	1,194	1,257	1,518	1,716
XII. Agriculture, Pastoral, etc.	8	72	627	839	944	965	965	969	1,073	1,192	1,231	1,370	1,699
XIII. Domestic, Hotels, etc.	17	114	598	887	894	918	935	948	995	1,052	1,104	1,338	1,571
XIV. Miscellaneous	36	233	759	929	1,015	1,045	1,054	1,065	1,137	1,185	1,234	1,389	1,656
All Groups (a)	652	3,948	848	1,000	1,051	1,076	1,085	1,102	1,184	1,252	1,296	1,462	1,752

NOTE.—The figures in the above table are comparable both horizontally and vertically.

(a) Weighted average: see graph on page 1031 hereof. (b) The decrease in this group is due to a reduction in the award rates in the furniture trade resulting from an appeal made by employers.

It may be seen that the index-numbers increased during the whole period under review from 848 in 1901 to 1,000 in 1911, 1,051 in 1912, and 1,752 in 1920.

2. Variations in Wage Index-Numbers in Different States, 1901 to 1920.—The following table shews the progress in rates of wage for all industries in each State, the weighted average wage for the Commonwealth in 1911 being taken as the base (= 1,000). These results are based generally upon rates of wage prevailing in the capital town of each State, but in certain industries, such as mining, rates are necessarily taken for places other than the capital towns.

VARIATIONS IN NOMINAL WAGE INDEX-NUMBERS IN DIFFERENT STATES, 1901 TO 1920.

(WEIGHTED AVERAGE WAGE FOR COMMONWEALTH IN 1911=1,000.)

States.	Number of Occupations included.		1901.	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

(a) Weighted average.

NOTE.—The figures in the above table are comparable both horizontally and vertically.

The significance of the above figures since 1906 can be better appreciated by reference to the graph on page 1031, which shews not only variations in wages in each State from year to year, but also the difference in wage level as between the several States. From this graph it is clearly seen that, excluding Western Australia, the difference between nominal wages in the several States has decreased very considerably since 1906. This difference is shewn at any point by the vertical distance between the graphs. Wages in Queensland and New South Wales have increased since 1914 at a higher rate than in any other State, and the general level in these States is now higher than in any other State. The graphs for Victoria and South Australia lie very close together throughout the period. In Tasmania the first determination under the Wages Boards Acts 1910 and 1911 came into force in 1911. Since then wages in that State have increased rapidly, and their general level is now near the average for the Commonwealth.

3. Variations in Effective Wages.—In order to obtain an accurate measure of the progress in the material welfare of wage-earners, regard must be had to the purchasing-power of wages, and the index-numbers based merely upon nominal rates of wage must consequently be subject to some modification, inasmuch as they take no account of variations in the purchasing-power of money. In computing these effective wage index-numbers, the nominal wage index-numbers given in sub-section 2 hereof have been divided by the purchasing-power-of-money index-numbers in Section IV., paragraph 5 of Labour Report No. 11, p. 30. The resulting index-numbers shew for each State and for the Commonwealth for the years specified the variations in *effective* wages.

The following table shews the effective wage index-numbers for each State for each of the years indicated from 1901 to 1920 :—

VARIATION IN EFFECTIVE WAGES IN EACH STATE AND COMMONWEALTH, 1901 TO 1920.(a)

Particulars.	1901.	1910.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
New South Wales ..	961	973	973	922	924	909	850	867	893	902	948	994

Queensland ..	1,172	1,095	1,090	1,032	1,060	1,045	912	991	1,078	1,083	1,064	1,085
South Australia ..	948	943	957	906	947	929	847	896	989	957	935	919
Western Australia ..	1,024	1,091	1,023	1,032	1,076	1,073	1,011	1,005	1,079	1,107	1,068	1,083
Tasmania ..	827	812	838	896	976	943	843	870	894	880	900	911
Commonwealth ..	964	985	1,000	955	975	952	862	894	950	952	968	982

(a) As to the effect in abnormal periods, see Labour Report No. 6, pp. 20-2, Section IV., par. 3.

The figures in the preceding table from the year 1907 onwards are shewn in the graph on page 1032. A comparison between this graph and the preceding one shews that the difference between nominal and effective wages is very marked. In the first place, the whole nature of the graphs is entirely different. Instead of having a series of lines shewing a practically continuous and rapid upward trend, the effective wages shew (except for Tasmania) a series of fluctuating points, in which no very marked tendency is immediately discernible. It will be seen that, generally speaking, the years 1907, 1909, 1910, 1911, 1913, 1916, 1917, 1918 and 1919 were marked by increases in effective wages, but that in each of the years 1908, 1912, 1914 and 1915, there were rapid decreases. In 1920 effective wages decreased in Victoria and South Australia, and increased in the remaining States. In each of these years in which effective wages declined there was a rapid increase in cost of food and groceries, which was not, immediately, compensated by increased wages. Since 1911 the effect of prices on nominal wages has caused serious fluctuations in the effective wage, e.g., the effective wage index-number for the Commonwealth for the year 1915 (862) was 13.8 per cent. below that of 1911. From 1915 to 1920 the effective wage index-number rose by 13.9 per cent. to 982, which, however, still leaves the average effective wage for the Commonwealth lower than in 1911 by 1.8 per cent. In the next table index-numbers are given for nominal wages and for the purchasing-power of money, together with the effective wage index-number derived therefrom.

One important feature common to both graphs (nominal and effective wages) is the manner in which the graphs for the individual States have, on the whole, approached more closely together. With the adoption of rates of wage fixed according to the relative purchasing-power of money, it appears probable that this tendency will continue in the future.

4. Variations in Effective Wages and Standard of Comfort, 1901 to 1920.—In the preceding paragraph particulars are given as to variations in effective wages in each State, due allowance having been made for variations in purchasing-power of money, though not for unemployment. Attention has also been drawn to the limitations to which they are subject in abnormal times.

For years prior to 1913 the data available as to unemployment are so meagre that comparative results allowing for variations both in purchasing-power of money and in unemployment cannot be accurately computed for the several States. In the subjoined table, however, the percentage of unemployment for the whole Commonwealth at the end of the years specified has been used in order to obtain results shewing the variations in unemployment upon effective wages. Column I. shews the nominal rate of wage index-numbers, and Column II. the relative percentages unemployed. Applying these percentages to the numbers shewn in Column I., and deducting the results from each corresponding index-number, so as to allow for relative loss of time, the figures in Column III. are obtained. These figures are then re-computed with the year 1911 as base, and are shewn in Column IV. In Column V. the purchasing-power-of-money index-numbers are shewn, and in Columns VI. and VII. the effective wage index-numbers are given, firstly, for full work, and, secondly, allowing for lost time. These are obtained by dividing the figures in Columns I. and IV., respectively, by the corresponding figures in Column V. The resulting index-numbers shew for the Commonwealth, for the years specified, the variations in *effective wages*, or in what may be called the "standard of comfort."*

A comparison between the figures in Columns I. and VI. shews the relation between the nominal rates of wage and the purchasing efficiency of these rates. The figures in Column VII. shew variations in *effective wages* after allowing not only for variations in purchasing-power of money, but also for the relative extent of unemployment.

* This expression must not be confused with "standard of living." A change in the standard of living necessarily involves a change in regimen (see Labour Report No. 1), that is, a change in the nature or in the relative quantity of commodities purchased, or both. A change in the "standard of comfort" merely implies a variation in effective wages, which variation may, or may not, result in, or be accompanied by, a change in the "standard of living."

1919 ..	1,462	5.2	1,386	1,454	1,510	968	963
1920 ..	1,752	7.8	1,615	1,695	1,785	982	950

(a) As to the effect in abnormal periods, see Section IV., par. 3, of Labour Report No. 6.

During the period 1901-20, while the nominal wage index-number rose from 848 to 1,752, an increase of 106.7 per cent., prices rose from 880 to 1,785 or by 102.8 per cent., the net result therefore being that effective full time wages rose by only 0.5 per cent. Compared with 1911, effective wages shew a fall of 1.8 per cent., although nominal wages increased by 75.2 per cent.

§ 5. Changes in Rates of Wage.

1. *General.*—The collection of information regarding changes in rates of wage throughout the Commonwealth dates from the 1st January, 1913.

(i) *Definition of a Change in Rate of Wage.* For the purpose of these statistics a change in rate of wage is defined as a change in the weekly rates of remuneration of a certain class of employees, apart from any change in the nature of the work performed or apart from any revision of rates due to increased length of service or experience. It is obvious that under this definition certain classes of changes are excluded, such, for example, as (a) changes in rates of pay due to promotion, progressive increments, or, on the other hand, to reduction in pay or grade to inefficient workers, and (b) changes in average earnings in an occupation due to a change in the proportions which higher paid classes of workers bear to lower paid classes. Bonuses to employees have not been taken into account in the tabulations. Each single change recorded relates to a change in the rates of wage effected in a specific industry or calling, and includes any and all changes to workers in that industry, irrespective of the different number of separate occupations

or trades affected. Further, it should be observed that in some instances a change may relate to the employees of a single employer or to those of a number of employers, according to the instrument or method operating to bring about the change.

(ii) *Sources of Information.* Primary information merely as to the fact that a change in rate of wage has occurred is obtained through the following channels:— (a) the Industrial Registrar or Chief Inspector of Factories in each State; (b) Reports from Labour Agents and Correspondents; (c) Quarterly reports from Secretaries of Trade Unions; (d) Returns relating to industrial disputes which resulted in changes in rates of wage; (e) Reports in newspapers, labour and trade reviews, and other publications.

(iii) *Collection of Particulars concerning Changes.* On the occurrence of a change in rate of wage, forms* (prescribed under the Census and Statistics Act 1905) are issued to employers and employers' associations (if any) and to the secretaries of the trade unions, the members of which are affected by the change. The particulars which have to be inserted in these forms furnish information regarding the occupations of the workers affected, the number of workers in each occupation, the rates of wage paid before and after the change, the locality affected, and the date on which the change took effect. Information must also be furnished regarding employers and employers' associations concerned (if any), and the method by which the change was effected.

When the forms are returned from the various persons who are required to complete them, the returns are checked and compared with each other and with copies of awards, determinations, and agreements. In all cases when the information furnished on the forms is incomplete or unsatisfactory, further inquiries are made, and the figures checked by reference to census results, industrial statistics, factory reports, etc.

2. Comparative Summary of Changes in Rates of Wage in each State, 1913–1920.—

The following table gives particulars of changes which occurred in each State of the Commonwealth during the years specified. As regards the number of persons affected, the particulars given refer to the total number of persons ordinarily engaged in the various industries. The results as to the amount of increase in wages are computed for a full week's work for all persons ordinarily engaged in the several industries and occupations affected, and in cases of changes in existing minimum rates under awards or determinations of industrial tribunals, it has ordinarily been assumed (in the absence of any definite information to the contrary) that the whole of the employees in each occupation received the minimum rates of wage before and after the change.

It should be clearly understood that the figures given in the third division of the following table (amount of increase per week) do not relate to the increase each week, but only to the increase in a single week on the assumption that the full number of persons ordinarily engaged in the particular trade or occupation affected by the change were employed during that week. It is obvious, therefore, that the aggregate effect per annum cannot be obtained without making due allowance for unemployment and for occupations in which employment is seasonal or intermittent. It is also obvious that since unemployment and activity in all branches of industry may vary from year to year, and in many branches from season to season also, no accurate estimate of the actual effect of the changes in the total amount of wages received or paid per annum can be made until the determining factors have been investigated. These factors are (a) the amount of unemployment, and (b) the period of employment in seasonal industries.

It should be observed that changes brought about by awards and agreements under the Commonwealth Conciliation and Arbitration Act, the Arbitration (Public Service) Act, and the Industrial Peace Act 1920 are necessarily included hereunder as changes in each State to which such awards and agreements apply. The average increase per head per week is computed to the nearest penny.

* Since these forms are issued under the authority of the Census and Statistics Act 1905, it is compulsory for prescribed persons to furnish the information required.

(a) Changes recorded in this column are common to all States, as the particulars relating to the number of workpeople affected and the net amount of increase per week in each State were not ascertainable.

In point of number of changes in each State, New South Wales was first, Victoria second, and Queensland third, in each of the years 1913 to 1916. During the year 1917 the number of changes in Queensland exceeded the number recorded in Victoria, while during the year 1918 the number of changes in Queensland was greater than the number recorded as having taken place in New South Wales. It will be seen from the table that the number of changes in rates of wage recorded during the year 1920 is higher in each State than during any previous year. The relative position of the States in regard to the numbers of changes effected, and also in regard to the numbers of workers affected in each year is, of course, largely due to the magnitude of the different industries and callings in which changes took place.

The number of workpeople who were affected by changes in rates of wage during the year 1920 was 1,027,286, and the total net amount of increase per week was £494,708, representing 9s. 8d. per head per week. These figures are greater than in any other year for which records are available, and indicate a widespread attempt to restore wages to their previous relation to the cost of living, *i.e.* to regain the accustomed effective wage.

The table shows the net results of all changes made in the rates of wage, and includes a few instances in which the weekly wage was reduced. In 1920 eleven decreases were recorded. Six occurred in New South Wales, four in Western Australia, and one in Tasmania. The total number of workpeople affected by these changes was 2,845, and the amount of decrease per week was £728. Of these eleven decreases, three were caused by reduction in the weekly rate of wage owing to the number of working hours per week being reduced without a corresponding increase in the hourly rate of wage; five were due to lower rates for unskilled workers and employees at certain ages being inserted in awards, which previously specified flat rates; while the other decreases were caused by awards shewing lower rates of wage than the ruling or predominant rates which were being paid prior to the awards or determinations coming into force. Therefore, of the 1,999 changes made in 1920, 1,988, or 99.45 per cent. gave increased rates of pay to 1,024,441 persons, representing 99.72 per cent. of the 1,027,286 persons affected by all changes during the year.

3. Number and Magnitude of Changes in Rates of Wage in the Commonwealth Classified according to Industrial Groups, 1913 to 1920.—*Total Workpeople (Male and Female) affected by Changes.* In the following table particulars are given of the number of changes, the number of persons (males and females) affected, and the total amount of increase per week, classified according to Industrial Groups throughout the Commonwealth during the years 1913 and 1917 to 1920:—

CHANGES IN RATES OF WAGE IN THE COMMONWEALTH ACCORDING TO INDUSTRIAL GROUPS, 1913 AND 1917 TO 1920.

(n) In this table an Industrial Award or Agreement under the Commonwealth Conciliation and Arbitration Act, the Arbitration (Public Service) Act, the Industrial Peace Act, or an Order of the War Precautions Coal Board is counted as one change only, although such Award, Agreement or Order may be operative in more than one State.

4. Changes in Rates of Wage in Male and Female Occupations—Number and Effect of Changes in each State, 1913–1920.—Included in the changes in rates of wage recorded in the tables on page 1011 are those which in the whole or part thereof affected female occupations. Particulars in respect to these changes in so far as they relate to the numbers of male and female workers affected, etc., are set out hereunder:—

5. Methods by which Changes were Effected.—(i) *Changes in Rates of Wage and Methods by which Effected—Commonwealth, 1919 and 1920.* In the following table particulars are given for the Commonwealth of the number of changes in rates of wage, the number of workpeople affected, and the total net amount of increase to the weekly wage distribution brought about either without, or after, stoppage of work, during the years 1919 and 1920 respectively, as a result of the application of one or other of the methods set out in the tables :—

CHANGES IN RATES OF WAGE.—METHODS BY WHICH EFFECTED,
1919 AND 1920.

Methods by which Changes were Effected.	Without Stoppage of Work.			After Stoppage of Work.			All Changes.

(a) In this section of the table an Award or Agreement under the Commonwealth Conciliation and Arbitration Act, the Arbitration (Public Service) Act, the Industrial Peace Act, or an Order of the War Precautions Coal Board is counted as one change only, although such Award, Agreement, or Order may be operative in more than one State. (b) Decrease.

The total number of changes recorded during the year 1920 was 1,724, of which 978 or nearly 57 per cent. of the total number were brought about by award or determination under State Industrial Acts. The number of workpeople who were affected by these changes was 648,083, and the total amount of increase per week in wages was £315,728. Of these 978 changes, 478 occurred in New South Wales, 115 in Victoria, 218 in Queensland, 32 in South Australia, 33 in Western Australia, and 52 in Tasmania. The number of changes in rates of wage which were recorded as having been made by awards or variations of awards under the provisions of the Commonwealth Conciliation and Arbitration Act was 64, as compared with 42 during the previous year. Direct negotiations between representatives of employers and employees brought about 333 changes in rates of wage during the year. A large number of industrial agreements were filed under the provisions of the Commonwealth and State Acts during the twelve months under review. Ninety-five changes in rates of wage were arranged after stoppages of work. The number of workpeople affected by these changes was 16,587.

(ii) *Changes in Rates of Wage and Methods by which Effected—Commonwealth, 1913–1920.* Comparative particulars are contained in the following table of the total number and effect of all changes in rates of wage brought about throughout the Commonwealth during the years indicated, as a result of the application of one or other of the specified methods:—

(a) See footnote to table on page 1013.

It will be seen from the foregoing table that the greatest number of changes throughout the period under review was effected through the instrumentalities of the State Acts, though in relation to the total business the activities of the State organizations shew a decline from 80 per cent. of all changes in 1913 to 65 per cent. in 1920, while the changes made under the Commonwealth Acts have increased from 8.7 per cent. to 13.2 per cent. It is interesting to observe the very marked extent to which "direct negotiation" between parties has been resorted to in the later years. In 1913, only 30 changes, or less than 10 per cent. of the total, affecting only 2.6 per cent. of all persons concerned in the changes of that year, were brought about by direct negotiations, whereas in 1920, 333 changes (19 per cent.), affecting 169,973 persons, or 16 per cent. of the whole, resulted from this agency. It must be mentioned that, so far as possible, the effect of awards or agreements is recorded in the figures for the year in which such awards or agreements are made retrospective as to the date on which the increased rate of wage has to be paid, while in others the particulars as to the number of workpeople affected and the effect of the change are difficult to ascertain.

§ 6. Industrial Disputes.

1. General.—Information with regard to the collection of particulars and methods of tabulation of industrial disputes involving stoppage of work has appeared in previous issues of the Year Book, and is also given in the Annual Reports of the Labour and Industrial Branch of this Bureau.

In the following tabulations particulars are included only with respect to the industrial disputes which commenced during any calendar year.* This course requires the elimination of such data as relate to disputes which commenced during an earlier period, but which remained unsettled during some portion of the succeeding year. On the other hand it necessitates the inclusion of the number of working days and wages lost during the following year in connexion with disputes commenced during the calendar year to which the statistics relate.

2. Comparative Summary of Disputes (involving Stoppage of Work), 1913 to 1920.—The systematic collection of information as to industrial disputes (causing a stoppage of work) throughout the Commonwealth was first undertaken as from the 1st January, 1913, and particulars concerning disputes occurring during the year 1913 were published in Labour Report No. 5. The following table gives particulars of the number of industrial disputes which began in various years from 1913 to 1920, together with the number of workpeople involved, the number of working days lost, and the total estimated loss in wages in each State and Territory comprising the Commonwealth:—

INDUSTRIAL DISPUTES IN EACH STATE AND TERRITORY.—COMPARATIVE PARTICULARS FOR 1913 AND 1917 TO 1920.

State or Territory.	Year.	No. of Disputes.	Establishments Involved in Disputes.	No. of Workpeople Involved.			No. of Working Days Lost.	Total Estimated Loss in Wages.

* Any tabulations as to causes, duration, etc., based on disputes which were in existence in any given year, and not on those which commenced in that year, would inevitably result in confusion, seeing that particulars relating to the same dispute would probably occur in two successive years.

It may be seen from the foregoing table that industrial disputes throughout the Commonwealth were most frequent during the year 1920. The number of workpeople involved in disputes during 1916 and 1917 increased to an enormous extent, while the losses in working days and wages were considerably in excess of such losses during any previous yearly period. The figures for 1917 are swollen by the effects of the dispute at the Government Railway Workshops in New South Wales in connexion with the introduction of the "card system." The dislocation of industry due to this dispute is the most extensive which has been recorded by the Bureau since the systematic collection of particulars was undertaken at the beginning of the year 1913. After careful consideration of the data it was ascertained that 79 disputes throughout the various States were directly associated with the action of the employees at the Government Railway Workshops. The originating dispute, which commenced on the 2nd August, 1917, when the employees at the workshops ceased work as a protest against the introduction of a time-card system, rapidly extended to other industries throughout the Commonwealth. Railway employees in other branches of the service, coal and metalliferous miners, seamen, waterside workers, and others left work, mostly in sympathy with the railway men, while other workers, including carters, storemen, and artificial manure makers, refused to handle "black" goods and coal. Of the 79 disputes, which were the outcome of the original stoppage, 52 occurred in New South Wales; 18 in Victoria; 3 in South Australia; and 2 in each of the remaining States. The total number of workpeople involved in these dislocations was 97,507, the loss in working days was 3,982,250, with a consequent estimated loss in wages of £2,233,000. In addition a large number of employees in various industries, though not directly connected with the dispute, were thrown out of work by the restrictions placed upon the use of coal, gas and electricity.

The figures for 1914 and 1916 were inflated by disputes in the coal mining industry. In the earlier year, there was a protracted dispute in New South Wales through the refusal of the miners to work the afternoon shift. The estimated loss incurred was 523,000 working days, representing £259,000 in wages. In 1916 the coal mining employees in New South Wales, Victoria, Queensland, and Tasmania ceased work over the question of the "eight hours bank to bank." The loss on this occasion was 409,000 working days, equivalent to £240,850 in wages.

Three serious dislocations occurred during the year 1919. The stoppage of work at Broken Hill, in which metalliferous miners and others were involved, was the most prolonged dispute which has been recorded by this Bureau. The mines closed down during May, 1919, and work was not resumed until November, 1920. Over 7,000 workpeople at Broken Hill were thrown out of work, and it is estimated that the loss in wages to workpeople at the mines at Broken Hill and at the smelters, Port Pirie, exceeded £2,500,000. Seamen and marine engineers were also involved in protracted disputes, which caused heavy losses of working days and wages during the year. Detailed particulars of these important disputes have been published in Labour Reports, Nos. 10 and 11.

In regard to extensive dislocations of industry which occurred prior to the institution of systematic inquiries by the Bureau, efforts were made to obtain statistical data relating to the shearers' disputes in 1890, 1891 and 1894, and also concerning the number of workpeople involved and the losses caused by the maritime dispute in the early part of 1891, but precise information was not obtainable.

The proportion of disputes in each State expressed as a percentage on the total for the Commonwealth is as follows :—

PROPORTION PER CENT. OF DISPUTES IN THE LARGER STATES, 1914 TO 1920.

State.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
New South Wales ..	70	76	66	69.	46	58	63
Victoria.. ..	13	11	11	12	11	13	10
Queensland	5	5	13	9	28	15	10
Other States and Territories	12	8	10	10	15	14	17
* Commonwealth ..	100	100	100	100	100	100	100

Although the number of disputes in 1919 was less than that in 1916, and the number of workpeople involved was less than in either of the years 1916 and 1917, yet, measured by the loss of time and wages, the disruption to industry which occurred during 1919

was the most serious which the Commonwealth has experienced since records of such matters were instituted in 1913. Prior to 1919 the most serious loss in wages was incurred in 1917, when it amounted to £2,594,808, a sum outstanding in its magnitude as compared with other years. In 1919, however, this amount was exceeded by £1,357,128, the estimated loss in wages being £3,951,936, representing 6,308,226 working days. During the year 1920 particulars concerning 554 dislocations of work were recorded. This number is considerably higher than that for any previous year. The losses in working days (1,872,065) and in wages (£1,223,716) were, however, lower than those caused by disputes during 1917 and 1919. The more important of the disputes which contributed to the losses during 1920 were the dislocations of work in which were involved marine stewards on inter-State vessels; factory engine-drivers and firemen, Melbourne; gas workers, Melbourne; brown-coal miners, Morwell; ironstone quarrymen and others, Iron Knob and Whyalla, and State civil servants, Western Australia.

It is, of course, obvious that the mere number of disputes cannot by itself be accepted as a proper basis of comparison, nor does the number of workpeople afford a satisfactory basis. A better idea as to the significance and effect of industrial disputes may be obtained from the number of working days lost and the estimated loss in wages.

The position which New South Wales occupies in comparison with the other States is almost entirely due to the prevalence of disputes in connexion with coal mining. Apart from these stoppages the number of disputes in all other industries, whilst still in excess of that for each of the other States, does not compare unfavourably when the number of workpeople in each State is taken into consideration.

3. Number and Magnitude of Industrial Disputes in the Commonwealth, Classified according to Industrial Groups.—Comparative Particulars for 1919 and 1920.—The following table gives particulars of disputes in the Commonwealth during the years 1919 and 1920, classified according to industrial groups. The system of classification selected is similar to that adopted in connexion with labour organisations, unemployment, rates of wage, etc. (see Report No. 11, Labour and Industrial Branch, page 9).

INDUSTRIAL DISPUTES IN THE COMMONWEALTH, CLASSIFIED ACCORDING TO INDUSTRIAL GROUPS, 1919 AND 1920.

Industrial Group.	No. of Disputes.		No. of Work-people involved in Disputes.		No. of Working Days Lost.		Total Estimated Loss in Wages.

XIV. Miscellaneous	27	40	5,694	30,936	129,114	547,608	83,620	311,362
Commonwealth, All Groups	460	554	157,591	155,566	6,308,226	1,872,065	3,951,936	1,223,716

Attention has frequently been drawn to the preponderating influence exercised by disputes in the coal-mining industry in New South Wales on the total number of industrial disputes. In making any comparison as to the number of disputes in this industrial class in each State, it should be observed that while the number of workers engaged in the mining industry is very much larger in New South Wales than in any of the other States, nevertheless the total number of disputes recorded in that State is considerably greater than in any other State. Of the 3,167 disputes recorded in the Commonwealth for the eight years 1913–20, 1,615 or 51.0 per cent. were connected with the industries included in Group VIII., Mines, Quarries, &c.

4. Duration of Industrial Disputes in the Commonwealth, 1920.—In the following table particulars are given with respect to the number of disputes, workpeople directly and indirectly involved, working days lost, and estimated amount of loss in

wages respectively, consequent on the cessations of work which were recorded for the Commonwealth during the year 1920, classified under the adopted limits of duration :—

DURATION OF INDUSTRIAL DISPUTES IN THE COMMONWEALTH, 1920.

Limits of Duration.	No. of Disputes.	No. of Workpeople Involved.			Number of Working Days Lost.	Total Estimated Loss in Wages.
		Directly.	Indirectly.	Total.		
1 day and less	226	40,603	10,225	50,828	49,862	£ 49,610
2 days and more than 1 day ..	62	11,443	2,965	14,408	27,114	23,705
3 days and more than 2 days ..	43	7,286	1,687	8,973	26,739	23,056
Over 3 days and less than 1 week (6 days)	58	10,228	1,819	12,047	52,601	41,572
1 week and less than 2 weeks ..	66	10,359	3,100	13,459	107,364	77,022
2 weeks and less than 4 weeks ..	43	9,549	22,030	31,579	412,219	243,031
4 weeks and less than 8 weeks ..	24	6,027	10,839	16,866	539,639	332,125
8 weeks and over	32	7,024	382	7,406	656,527	433,595
Total	554	102,519	53,047	155,566	1,872,065	1,223,716

NOTE.—Similar figures for the years 1913 to 1919 will be found in previous issues of the Year Book and in the Labour Reports.

5. Industrial Disputes, Classified as to Causes, Commonwealth, 1914–1920.—The following table shows the number of disputes, number of workpeople involved, and the total number of working days lost in disputes which commenced during the years 1914 to 1920, classified according to principal cause :—

CAUSES OF INDUSTRIAL DISPUTES IN THE COMMONWEALTH, 1914 TO 1920.

Causes of Disputes.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
NUMBER OF DISPUTES.

(b) Other disputes re hours	16,855	23,374	1,598	62,560	20,551	15,760	37,486
3. Trades Unionism—							
(a) Against employment of non-unionists ..	92,720	31,145	48,881	87,600	21,894	279,804	24,900
(b) Other union questions	6,968	7,434	10,276	572,949	24,341	329,205	21,999
4. Employment of particular Classes or Persons ..	64,367	77,862	70,452	47,297	113,466	87,225	129,215
5. Working Conditions ..	584,289	82,322	81,511	211,971	93,468	32,029	128,967
6. Sympathetic ..	2,125	6,004	75,447	3,239,798	7,200	21,050	72,940
7. Other Causes ..	11,568	17,442	65,648	18,262	3,421	23,069	26,946
Total ..	1,090,395	583,225	1,678,930	4,599,658	580,853	6,308,226	1,872,065

It will be observed from the above table that the main causes of industrial disputes are "Wage" questions, "Working Conditions," and "Employment of Particular Classes or Persons." In each of the seven years, 1914-1920, the number of dislocations concerning wages exceeded those caused by any other question, having varied between a minimum proportion of 28 per cent. in 1917 and a maximum of 45 per cent. in 1916. The proportion attributed to this cause in 1920 was 36 per cent. The majority of the disputes classified under the heading, "Employment of Particular Classes or Persons," are stoppages of work for the purpose of protesting against the dismissal of certain employees, who, in the opinion of their fellow-workers, have been unfairly treated or victimised. This class of dispute occurs very frequently in the coal mining industry. The number of disputes over "Trade Union" questions and "Hours of Labour" has represented a fairly uniform proportion of the total number of disputes during the years under review. "Sympathetic" disputes were numerous during the years 1916 and 1917. The figures for the latter year were abnormal in comparison with the other periods. It may be mentioned, however, that the disputes which arose during that year in connection with the "time-card system" dispute were responsible for the increase in the number.

6. Results of Industrial Disputes, Commonwealth, 1913-20.—The following table shows the number of disputes, number of workpeople involved, and the number of working days lost in disputes throughout the Commonwealth during the eight years 1913-20, classified according to results:—

**INDUSTRIAL DISPUTES CLASSIFIED ACCORDING TO RESULTS,
COMMONWEALTH, 1913 TO 1920.**

Year.	No. of Disputes.				Number of Workpeople Involved in Disputes.				Total Number of Working Days Lost by Disputes.			
	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In favour of Employer.	Compromise.	Indefinite.	In Favour of Workpeople.	In Favour of Employer.	Compromise.	Indefinite.
1913	67	64	66	11	10,914	12,211	24,826	2,332	59,823	104,654	433,014	26,037
1914	118	98	110	11	21,224	18,242	30,396	1,187	129,995	119,819	829,265	11,316
1915	190	78	68	22	44,140	15,327	14,860	6,965	245,625	155,659	151,544	30,397
1916	223	178	84	23	70,588	36,670	23,296	40,129	886,010	253,084	476,302	63,534
1917	147	188	100	9	24,331	119,589	22,310	7,740	103,267	4,201,981	285,103	9,307
1918	92	100	93	13	13,780	15,998	23,739	2,922	101,207	177,223	280,045	22,878
1919	154	157	140	9	54,810	43,140	55,445	4,196	2,398,252	406,361	3,483,571	20,042
1920	183	199	168	4	30,399	61,947	62,811	409	180,345	911,156	777,175	3,389

It will be seen from the above table that, during the years 1913, 1914, 1915, and 1916 the disputes resulting in favour of workpeople exceeded those resulting in favour of employers. During 1917, 1918, 1919, and 1920, however, the position was reversed. A considerable number of disputes in each year resulted in a compromise, while certain disputes resulted in such a manner that they could not be definitely classed as in favour of either party.

7. Methods of Settlement of Industrial Disputes, Commonwealth, 1914-20.—The following tables shew the number of disputes, number of workpeople involved, and number of working days lost in industrial disputes during the seven years 1914-20, classified for the Commonwealth according to the adopted schedule of methods of settlement :—

METHODS OF SETTLEMENT OF INDUSTRIAL DISPUTES, COMMONWEALTH, 1914 TO 1920.

Methods of Settlement.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

**METHODS OF SETTLEMENT OF INDUSTRIAL DISPUTES,
COMMONWEALTH, 1914 TO 1920—continued.**

Methods of Settlement.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
NUMBER OF WORKING DAYS LOST.							
Negotiations—							
Direct between employers and employees or their representatives	803,709	384,425	563,828	551,484	222,846	632,269	827,985
By intervention or assistance of distinctive third party—not under Commonwealth or State Industrial Act	128,231	56,126	812,763	863,896	37,444	5,379,655	217,916
Under State Industrial Act—							
By intervention, assistance, or compulsory conference	4,256	20,537	31,696	159,799	57,559	94,557	69,436
By reference to Board or Court	120,685	15,418	48,022	48,352	151,472	8,460	19,236
Under Commonwealth Conciliation and Arbitration Act—							
By intervention, assistance, or compulsory conference	1,421	26,883	20,697	33,396	23,239	74,018	34,205
By Filling Places of Workpeople on Strike or Locked Out	4,402	1,533	9,060	908,596	35,298	46,029	160,562
By Closing-down Establishment Permanently	3,646	19,600	2,776	11,392	4,270	5,737	12,919
By other Methods	23,955	58,703	190,088	2,022,743	48,675	67,501	529,806
Total	1,090,395	583,225	1,678,930	4,599,658	580,853	6,308,226	1,872,065

In the above tables the methods of settlement of all disputes recorded during the past seven years are set out in comparative form. In all years it will be observed that direct negotiations between the employers and employees settled the majority of the disputes. The proportion of disputes so settled ranges between a minimum of 53 per cent. in 1917 and a maximum of 73 per cent. in 1914; in 1920 the proportion was 69 per cent. The numbers of dislocations which have been settled by compulsory conferences or the intervention and assistance of officials under State or Commonwealth Arbitration Acts have not varied greatly during the period under review. In connexion with the comparatively large numbers of disputes which are classified as having been settled "By other methods," it must be mentioned that a large number of stoppages of work occur each year, principally at the collieries, without any cause for such stoppages being brought officially under the notice of the employers or their representatives. Such stoppages usually last for one day, and work is resumed without any negotiations for a settlement of the trouble which caused the stoppage.

8. Industrial Disputes, Commonwealth.—Number and Magnitude during Calendar Years 1913 to 1920.—In the following table particulars are given of the number of industrial disputes, the number of workpeople involved, and the losses in working days and wages caused by disputes during each calendar year 1913 to 1920, classified according to industrial groups:—

**INDUSTRIAL DISPUTES, COMMONWEALTH. — NUMBER AND MAGNITUDE

§ 7. Retail Prices, House Rents, and Cost of Living.

1. *Introduction.*—In Labour Report No. 1, issued in December, 1912, the results of certain investigations into the subjects of Prices, Price-Indexes and Cost of Living in past years were published, and some account was given of the methods employed for the collection of the data and of the technique adopted in the computation of the results. A detailed examination of the theory upon which the calculation of the index-numbers is based was given, but being necessarily too technical for the ordinary reader, was relegated to Appendixes. In Reports Nos. 2, 5, 6, 7, 8, 9, 10, and 11, results of further investigations were included, and in Labour Bulletins Nos. 1 to 18, and in Quarterly Summaries of Statistics, Nos. 70 to 84, information was incorporated regarding variations in retail and wholesale prices, house-rent, and purchasing-power of money up to the end of 1920.

It must here suffice to state that the method adopted for the computation of the index-numbers is what may very properly be called the "aggregate expenditure" method. The first process is, of course, to work out the average price of each commodity included, and numbers (called "mass-units") representing the *relative* extent to which each commodity was on the average used or consumed are then computed. The price in any year of each commodity multiplied by its corresponding "mass-unit" represents, therefore, the relative total expenditure on that commodity in that year *on the basis of the adopted regimen*. It follows, therefore, that by taking for any year the sum of the price of each commodity multiplied by its corresponding "mass-unit," a figure is obtained which represents the relative aggregate or total expenditure of the community in that year on all the commodities, etc., included. By computing these aggregate expenditures for a series of years and taking the expenditure in any selected year as "base," that is, making the expenditure in that year equal to 1,000 units, the relative expenditure in any other year, that is to say, the "index-numbers," are readily ascertained. Numerical examples of the technique and methods adopted for the computation of index-numbers were given in Report No. 2 (pp. 44 and 45), and in Report No. 9 Appendixes I to IV., pp. 174 to 229.

2. Scope of Investigation.—It was pointed out in Report No. 1 that, in any investigation into the question of change in cost of living of a community, a careful distinction must be drawn between two things, viz. :—

- (a) Variations in the *purchasing-power* of money, and
- (b) Variations in the *standard of living*.

In Report No. 2, attention was drawn to the fact that the second element (b) can be limited, at any rate to some extent, by the exercise of self denial and thrift, and that such limitation is at the disposal of each individual; the former (a) is not subject to this possibility. Thus, from this aspect, social economics are concerned *primarily* with an accurate estimation of variations in the purchasing-power of money and only secondarily with the question of the general standard of living which has been reached. The first desideratum demands the selection of a suitable list of commodities, the quantities of each being taken in due proportion to their relative average consumption. The quantities in this list being kept constant, the cost of the whole group must then be ascertained. In this way a comparison may be made of the cost in different areas or districts at the same time, as well as the variation in any one place from time to time. This is the "aggregate expenditure" method explained above.

As explained in Report No. 1, special steps were taken to conduct the investigation back as far as 1901 for the capital towns only. The collection of current monthly returns as to prices and of quarterly returns of house rents commenced in 30 of the more important towns of the Commonwealth in January, 1912.

3. Commodities and Requirements Included.—The 47 items of expenditure included are divided into four groups, viz. :—(i) groceries and bread, (ii) dairy produce, (iii) meat, and (iv) house rent. These items cover about 60 per cent. of the total expenditure of a normal family. There are very cogent reasons for the restriction of the enquiries to the items mentioned. If the comparisons made are to be satisfactory, no confusion must arise between changes in the standard of living and changes arising from a variation of the purchasing-power of money. In order to avoid such confusion the items selected are such as are sensibly identical and identifiable in the various localities. The most important group of expenditure which is not included is clothing, the cost of which amounts to about 13 per cent. of the total expenditure. In Report No. 11 (page 26), a tabular statement was given furnishing particulars of the commodities and items included, the units of measurement for which prices are collected, and the mass-units shewing the relative extent to which each item is used or consumed. As the result, however, of a recommendation made by the Royal Commission on the Basic Wage, the Government has authorised the Bureau to extend its investigations to cover the whole of the ordinary expenditure of a household, and steps are being taken to give effect to the recommendation made. It is proposed, at an early date, to publish index numbers shewing

variations in the cost of clothing, fuel, and light, and other principal items of miscellaneous expenditure.

4. **Variations in the Purchasing-Power of Money in each Metropolitan Town, 1901 to 1920.**—In Labour Reports and Bulletins, and in recent issues of the Quarterly Summaries of Statistics, index-numbers were given for each of the four groups, and for all groups combined for each capital town since 1901, the expenditure in 1911 being taken in each case as base (=1,000). In this section summarised results only are given, firstly, for food and groceries; secondly, for house rent; and thirdly, for all groups combined—the weighted average expenditure for all capital towns in 1911 being taken in each case as base (=1,000). The index-numbers in each table are fully comparable with each other, that is to say, they shew not only the variations from year to year in each capital town, but also the relative cost as between the towns.

(i) *Food and Groceries.* The index-numbers thus computed for the three groups comprising groceries and food are shewn in the following table:—

RETAIL PRICES IN METROPOLITAN TOWNS, INDEX-NUMBERS FOR GROCERIES AND FOOD (GROUPS I, II, AND III.), 1901 TO 1920.

Town.	1901.	1906.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Sydney ..	917	964	989	1,124	1,131	1,156	1,396	1,520	1,540	1,549	1,783	2,148
Melbourne ..	965	945	935	1,082	1,024	1,091	1,411	1,462	1,412	1,466	1,620	2,056
Brisbane ..	965	959	1,018	1,102	1,042	1,078	1,373	1,426	1,406	1,495	1,762	2,052
Adelaide ..	1,028	982	1,020	1,154	1,119	1,215	1,487	1,532	1,445	1,554	1,719	2,132
Perth ..	1,184	1,237	1,346	1,345	1,267	1,302	1,483	1,542	1,505	1,486	1,772	2,050
Hobart ..	1,011	1,047	1,058	1,190	1,164	1,212	1,445	1,523	1,544	1,635	1,748	2,162
Weighted Average(a) ..	972	980	1,000	1,129	1,095	1,144	1,416	1,495	1,472	1,514	1,716	2,101

(a) For all capital towns.

The above figures are directly comparable in every respect; thus it will be seen that the same quantity of food and groceries, which cost £1,000 in the capital towns considered as a whole in 1911, would have cost £917 in Sydney in 1901, £1,346 in Perth in 1911, or £2,056 in Melbourne in 1920.

The weighted average retail price index-numbers for the six capital cities shew that the upward tendency of prices was temporarily arrested on two occasions since 1911—first in 1913, and, again, in 1917. The prices for Sydney shew a rise in every year since 1911; in 1917 Sydney and Hobart constituted exceptions to the decline experienced in all the other capitals; while in 1918 the figures for Perth only shewed a decline. In 1919 and 1920 increases were experienced in all the cities concerned. Comparing the results for 1920 with those for 1911 it will be seen that the extent by which prices increased, varied from 120 per cent. in Melbourne to 52 per cent. in Perth. It will be noticed, however, that prices were abnormally high in Perth in 1911.

(ii) *House Rent.* In the following table, index-numbers are given computed for the weighted average house rent in each of the capital towns from 1901 to 1920, taking the average rent for the six capital towns in 1911 as the base (=1,000). The average rent has been obtained for each town separately by multiplying the average predominant rent for each class of house (*i.e.*, houses having less than 4 rooms, 4 rooms, 5 rooms, 6 rooms, 7 rooms, and over 7 rooms) by a number ("weight") representing the relative number of houses of that class in the particular town. The sum of the products thus obtained, divided by the sum of the weights, gives the weighted average for all houses. The number of houses in each class for each town was obtained from the results of the 1911 census. It should be observed, therefore, that these index-numbers are based on the weighted average rents for all houses, and that they do not refer to any particular class of houses. The actual predominant rents for each class were given in appendixes to

Reports Nos. 1, 2, 5, 6, 7, 8, 9, 10, and 11, and an examination of these figures shews that for some classes of houses the increase has been greater, and in some less, than the general increase indicated in the following table.

HOUSE RENTS IN METROPOLITAN TOWNS.—INDEX-NUMBERS SHEWING
WEIGHTED AVERAGE RENTS (GROUP IV.), 1901 TO 1920.

Town.	1901.	1906.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Sydney ..	858	891	1,090	1,183	1,246	1,279	1,220	1,212	1,215	1,252	1,289	1,415
Melbourne ..	733	782	970	1,016	1,089	1,126	1,085	1,089	1,124	1,180	1,283	1,405
Brisbane ..	488	524	767	804	863	882	859	847	859	905	983	1,061
Adelaide ..	629	761	1,112	1,160	1,125	1,040	932	930	959	1,022	1,108	1,216

Hobart ..	667	686	805	829	887	914	928	928	951	956	1,134	1,373
Weighted Average(a) ..	751	793	1,000	1,063	1,118	1,135	1,081	1,081	1,098	1,143	1,215	1,333

(a) For all capital towns.

NOTE.—The above figures are directly comparable in every respect.

The figures given in the above table shew that from 1901 to 1914 house rents increased in all the capital cities, though varying in degree, from 14 per cent. in Perth to 81 per cent. in Brisbane, where, however, rents were very low in 1901. The weighted average index-number, which is, of course, largely dominated by the experience of the more populous cities of Sydney (with an increase of 49 per cent.) and Melbourne (54 per cent.) increased from 751 in 1901 to 1,135 in 1914, or by 51 per cent. This increase in the weighted average represents the accumulated results of increments of varying amount, in each of the years 1901-1914, without exception. These annual increments to rents were experienced in all the capital cities except Adelaide and Perth. Since 1916 rents have advanced in all the capital cities. The rent index-numbers for Perth for the years 1904-10 consistently followed a direction opposite to that taken by the same indices relating to the other cities, inasmuch as, instead of moving upward, they declined during each year, the aggregate result being a fall from 802 in 1903 to 667 in 1909, and, although they rose in 1910 to 696, they were even then below the level of 1903. This period of falling rents in Perth—in such striking contrast to the experience of all the other capital cities—was contemporaneous with a diminution almost to vanishing point of net immigration, which for many years had been considerable. A further factor in the arrest of the growth of population consisted in the reduction of public expenditure following upon the completion of large public works, while, at the same time, there was a falling-off in speculative ventures in gold-mining. Moreover, during this period there was a marked movement by residents of Perth to land settlement in the southern districts of the State.

A further striking feature in the movements of rents, as shewn by the weighted average index-numbers given in the foregoing table, is the decline registered in the years 1915-1917. This fall was probably, in some measure, due to the circumstance that wives and other dependents of soldiers, for social reasons, gave up their separate establishments and shared houses or apartments, thus reducing the demand for house accommodation. The Government regulations forbidding the increase of rents of houses tenanted by soldiers' dependents would, also, have a restraining influence on any tendency for rents to rise. It will be seen that in 1918 rents were again at the 1914 level, and that in both of the years 1919 and 1920 fairly substantial increases occurred.

(iii) *Food, Groceries, and House Rent combined.* The weighted averages for all four groups are of importance, as indicating the general results of this investigation so far as the purchasing-power of money is concerned. The following table shews the

index-numbers for groceries, food, and house rent for each metropolitan town, the weighted average cost for the six capital towns in 1911 being taken as base (=1000):—

PURCHASING-POWER OF MONEY IN METROPOLITAN TOWNS.—PRICE INDEX-NUMBERS^(a) SHEWING WEIGHTED AVERAGE RESULTS FOR ALL GROUPS (GROCERIES, DAIRY PRODUCE, MEAT, AND HOUSE RENT), 1901 TO 1920.

Town.	1901.	1906.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
Sydney ..	893	934	1,031	1,148	1,178	1,206	1,323	1,394	1,406	1,427	1,580	1,847
Melbourne ..	870	878	950	1,055	1,051	1,105	1,277	1,309	1,294	1,349	1,481	1,788

Adelaide ..	864	891	1,058	1,157	1,121	1,143	1,259	1,285	1,245	1,335	1,468	1,756
Perth ..	1,027	1,024	1,126	1,154	1,128	1,143	1,222	1,266	1,246	1,289	1,420	1,617
Hobart ..	869	899	954	1,042	1,050	1,090	1,233	1,278	1,301	1,356	1,496	1,837
Weighted Average ^(b) ..	880	902	1,000	1,101	1,104	1,140	1,278	1,324	1,313	1,362	1,510	1,785

(a) As the price index-number increases, the purchasing-power of money diminishes.
(b) For all capital towns.

NOTE.—The above figures are directly comparable in every respect.

From this table, which presents the index-numbers for the combined results from food and groceries and rents, it will be seen that, on the basis of the weighted average for the six capital cities, the decline (alluded to in (i) of this sub-section) in the prices of food and groceries during 1913 was more than counterbalanced by the rise in house rents. This, however, was not the case with regard to Melbourne, Brisbane, or Perth, for each of which the combined index shews a decline. Adelaide, alone, shewed a decrease in house rents in 1913, consequently the decline in the combined index-number for that city was the most marked. In 1917 the fall in the prices of food and groceries was sufficient to outweigh the increase in house rents and so effect a slight decrease in the combined index-number. As in 1913, the net effect in Sydney and in Hobart did not conform to the experience indicated by the weighted average. In 1918 the upward movement was experienced in all the cities except Perth, while in 1919 and 1920 it was general throughout.

The abnormal movements of the prices of food and groceries, and of house rents, during the war years present features of particular interest. It will be seen that, on the basis of the weighted averages, prices of food and groceries rose in 1915 by about 24 per cent. over 1914, and continued on a somewhat higher level, whereas the weighted average for house rents fell in 1915 by 4.8 per cent., and remained below the 1913 level until 1918. The combination of house rents with prices of food and groceries has had the effect of very materially modifying the index of prices, or, in other words, the purchasing-power of money, as compared with the similar index based on food and groceries only. In 1918, 1919, and 1920 there were increases in both prices of food and groceries and house rents, the combined results for 1920 being an increase of 18.2 per cent. over 1919, 56.6 per cent. over 1914, and 78.5 per cent. over 1911. The increase in the purchasing-power of money index-number between 1920 and 1914 has varied between the capital cities from 41 per cent. in Perth to 69 per cent. in Hobart, while between 1920 and 1911 it has varied between 44 per cent. in Perth and 93 per cent. in Hobart.

5. **Variation in Purchasing-Power of Money, 1901 to 1920.**—The tables in paragraph 4 give the relative cost in the six capital towns of food, groceries, and house rent from 1901 to 1920 in the form of index-numbers. The figures have been converted into a monetary basis in the next table, and shew the sums which would have to be paid in each town and in each year in order to purchase such relative quantities (indicated by the mass-units) of the several commodities, and to pay such sums for house rent as would in the aggregate cost £1, according to the weighted average prices and rents in the six capital towns in 1911.

(a) See remarks on page 49 of Labour Report No. 11, with reference to house rents.

A table shewing the retail price index-numbers (food and groceries) for each of the thirty towns for various months in the year since July, 1914, appeared in previous issues, but consideration of space precludes its repetition in the present issue. This table is, however, given in Labour Report No. 11, issued by this Bureau.

§ 8. Investigation into Purchasing-Power of Money in 150 Towns in Commonwealth.

1. **Introduction.**—In the earlier investigations with regard to the variations in the purchasing-power of money, inquiries were restricted to the 30 towns mentioned in the preceding table. To provide a wider field of observation, investigations were extended in November, 1913, to 100 towns, and in November, 1915, to 150 towns. The index-numbers for these 150 towns are computed from the retail prices ruling in November of each year.

2. **Map shewing the relative Purchasing-Power of Money in various Localities.**—The index-numbers for each of the 150 towns referred to in the preceding paragraph are tabulated on the inset on page 1033, and are accompanied by a map of Australia. The position of any town may be located on the map by the reference numbers printed on the left-hand margin of the table. The weighted average cost for the 100 towns in 1913 has been taken as the base, and the index-numbers are comparable throughout. Separate index-numbers are given for food, groceries, and rent of five-roomed houses (Column headed "A"), and for food and groceries only (Column headed "B").

§ 9. Wholesale Prices.

1. **General.**—The results of an investigation into wholesale prices in Melbourne from 1871 to the end of September, 1912, were given in some detail in Report No. 1 of the Labour and Industrial Branch. Summarized results for later years are included in later Reports of the same Branch.

The index-numbers up to the year 1911 are based on the prices of eighty commodities, but since that year the number has been increased to ninety-two.* The methods followed for the computation of the wholesale price index-numbers are the same as those adopted in regard to retail prices. The commodities included, the units of measurement for which the prices are taken, and the mass-units, indicating the relative extent to which each commodity is used or consumed, are shewn in a tabular statement in Report No. 11 (page 68).

2. **Index-Numbers and Graphs.**—Index-numbers have been computed for each group of commodities, as well as for all groups together. The index-numbers for the several groups, and for all groups together, are shewn in the following table.

(i) **Table of Index-Numbers.** The index-numbers have in each case been computed with the prices in the year 1911 as base. They shew, for each of the years specified, the expenditure necessary, if distributed in purchasing the relative quantities (indicated by the mass-units) of the several commodities concerned, to purchase what would have cost £1,000 in 1911. Thus, in the last column it may be seen that the cost of the relative quantities of the various commodities was 1,229 in 1871, and 974 in 1901, as compared with 1,000 in 1911, 1,934 in 1918, 2,055 in 1919, and 2,480 in 1920. In other words, prices were lower in 1911 than in either 1871, 1914, 1918, or 1920, and the purchasing-power of money in 1911 was, accordingly, greater. Again, prices were lower in 1901 than in 1911, and the purchasing-power of money in the former year was, therefore, greater.

* In the computation of the index-numbers for years prior to 1911, the aggregate expenditure on 30 commodities in 1911 is taken as base (= 1,000), while for later years the aggregate expenditure on 92 commodities is taken.

1918 ..	2,416	2,360	1,444	1,454	1,422	2,385	2,686	3,225	1,934
1919 ..	2,125	2,363	1,996	1,651	1,516	2,343	2,851	2,898	2,055
1920 ..	2,298	2,624	2,439	2,209	1,918	3,279	3,226	2,825	2,480

NOTE.—The figures given in this table are comparable in the vertical columns, but are not directly comparable horizontally. The index-numbers are reversible.

(ii) *Graphs.* The index-numbers are shewn for each group and for all groups combined in the graphs on page 1034. The heavy line, repeated on each graph, represents the index-numbers for the weighted average for all groups, and is shewn so that comparison may be made between the price levels for all commodities and those for the commodities comprised in each group separately. The index-numbers for the individual groups are represented by the light lines. The broken lines at the commencement of each graph shew the index-numbers for the separate years 1861 and 1866, the continuous records commencing with the year 1871. The actual index-numbers for the whole period were given in Report No. 1.

3. *Seasonal Fluctuations and Tables of Prices.*—Information as to seasonal fluctuations in wholesale prices was given in Report No. 2 (page 64), and tables of prices of each commodity were given in Appendixes to the Reports of the Labour and Industrial Branch of this Bureau.

4. *Fluctuations in Wholesale Prices, July, 1914, to July, 1921.*—Since the outbreak of war, prices of many commodities have increased considerably. This is shewn in the following table in which the index-numbers are given for each group for the month of July, 1920, taking July, 1914, the last month before the outbreak of war, as base (=1,000) for each group:—

**MELBOURNE WHOLESALE PRICES.—VARIATIONS BETWEEN JULY, 1914,
AND JULY, 1920, AND JULY, 1921.**

It will be seen that, on the basis of the weighted average for all the groups of commodities included in the computation, prices in 1920 were 167 per cent. higher than in 1914. During 1921, however, prices fell and in July, 1921, were 58.9 per cent. higher than in July, 1914.

§ 10. Control of Trade and Prices.

1. **General.**—Shortly after the outbreak of war, a conference of Federal and State Ministers met to discuss the financial position and other matters, and it was decided that for the purpose of controlling the prices of foodstuffs, each State should introduce *uniform* legislation, since it was obvious that this was necessary in view of all the circumstances. Particulars of the various Acts passed by the State Governments were given in Labour Bulletin No. 6, September, 1914, pages 132–147. The same publication shews that there was great diversity in regard to the operations of the various authorities created in the different States.

As a further outcome of this conference, in addition to the various State Boards and Commissions, a Federal Royal Commission, consisting of the Hon. Alfred Deakin (chairman), the Hon. Dugald Thomson, formerly Minister for Home Affairs, and Mr. G. H. Knibbs, C.M.G., Commonwealth Statistician, was appointed to collect information and report upon such matters as the supply of foodstuffs and other necessities required by and available for Australia during the war and cognate matters. This Commission ceased to exercise its functions after the 30th October, 1914.

2. **Federal Control of Prices.**—In March, 1916, the Federal Government created a Prices Adjustment Board with authority to fix the prices of flour, bread, bran, and pollard. The Board fixed the prices of flour, bran, and pollard in every milling centre in Australia. Prices of bread were fixed in upwards of 1,000 separate towns, after investigations had been made as to the cost of manufacture, distribution, etc. An important judgment of the High Court, as to the powers of Government to fix prices, was obtained as the result of the conviction of a Melbourne suburban baker, by the local magistrate, for selling bread at a higher rate than that fixed by the Prices Adjustment Board. This conviction was appealed against, but the High Court, by a majority decision, affirmed that in matters affecting the safety of Australia the Government, under the War Precautions Act, had plenary powers, and that the decision as to what is necessary rests with the Executive and not with the judicial authority. After this judgment, the scope of the investigations and activities of the Prices Adjustment Board were considerably enlarged, and an exhaustive list of commodities was declared to be “necessary commodities.” Later, a Commissioner was appointed in each State to make investigations, and to make recommendations to the Minister as to the necessity for fixing maximum selling prices of various commodities.

Shortly after the appointment of these Commissioners, the members of the Prices Adjustment Board resigned in a body, and the control of prices was placed in the hands of a Minister acting upon the recommendations of State Commissioners. The Commissioner for Victoria acted also as Chief Prices Commissioner. Prices were fixed, by regulations under the War Precautions Act, for a large number of commodities. In May, 1919, the Commonwealth Government released from the control of the Prices Commissioners many articles, trade in which had been regulated during the war.

In July, 1919, control ceased of all but a few commodities, the more important of which were butter, cheese, and flour. In August, 1920, the Commonwealth organization for the fixing of prices was abolished. Prices, however, of necessary commodities were not permitted to remain uncontrolled except in Tasmania. In New South Wales, Queensland, and South Australia price fixing was resumed under the authority of Acts already in existence, while in Victoria and Western Australia necessary legislation was passed to enable the Governments of these States to deal with the subject.

The following statement shews the Acts which have been passed, and the Bills introduced by the Governments of the various States for the purpose of controlling prices :—

New South Wales.—In New South Wales, control of prices was resumed in July, 1919, under authority of the "Necessary Commodities Control Act, 1914." In January, 1920, this Act was superseded by the "Necessary Commodities Control Act, 1919," and in December, 1920, by the "Profiteering Prevention Act, 1920," which is still in force.

Victoria.—In Victoria, an Act entitled the "Necessary Commodities Control Act, 1919," was passed. Under authority of this Act a "Fair Profits Commission," consisting of three members, was appointed for the purpose of regulating prices of necessary commodities in Victoria. This Act was repealed in 1920 and the Commission disbanded, thus bringing to an end all State control of prices.

Queensland.—Queensland resumed control of prices in December, 1919, under authority of "The Control of Trade Act, 1914." In March, 1920, this Act was superseded by "The Profiteering Prevention Act, 1920," under which a "Commissioner of Prices" was appointed to control prices in Queensland.

South Australia.—State control was resumed in August, 1919, under authority of the "Prices Regulation Act, 1914." In November, 1919, this Act was superseded by the "Prices Regulation Act, 1919," under which a "Prices Regulation Commission," consisting of three members, was appointed to control prices in South Australia. This Act was repealed in September, 1921, and consequently all control of prices ceased.

Western Australia.—In Western Australia, State control of prices was not resumed until December, 1919, when an Act, entitled "The Prices Regulation Act, 1919," was passed. Under this Act three Commissioners were appointed for the control of prices in Western Australia. In 1920 the "Prices Regulation Act, and Continuance Act, 1920" was passed, and is still in force.

Tasmania.—In Tasmania, a "Necessary Commodities Control Bill, 1919," was introduced, but was not passed.

3. Control of House Rents.—No attempt was made by the Commonwealth Government to control rents generally, but War Precautions Regulations afforded special protection to persons connected with the Defence Forces against increases in rent. During the war the Inter-State Commission conducted an investigation into Housing Accommodation and Rents. Fair Rents Courts are in operation in New South Wales, under the "Fair Rents Act, 1915," and in Queensland under "The Fair Rents Act, 1920." Recently a "Fair Rents Bill" was introduced in Tasmania, but at the time of writing had not become law. In the other States no legislative regulation of house rents is in force.

SECTION XXXIV.

MISCELLANEOUS.

§ 1. Immigration, Passports, and Aliens Registration.

(A) The Encouragement of Immigration into Australia.

1. **Introduction.**—Various measures have from time to time been adopted by the Commonwealth and State Governments, as well as by private societies and individuals, with a view to promoting the immigration of suitable classes of settlers into Australia. The activities of the Commonwealth Government (which is vested with constitutional powers in regard to immigration under section 51, xxvii., of the Constitution Act 1900) with respect to the encouragement of immigration, were practically confined to advertising the resources and attractions of Australia by means of exhibitions and in handbooks, newspapers, and periodicals. With the outbreak of war the immigration operations were almost entirely suspended.

2. **Joint Commonwealth and States Immigration Scheme.**—In 1920 an arrangement was arrived at between the Commonwealth and State Governments under which the Commonwealth is to be responsible for the recruiting of immigrants abroad and for their transport to Australia; whilst the State Governments, on their part, are to advise the Commonwealth as to the numbers and classes of immigrants which they are prepared to receive. Briefly stated, the Commonwealth will select the immigrant according to the requirements of the State concerned and bring him to Australia; and on his arrival the State Government will assume the responsibility for placing him in employment or upon the land. Incidentally, the Commonwealth will undertake all publicity and propaganda in connexion with the encouragement of immigration.

3. **Assisted and Nominated Passages.**—The Commonwealth Government will donate £12 towards the passages of approved settlers for Australia. Further assistance will be granted by way of loans in special cases. Under the joint scheme the immigrants entitled to part-paid fares are divided into two classes—"Assisted" immigrants and "Nominated" immigrants. "Assisted" immigrants are those who are originally recruited by the Commonwealth overseas. "Nominated" immigrants are those nominated by persons resident in the Commonwealth, and the nominators, who must submit their applications through the Officers in Charge of the State Immigration Offices in the various capital cities, are required to undertake to look after their nominees upon arrival, and to see that they do not become a burden upon the State.

4. **Overseas Settlement Committee's Free Passage Scheme.**—Free passages to Australia will be granted by the Overseas Settlement Committee, London, to British ex-service men and their dependents and to British ex-service women who are accepted as suitable settlers under the Joint Commonwealth and State Immigration Scheme. This concession will remain in force until the end of 1921, and every Australian of good repute is eligible to nominate British ex-service men and women and to have their nominees landed in Australia free of charge to both nominator and immigrant.

Intending settlers or immigrants may, on application, obtain full information from—

THE DIRECTOR OF MIGRATION AND SETTLEMENT,
AUSTRALIA HOUSE,
THE STRAND,
LONDON, W.C.2,

or,

THE COMMONWEALTH SUPERINTENDENT OF IMMIGRATION,
MELBOURNE,
AUSTRALIA.

(B) The Regulation of Immigration into Australia.

1. **Pre-Federal Restrictions.**—(i) *Alien Races.* The several States of Australia had regarded it as desirable, long prior to Federation, to impose certain restrictions upon the admission of persons wishing to become inhabitants of those States. The influx of Chinese for example, was limited by stringent statutes, and later, general Acts were passed in some of the States which had the effect of restricting the immigration of other—principally Asiatic—races.

(ii) *Undesirable Immigrants.* Further restrictions were placed upon the admission of persons who were undesirable as inhabitants, either for medical or moral reasons, or who were likely to be an economic burden upon the community.

2. **Powers and Legislation of the Commonwealth.**—(i) *Constitutional Powers.* By Chap. I, Pt. V., Sec. 51, xxvii. and xxviii. of the Commonwealth Constitution Act the Parliament of the Commonwealth is empowered to make laws with respect to immigration and emigration and the influx of criminals. (See page 16 herein.)

(ii) *Legislation.* The powers above specified have now been exercised by the Commonwealth Government, and the laws passed in pursuance thereof supersede the previously existing State laws. The present Commonwealth Acts dealing with Immigration are the Immigration Act 1901-1920 and the Contract Immigrants Act 1905. A summary of the provisions of these Acts (excepting the provisions of the Amending Immigration Act 1920, which are given below), containing particulars regarding the admission of immigrants, prohibited immigrants, the liabilities of shipmasters and others, and kindred matters will be found in preceding Year Books (see Year Book, No. 12, pp. 1166-1168).

3. **Amending Immigration Act 1920.**—The principal provisions of this Act, which came into operation as from the 2nd December, 1920, are those prohibiting the entry of (a) any person who advocates the overthrow by force or violence of the established Government of the Commonwealth or of any State or of any other civilized country, or of all forms of law, etc.; (b) for a period of five years, any person of German, Austro-German, Bulgarian, or Hungarian parentage and nationality, or Turk of Ottoman race; (c) any person over 16 years of age who, on demand by an officer, fails to prove that he is the holder of a valid passport; (d) any person who has been deported under any Act.

Section 9 of the War Precautions Act Repeal Act also provides for prohibiting the entry of any British subject who upon being required to make and subscribe an oath or affirmation of loyalty fails to do so.

4. **Statistics.**—The following tables shew the number of persons who desired but were not permitted to land, those who were allowed to land, and the nationality of the persons admitted:—

PERSONS ADMITTED OR REFUSED ADMISSION TO COMMONWEALTH UNDER PROVISIONS OF IMMIGRATION RESTRICTION ACT, 1911 TO 1920.

1919 ..	96,331	84,751	6,007	16,897	18,507	1,163	80	223,736
1920 ..	69,135	19,302	4,151	4,877	6,803	1	82	104,351

(C) Passports.

Provision is made in the Immigration Act 1920 (see paragraph 3 on page 1038) for requiring the production of passports by all persons over 16 years of age who are entering the Commonwealth. Similarly, the Passports Act 1920 provides that no person over the age of 16 years shall leave the Commonwealth unless—

- (a) he is the holder of a passport or other document authorizing his departure; and
- (b) his passport has been viséed or indorsed in the prescribed manner for that journey, and the visé or indorsement has not been cancelled.

Among the exceptions to this requirement are natural-born British subjects leaving for New Zealand, Papua, or Norfolk Island; members of the crew of any vessel who sign on in Australia for an overseas voyage and who satisfy an officer that they are by occupation seafaring men; aboriginal natives of Asia, or of any island in the East Indies, or in the Indian or Pacific Oceans. The charge for a Commonwealth passport is 10s., and for a visé 2s.

(D) Registration of Aliens.

The Aliens Registration Act 1920, which replaces the War Precautions (Aliens Registration) Regulations, was proclaimed to come into operation as from the 1st January, 1921. Aliens who have already been registered under the Regulations referred to are not required to re-register, but all other aliens residing in Australia, including their children after attaining the age of 16 years (unless natural-born British subjects) are under obligation to register at the police station nearest to their place of abode. All aliens entering the Commonwealth as passengers, master, or members of the crew of an overseas ship are registered immediately after the vessel's arrival at the first port of call in Australia. Aliens residing in Australia are required to give notice at the nearest police station before changing their place of abode. Special arrangements have been made for saving *bona fide* tourists, commercial travellers, theatrical artists, etc., from the necessity of reporting temporary changes of residence. An alien resident of Australia must not change his name without first giving notice to the aliens registration officer at the nearest police station.

§ 2. Patents, Trade Marks, and Designs.

1. Devolution of Jurisdiction upon the Commonwealth.—Prior to the establishment of Federation, and for a few years thereafter, each Australian State possessed independent jurisdiction in respect of patents, copyrights, trade marks, and designs, and had, with the exception of Tasmania in regard to copyrights, enacted its own laws. Any person, therefore, who desired to obtain the grant of a patent, or the registration of any copyright, trade mark, or design had necessarily, with the exception aforesaid, to incur the trouble and expense of making separate applications in each State. The Commonwealth Constitution Act conferred upon the Federal Parliament power to legislate respecting these matters. (See page 16 hereinbefore.) The Patents Act of 1909 applied the laws relating to patents for inventions to the Territory of Papua.

The State Acts, though in general based upon the Imperial Statutes dealing with these subjects, were not wholly governed by them. The Commonwealth Acts, both in regard to principle and practice, have the same general foundation as the Imperial Statutes, but in some respects have been modified and brought into line in accordance with Australian experience.

2. Patents.—(i) *General.* The first Commonwealth Patents Act was passed in 1903, and was amended in 1906, 1909, 1910, 1915 and 1916. (See page 34 *ante*.) Under these Acts, which are administered by a "Commissioner of Patents," the powers and functions exercised under the States Acts became vested in the Commonwealth. Comparatively small fees, totalling £8, are now sufficient to obtain for an inventor protection throughout the Commonwealth and the Territory of Papua, and the only renewal fee (£5) is payable before the expiration of the seventh year of the patent, or within such extended time, not exceeding one year, and upon payment of further fees as may be allowed. Particulars in regard to the terms under which patents are granted, publications, etc., of the Commonwealth Patents Office, have been given in full in preceding issues of the Official Year Book. (See Year Book 12, p. 1170 *et seq.*) Limits of space preclude their repetition in the present issue.

(ii) *Applications Filed, Provisional Specifications Accepted, and Letters Patent Sealed.*

The numbers of individual inventions in respect of which applications were filed in the Commonwealth during each year from 1911 to 1920 inclusive are shewn in the following table. The number of applications accompanied by provisional specifications and the number of patents sealed in respect of applications made in each year are also shewn.

PATENTS.—APPLICATIONS FILED AND LETTERS PATENT SEALED IN THE COMMONWEALTH, 1911 TO 1920.

Year	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.

3. Trade Marks.—The remarks made concerning the unification of the patent system of the Commonwealth apply equally to trade marks. Under the Trade Marks Act 1905, which came into force on the 2nd July, 1906, the Commissioner of Patents is appointed to act also as “Registrar of Trade Marks.” The Trade Marks Act of 1905 was amended by the Patents, Trade Marks, and Designs Act 1910, assented to on the 14th November, 1910, by the Trade Marks Act 1912, and by the Trade Marks Act 1919, and is now cited as the Trade Marks Act 1905-1919. The principal objects of the amending Act were to enlarge the scope of marks capable of registration, and repeal the provisions of the Act of 1905 relating to the “Workers Trade Mark,” the provisions regarding which were held to be unconstitutional. Special provisions for the registration of a “Commonwealth Trade Mark” are contained in the Act of 1905 and are applicable to all goods included in or specified by a resolution passed by both Houses of Parliament that in their opinion the conditions as to remuneration of labour in connexion with their manufacture are fair and reasonable. (See also Official Year Book 12, p. 1173.)

4. Designs.—The Designs Act of 1906 came into operation on the 1st January, 1907, being subsequently amended by the Patents, Designs and Trade Marks Act 1910, and the Designs Act 1912, and is now cited as the Designs Act 1906-12. Under this Act a Commonwealth Designs Office has been established and the Commissioner of Patents appointed “Registrar of Designs.” (See also Official Year Book 12, p. 1174.)

5. Applications for Trade Marks and Designs.—The following table gives particulars of applications for trade marks and designs received and registered under the Commonwealth Acts from 1911 to 1920 inclusive:—

APPLICATIONS FOR TRADE MARKS AND DESIGNS RECEIVED AND REGISTERED UNDER COMMONWEALTH ACTS, 1911 TO 1920.

Applications.	1911.	1912.	1913.	1914.	1915.	1916.	1917.	1918.	1919.	1920.
RECEIVED.

Fees collected under Commonwealth Acts	4,280	354	89	3,978	312	94	4,330	318	114	5,314	346	101	12,607	368	107
Total	4,301	354	89	4,006	312	94	4,344	318	114	5,506	346	101	12,616	368	107

6. **Enemy Patents and Trade Marks.**—On the outbreak of the European war the Commonwealth Government deemed it advisable to extend the powers of the Governor-General of the Commonwealth during the continuance of hostilities with reference to patents, trade marks, and designs, the property of alien enemies.

Acts Nos. 15 and 16 of 1914 were accordingly passed by the Commonwealth Parliament in November, 1914, giving the Governor-General power to make the necessary regulations. Further information in this connexion will be found in Year Book No. 13, p. 1104.

§ 3. Copyright.

1. **Copyright Legislation.**—Prior to the 1st January, 1907, the date on which the Commonwealth Copyright Act of 1905 came into operation, the subject of copyright was regulated by the laws of the separate States. In general, the provisions of State laws were similar to those of the Imperial Copyright law, including the law of 1842 and the earlier unrevoked or subsequent Acts, the most important of which were the Colonial Copyright Act 1847 and the International Copyright Act of 1886. They were also generally included under the British international relations embracing the Berne-Paris provisions of the International Copyright Union and the reciprocal relations with the United States of America, with the exception that in the Austria-Hungary Treaty, New South Wales and Tasmania were not parties, because they did not exercise the right of ratification especially reserved to individual colonies.

Though the Commonwealth Copyright Act of 1905 took the place of the State Copyright Acts formerly in force, it left unaffected existing rights under the State laws, but transferred the administration thereof to the Commonwealth. Provision was also made under the law of 1905 for the registration of International and State copyrights. The principal features of the Act of 1905 are given in previous issues of the Year Book (see No. 9, p. 1119). This Act was repealed by the Copyright Act of 1912, which was assented to and became operative on the 20th November, 1912. Subject to modifications relating to procedure and remedies, the Commonwealth law of 1912 adopted the British Copyright Act of 1911, and declared the latter law to be in force within the Commonwealth as from the 1st July, 1912. The British Act extends throughout the whole of His Majesty's dominions, but it is not to be in force in a self-governing dominion unless enacted by the legislature thereof either in full or with modifications relating exclusively to procedure and remedies necessary to adapt the Act to the circumstances of the dominion. (See also Official Year Book No. 12, p. 1176.)

By an Order-in-Council made by the Government of the Commonwealth of Australia, simultaneously with the issue of a Proclamation by the President of the United States of America on the 15th March, 1918, reciprocal protection was extended to citizens of the respective countries in regard to unpublished literary, dramatic, musical and artistic works in which copyright existed on the date mentioned, or may thereafter subsist under the laws of these countries. The enjoyment of the rights conferred by the Order-in-Council is subject to the accomplishment of the conditions and formalities prescribed by law of the United States of America, or, in other words, registration at the Library of Congress, Washington, D.C., U.S.A., is made a condition precedent to the protection of Australian copyright property in the United States of America.

Further details relative to the provisions of the Act of 1912 will be found in previous issues of the Year Book (see No. 8, p. 1066).

2. Applications for Copyright.—The following table gives particulars of copyright applications received and registered under the Commonwealth Acts from 1916 to 1920 inclusive:—

APPLICATIONS FOR COPYRIGHT RECEIVED AND REGISTERED UNDER COMMONWEALTH ACTS, 1916 TO 1920.

Year.	Copyrights.			
	Literary.	Artistic.	International and State.	Total.
APPLICATIONS RECEIVED.				
1916	845	180	..	1,025
1917	835	141	..	976
1918	816	261	4	1,081
1919	923	216	1	1,140
1920	922	203	..	1,125
APPLICATIONS REGISTERED.				
1916	797	168	..	965
1917	793	140	..	933
1918	750	232	3	985
1919	850	197	..	1,047
1920	879	185	..	1,064

The revenue from copyright for the years 1916, 1917, 1918, 1919, and 1920, was £268, £256, £309, £284 and £287 respectively.

§ 4. Old-age and Invalid Pensions.

1. General.—In previous issues an account has been given of the introduction of the old-age pension system into Australasia, together with a detailed description of the Commonwealth Invalid and Old-age Pensions Act of 1908, which became operative on 1st July, 1909. (See Year Books, Nos. 3 to 8.) An amendment of this Act, assented to on 30th September, 1916, made a very important alteration. Section 24 originally enacted that the pension “shall not exceed the rate of twenty-six pounds per annum in any event, nor shall it be at such a rate as will make the pensioner's income, together with pension, exceed fifty-two pounds per annum.” It was amended (a) by omitting the words “twenty-six pounds,” and inserting in their stead the words “thirty-two pounds ten shillings”, and (b) by omitting the words “fifty-two pounds” and inserting in their stead the words “fifty-eight pounds ten shillings.” Section 26 originally enacted that if an applicant for pension was in receipt of board or lodging, the actual or estimated

value or cost of this should be counted as income, to an extent not exceeding five shillings per week. This was amended by omitting the words "five shillings" and inserting in their stead the words "seven shillings and sixpence."

In 1919 the Act was again amended, and the rate of pension raised to £39 per annum and the maximum amount allowable to £65 per annum. The estimated value of board and lodging was raised to 10s. per week.

In 1920 special provision was made for permanently blind persons, by which the amount of pension may be at such a rate (not exceeding £39) per annum, as will make his income, together with the pension, equal to an amount not exceeding £221 per annum, or such other amount as is declared to be a basic wage.

2. Amounts of Old-age Pensions.—Details regarding Old-age Pensions for the several States as at 30th June, 1920, are as follows:—

COMMONWEALTH OLD-AGE PENSIONS, YEAR ENDING 30th JUNE, 1920.

Particulars.	N.S.W.	Vic.	Q'land.	S. Aust.	W. Aust.	Tas.	C'wealth.
Claims examined during year ending 30th June 1920 ..	5,973	3,820	2,093	1,204	820	603	14,513

3. Sexes of Old-age Pensioners.—Of the 99,170 persons in receipt of pensions at 30th June, 1920, 39,217 (or 39½ per cent.) were males, and 59,953 (or 60½ per cent.) were females. Details for the several States are as follows:—

SEXES OF OLD-AGE PENSIONERS, 30th JUNE, 1920.

State.	Males.	Females.	Total.	(a) Masculinity
New South Wales	15,515	21,843	37,358	71.03
Victoria	11,135	18,430	29,565	60.42
Queensland	5,384	7,338	12,722	73.37
South Australia	3,535	6,293	9,828	56.17
Western Australia	1,965	2,826	4,791	69.53
Tasmania	1,683	3,223	4,906	52.22
Total	39,217	59,953	99,170	65.40

(a) Number of males to each 100 females.

4. Ages and Conjugal Condition of Old-age Pensioners Granted Pensions during 1919-20.—The recorded ages of the 12,705 persons to whom pensions were granted during the year 1919-20 varied considerably, ranging from 2,327 at age 60 to one at age 96. Particulars for quinquennial age-groups are as follows :—

AGES AND CONJUGAL CONDITION OF PERSONS GRANTED OLD-AGE PENSIONS DURING 1919-20.

Age Groups.	Males.				Females.				Grand Total.
	Single.	Married.	Widowed.	Total.	Single.	Married.	Widowed.	Total.

Total ..	1,433	1,638	361	3,432	1,238	824	1,039	3,101	6,533

8. **Cost of Administration.**—Under the State régime the cost of administration differed considerably in the several States, and for 1908-9 represented in New South Wales 4.17 per cent. of the amount actually paid in pensions. In Victoria for the same year the corresponding percentage was 0.70. During the year 1919-20 the total cost to the Commonwealth of administering the Old-age and Invalid Pensions Department was £74,120, or about 1.6 per cent. of the amount actually paid in pensions. Details concerning the cost of administration for 1919-20 are as follows :—

	£
Salaries	25,987
Temporary assistance	4,565
Services of magistrates, registrars, clerks of courts, and police ..	3,861
Commission to Postmaster-General's Department, at 12s. 6d. per £100 paid	24,812
Postage and telegrams	4,597
Other expenses	10,298
Total	£74,120

The actual sum disbursed in Old-age and Invalid Pensions in the financial year 1919-20, apart from the cost of administration, was £4,411,629.

The following table gives detailed statistical information concerning the working of the Act for the last five years :—

INVALID AND OLD-AGE PENSIONS, 1916 TO 1920.

Financial Year ended 30th June—	Number of Pensioners.			Amount Paid in Pensions.	Amount Paid to Asylums for Maintenance of Pensioners.	Total Payment to Pensioners and Asylums.	Cost of Administration. § 5. Maternity Allowance.

The Federal Parliament, during the session of 1912, passed an Act (assented to on 10th October, 1912) providing under certain circumstances for the payment of maternity allowances. The scope and main provisions of the Act will be gathered from the following sections and sub-sections, given in full :—

4. "Subject to this Act, there shall be payable out of the Consolidated Revenue Fund, which is hereby appropriated accordingly, a maternity allowance of Five pounds to every woman who, after the commencement of this Act, gives birth to a child, either in Australia or on board a ship proceeding from one port in the Commonwealth or a Territory of the Commonwealth to another port in the Commonwealth or a Territory of the Commonwealth."
5. (1) "A maternity allowance shall be payable in respect of each occasion on which a birth occurs, and the child is born alive, or is a viable child, but only one allowance shall be payable in cases where more than one child is born at one birth."
6. (1) "The maternity allowance shall be payable only to women who are inhabitants of the Commonwealth or who intend to settle therein."
- (2) "Women who are Asiatics or are aboriginal natives of Australia, Papua, or the islands of the Pacific, shall not be paid a maternity allowance."

The following table gives a statistical summary of the most important points in connexion with the working of the Maternity Allowance Act since 10th October, 1912, when the first payments were made :—

COMMONWEALTH MATERNITY ALLOWANCE.—SUMMARY, 1913 TO 1920.

§ 6. War Pensions.

1. **General.**—An Act for the provision of war pensions was passed in 1914 and amended in 1915 and 1916. Its scope can be determined by the following extract from Section 3. "Upon the death or incapacity of any member of the forces whose death or incapacity results, or has resulted, from his employment in connexion with warlike operations in which His Majesty is, or has since the commencement of the present state of war been engaged, the Commonwealth shall, subject to this Act, be liable to pay to the member or his dependents, or both, as the case may be, pensions in accordance with this Act." Full details as to rates of pension, etc., are given in the section on Defence, page 934.

2. **Number of Pensioners, 1920.**—The following statistical tables shew the position of affairs as at the 30th June, 1920 :—

PARTICULARS OF WAR PENSIONERS AT 30th JUNE, 1920.

Classification.	In respect of Deceased Members.	In respect of Incapaci- tated Members.	Total.
(i) Dependents of members of the Forces—			
(a) Wives or widows	8,498	35,689	44,187
(b) Children under 16 years	12,445	44,454	56,899
(c) Children over 16 years	222	186	408
(d) Widowed mothers of unmarried members	7,455	1,979	9,434
(e) Other mothers of members	14,585	3,095	17,680
(f) Fathers	3,418	171	3,589
(g) Brothers and sisters	1,346	380	1,726
(h) Others	774	494	1,268

South Australia	444,882	Total	5,872,770
Western Australia	543,323		

The cost of administration in 1919-20 was £118,619.

§ 7. Local Option.

1. **General.**—The principles of local option as to the sale of fermented and spirituous liquors have been applied in all the States of the Commonwealth. The last State to adopt these principles was Western Australia, where provision was made for a system of local option by the Licensing Act 1911. Upon the outbreak of war in 1914, various enactments were made in several of the States relative to the control of the liquor traffic. While not in any way pertaining to the scheme of local option, these measures are probably affecting public opinion in regard to this matter.

2. **New South Wales.**—(i) *Local Option.* The Act in force relating to local option in this State is the Liquor Act 1912, which consolidated the laws relating to publicans, brewers, and other persons engaged in the brewing, manufacture or sale of liquor. The local option vote is taken in every electorate on the day fixed for the poll therein at each general election, but special provision was made under the Liquor Amendment Act 1916 to suspend the taking of the local option vote at the general election in 1917. The option with regard to licenses extends to public-houses, wineshops, and clubs, and the persons entitled to vote are those entered on the Parliamentary electoral rolls. The first local option vote under the Liquor (Amendment) Act of 1905 was taken at the general election in 1907, and the second at the election in 1910, while the vote in 1913 was taken under the Liquor Act 1912. In 1907, when the first local option vote was taken, there were 3,023 hotels in existence; of this number 293 were ordered to be closed at varying dates. At the election of 1910 there were 2,869 hotels, and of these, 28 were ordered to be closed. At the 1913 election there were 2,719 hotels, of which 23 were closed before July, 1917. The number of wine licenses at the time of the vote of 1907 was 633, of which

46 were abolished. In 1910, 5 wine shops out of 565 were closed, and in 1913, 7 out of 514 were ordered to be closed. The resolutions to be submitted, and the effects of such resolutions, if carried, are given *in extenso* in previous issues of this book. The following statement shows the number of electorates in which each of the resolutions was carried :—

NEW SOUTH WALES.—EFFECTS OF LOCAL OPTION VOTES, 1907, 1910, and 1913.

Particulars.	General Election, 1907.		General Election, 1910.		General Election, 1913.	
	Elector-ates.	Votes.	Elector-ates.	Votes.	Elector-ates.	Votes.
<i>Results in favour of—</i>						
(a) Continuance ..	25	209,384	76	324,973	75	380,707
(b) Reduction ..	65	75,706	14	38,856	15	44,453
(c) No license ..	Nil	178,580	Nil	212,889	Nil	245,202

(ii) *Liquor Referendum Act 1916.* On 17th February, 1916, a proclamation was issued, in terms of the War Precautions Act, by the Minister for Defence, ordering that licensed premises be closed at 6 p.m. in the County of Cumberland, and within a radius of 5 miles from any military camp; a week later the closing hour was varied from 6 to 8 p.m. Subsequently the Liquor Referendum Act 1916 was passed in the State Parliament to decide by referendum the hour of closing for premises licensed under the Liquor Act 1912. At the referendum the electors were enabled to record votes in order of preference for each hour from 6 to 11 p.m. inclusively. The count of the first preference votes resulted in a large majority for 6 o'clock, and from 21st July, 1916, all licensed premises and registered clubs in New South Wales have been closed at that hour.

(iii) *Liquor Amendment Act 1919.* This Act, which was assented to on the 23rd December, 1919, provides for the continuance of the six o'clock closing of hotels, and suspends Local Option pending a referendum on the question of prohibition, which must be taken within eighteen months after the passing of the Act. Other clauses provided for the establishment of the Licences Reduction Board and the Compensation Assessment Board, the former to regulate the number of licences, to determine the amount of compensation to be paid in cases where cancellations are recommended and to fix compensation fees payable by licensees; and the latter to assess the cost to the State for compensation if prohibition be carried. The Government has announced that it does not intend to take the referendum provided for in the Act.

3. *Victoria.*—The Acts dealing with the subject of local option as to the sale of fermented and spirituous liquors, and with the compulsory closing of hotels in this State, are the Licensing Act 1915, No. 2683, and the Licensing Act 1916, No. 2855.

Part XIII. of the Act of 1915 relates to the subject of local option. Under this Part the local option provisions were to come into operation at the first general election subsequent to 1st January, 1917. The 1916 Act provided that the first local option polls were not to be held till the second general election following on the above date. In the meantime, the Licences Reduction Board, which by the same Act was constituted the Licensing Court for the whole State, was empowered to continue the work of closing hotels, which it has carried out since 1906.

The provision of a statutory number of hotels for each licensing district disappeared with the old conditions relating to closing. Part XIII. providing that the number of licences of the different descriptions existing on 1st January, 1917, should not thereafter be exceeded. The Court, up to the election on 21st October, 1920, was authorized to close hotels in any licensing district, as if resolution B (Reduction), under the local option provisions, had been carried in each district. This allows of a reduction proportionate to the existing number, the maximum closing not to exceed one-fourth. Power has also been given to accept the surrender of any victualler's license irrespective of the

number otherwise closed. A greater number must not be closed than can be compensated, and the old limitation, that hotels licensed after 1886 were not entitled to compensation, has been removed.

(i) *The Licenses Reduction Board.* This Board was established by the 1906 Act, with power to reduce the number of licensed victuallers' premises, up to December, 1916, in districts where there were more than the statutory number of licenses. It had also the duty of fixing and awarding compensation to the owners and licensees of the closed hotels. The compensation was provided by an annual percentage fee of 3 per cent. on all liquor purchased by licensed victuallers. The compensation fund obtained in this manner has risen from £48,233 in 1907, to £63,623 in 1915, which was the highest figure reached. In 1916, with the restricted hours of trading, the amount received was £60,396. The licensing fund which was distinct from the compensation fund, was protected by a provision that the remaining hotels, by a *pro rata* assessment, had to make up annually the amount of the license fees lost by the closing of hotels; the license fees for hotels were of varying amounts, based on the annual municipal value of the premises, ranging from £5 to £50, in four classes, viz., £5, £15, £25, £50. By the 1916 Act, this system of fixed fees was abolished, as was also the *pro rata* assessment of lost fees and the 3 per cent. compensation fees. The two funds referred to above were merged into one, and a system of percentage fees was applied to all licenses for the sale of liquor in the State, whether wholesale or retail, and the amount received is paid into one fund. The expenses of operating the Licensing Act are a charge on this fund. In addition, £23,000 is paid annually to the Police Superannuation Fund, and £68,000 to municipalities which formerly granted licences. The balance, amounting in 1920 to £94,000, is available for compensation to owners and licensees of closed hotels.

All vendors of liquor pay in proportion to the benefit they derive from the license. The amount charged the wholesale trade is 4 per cent. on the cost of all liquors sold to non-licensed persons, no charge being made on sales to other licensed vendors. The retail trade is charged 6 per cent. on liquor purchases, except the holders of Australian wine licenses, who are charged 4 per cent.

The maximum compensation payable is still governed by the trading results and the rents of the years 1903-6, though a concession was made in the Amending Act by which licensees are entitled to be compensated on a three years' tenure, if they are in possession of a lease of that extent when deprived of their license. Under the 1916 Act 317 hotels have been closed and £210,575 awarded as compensation to 316 hotels, there being no claim as to one hotel. The total number of hotels closed up to the 31st December, 1920, was 1,371, and the compensation paid, £751,426, or an average of £548 per hotel. The following table shews particulars of the operations of the Board and Court up to the 31st December, 1920:—

VICTORIA.—OPERATIONS OF LICENSES REDUCTION BOARD, 31st DECEMBER, 1920.

Particulars.	Licenses in December, 1906.			Hotels Deprived of Licenses.	Compensation Awarded.		Hotels Surrendered.	Compensation Awarded.	
	Number in Existence.	Statutory Number.	(a) Number in Excess.		Owner.	Licensee.		Owner.	Licensee.
					£	£		£	£
Metropolitan and Suburban ..	1,020	877	401	371	280,692	60,358	17	8,673	1,884
Country ..	2,428	1,622	967	646	257,058	41,687	(b) 337	90,018	10,456
Total ..	3,448	2,499	1,368	1,017	537,750	102,045	354	99,291	12,340

(a) In some districts the number of hotels was below the statutory number; in these districts the total number of hotels less than the statutory number was 418. (b) Including 6 Roadside licenses.

(ii) *Early Closing of Hotels.* Consequent on the war, an Act (No. 2584) was passed, and came into operation on 6th July, 1915, restricting the hours for the sale of intoxicating liquors, the restriction being limited to the duration of the war. Sale was permitted

only between the hours of 9 a.m. and 9.30 p.m. By a subsequent Act (No. 2776), tenants of licensed premises were given the right to apply to the Licenses Reduction Board to adjust the rents of their premises. Four hundred licensees took advantage of this provision. The hours of trading in the evening were further restricted as from 25th October, 1916—six o'clock being fixed as the time of closing. These hours were made permanent by the 1919 Act.

The provisions of the Rent Adjustment Act were extended so as to enable the Board to deal with applications for reductions of rent arising from fresh restrictions. Between 300 and 400 additional applications were received, the amounts involved being substantial.

Special provision was made in the 1916 Act for the granting of victuallers' licenses in the Mallee. Power was given to proclaim areas containing 500 resident electors, when petitions signed by a majority of the residents were lodged, and where the Licensing Court, after enquiry, recommended this course.

On the proclamation of an area, a poll of the electors is to be taken at which, if the poll is to be recognised, one-third of those enrolled must vote. A majority of those voting decides whether a license is to issue or not. Hotels must be at least twelve miles apart, except at Mildura, where special provision is made for the issue of three licenses. Under these provisions six areas have been proclaimed, in five of which polls were taken and resulted in favour of license. Licenses have now been granted at Mildura, Murrayville, Ouyen, Manangatang, and Ultima.

The first local option poll under Part XIII. of the 1915 Act was held at the General Election on 21st October, 1920. In one of the licensing districts—Peechelba—there are no licenses. In the 216 remaining licensing districts the result was as follows:—Continuance, 143; Reduction, 71; No Licence, 2. The total votes for each resolution were Continuance, 278,707; Reduction, 36,025; No Licence, 212,254.

4. Queensland.—The local option clauses of the Liquor Acts of 1912–1914 provide for the following:—

- (i) The conditions under which new licenses may be granted until the completion of the business of the Licensing Court in April, 1916.
- (ii) The continuance of the local option clauses of the Licensing Act of 1885 until the 31st December, 1916.
- (iii) The institution of a new scheme, under which electors from and after the year 1917 will have the opportunity of voting every three years on the question of reduction or increase of licenses.

(i) *New Licenses.* With regard to the granting of "new licenses" from the 1st April, 1913, and until the completion of the business of the Licensing Court in April, 1916, it was provided that no new licensed victualler's or wine-seller's or provisional licenses should be granted, unless at a local option vote of the electors of the local option area in which the premises or proposed premises are situated a resolution "that new licenses shall be granted in this local option area" were carried.

If the resolution were carried, the Court might, but need not, grant applications; but if the resolution were not carried, the Court might not grant any application during the said years in the said local option areas.

The Acts of 1912 and 1914 provided that a local option vote following on an application for a license might be taken in any of the years 1913, 1914, 1915, and 1916 in a local option area, but having been taken once should not be taken again during those years in the same local option area. During 1913 a vote was taken in ten districts on the resolution "that new licenses be granted." In five of these the resolution was carried, the other five districts declaring against any increase in the number of licenses. In 1914, sixteen districts voted on the same resolution, in eleven of which it was carried, while in 1915, sixteen districts also voted, the resolution being carried in ten cases.

(ii) *Continuance of Present System until 1917.* With the exception of the third resolution, viz., "that no new licenses be granted," the local option provisions of the Licensing Act of 1885 remained in full force and effect until the 31st December, 1916, with certain modifications and additions. These will be found fully described in previous issues of the Year Book (see No. 6, p. 1177).

(iii) *General Local Option.* The first vote might be taken in the year 1917, either on the same day as the election of senators, or if no Senate election were held in 1917 before the 30th September, then on a day to be appointed by the Governor-in-Council.

The vote should be taken on the request of one-tenth of the number of electors in an area, which was defined in the request, and such area might be:—(a) an electoral district, (b) an electoral division of an electoral district, or (c) a group of two or more divisions of an electoral district, provided that the whole of such local option area were wholly comprised within one and the same electoral district.

There should be a separate request for each resolution on which a vote was required to be taken.

The resolutions on which a vote might be taken were:—(a) reduction by one-fourth of the existing number, (b) further reduction by one-fourth of the existing number, (c) further reduction by one-fourth of the existing number, (d) prohibition, and (e) new licenses.

On the 5th May, 1917, 57 polls were taken, 55 being on the question of reduction and two being on the question of increase. Reduction was carried in only four local option areas. The total number of licenses which ceased to exist as from 1st January, 1920, was 17. Increase was carried in two areas.

In previous issues of the Year Book (see No. 6, p. 1178) will be found fuller reference to the effect of the carrying of any of the resolutions.

On the 13th December, 1919, twelve polls were taken, eleven being on the question of increase or new licenses and one on the question of reduction of licenses. Increase was carried in five local option areas, but in two of these a sufficient number of electors did not vote, 35 per cent. being required under Section 175 of the Liquor Acts. The poll in one area resulted in a majority against reduction.

The Liquor Act Amendment Act of 1920 provides that every local option vote must be taken in the month of May in every third year, on a day to be fixed by the Governor in Council, but no vote may be taken on the same day as the State General Election or a Commonwealth General or Senate Election.

(iv) *State Option, Prohibition, and Continuance of Present System.* The Liquor Act Amendment Act of 1920 provides for triennial polls throughout the State on the following resolutions:—

- (a) State management of manufacture, importation, and sale of fermented and spirituous liquors.
- (b) Prohibition of manufacture, importation, and retail of fermented and spirituous liquors to take effect from 1st July, 1925, in case of the poll in 1920 or 1923, and for subsequent polls from 1st July in the third year after the carriage of resolution (b).
- (c) Continuance of the present (or if (a) or (b) has been carried—return to the earlier) system of manufacture, importation and retail of fermented and spirituous liquors.

The first poll under this provision was held on 30th October, 1920, that date having been fixed by the Governor in Council. Voting was compulsory under a compulsory preferential system. State management was everywhere defeated. In 14 areas majorities were recorded for (b); and in 58 areas continuance was carried with a majority for the whole State of 38,992 votes.

5. *South Australia.*—In this State the subject of local option is now regulated by Part VIII. of the Licensing Act 1917.

Under this Act, each electoral district for the House of Assembly is constituted a local option district, and each electoral district may be divided into local option districts by proclamation of the Governor. A quorum consisting of 500 electors, or one-tenth of the total number of electors, whichever be the smaller number, in any district may petition to the Governor for a local option poll. The persons entitled to vote at the poll are those whose names appear on the electoral roll and who reside in the local option district.

The resolutions to be submitted, together with the effects such resolutions would have, are set out in detail in previous issues of the Year Book (see No. 6, p. 1179).

(i) *Local Option Poll.* On the 2nd April, 1910, local option polls were taken under the Act of 1908 in twenty-four districts; the electors in the remaining nine local option districts did not petition for polls. A resolution that the number of licenses be reduced was carried in only one district; in the remaining twenty-three districts a resolution that the number of licenses be not increased or reduced was carried. At the general election of the House of Assembly, held on the 10th February, 1912, no local option polls were held in any local option district. On the 27th March, 1915 (the same day as the Parliamentary elections), a local option poll was taken in the Flinders Southern (Port Lincoln) local option district, when the resolution "that the number of licenses be not increased or reduced" was carried. There have been no further polls in any of the districts up to the end of 1920.

(ii) *Early Closing of Hotels.* On the 27th March, 1915, a referendum was held as to the hour for the closing of bar-rooms in licensed premises. Out of a total of 178,362 votes cast, 100,418 were cast in favour of closing bar-rooms at 6 p.m., those in favour of closing at 11 p.m. being 61,362. Electors had the choice of voting for hours other than the two mentioned, but the votes so cast were comparatively few. No polls have since been taken.

(iii) *Re-proclamation of Districts.* Local option districts were re-proclaimed on the 29th November, 1917, the districts, which number thirty-five, being given in the *Government Gazette* of the same date.

6. *Western Australia.*—The law relating to local option in Western Australia is contained in Part V. (sections 75 to 86) of the Licensing Act 1911, which was assented to on 16th February, 1911, and came into force on the 7th April following. Prior to the passing of this Act there was no provision for any system of local option in Western Australia.

The resolutions to be submitted under the above-mentioned Act and the effect such resolutions would have, are given in detail in previous issues of the Year Book (see No. 6, p. 1180).

The first vote under the Act of 1911 was a limited poll, taken on 26th April, 1911, the main question being confined (as prescribed by the Act when the vote is taken prior to 1920) to a resolution "that the number of licences be increased," the only other questions submitted being those of State control of new publicans' general licenses and State management throughout all licensing districts. Only one district voted for increase, and there were majorities for State control and State holding of all new publicans' general licenses. On 30th April, 1921, the first full poll was taken, and in accordance with the provisions of the Act the four main questions were Continuance, Increase, Reduction, or No License. The resolutions for Continuance, Reduction, or Increase were carried if a majority in the number of votes cast was in favour of any of those resolutions. No License, however, was not carried unless three-fifths of the votes cast were in favour thereof and moreover 30 per cent. of the electors in the district had voted for the resolution. Where resolution D (No License) was not carried the votes in favour of it were to be added to the votes for resolution C (Reduction); and similarly where resolution B (Increase) was not carried the votes in favour of it were to be added to those for resolution A (Continuance). For the purpose of the poll the State was divided into Licensing Districts which to all intents and purposes, with a few exceptions, coincided with the equivalent Electoral Districts, the Assembly Electoral Rolls being utilized.

In no district was No License carried with a sufficient majority and in no district was Increase passed. The final result, after adding the votes for Increase and No License to the votes for Continuance and Reduction respectively as shewn above, was that 10 districts voted for Reduction and 32 for Continuance. The results where Continuance was carried are negative, no action being required. Where Reduction was carried the licenses in existence continue till the end of the current year, and during that period the Licensing Courts must reduce the number of licenses according to the rates set out in the Licensing Act. This provides that there must be a reduction of one license, and there

may, in the discretion of the Court, be a reduction of a quarter of the number in the district. The Act further provides that if the number of licenses in the districts exceeds 12 the number must be reduced by at least 2; and if the number exceeds 24, but is less than 36, by at least 3; and if the number is 36 or over by at least 4. This provision, however, does not affect the general discretion given to the Bench to reduce to three-fourths.

The licenses to which local option applied are Publicans' General Licenses, Hotel Licenses, Wayside House Licenses, Australian Wine and Beer Licenses, and Australian Wine Licenses; and in dealing with the question of reduction the word "license" is used in a collective sense, and it is in the discretion of the Bench whether the reduced license will be a Publican's General License or any of the others mentioned above. In coming to its determination the Bench has to classify the licenses, considering in the first place the convenience of the public and the requirements of the district, and then taking into consideration the number of offences against the licensing laws of which licensees have been guilty and the general conduct of their houses. The result of the poll (the first full poll) was:—

RESULT OF LOCAL OPTION POLL, 30th APRIL, 1921.

Continuance. A.	Increase. B.	Reduction. C.	Prohibition. D.	Do you vote that all new Publicans' General Licenses be held by the State?		Are you in favour of State Management throughout all Licensing Districts?	
				Yes.	No.	Yes.	No.
37,710	2,165	5,940	32,302	30,154	24,377	28,915	24,938
39,875		38,242					

7. *Tasmania*.—In this State the subject of local option is dealt with in Part VI. (sections 72 to 84) of the Licensing Act 1902, as subsequently amended by section 8 of the Licensing Act 1908, which later Act, however, did not come into full operation until the first of January, 1917. Other Acts which formerly dealt with the subject, but are now repealed, are the Licensing Acts 1889–1890, the Innkeepers Relief Act 1894, and the Licensing Act Amendment Act 1898. Under the Act of 1902, opposition to the grant of a license may be made (i) by any resident ratepayer, (ii) by petition of ratepayers resident in the neighbourhood, or (iii) by local option poll.

The conditions under which applications may be made to the Licensing Bench, opposing the granting of licenses, are set out in detail in previous issues of the Year Book. (See No. 6, p. 1181.)

(i) *Local Option Poll*. Any number of ratepayers not less than seven, resident in the neighbourhood of the house in respect of which a certificate for a hotel license has been applied for, may require, by petition lodged with the Clerk of Petty Sessions, that a poll of the ratepayers resident in the neighbourhood be taken upon the question whether such certificate be granted or not. If a majority of the votes taken be against the granting of the certificate the Licensing Bench must refuse to grant it.

An application refused is not to be renewed within three years.

(ii) *Early Closing of Licensed Premises*. A referendum on the question of the closing time for the sale and supply of liquor on licensed premises (6 Geo. V., No. 63) was taken on the 25th March, 1916, when 42,713 votes were cast in favour of closing at six o'clock p.m., against 26,153 votes in favour of ten o'clock, and 3,951 votes for other hours. The majority in favour of closing at six o'clock over all other hours was 12,609, and the Licensing Act (No. 2) of 1916 gives effect to the wishes of the electors.

§ 8. Preferential Voting.

In previous issues of the Year Book, a description in detail has been given of the systems of preferential voting now in force in the States of Victoria, Queensland, Western Australia, and Tasmania. It is not intended to repeat the description in the present issue. It is interesting to note that the system of preferential voting was introduced into elections for the Federal House of Representatives by Act No. 27 of 1918, which amended the previous electoral law. Section 124, sub-section (a) reads as follows:—

“Where his (the voter's) ballot-paper is a ballot-paper in accordance with Form F in the Schedule—he shall place the number 1 in the square opposite the name of the candidate for whom he votes as his first preference, and shall give contingent votes for all the remaining candidates by placing the numbers 2, 3, 4 (and so on, as the case requires) in the squares opposite their names so as to indicate the order of his preference for them.”

This regulation rectifies one of the serious anomalies of the old system of voting.

§ 9. Valuation of Commonwealth Production.

1. Value of Production.—The want of uniformity in methods of compilation and presentation of Australian statistics renders it an extremely difficult task to make anything like a satisfactory valuation of the various elements of production. At present there is so little accurate statistical knowledge regarding such industries as forestry, fisheries, poultry, and bee-farming, that any valuation of the production therefrom can only be regarded as the roughest approximation. As a matter of fact, complete information as to value of production in all States is available in regard to the mining industry alone, and even in this case adjustments have to be made before the returns are strictly comparable. Careful estimates have been made in connexion with the value of production from the agricultural and pastoral industries, which, it is believed, in the main give fairly accurate results. In the case of manufactories, prior to 1909, five of the States collected statistics of the value of production, while for the sixth State, Tasmania, an estimate has been prepared which it is believed gives a fair approximation. The returns given in the following table are fuller and more approximate than those which have been given previously, and the figures furnished for 1909 and subsequent years may be taken as substantially correct. The table hereunder shews the approximate value of the production from all industries during the years 1909 to 1919–20:—

ESTIMATED VALUE OF PRODUCTION FROM INDUSTRIES, 1909 TO 1919–20.

Year.	Agriculture.	Pastoral.	Dairy, Poultry, and Bee-farming.	Forestry and Fisheries.	Mining.	Manufacturing (a)	Total.
	£1,000.	£1,000.	£1,000.	£1,000.	£1,000.	£1,000.	£1,000.
1909 ..	41,056	50,864	15,064	4,462	23,036	39,713	174,195
1910 ..	39,752	56,993	17,387	4,789	23,222	45,598	187,741
1911 ..	38,774	50,725	19,107	5,728	23,494	50,767	188,595
1912 ..	45,754	51,615	20,280	6,432	25,645	57,022	206,748
1913 ..	46,162	57,866	20,341	6,338	25,810	61,586	218,103
1914 ..	36,052	60,265	21,562	6,419	22,275	62,922	209,495
1915 ..	73,769	65,607	21,156	5,777	22,428	62,883	251,620
1916 ..	60,207	89,939	26,949	5,505	23,606	64,205	270,411
1917 ..	57,967	93,435	31,326	5,523	25,581	69,797	283,629
1918 ..	58,080	98,297	33,738	7,137	26,156	75,261	298,669
1919–20 ..	72,234	109,062	38,830	10,170	19,725	98,162	348,183

(a) These amounts differ from those given in Section XIII., Manufacturing Industries, owing to certain products which are there included having been included in Dairy Farming and Forestry in this table.

2. Relative Productive Activity.—The relative output or production per head of population measured quantitatively cannot be gauged from a mere statement of the total value of production from year to year. If measured by mere value, increase of price would have the effect of making an equal production with that of a time when prices were lower, and shew an increase which would, of course, be misleading. For example, the annual figures shewing the estimated value of production from the Commonwealth industries do not directly shew whether there has been any increase in the *quantity* produced, since the price-level at the time is itself a factor in the determination of the values. Before, therefore, any estimate of the relative increase or decrease in production (that is, in the relative quantity of output) can be formed, the variations due to the price element must be eliminated. This is done in the following table, in which Column I. shews the estimated *value* of production (a) in the aggregate and (b) per head of mean population. In Column II. the estimated value of production per head of population is shewn in the form of index-numbers with the year 1911 as base; that is to say, the production per head in 1911 is made equal to 1000, and the values for the other years computed accordingly. In Column III. Wholesale and Production price index-numbers are given; it is assumed that these index-numbers reflect, with substantial accuracy, variations in Wholesale and Production prices in the Commonwealth as a whole. The figures in Column IV. are obtained by dividing the figures for each year in Column II. by the corresponding figures in Column III. They shew the estimated relative productive activity per head of population, taking the year 1911 as the basic or standard year, the fluctuations due to variation in prices having been eliminated.

ESTIMATED RELATIVE PRODUCTIVE ACTIVITY IN COMMONWEALTH FOR THE YEARS SPECIFIED, 1871 TO 1919-20.

Year.	I.		II.	III.		IV.	
	Estimated Value of Production.		Relative Value of Production per Head (Year 1911 = 1,000).	(a)	(b)	Estimated Relative Productive Activity Index-Numbers (Year 1911 = 1,000).	
	(a) Total. (000 omitted)	(b) Per Head of Population.		Wholesale Price Index-Number (Year 1911 = 1,000).	Production Price Index-Number (Year 1911 = 1,000).	(a)	(b)

1910 ..	187,741	42.43	1,028	1,000	973	1,028	1,057
1911 ..	188,595	41.28	1,000	1,000	1,000	1,000	1,000
1912 ..	206,748	43.68	1,058	1,170	1,101	904	961
1913 ..	218,103	44.77	1,085	1,088	1,050	997	1,033
1914 ..	209,495	42.40	1,027	1,149	1,266	894	811
1915 ..	251,620	51.02	1,236	1,604	1,426	771	867
1916 ..	270,411	55.47	1,344	1,504	1,498	894	897
1917 ..	283,629	57.47	1,392	1,662	1,604	838	868
1918 ..	298,669	59.37	1,438	1,934	1,763	744	816
1919-20 ..	348,183	66.36	1,608	2,312	2,110	696	762

(a) Relative Production computed by application of Wholesale Price Index-numbers. (b) Index-numbers computed by application of Production Price Index-numbers.

The total production from all industries during 1919-20 was £348,183,000, equal to an average of £66.36 per inhabitant.

In Year Book No. 5 (page 1217) will be found the value of production in each State at decennial intervals since 1871, and for the year 1909. Details for individual States are not available for subsequent years owing to discontinuance by the Customs Department of the collection of statistics of interstate trade.

§ 10. Norfolk Island.

1. **Area, Location, etc.**—Norfolk Island, discovered by Captain Cook in 1774, is situated in latitude $29^{\circ} 3' 45''$ south, longitude $167^{\circ} 58' 6''$ east. Its total area is 8,528 acres, the island being about 5 miles long and 3 miles wide. From Sydney it is distant 930 miles, and from New Zealand 400 miles. The coast line is 20 miles, and its form that of an irregular ellipse. Except on the south-west, inaccessible cliffs rise from the water's edge. The climate is equable, the temperature ranging between 56° and 82° with a mean of 68° . The average annual rainfall is 55 inches. It has been said that the salubrious climate coupled with the beauty of its land and sea scapes should combine to render Norfolk Island "the Madeira of the Pacific."

2. **Settlement.**—The first colonisation, in 1788, was by Lieutenant King, who in H.M.S. *Sirius* established a small penal station as a branch settlement of that at Port Jackson. The settlement was abandoned in 1806, and thence for 20 years its chief use was as a whaling station and place of call for British warships.

From 1826 to 1855 it was again made a penal station. In 1844 it was annexed to Van Diemen's Land (Tasmania).

The descendants of the *Bounty* mutineers, having become too numerous to subsist on Pitcairn Island, were removed thence to Norfolk Island in 1856. The new community numbered 193—94 males and 99 females—and were the descendants of British sailors and Tahitian women.

In 1856 the island was severed from Tasmania, and created a distinct and separate settlement under the jurisdiction of New South Wales. In 1897 it was made a dependency under the Governor of that Colony, and was administered by the Chief Secretary's Department through a resident Chief Magistrate, in whom was vested the executive government of the settlement, and the penal supervision of its affairs. In 1913, however, a Bill was passed by the Federal Parliament providing for the taking over of the island as a territory of the Commonwealth. The Act came into force on 1st July, 1914, and the island is now administered by the Department of Home and Territories, Melbourne, through an Administrator and Chief Magistrate.

3. **Population and Live Stock.**—The population on 31st December, 1919, was 340 males, and 391 females, a total of 740. Births in 1919 numbered 15, and deaths 9. The latest returns of live stock shew that there are on the island 1,979 cattle, 699 horses, 548 sheep, and 198 pigs. In addition there are about 6,000 head of poultry. At the Census (4th April, 1921) the population was 717—339 males and 378 females.

4. **Production, Trade, etc.**—The soil throughout is rich, and is specially suitable for the cultivation of citrus fruits, bananas, and (in parts) coffee. Various other sub-tropical fruits thrive. During 1918–19 the production of oranges was given as 24,335 bushels; lemons, 220,970 bushels; bananas, 222,800 dozen. About 52,000 bushels of guavas, 839 dozen pineapples, and 6,840 bushels of passion fruit were also raised, as well as 44,764 lbs. of coffee. Local production of butter was estimated at 16,000 lbs. Similar information for 1919–20 is not available, except for butter, the yield of which was returned at 12,840 lbs. The island is visited annually by schools of whales, both of the sperm and hump-backed variety, and whaling was at one time an important industry, but in recent years it has been allowed to languish. Preparations were, however, in progress for a revival of the industry, but were dislocated by lack of shipping. Edible fish in large variety are found in abundance in the ocean waters in the vicinity of the island. In 1919–20 the imports

were valued at £16,932. The exports were valued at £13,727, the chief items being lemon peel, £4,582; lemon juice, £3,290; and hides, £755. Small quantities of fruit and fruit pulp, passion fruit juice, seeds, fish, whale oil, wool, and timber were also exported. Nearly all the export trade was with the Commonwealth, only small amounts going to New Zealand and the South Sea Islands. Under ordinary circumstances a monthly steam service was maintained with Sydney, but in 1919-20 the arrivals from Sydney consisted of six steamers and one schooner, while three steamers arrived from New Zealand, and two from Fiji. Communication was afforded with New Zealand twice a year by the Melanesian Missionary Yacht "Southern Cross," but the Mission has practically completed arrangements for the transfer of its headquarters from Norfolk Island to some island nearer the centre of its field of operations. The "all red" cable from Great Britain via Vancouver, Fanning Island and Fiji bifurcates at Norfolk Island, one line connecting with New Zealand, the other with Brisbane.

5. **Social Condition.**—Education is free and compulsory up to the age of fifteen years. The school is under the N.S.W. Department of Public Instruction, with standards corresponding to the State public schools, but the salaries and allowances of the teachers are paid by the Norfolk Island Administration. The number of scholars enrolled on the 30th June, 1920, was 136 (68 boys and 68 girls).

The magistrate's court has criminal jurisdiction in all crimes except capital offences, civil jurisdiction in all matters, and authority to grant probate and letters of administration.

§ 11. Lord Howe Island.

1. **Area, Location, etc.**—Between Norfolk Island and the Australian coast is Lord Howe Island in latitude 31° 30' south, longitude 159° 5' east. It was discovered in 1788. The total area is 3,220 acres, the island being seven miles in length and from one-half to one and three-quarter miles in width. It is distant 436 miles from Sydney, and in communication therewith by monthly steam service. The flora is varied and the vegetation luxuriant, with shady forests, principally of palms and banyans. The highest point is Mount Gower, 2,840 feet. The climate is mild and the rainfall abundant, but on account of the rocky formation only about a tenth of the surface is suitable for cultivation.

2. **Settlement.**—The first settlement was by a small Maori party in 1853; afterwards a colony was settled from Sydney. Constitutionally, it is a dependency of New South Wales, and is included in the electorate of Sydney. A Board of Control manages the affairs of the island and supervises the palm seed industry referred to hereunder.

3. **Population.**—The population at the Census of 3rd April, 1921, was 65 males, 46 females—total 111.

4. **Production, Trade, etc.**—The principal product is the seed of the native or *Kentia* palm. The lands belong to the Crown. The occupants pay no rent, and are tenants on sufferance.

§ 12. Nauru (Pleasant Island).

1. **History.**—Nauru, which is situated in latitude 166° east and is only 26 miles south of the equator, was, prior to 1914, part of the protectorate of German New Guinea (see § 1 of the article on the Territory of New Guinea).

In November, 1914, Nauru was occupied by a detachment from the Australian Expedition at Rabaul; and it was included in the cession of colonies made by Germany in 1919 to the Allied and Associated Powers, whose representatives agreed that a mandate over it should be given to His Majesty the King. On 2nd July, 1919, the British, Commonwealth, and New Zealand Governments agreed that the administration of the island (which, since 1915, had been in charge of an official appointed by the British Colonial Office) should be vested in an Administrator; the first Administrator was to be appointed for a term of five years by the Australian Government, and thereafter the Administrator was to be appointed in such manner as the three Governments decided. This Agreement was approved by the Commonwealth Parliament in the Nauru Island Agreement Act 1919, to which it is a schedule.

The first Administrator appointed by the Commonwealth Government assumed duty in June, 1921.

The Mandate for Nauru, which was issued by the Council of the League of Nations in December, 1920, is in terms similar to that for the Territory of New Guinea (see subsection 7 of the section devoted to that Territory).

2. Administration.—The Administrator has all the powers of government,—administrative, legislative, and judicial,—in the island. All expenses of administration are met from local revenue and from the proceeds of the sale of phosphates.

3. Description.—Nauru has an area of 12 square miles, and six-sevenths of this is phosphate bearing. The climate is healthy, and malaria is unknown. The natives number about 1,200.

4. Phosphate Deposits.—These were discovered in 1900, and were worked by the Pacific Phosphate Company, which also worked the deposits on Ocean Island (about 165 miles east of Nauru and part of the Gilbert and Ellice Islands Colony, administered by the Colonial Office). The quality of the phosphates on these islands is very high, and the quantity on the two islands has been estimated at not less than 100,000,000 tons. About 3,750,000 tons have already been removed.

The interests of the Pacific Phosphate Company in the two islands (though not in other islands in the Pacific in which it has workings) were bought by the British, Commonwealth, and New Zealand Governments in 1919 for £3,500,000, the purchase money being contributed in the proportions of 42, 42, and 16 per cent. respectively. The Agreement of 2nd July, 1919, provides for the working of the deposits by a Board of Commissioners, of three members, one appointed by each Government; and the three countries are to receive the output in the same proportions of 42, 42, and 16 per cent.

The output from the two islands in 1913, the last year before the war, was 350,000 tons; in 1920–21 it amounted to about 400,000 tons; and the Commissioners hope to increase it to 500,000 tons. In 1920–21, owing to Great Britain not requiring her full share, about 200,000 tons were exported to Australia.

The employees of the Commission at Nauru consist of 60 Europeans, 554 Chinese, 200 natives from the Caroline Islands, and 40 natives from the Territory of New Guinea.

§ 13. Interstate Conferences.

1. General.—Reference to Inter-State Conferences held in 1914, 1915, 1916, and 1916–17, will be found in earlier issues of Official Year Book (See No. 8, page 1081; No. 11, pages 1191–3; No. 12, pages 1194–5). Considerations of space preclude repetition in present issue.

2. **Premiers' Conference, Sydney, 1918.**—On 8th May, 1918, and following days, a Conference of Premiers was held at Sydney. The substance of the more important resolutions is given below :—

- (i) *Uniform Company Law.* That it is desirable that an amended company law be introduced in each State as far as possible upon uniform lines.
- (ii) *Adoption of Uniform Food Standards.* That the New South Wales Government be requested to draft a model Pure Food Act and submit it to the other States for their consideration.
- (iii) *Uniform Secret Commissions Act.* That it is desirable that uniform Secret Commissions laws should be passed by the States.
- (iv) *Guarantee to Wheat Growers for 1918-19 and 1919-20.* That, subject to the Governments of the Commonwealth and of the States retaining control of the wheat scheme and of responsibility therefor, this Conference recommends that the wheat-growers of 1918-19 and 1919-20 be guaranteed 4s. 4d. per bushel, less freight from point of delivery, except in the case of New South Wales, where the arrangements already announced should be adopted; that the manner and the amounts of payment for wheat delivered and the allocation of responsibility between Commonwealth and States shall be the subject of early negotiations.
- (v) *Definition of Industrial Matters.* That this Conference affirms the desirability of defining the industrial matters which should with advantage be referred to the exclusive jurisdiction of the Federal Arbitration Court, and those that should be regarded as within the exclusive jurisdiction of the State Industrial Courts.

§ 14. Interstate Commission.

Particulars regarding the Inter-State Commission will be found in Official Year Book No. 13, p. 1123. The term of office (seven years) of the original commissioners expired in 1920, and no new appointments have since been made.

§ 15. Commonwealth Institute of Science and Industry.

1. **General.**—An account of the origin of this Institute was given in Official Year Book No. 9, p. 1135, while the progress of its activities was outlined in succeeding issues.

Under the Institute of Science and Industry Act 1920, assented to on the 14th September, 1920, provision is made for the establishment of the Institute on a permanent basis. By that Act it is declared that there shall be a Commonwealth Institute of Science and Industry, which will be a body corporate. The Act provides for the creation of (a) A Bureau of Agriculture, (b) A Bureau of Industries, and (c) such other Bureaux as the Governor-General determines. Power is given for the establishment of a General Advisory Council and Advisory Boards in each State to advise the Director with regard to—

- (a) The general business of the Institute or any Bureau thereof, and
- (b) Any particular matter of investigation or research.

The Director of the Institute is to be appointed for a period of five years. He is to be eligible for reappointment, and shall receive such salary as the Governor-General determines. The Act specifically imposes upon the Director the duty of co-operating as far

as possible with existing State organizations in the co-ordination of scientific investigations. The statutory powers and functions of the Director are as follows :—

- (a) the initiation and carrying out of scientific researches in connexion with, or for the promotion of, primary or secondary industries in the Commonwealth ;
- (b) the establishment and awarding of industrial research studentships and fellowships ;
- (c) the making of grants in aid of pure scientific research ;
- (d) the recognition or establishment of associations of persons engaged in any industry or industries for the purpose of carrying out industrial scientific research and the co-operation with and the making of grants to such associations when recognised or established ;
- (e) the testing and standardization of scientific apparatus and instruments, and of apparatus, machinery, materials and instruments used in industry ;
- (f) the establishment of a Bureau of Information for the collection and dissemination of information relating to scientific and technical matters ; and
- (g) the collection and dissemination of information regarding industrial welfare and questions relating to the improvement of industrial conditions.

2. *Work of the Institute.*—The Institute has made investigations into several matters of importance to the Commonwealth, and has issued bulletins and pamphlets shewing the progress made. A list of these publications is given at the end of this section. The more important subjects which have been or are at present under consideration are as follows :—

A.—Agricultural and Pastoral Industries.

(i) *Cattle Tick Pest.* (ii) *Worm Nodule Disease.* (iii) *Tuberculosis in Stock.* (iv) *Sheep Blow Fly.* (v) *White Ant Pest.* (vi) *Prickly Pear.* This weed covers in Australia an area of about 23,000,000 acres, and is spreading at the rate of about 1,000,000 acres annually. (vii) *Flax Industry.* The area under flax has been increased from 400 to 2,000 acres. (viii) *Cotton Growing.* Varieties of seed specially suitable for cultivation in Australia are being introduced, and the Government has guaranteed a minimum price for cotton cultivated in Australia. (ix) *Seed Improvement.* (x) *Natural Grasses and Fodder Plants.* (xi) *Viticultural Problems.* (xii) *Castor Beans.* (xiii) *Sorghum.*

B.—Forest and Vegetable Products.

(i) *Paper Pulp.* (ii) *Tanning Materials.* (iii) *Zamia Palms.* (iv) *Grass Tree Resin.* (v) *Western Australian Sandalwood.* (vi) *Preservation of Timbers.*

C.—Manufacturing Industries.

(i) *Leather and Tanning.* (ii) *Pottery.* (iii) *Power Alcohol.* (iv) *Posidonia Fibre.* (v) *Mechanical Cotton Picker.* (vi) *Engineering Standardization.*

D.—Mining and Metallurgy.

(i) *Mode of Occurrence of Gold.* (ii) *Ferro-alloys.* (iii) *Alunite.*

E.—Miscellaneous.

(i) *Road-making Materials, etc.* (ii) *Weights and Measures.* (iii) *Leather.* (iv) *St. John's Wort.*

In addition to these investigations, a Bureau of Information has been established, with a library of scientific books and journals catalogued and indexed. Information is also furnished to Commonwealth and State Government Departments, institutions and organisations, companies, firms, and private individuals on scientific and technical matters.

3. **Publications.**—The following is a list of the publications issued to 14th March, 1921, by the Institute :—

1. *Bulletins.*

1. The Cattle Tick in Australia. (Out of print. See No. 13.)
2. Worm Nodules in Cattle. (Out of print.)
3. The Alunite Deposits of Australia and their Utilization. (Out of print.)
4. The Factors Influencing Gold Deposition in the Bendigo Goldfield. Part I. (Out of print.)
5. Wheat-storage Problems (Damaged Grain and Insect Pests).
6. Power Alcohol. Proposals for its Production and Utilization in Australia. (Out of print. See No. 20.)
7. Agricultural Research in Australia. (Out of print. The individual papers contained in this Bulletin can be supplied separately.)
8. The Factors Influencing Gold Deposition in the Bendigo Goldfield. Part II. (Out of print.)
9. The Manufacture and Uses of Ferro-alloys and Alloy Steels. (Out of print.)
10. Substitutes for Tin-plate Containers.
11. Paper-pulp: Possibilities of its Manufacture in Australia. (Out of print.)
12. The Prickly Pear in Australia.
13. The Cattle Tick Pest in Australia.
14. An Investigation of the Marine Fibre of *Posidonia Australis*.
15. Welfare Work.
16. The Factors Influencing Gold Deposition in the Bendigo Goldfield. Part III.
17. Industrial Co-operation in Australia.
18. A Classification and detailed Description of Some of the Wheats of Australia.
19. Wood Waste.
20. Power Alcohol. (Reprint of No. 6, with Addendum.)
21. White Ant Pest.

2. *Reports.*

1. Reports of Executive Committee from Date of Appointment to 30th June, 1917.
2. Report of Executive Committee 1917–18.
3. Report on Organization and Work of Permanent Institute of Science and Industry.
4. Organization of Scientific Research Institutions in United States of America, by G. Lightfoot. (Out of print.)
5. The Work and Present Position of the Temporary Institute of Science and Industry (June, 1920).

3. *Pamphlets.*

1. Recent Developments in the Organization of National Industrial Research Institutions, by G. Lightfoot.
2. Engineering Standardization, by G. Lightfoot.

4. *Australian Standard Specifications.*

1. Structural Steel.
2. Tramway Rails and Fishplates.

5. "*Science and Industry.*"

(Monthly Journal.)

Vol. I., Nos. 1 to 8.

Vol. II., Nos. 1 to 12.

§ 16. Department of Chemistry, South Australia.*

In South Australia, a Department of Chemistry was formed in 1915. The Department is principally engaged in general routine chemical examinations and analyses in pursuance of various Acts of Parliament and for Government Departments, but the chemical investigation of local products and industries forms an important branch of its work. In this connexion a series of Bulletins is in course of preparation. Up to July, 1918, nine Bulletins have been issued, as indicated below. Although publication of Bulletins had to be suspended for a time, it is hoped to continue the series as soon as possible.

No. 1.—*Paper Making*: An investigation into the prospects of establishing a paper-making industry in South Australia. A number of local materials have been investigated, and special attention is directed to straw as the most valuable available material, owing to the very large supply obtainable at a low price and near to the principal sea-ports. No. 2.—*Potash*: Its economic sources in South Australia. Many local sources have been investigated, and wool scour is indicated as especially worthy of attention. *Lanoline*: A process for obtaining wool fat from locally scoured wool is described. No. 3.—*Cream of Tartar*: An examination of local grape products as sources of cream of tartar. No. 4.—*Marine Fibre*: The fibrous portion of the leaf sheath of the sea plant *Posidonia Australis* grows abundantly in the shallow waters around the coasts of South Australia, and on other parts of the Australian Coast. This Bulletin has been written to gather together and publish all the available information respecting it. The sum of £220,000 has already been spent in this industry, and a large amount of experimental work has been done in finding methods of collection and purification and market uses. No. 5.—*Boiler Waters*: Foaming and priming of boiler waters have been studied with a view to the suggestion of a remedy for these faults. No. 6.—*Grass Tree*: An investigation of the economic products of the species *Xanthorrhœa*. The trunk, leaves, and resin were examined. Special attention is drawn to the resin as similar to the high-priced resins, such as dragon's blood, benzoin, etc. It was found that 8 per cent. of para-oxy-benzoic acid was readily obtained from the gum. No. 7.—*Gypsum and Plaster of Paris*: An investigation of the gypsum deposits in South Australia and their uses, with special reference to the manufacture of plaster of paris. No. 8.—*Alcohol as a Source of Power*: This Bulletin discusses the use of alcohol as a motor fuel, details tests carried out under practical conditions, and indicates sources from which alcohol can be obtained. No. 9.—*Bonedust*: Its adulteration with Phosphate Rock. The results of this particular form of adulteration are dealt with, and a method of detection described.

Work in connexion with the wheat pest problem was carried out by the Department of Chemistry for the Wheat Weevil Committee, of which the Director of the Department was Chairman. An outline of the results achieved by the Committee is set out in Report No. 2 of the State Advisory Council of Science and Industry of South Australia, 1920. It is estimated that at least £1,500,000 worth of wheat valued at 4s. 9d. per bushel was saved as the direct result of this research work.

NOTE.—In previous editions of the Year Book various other matters of special importance have been dealt with in this section. For a list of these, see Index to Special Articles on page vii.

* Information supplied by the Director, Dr. W. A. Hargreaves, D.Sc., M.A., F.I.C.

§ 17. Animal and Vegetable Diseases and Pests.

1. **General.**—A Conspectus of Acts and Regulations in force in the various States of the Commonwealth, relating to noxious animals and weeds, means of preventing or mitigating their ravages, restriction on introduction from overseas of disease-carrying animals and plants, quarantining and eradication of infected organisms, etc., will be found on the following pages.

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—			
(i) Acts in Force ..	Pastures Protection Act 1912, 1918, 1920. (The provisions with respect to the destruction of noxious animals apply only to districts proclaimed to be rabbit infested) Native Dogs Destruction and Poisoned Baits Act 1901	Vermin Destruction Act 1915	Rabbit Act 1885, 1889, 1913. Marsupial Proof Fencing Act 1898, 1913 Dingo and Marsupial Destruction Act 1918
(ii) Definitions ..	<i>Marsupial</i> includes kangaroo, wallaroo, wallaby, or paddymelon <i>Native Dog</i> includes any dingo or native dog or dog which has become wild <i>Noxious Animals</i> include marsupials and native dogs and any animals which the Governor, on petition from a Board, may declare to be such	<i>Vermin</i> includes rabbits, foxes, dingoes and dogs run wild or at large, and any kind of animal or bird declared by the Governor to be vermin <i>Wild Dog</i> .—A dingo or any undomesticated dog generally known as a wild dog inhabiting the bush and apparently having no owner and being under no control <i>Wombats</i> have been declared to be vermin	<i>Marsupial</i> , any wallaby, kangaroo, paddymelon, bandicoot, or kangaroo rat. Under the <i>Marsupial Proof Fencing Act</i> dingo is included <i>Dingo</i> .—A dingo or half-bred dingo or any undomesticated dog generally known as a wild dog inhabiting the bush, or a fox (<i>Canis vulpes</i>)
(iii) Constitution of Districts	The Governor may constitute Pastures Protection Districts, and may divide such districts into two or four subdivisions	There are no provisions for the constitution of districts, but for the purposes of the fencing provisions of the Act, special areas comprising a part or the whole of any shire may be formed	(a) The Governor may constitute any part of Queensland a Rabbit District (<i>Rabbit Act</i>) (b) The Governor must divide the State into districts and constitute each district a Dingo District (<i>Dingo and Marsupial Destruction Act</i>)
(iv) Boards ..	There is a Pastures Protection Board, consisting of eight elected Directors, for each district	There are no provisions for Boards, but municipal and shire councils have certain powers with respect to the purchase and sale of wire netting	(a) <i>Central Rabbit Board</i> , consisting of the Minister and not more than six members appointed by the Governor (b) <i>Rabbit Boards</i> , consisting of so many elected members as may be prescribed. Inspectors are <i>ex officio</i> members (c) <i>Dingo Boards</i> , consisting of five members, one appointed by the Governor and four elected
(v) Qualifications of Members of Boards	Any person, who is liable to be assessed, whose name is on the roll, and who has paid all rates due by him to the Board		<i>Rabbit Board</i> .—Any owner, part owner, general manager, or resident manager in the district assessed at not less than 50 head of cattle or 250 sheep <i>Dingo Board</i> .—Any resident, owner, or manager of a holding in respect of which the prescribed return of stock has been made of not less than 25 head of cattle or 125 sheep or a proportionate number of each

RELATING TO NOXIOUS ANIMALS.

South Australia.	Western Australia.	Tasmania.
GENERAL.		
<p>Vermin Act 1914, 1916, 1919 Wild Dogs Act 1912, 1914, 1919 Sparrow Destruction Act 1889</p>	<p>Rabbit Act 1902 Vermin Boards Act 1909, 1915 Vermin Act 1918, 1919. (This Act applies only to the south-west portion of the State, west of No. 1 rabbit-proof fence and south of No. 3 rabbit-proof fence) Wild Cattle Nuisance Act 1871, 1878, 1883 Destructive Birds and Animals Act 1893</p>	<p>Rabbits Destruction Act 1889, 1893 Wire Netting Act 1910</p>
<p><i>Vermin</i> includes rabbits, wild dogs and foxes, and any other animals proclaimed by the Governor to be vermin <i>Wild Dog</i> includes a dingo and any cross of the native dog, also a dog run wild <i>Sparrow</i>.—The common house sparrow (<i>Passer domesticus</i>) only</p>	<p><i>Vermin</i> means rabbits and wild dogs and any other animals declared by the Governor to be vermin (<i>Vermin Boards Act</i>) <i>Vermin</i> means rabbits, foxes, dingoes, dogs run wild or at large, sparrows, starlings, and any other animals or birds proclaimed by the Governor (<i>Vermin Act</i>) <i>Wild Cattle</i>.—All horses and horned stock not branded with a registered brand <i>Destructive Birds and Animals</i>.—Sparrows and any animal or bird proclaimed by the Governor</p>	
<p>(a) The Governor may, upon the petition of the holders representing one-half of the ratable property (exclusive of unoccupied Crown lands) constitute such area, if not within a municipality, a Vermin-fenced District (<i>Vermin Act</i>) (b) Governor may declare the district of a municipal corporation or district council to be a Sparrow District (<i>Sparrow Act</i>)</p>	<p>The Governor may constitute any definite part of the State a Vermin District</p>	<p>Every municipal district is deemed to be a Rabbit District</p>
<p>(a) <i>Vermin Boards</i>, consisting of four members, one of whom is a Government officer and the other three are elected (b) The council of every municipality is the Local Authority for carrying out the provisions of the <i>Sparrow Act</i></p>	<p><i>Vermin Boards</i>, consisting of not less than six nor more than twelve elected members as the Governor may determine, unless the district is divided into wards, when the number must not exceed twice the number of wards. When the boundaries of a Road District and Vermin District are contemporaneous, the Governor may appoint the Road Board to be the Vermin District Board</p>	<p>There are no provisions for the constitution of Boards, but municipal councils must carry out the provisions of the Rabbits Act</p>
<p>Any male ratepayer of a District, and any person who is a resident representative of a ratepayer, if nominated by such ratepayer, when he has reached 18 years of age, and any officer or shareholder in a company which is a ratepayer in the District</p>	<p>Any owner, part owner, or manager of a holding within the District, if such holding is ratable under the Act Under the <i>Vermin Act</i>, such ownership or part ownership of a holding is not a qualification where the manager is qualified in respect of such holding</p>	

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—GENERAL			
(vi) Qualifications and Voting Power of Electors	On notification of a District, the Minister prepares a roll of all persons entitled to vote, and such roll is revised from time to time by the Board. Any person who has been assessed or is liable to be assessed for payment of rates under the Act is entitled to a vote	..	<p><i>Rabbit Boards.</i>—Same qualification as for membership. Number of votes allowed for 50 and under 2,000 cattle, one; 250 and under 10,000 sheep, one; 2,000 and under 5,000 cattle, two; 10,000 and under 25,000 sheep, two; 5,000 cattle or 25,000 sheep and upwards, three</p> <p><i>Dingo Boards.</i>—Same qualifications as for membership, one vote allowed to each elector</p>
(vii) Functions of Boards	A Board may (a) erect on any land a rabbit-proof fence, deemed to be a barrier fence; (b) specify dates for simultaneous destruction of rabbits and the means to be employed therefor; (c) pay bonuses for scalps; (d) destroy rabbits on public lands when money has been voted for that purpose	..	<p>(a) <i>Central Rabbit Board.</i>—To advise the Minister upon matters relating to the administration of the Act and with respect to any measures for preventing the incursion and migration of rabbits or for their destruction</p> <p>(b) <i>Rabbit Board.</i>—A Board may (i) order fences to be erected; (ii) affix wire netting to fences; (iii) erect, alter, or repair fences; (iv) search for and destroy rabbits</p> <p>(c) <i>Dingo Board.</i>—A Board may make by-laws with respect to the destruction of dingoes and marsupials and employ scalpers</p>
(viii) Funds of Boards	<p><i>Pastures Protection Funds.</i>—All subsidies, fines, penalties, rates, and other moneys received by a Board</p> <p>The Governor may subsidise a Board in respect of public land in its District</p> <p>The Governor may require a Board to pay a sum not exceeding 3 per cent. of its revenue to cover the cost of administering the Act</p>	..	<p>(a) <i>Central Rabbit Board.</i>—Endowed from the Consolidated Revenue with not exceeding £10,000 annually</p> <p>(b) <i>Rabbit Boards.</i>—Funds consist of (a) rates, (b) endowment not exceeding twice the amount actually raised in a year, (c) loans from Government not exceeding five times the rates raised during the preceding year</p> <p>(c) <i>Dingo Funds.</i>—Assessments, licence fees, and endowment</p>

RELATING TO NOXIOUS ANIMALS—*continued.*

South Australia.	Western Australia.	Tasmania.
— <i>continued.</i>		
<p>Every ratepayer of the age of 18 years and upwards may vote, provided that he is the owner of not less than one-quarter of a square mile of land within the District. One vote is allowed for every 50 square miles or part thereof up to 200 square miles, and then one vote additional for every additional 200 square miles or part thereof</p>	<p>(a) Any person who is an elector under the Roads Act, if his land is ratable under the Act. Voting power—</p> <p>Acreeage of holding. No. of votes.</p> <p>Not exceeding 10,000 acres .. one</p> <p>Exceeding 10,000, not exceeding 100,000 acres .. two</p> <p>Exceeding 100,000 acres .. three</p> <p>(<i>Vermin Boards Act</i>)</p> <p>(b) Any person who on the 13th January is the owner of a holding in the District, if such holding is ratable and his name is on the electoral list. Voting power for pastoral holdings—</p> <p>Not exceeding 10,000 acres .. one</p> <p>Exceeding 10,000, not exceeding 100,000 acres .. two</p> <p>Exceeding 100,000, not exceeding 500,000 acres .. three</p> <p>Exceeding 500,000 acres .. four</p> <p>Other holdings.—The same number of votes calculated on the unimproved capital value (<i>Vermin Act</i>)</p>	..
<p>A Vermin Board may (a) carry out all works and undertakings and do all acts necessary for the suppression of vermin by erecting vermin fencing; (b) require water supplies to be fenced in; (c) purchase any fence along its boundaries; (d) contribute to the cost of fences on its boundaries</p>	<p>(a) A Board may (i) erect fences or improve existing fences; (ii) alter, maintain, repair, or renew fences; (iii) affix wire netting to fences; (iv) search for and destroy vermin (<i>Vermin Boards Act</i>)</p> <p>(b) A Board may (i) erect vermin fences and rabbit-proof fences and improve existing fences; (ii) alter, maintain, repair, or renew fences (<i>Vermin Act</i>)</p>	..
<p>(a) <i>Vermin Boards</i>.—Revenue consists of (a) rates, (b) fines and penalties, (c) all other moneys received by a Board, (d) loans from Government repayable in 20 annual instalments with interest</p> <p>(b) <i>Wild Dogs Fund</i> consists of (a) rates, (b) £1 for £1 subsidies from the Treasury not exceeding £4,000 in one year, and (c) advances from General Revenue not exceeding £2,000</p>	<p><i>Vermin Boards</i>.—Funds derived from rates and loans from Government</p>	..

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—GENERAL			
(ix) Rates leviable by Boards, etc.	<p>Every owner or occupier who has 10 head or more of large stock or 100 sheep or more must be assessed and rated</p> <p>Assessment must not exceed 4d. per head of large stock or $\frac{1}{2}$d. per head of sheep</p> <p>Unstocked or partly stocked land must be assessed according to its carrying capacity, agricultural land being assessed at one sheep to 3 acres</p> <p>Owners of rabbit-proof fenced holdings only pay half rates</p>	..	<p>(a) <i>Rabbit Boards</i> may levy an assessment of not less than 1s. nor more than 5s. on every 20 head of cattle or 100 sheep depastured within the District. The assessment on Crown land must not be on a less number of cattle or sheep for every square mile than the Governor fixes, which may be 10 or less cattle or 50 or less sheep. No assessment is made on an owner of less than 50 cattle or 250 sheep, except on Crown leases, nor on owners of rabbit-proof fenced holdings nor on holdings outside of and to the south or west of the border fence</p> <p>(b) <i>Dingo Boards</i>.—Assessment not less than 1s. nor more than 6s. on every owner of 25 head of cattle or 125 sheep or more</p>
(x) Returns to be furnished by owner or occupier	<p>Every owner or occupier liable to be rated and every owner of large stock or sheep must make an annual return to the Board shewing the area of his land and the number of his large stock or sheep</p>	..	<p>Under the <i>Stock Returns Act</i>, every owner of stock must furnish annually the Clerk of Petty Sessions of his District with a return of the number and description of stock kept by him. Assessments are based on these returns</p>
(xi) Appointment of Inspectors	<p>The Governor may appoint a Chief Inspector for New South Wales and Inspectors for any one or more districts</p> <p>Each member of a Board is an <i>ex officio</i> Inspector</p> <p>District Inspectors are paid out of District Funds</p>	<p>(a) The Governor may appoint, subject to the <i>Public Service Act</i>, a Chief Inspector for the Suppression of Vermin</p> <p>(b) The Governor may appoint Inspectors either generally or within a prescribed area</p>	<p>Under the <i>Rabbit Act</i>, the Governor may appoint Inspectors. Every Inspector is <i>ex officio</i> a member of every Board, except the Central Board, but not more than two may attend at any meeting of a Board</p>
(xii) Powers of Inspectors or authorized persons to enter land, etc.	<p>Any authorized person may enter any land in order to search whether any rabbits or noxious animals are on such land, and to erect or repair barrier fences and gates or to examine and inspect land</p>	<p>Any Inspector may at any time enter upon any land and may search whether vermin are on such land, and, on giving notice previously, may take one dog with him</p>	<p>Any member of the police force, who has reasonable grounds for suspicion, may, under authority of a warrant, enter any premises and seize any skins and cyanide of potassium, and if person possessing them does not account for them he may be fined up to £5, or, in case of cyanide, up to £20</p>
B.—DESTRUCTION OF			
(i) Notification by Owner	..	<p>Any owner or occupier of land within 25 miles of an Inspector's usual place of abode may call on him to visit such land to ascertain whether any vermin are thereon</p>	..

RELATING TO NOXIOUS ANIMALS—*continued.*

South Australia.	Western Australia.	Tasmania.
— <i>continued.</i>		
<p>(a) <i>Vermin.</i>—A Board may levy a rate not exceeding 5s. on each full quarter of a square mile of ratable property, but owners of less are exempt as well as those of holdings enclosed with a vermin-proof fence. A District Council may levy a rate not exceeding 3d. in the £1 for the purpose of destroying vermin, but land within a rabbit-proof fence is exempt.</p> <p>(b) <i>Wild Dogs.</i>—A rate may be levied on certain lands, not exceeding 1s. on every square mile, or half the amount of annual rental on land leased from the Crown, whichever is the less. Occupier of less than 3 square miles exempt.</p> <p>(c) <i>Sparrows.</i>—Municipalities and District Councils may levy a rate not exceeding 2d., or, with consent of the ratepayers, 6d. in the £1.</p>	<p>A Board may levy a rate on pastoral holdings not exceeding 1s. for every 100 acres, and on other holdings an amount equal to one half of the rate which might be levied on the unimproved capital value by a Road Board.</p> <p>Owners of holdings of less than 100 acres and of rabbit-proof holdings exempt.</p>	<p>A municipal council may levy a special rate for the destruction of rabbits.</p>
		<p>Occupiers of land in an infested district must furnish, every six months, a return shewing the methods adopted and the number of persons engaged in destroying rabbits.</p>
<p>(a) The Commissioner of Crown Lands may appoint Inspectors, Sub-Inspectors, and officers, and a Board may appoint Inspectors, Rangers, and other officers (<i>Vermin Act</i>).</p> <p>(b) A Local Authority may appoint Inspectors and officers within its district (<i>Sparrow Act</i>).</p>	<p>(a) The Governor may appoint a Chief Inspector, Inspectors, and other officers (<i>Rabbit and Vermin Boards and Vermin Acts</i>).</p> <p>(b) A Board may appoint Inspectors, and any member thereof may be appointed an Inspector without remuneration (<i>Vermin Act</i>).</p>	<p>(a) The Governor may appoint a Chief Inspector and Inspectors and officers.</p> <p>(b) A municipal council must appoint Inspectors, but no member of a council may continue to be an Inspector under such council.</p>
<p>(a) Any authorized person may enter upon any land or any Crown lands at any time and search to ascertain whether any vermin are to be found upon such land (<i>Vermin Act</i>).</p> <p>(b) Any Inspector, after 48 hours' notice, may enter between 7 a.m. and 6 p.m. upon any land or building to ascertain if sparrows' eggs or nests are thereon (<i>Sparrow Act</i>).</p>	<p>Any Inspector or authorized persons may enter any land or holding to search whether any rabbits or vermin are thereon or to patrol and inspect any fence.</p>	<p>An Inspector or person authorized by the Chief Inspector may at all reasonable hours enter upon any Crown land and upon the lands of any person in an infested district for the purpose of seeing whether there are rabbits upon such land.</p>

NOXIOUS ANIMALS.

	<p>(a) Occupier on finding rabbits upon his land must forthwith notify the nearest Inspector, under a penalty not exceeding £10 for the first offence and not exceeding £50 for subsequent offences (<i>Rabbit Act</i>).</p> <p>(b) Occupier, upon whose holding there are vermin or signs of vermin, must forthwith give notice to the nearest Inspector or to the Secretary of the local Vermin Board or to the Minister under a penalty not exceeding £20 (<i>Vermin Act</i>).</p>	
--	---	--

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
B.—DESTRUCTION OF NOXIOUS			
(ii) Proclamation of Infested Areas	<p>The Governor may proclaim any Pastures Protection District to be rabbit infested.</p> <p>When any District within the Western Division is proclaimed to be rabbit infested, the provisions of the Western Lands Acts relating to rabbits are suspended.</p>		<p>The Governor may, under the <i>Marsupial Proof Fencing Act</i>, constitute any part of Queensland which is grievously infested with marsupials an infested area.</p>
(iii) Destruction of Noxious Animals by Owners or Occupiers of land	<p>(a) The owner or occupier of land must suppress and destroy all rabbits and noxious animals upon his land and upon any roads bounding or intersecting the same, unless such roads are vested in a municipality or shire.</p> <p>(b) A Board may give an owner or occupier notice to destroy all rabbits and noxious animals upon his land.</p> <p>(c) A Local Authority under the <i>Local Government Act</i> may cause owners and occupiers to destroy noxious animals.</p>	<p>(a) Every occupier or owner of land must suppress and destroy all vermin on his land and on the half width of all roads adjoining.</p> <p>(b) An Inspector on finding vermin may notify the owner or occupier to destroy all vermin upon his land and upon the half width of adjoining roads and keep them clear of vermin.</p>	<p>The Minister may require the owner of a rabbit-proof fenced holding to forthwith take effective measures for the destruction of rabbits upon his holding.</p>
(iv) Penalty on Owner or Occupier for failing to destroy Noxious Animals	<p>(a) Owner or occupier failing to fully and continuously destroy rabbits and noxious animals on his land, first conviction not exceeding £10, second not exceeding £25, and subsequent convictions not exceeding £100 (<i>Pastures Protection Act</i>).</p> <p>(b) Owner neglecting to destroy rabbits or noxious animals within 28 days of notice, not exceeding £50 (<i>Local Government Act</i>).</p>	<p>Owner or occupier failing within 14 days of service of notice to take means to destroy vermin, first offence not exceeding £10, subsequent offences, not exceeding £50.</p>	<p>Owner failing within 30 days of notice to comply with the requirements thereof, not less than £10 nor more than £100.</p>
(v) Procedure when Owner or Occupier fails to destroy Noxious Animals	<p>(a) The owner or occupier is summoned before a Board, and, unless his explanation is satisfactory, any person authorized by the Board may enter his land and take measures to destroy noxious animals at the expense of such owner or occupier (<i>Pastures Protection Act</i>).</p> <p>(b) A municipal council may cause noxious animals to be destroyed at the expense of the owner or occupier of the land (<i>Local Government Act</i>).</p>	<p>If after 14 days' notice the owner or occupier has not complied with the notice, in addition to any other proceedings, any Inspector may enter upon his land and remain thereon in order to take or destroy or suppress vermin at the expense of such owner.</p>	<p>If an owner fails within 30 days to comply with a notice the Minister may authorize any person to enter upon his holding and take measures to destroy the rabbits thereon at the owner's expense.</p>

RELATING TO NOXIOUS ANIMALS—*continued.*

South Australia.	Western Australia.	Tasmania.
<i>ANIMALS—continued.</i>		
A District Council may declare any Crown lands within its District, but which are not within a Vermin-fenced District, to be vermin-infested	The Governor may proclaim that any area is vermin-infested, in order that all water supplies therein may be enclosed with rabbit-proof fencing	The Governor must, upon the report of the Chief Inspector, declare any district to be an infested district or a clear district
<p>(a) Every owner and occupier of land must destroy all vermin upon such land and upon the half width of all adjoining roads</p> <p>(b) Where an authorized person finds vermin upon any land he may require the owner or occupier to forthwith destroy all vermin thereon and upon the half width of roads adjoining same</p>	<p>(a) The owner or occupier of any land must suppress and destroy all rabbits upon such land and upon any roads bounding or intersecting same. An Inspector may give notice to an owner or occupier to suppress and destroy rabbits (<i>Rabbit Act</i>)</p> <p>(b) A Vermin Board may notify an owner of a holding to forthwith take effective steps for the destruction of vermin thereon (<i>Vermin Boards Act</i>)</p> <p>(c) The owner and occupier of a holding must destroy all vermin upon such holding and upon any roads bounding or intersecting same. The Minister or a Board may notify the owner or occupier of any holding to destroy vermin thereon (<i>Vermin Act</i>)</p>	An Inspector may serve upon the occupier of any land in an infested district notice requiring him forthwith to destroy the rabbits upon such land
Owner or occupier not destroying all vermin within the time prescribed, or during the simultaneous vermin destruction months, first offence not exceeding £5, subsequent offences not exceeding £20	<p>(a) Owner or occupier failing to fully and continuously destroy rabbits, first conviction, not exceeding £10, subsequent convictions, not exceeding £50 (<i>Rabbit Act</i>)</p> <p>(b) Owner or occupier not destroying vermin, not exceeding £10 (<i>Vermin Act</i>)</p> <p>(c) Owner or occupier not commencing to destroy vermin within 7 days of notice, not exceeding £50 (<i>Vermin Act</i>)</p>	Occupier not commencing within 7 days after service of notice to destroy rabbits, not less than £2 nor more than £25
When an owner or occupier does not forthwith commence to comply with a notice to destroy vermin and continue to comply therewith, any authorized person may enter upon his land and take measures to destroy vermin at their expense	<p>(a) An owner or occupier failing to comply with a notice is summoned before the Minister, who may authorize any person to enter upon the land and destroy rabbits, the cost thereof, with 5 per cent. interest, to be paid by owner, etc. (<i>Rabbit Act</i>)</p> <p>(b) If owner fails within 30 days to comply with notice, a Board may authorize any person to enter upon his holding and destroy vermin at his expense (<i>Vermin Boards Act</i>)</p> <p>(c) If owner fails to comply with notice, any Inspector may enter upon his land and destroy vermin at his expense (<i>Vermin Act</i>)</p>	If an occupier fails for 7 days to comply with a notice to destroy rabbits, an Inspector makes a complaint, and two Justices in Petty Sessions may authorize him to enter upon the land and destroy rabbits at the occupier's expense

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
B.—DESTRUCTION OF NOXIOUS			
(vi) Recovery of cost of destruction by Tenant from Landlord	..	Any occupier who, while occupying any land under any agreement with a landlord, has incurred expense in destroying vermin may, unless otherwise provided by such agreement, recover from such landlord one-half the amount of such expense if such agreement terminates within 12 but not within 6 months, and two-thirds if it terminates within 5 months	..
(vii) Destruction of Noxious Animals on Crown Lands	Where money has been voted by Parliament for the destruction of rabbits on public lands, the Minister may authorize a Board to apply such money on such terms and conditions as he may think fit	In the event of the owner or occupier of land being the Board of Land and Works, any owner or occupier of land within 1 mile thereof may require the said Board to forthwith destroy all vermin upon its land and half width of road and keep them clear, and if the Board fails to do so within 14 days it may be fined up to £10 for first offence, and to £50 for subsequent offence, such fines to be paid to the shire in which the land is situated	..
(viii) Destruction of Noxious Animals by Local Authorities, etc.	(a) The Council of a Municipality or Shire is deemed to be the occupier of all land vested in or held by them, and trustees of commons are deemed to be the occupiers thereof (<i>Pastures Protection Act</i>) (b) A Municipal Council must destroy all noxious animals on land vested in or leased by it (<i>Local Government Act</i>)	All lands permanently or temporarily vested in or occupied or managed by any municipality, council, or trustees are deemed to be owned by such bodies Any municipality, council, or trustees, who are owners of land, may apply the funds under their control to defraying any expenses incurred under the <i>Vermin Destruction Act</i>	..
(ix) Simultaneous Destruction of Noxious Animals	A Board may specify (a) the dates on which owners or occupiers must commence to suppress and destroy rabbits and noxious animals, and (b) the periods during which such work must be continued, and (c) the means to be adopted. One month's notice at least must be given for such destruction	The Governor may proclaim any specified day on which simultaneous destruction of vermin must be commenced and continued in any specified part of Victoria	..
(x) Laying Poison	(a) When a Board destroys rabbits and noxious animals in default of the occupier so doing, poison must not be used unless previous notice has been given to the occupier (<i>Pastures Protection Act</i>) (b) Any occupier of land stocked with sheep, cattle, or horses may lay poisoned baits for native dogs, but a lessee of Crown land may not lay baits within $\frac{1}{2}$ mile of a public road, nor an occupier of freehold land within 100 yards of a road or boundary. Notice must be posted upon a road (<i>Native Dogs Destruction and Poisoned Baits Act</i>)	An Inspector who destroys vermin in default of the owner or occupier may lay poison, but must give such owner or occupier 14 days' notice, stating the land upon which such poison is to be laid	It is not lawful to use cyanide of potassium for the destruction of dingoes or marsupials, nor for a scalper to possess such cyanide. Penalty for contravention, not exceeding £20

ANIMALS— <i>continued.</i>		
<p>Every occupier of land alienated from the Crown, who pays the cost of the destruction of vermin upon land held by him as lessee or tenant for a term having less than 5 years to run, is entitled to be repaid so much of the cost as would be payable for the difference between a term of 5 years and the time so to run of his lease or tenancy</p>	..	<p>Where a tenant has incurred expense in destroying rabbits, he may recover from the landlord, in case of a lease not exceeding 1 year, four-fifths of such expense; and if the term exceeds 1 but not 3 years, three-fifths; and if it exceeds 3 years two-fifths. A person in occupation of pastoral Crown land may recover one-half of such expense provided that he may not recover a larger sum than 1 year's rent</p>
<p>When any Crown lands, not within a vermin-infested district, have been declared by a District Council to be vermin-infested, an annual rate may be declared not exceeding £1 per square mile, which is to be expended on the destruction of vermin on such Crown lands, otherwise the Crown is under no liability for the destruction of vermin on Crown lands</p>	<p>Where money has been voted by Parliament for the purpose of rabbit destruction, the Minister may apply such money for that purpose as he thinks fit (<i>Rabbit Act</i>)</p>	<p>Any Inspector or person authorized by the Chief Inspector may enter upon any Crown land and destroy the rabbits thereon, and all expenses incurred must be defrayed out of the Consolidated Revenue Fund</p>
<p>All Boards, Municipal Corporations, District Councils, and other corporate bodies must, at their own expense, destroy all vermin on the lands vested in them or under their control</p> <p>Two or more contiguous Councils may form an Associated District Councils' Vermin Board</p>	<p>A Road Board may defray out of its ordinary revenue any expenses incurred in the performance of its duties under the <i>Vermin Act</i> in respect of land of which it is the owner</p>	<p>Every Municipal Council must take measures to ensure the destruction of all rabbits within the Municipality</p>
<p>Simultaneous destruction of vermin must, within the district of every District Council, Vermin Board, or Associated Board, be proceeded with during January to April in each year or during such other period as fixed by the Commissioner of Crown Lands</p>	<p>The Minister or a Board may specify (a) dates on which owners or occupiers must commence destroying vermin, and (b) the period during which such destruction is to be continued, and (c) the means to be adopted for carrying out such work</p>	..
<p>(a) Any Vermin Board or Municipal Corporation or District Council may lay poison on any land within its district or on any adjoining Crown lands</p> <p>(b) Any occupier may lay poison on his land</p> <p>(c) No poison may be laid within 100 yards of a public road, and notice of laying poison must be exhibited</p> <p>(d) The use of poison for the destruction of sparrows may be authorized subject to regulations for the prevention of accident (<i>Sparrow Act</i>)</p>	<p>An Inspector who destroys rabbits where the owner or occupier fails to do so must give notice (7 days in <i>Vermin Boards Act</i>) to the occupier of his intention to use poison (<i>Rabbit and Vermin Acts</i>)</p>	<p>An Inspector who destroys rabbits in default of the occupier must give such occupier 7 days' notice of where poison is to be laid</p>

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
B.—DESTRUCTION OF NOXIOUS			
(xi) Special Provisions for the Destruction of Dingoes, Marsupials and Destructive Animals and Birds	Any occupant of land stocked with sheep, cattle, or horses may tender to the nearest Court of Petty Sessions for drawing trails and laying poisoned baits for the destruction of native dogs. The cost of such destruction is to be distributed proportionately among owners benefited		No person may destroy dingoes or marsupials within a Dingo District unless he holds a permit as scapler or is the owner or manager of a holding or is authorized by them No permit is issued in respect of any holding which is fenced with dog-proof fencing Annual fee for permit 2s. 6d.
(xii) Bonuses for the Destruction of Noxious Animals	A. Pastures Protection Board may, and, if the Minister directs, must, pay bonuses for the scalps of noxious animals at such rates as the Board may determine	Every municipal council must pay a bonus of 2s. 6d. for every fox and 20s. for every wild dog destroyed within its boundaries, but is not compelled to pay more than £200 in one year for the destruction of wild dogs, and may increase such amounts. The Government refunds one-half the difference between the bonuses paid and the amount received from the sale of skins, but not exceeding 1s. 3d. for foxes and 10s. for wild dogs, and the total for wild dogs must not exceed £500 in one year. One-half bonus only is to be paid for wild dogs under 6 months old. A council may also pay for the destruction of vermin whether killed within or without its boundaries such sum as it deems fit	(a) Any person, without a license, paying a bonus for rabbit scalps is liable to a penalty not exceeding £50 (b) The rates of bonus for the destruction of dingoes (including foxes) are fixed annually by the Dingo Boards, but must be not less than 20s. each The payment of a bonus in the case of marsupials is optional, and of dingoes compulsory Government makes an annual endowment, not exceeding £5,000, paid in proportion to the amount actually expended by each Board on bonuses
(xiii) Protection of Natural Enemies of Noxious Animals	The Governor may proclaim any animal, bird, or reptile to be a natural enemy of the rabbit, and prohibit within any area the killing thereof under a penalty not exceeding £5. The iguana, native cat, tiger cat, ferret, mongoose, and stoat are declared to be natural enemies, and in certain districts domestic cats which have become wild	The Governor may proclaim any animal, bird, or reptile to be a natural enemy of vermin, and prohibit within any proclaimed districts the killing, etc., thereof under a penalty of not less than £1 nor more than £10	The Governor may proclaim any animal to be a natural enemy of the rabbit, and prohibit the killing or capturing thereof in a defined district under a penalty not exceeding £10
(xiv) Penalty for Introducing or keeping Noxious Animals	(a) Liberating or attempting to liberate, or possessing any live rabbit, not exceeding £100 (b) Having in one's possession or wilfully liberating any noxious animal, not exceeding £10	Possessing or wilfully setting loose any live vermin, not less than £5 nor more than £50, or imprisonment with or without hard labour for not more than 6 months	(a) Introducing any live rabbit into Queensland a misdemeanour, penalty £100 and in addition imprisonment with or without hard labour up to 2 years (b) Possessing or keeping on one's premises any live rabbit, first offence not less than £10 nor more than £50, second offence not less than £20 nor more than £100

RELATING TO NOXIOUS ANIMALS—*continued.*

ANIMALS— <i>continued.</i>		
<p>An occupier of land, after notice from an Inspector, must within 21 days destroy all sparrows' eggs and prevent sparrows from building nests or increasing thereon. In default an Inspector, after 48 hours' notice, may, not earlier than one hour before sunrise nor later than one hour after sunset, enter such premises and destroy sparrows and their eggs at the owner's or occupier's expense</p>	<p>(a) Any person may destroy any destructive bird or animal within the State</p> <p>(b) Any police officer or constable and any authorized person may enter upon any land, houses, or buildings and destroy any destructive birds or animals found thereon</p> <p>(c) Licenses for the destruction of wild cattle are issued by the Board for licensing public houses</p>	..
<p>(a) The Treasurer must pay out of the Wild Dogs Fund a bonus for the scalp of any wild dog killed on ratable lands or on Crown lands, except in certain scheduled lands, such bonus to be not less than 5s.</p> <p>(b) A Local Authority in a Sparrow District may pay bonuses for the destruction of sparrows and sparrows' nests therein</p>	<p>(a) Any person, without the License of the Minister, who pays or offers to pay any bonus for the destruction of rabbits is liable to a penalty under the <i>Rabbit Act</i> not exceeding £50, and under the <i>Vermin Act</i> not exceeding £20</p> <p>(b) A Board may grant bonuses for the destruction of vermin (rabbits excepted under the <i>Vermin Act</i>) within its district</p> <p>(c) A Vermin Board may pay a bonus not exceeding 10s. each for the scalps of wild dogs and foxes, and under special circumstances may pay bonuses up to £5. When a Board has paid a bonus of 10s. or upwards, the Department of Agriculture may refund 5s. when outside and 10s. when inside the South-Western Division</p>	..
..	<p>The Governor may declare any animal, bird, or reptile to be a natural enemy of the rabbit, and prohibit within any specified area the killing, etc., thereof under a penalty not exceeding £5</p>	<p>The Governor may proclaim any animal to be a natural enemy of the rabbit, and prohibit within certain proclaimed districts the killing of any native cat (<i>Dasyurus maculatus</i>), tiger cat (<i>Dasyurus maculatus</i>), domestic cat, or other proclaimed enemy under penalty of not less than £2 nor more than £10</p>
<p>(a) Letting loose vermin in any part of the State, not exceeding £100 or 6 months' imprisonment with hard labour</p> <p>(b) Importing into or letting loose or keeping alive vermin on Kangaroo Island or other islands on the coast, not exceeding £100 or imprisonment for 6 months with or without hard labour</p> <p>(c) Letting loose sparrows in any part of the State, not exceeding £10 or imprisonment for 3 months with or without hard labour</p>	<p>Liberating or possessing any live rabbit, not exceeding £100.</p> <p>Selling any dead rabbit west of No. 1 fence, unless imported or killed west thereof, not exceeding £50 (<i>Rabbit Act</i>)</p> <p>Passing live vermin through vermin or rabbit proof fence, not exceeding £100 or 6 months' imprisonment (<i>Vermin Act</i>)</p> <p>Importing, possessing, or setting free destructive animals or birds, first offence not exceeding £50, subsequent not exceeding £100</p>	<p>Setting at large or attempting to set at large live rabbits, not less than £5 nor more than £20 for each rabbit</p>

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
C.—VERMIN-PROOF			
(i) Description of Rabbit-proof or Vermin-proof Fence	<i>Rabbit-proof Fence.</i> —(a) A substantial fence hung with galvanized wire netting at least 36 inches wide, not less than 18 gauge, mesh not wider than 1½ inches; or (b) a fence reasonably sufficient in the opinion of a Board for the purpose of excluding rabbits	The Governor may proclaim any wire netting or other vermin-proof or rabbit-proof fence described therein to be such fence within the meaning of the Act, and every fence erected in the manner so proclaimed, if at least 42 inches in height, is deemed to be a "sufficient fence" within the meaning of the <i>Fence's Act</i>	<i>Rabbit-proof</i> , used with reference to fencing, is defined as of such a character as to prevent the passage of rabbits
(ii) Erection of Fences by Government, Boards, etc.	(a) A Board may erect a rabbit-proof fence or barrier fence on any land, public or private, within or without its District, or co-operate with another Board in such work (b) Boards must maintain barrier fences (c) When a barrier fence is within or on the boundary of Crown lands, any purchaser or lessee thereof (other than an annual lessee) must pay the value of the fence situated within his land	On the application of two or more owners of adjoining properties in a special area who have been furnished with materials for fencing, a Shire Council may, at their cost, erect a rabbit or vermin-proof fence, such owners entering into a bond to repay the cost thereof	(a) A Rabbit Board may apply money towards defraying the cost of the erection or maintenance of rabbit-proof fences (b) A Rabbit Board may direct that a fence be erected from one place to another within its district, and owners of holdings along the boundaries of which such fence is to be erected must erect fences capable of supporting wire netting and maintain them (c) A Rabbit Board may affix wire netting to any fence
(iii) Fencing Crown Lands	Where a private rabbit-proof fence forms a common boundary between public and private lands, the same contribution is payable by the Crown as would be payable by a private owner	The Government may erect and maintain vermin-proof fencing to enclose any Crown lands not owned or occupied otherwise than by the Board of Land and Works, and when such land is sold or leased the purchaser or lessee must repay the Crown the cost thereof	
(iv) Advances by Government to Boards or Councils	When money is voted by Parliament for the purchase of wire netting and other materials, the Minister may (a) purchase and distribute the same among Boards, or (b) lend the money to Boards for the purchase by them of such netting, etc. A Board must repay the cost by instalments over a period not exceeding 20 years with interest	(a) The Governor may grant loans to Shires for the purchase of wire netting for supplying to owners of land in a special area, repayable within 10 years without interest (b) The Government may grant loans, not exceeding £50,000, from Trust Funds at 3% interest (c) The Minister may sell wire netting to any municipal council which undertakes to make arrangements with land-owners. Council pays 10% cash, and balance in nine equal annual instalments with 4% interest

Wire netting same as for rabbits. Barbed wires 3½ and 15 inches above netting, with plain wire between. Two plain wires 19 inches and 42 inches above surface</p>	
<p>(a) A Vermin Board may do everything necessary for the suppression of vermin by the erection of vermin fencing</p> <p>(b) The Government may erect vermin-proof fences, the cost of which is to be borne by the owners or occupiers benefited, payable in 20 equal annual instalments with interest, or by rates</p> <p>(c) The dog-proof fence from Morgan to Nackara was erected by Government at the expense of owners on each side, and is maintained by the District Councils of the areas benefited</p>	<p>(a) The Minister may, out of moneys voted by Parliament, erect, maintain, and repair fences on any Crown land or private land in order to protect any part of the State from the incursion of rabbits</p> <p>(b) A Vermin Board may erect fences for preventing the incursion or migration of vermin</p>	..
<p>The Government may fence any vermin-infested Crown lands with a rabbit-proof fence, upon which they cease to be ratable</p>	<p>The Minister may erect and maintain fences on Crown lands</p>	..
<p>A Vermin Board or District Council may borrow from the Government for the purpose of purchasing wire netting and supplying same to occupiers of land in a special area. The loan is to be repaid in 20 equal annual instalments, with interest</p>	..	<p>The Minister may sell wire netting to any municipal council which undertakes to make arrangements with land-owners to buy the same for holdings situated in an infested district. The council pays 10% cash, and the balance in nine equal instalments, with 4½% interest</p>

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
C.—VERMIN-PROOF			
(v) Advances by Boards or Councils to Land-owners or Occupiers	<p>(a) An owner of land may purchase from a Board wire netting, etc., the cost of which with interest and all expenses in connexion therewith must be repaid in instalments spread over a period not exceeding that within which the cost is to be paid by the Board</p> <p>(b) An occupier of a holding may purchase wire netting, etc., from a Board for cash if the Minister consents</p>	<p>(a) In a special area, a Shire Council must furnish or offer to furnish owners of land with netting and notify the amount of value, whereupon such amount (whether the materials are accepted by such owner or not) becomes a debt due by such owner. Repayment to be made in ten equal annual instalments with 8% interest</p> <p>(b) A Municipal Council may grant an advance of wire netting, not exceeding 5 lineal miles, to any owner of land, such owner to pay 4½% interest on the amount unpaid</p>	..
(vi) Advances by Government to Land-owners or Occupiers	..	<p>The Minister may advance up to 6 lineal miles of netting to any owner on such terms as to security as may be arranged (a) if such land is held under a license or conditional purchase lease as an agricultural or grazing allotment or under a lease as a selection purchase allotment, or (b) if such land is licensed under the <i>Land Act</i>, or (c) if such land immediately adjoins any unoccupied Crown land or is not included in a municipality</p> <p>Where a fence is on a boundary between private and unoccupied Crown land, only one-half of the value need be paid</p> <p>A mortgage or lien over the land must be given</p>	<p>(a) The owner of a holding in a Rabbit District or infested Dingo District may apply for wire netting to the Minister, who may provide same. The cost thereof is to be a charge on the estate or interest in the holding, and be repaid by equal annual instalments in 10, 15, 20, or 25 years, as agreed on, with interest at 4% for rabbit proof and 5% for marsupial proof fencing</p> <p>(b) An owner may obtain wire netting from the Minister on his own account for marsupial-proof fencing in a proclaimed infested district and the Minister may advance him the cost on the same terms on which he obtained the netting</p>
(vii) Erection of or Contributions to Cost of Fencing by Owner or Occupier	<p>(a) The occupier of a holding of Crown land under an occupation license or lease may notify the local Land Board that he intends to make such holding rabbit-proof, and, when the fence is completed, such holding is deemed to be rabbit-proof as far as regards the payment for improvements in connexion with land withdrawn from occupation license or lease by becoming the subject of any purchase or lease from the Crown</p> <p>(b) The owners or occupiers of adjoining properties must share the cost of rabbit-proof fencing on their boundaries</p> <p>(c) The holder of a license or lease from the Crown, having less than 5 years to run, need only pay a rental equal to 5% of the half of the cost of erection of the fence</p>	<p>(a) In a special area for which a Shire Council has borrowed money for the purpose of netting, an owner must be given notice to fence by the Shire which furnishes him with netting, and if such owner fails to comply the Council may erect the fence at his expense, and the owner is liable to a penalty not exceeding £20</p> <p>(b) Councils may erect fences in special areas on the request of two or more owners of adjoining properties at their expense</p> <p>(c) All land in a special area, unless already sufficiently fenced must be chargeable with the payment of all materials which the Council furnishes or offers to furnish</p>	<p>(a) When a Rabbit Board orders a fence to be erected the owner of every holding along the boundaries of which such fence passes must erect and maintain a fence capable of supporting wire netting. The cost is distributed as follows:—(i) Owner of holding within such fence, one-fourth; (ii) owners of holdings bounded by such fence, one-fourth each; (iii) owners of holdings benefited, the balance</p> <p>(b) The owner of a holding using a fence erected at the expense of a Board or the Crown must maintain such fence and pay 4% per annum upon the cost of the wire netting</p>
(viii) Miscellaneous	<p>The following means are sanctioned for the destruction of rabbits and noxious animals:—Poisoning, trapping, fumigation, destruction of harbour, hunting and shooting, killing the females as caught and letting the males go alive, but only in wire-netted areas</p>	<p>(a) Any owner or occupier may burn off, without notice, from May to September</p> <p>(b) Any Inspector may notify an owner or occupier to destroy fences or timber which give harbour to vermin</p>	<p>Marsupial-proof fences must be inspected annually by a Land Commissioner or Crown Lands Ranger</p>

RELATING TO NOXIOUS ANIMALS—*continued.*

South Australia.	Western Australia.	Tasmania.
FENCING— <i>continued.</i>		
<p>(a) A Vermin Board or District Council may supply occupiers of land in a special area with wire netting, such occupiers to repay in 20 equal annual instalments, with interest at $\frac{1}{2}\%$ more than the Board or Council pays for the loan</p> <p>(b) All land of an occupier in a special area is to be chargeable with the payment of all netting which a Board or Council furnishes or offers to furnish, whether the same is accepted or not</p>	<p>Any owner or occupier may apply to a Vermin Board for wire netting and other appliances for vermin fences; the Board may provide same and defray the cost out of its funds. Applicant to execute a mortgage to the Agricultural Bank and repay the cost in annual instalments over a period not exceeding 20 years, with interest at the prescribed rate (<i>Vermin Act</i>)</p>	<p>A Municipal Council may advance wire netting up to 5 lineal miles to any land-owner for fencing his land (not being less than 5 acres in area or leased Crown lands). Owner to repay cost in 10 annual instalments with $4\frac{1}{2}\%$ interest, and to give the Council a mortgage over his land</p>
<p>(a) The cost of barbed wire and netting for vermin-proof fencing a boundary fence may be advanced to the lessee of land outside of District Councils' and Vermin-fenced Districts by the Government. Repayment to be made by 20 equal annual instalments, with interest at a fixed rate</p> <p>(b) The Governor may lend money for fencing around agricultural or cultivated lands not situate within any District Council District. All persons interested therein are to form a Trust, and are jointly and severally liable for the repayment thereof in 20 equal annual instalments, with interest</p>	<p>The Minister, on application from any occupier or owner of land, may provide wire netting and defray the cost of delivery at the nearest railway station or port. The owner must mortgage the land and repay the cost with interest at the prescribed rate extending over a period not exceeding 20 years</p>	<p>An advance of wire netting not exceeding 6 lineal miles may be made by the Minister to any owner of land (a) if the land is held under lease (other than mining) under any Act relating to Crown lands, or (b) if the land immediately adjoins unoccupied Crown lands</p> <p>Repayment to be made in 10 yearly instalments, and such security is to be given as arranged</p>
<p>(a) A District Council may notify an occupier in a special area to erect wire netting furnished to him, otherwise it may do so at his expense</p> <p>(b) A District Council may, on the application of two or more occupiers of adjoining properties in a special area, erect netting at their expense</p> <p>(c) An occupier of land not within but abutting on a District must pay the Board owning the fence one-half the value thereof in 20 annual instalments, with interest</p> <p>(d) An occupier of land abutting on the vermin fence of a Board must pay 5% per annum on half the cost of such fence</p> <p>(e) An occupier of land outside a District Council's or Municipality's district must pay his share of the cost and maintenance of a fence erected by an adjoining owner</p>	<p>(a) Where a boundary is fenced with a rabbit-proof fence the owner or occupier of the adjoining holding must contribute to the cost thereof according to the length of time he has a right of occupation on the following scale: 10 years or more, four-fifths; 6 years and less than 10, three-fifths; 4 years and less than 6, two-fifths; 2 years and less than 4, one-fifth; less than 2 years, one-tenth</p> <p>(b) Where a fence erected by a Vermin Board is made use of by the owner of a holding, such owner must pay annually to the Board a prescribed percentage of the value of the fence to such owner</p> <p>(c) Owners in a vermin-infested area must fence in water supplies provided that Government or a Board is prepared to supply wire netting</p>	
	<p>No destructive bird or animal may be imported into Western Australia</p>

Particulars.	New South Wales.	Victoria.	Queensland.
(i) Acts in force	Prickly Pear Destruction Act 1901 Local Government Act 1919	Thistle Act 1915	Prickly Pear Destruction Act 1912, 1913 Local Authorities Act 1902, 1910, 1912, 1913
(ii) Definitions	(a) <i>Prickly Pear</i> .— <i>Opuntia vulgaris</i> , <i>O. brasiliensis</i> , <i>O. monacantha</i> , <i>O. tuna</i> , <i>O. inermis</i> , <i>O. aurantiaca</i> , <i>O. nigricans</i> , <i>O. imbricata</i> , <i>O. microdasys</i> (b) Governor may declare any plant to be a noxious plant (c) A Council may declare a plant to be a noxious plant within its area	<i>Thistle</i> .— <i>Carduus marianus</i> , <i>Carduus benedictus</i> , <i>Carduus lanceolatus</i> , <i>Onopordum acanthium</i> , <i>Xanthium spinosum</i> (Bathurst burr), <i>Carduus arvensis</i> (Canadian thistle), and any other plant declared by the Governor to be a thistle. Numerous plants have been declared noxious some for the whole State and others for portions thereof	<i>Noxious Weed or Plant</i> .—Any weed or plant growing within any Local Authority area which has been declared to be a noxious weed or plant and to be a nuisance under the Local Authorities Act. Prickly-pear and water hyacinth are declared to be noxious weeds
(iii) Inspectors and Persons authorized to give notices	The Minister may authorize any person to act as Inspector	A Justice or municipal officer gives notices	Notices are served by a Local Authority
(iv) Powers of Inspectors, etc.	Any Inspector may at all reasonable hours enter upon any Crown land or private land to ascertain if any prickly pear is growing thereon, and must do so on being required by any owner or occupier	Any person authorized by a Justice or municipal officer may enter upon any lands to ascertain if thistles are growing thereon	A Local Authority may cause the extirpation and destruction of any noxious weed within its area, and may enter upon and dig up the soil of any unoccupied Crown land, public reserve, or private land therein
(v) Noxious Weeds on Unoccupied Crown Lands	(a) When prickly pear is found on Crown land, an Inspector must give notice to the Minister, who must forthwith authorize the employment of all necessary labour to eradicate the same, but he may instead offer for lease such land by auction or tender, or let it in areas not exceeding 640 acres for a period not exceeding 21 years conditionally upon the lessee eradicating prickly-pear thereon (b) A Municipal Council may destroy noxious weeds on any unoccupied Crown lands or may notify the Crown to do so	Notice to be given to the Board of Land and Works in Melbourne, and such Board may eradicate thistles on unoccupied Crown lands not within the boundaries of any shire or borough	(a) The Secretary for Public Lands may make an agreement with any person having for its object the freeing of Crown land heavily infested with prickly-pear, and for the grant or disposal of such land when so freed, the maximum area allowed in one agreement being 100,000 acres (b) Land heavily infested with prickly-pear may be leased at a nominal rental for 50 years conditionally on the lessee destroying all prickly pear thereon (c) The Treasurer, on notification from a Municipal Council, must extirpate noxious weeds on unoccupied Crown land from moneys appropriated by Parliament
(vi) Noxious Weeds on Land occupied by a Municipality	(a) A Municipal Council, on receipt of notice, must forthwith eradicate prickly-pear on its land, streets, and roads (b) A Municipal Council must destroy all noxious plants upon land vested in it, on reserves and upon rivers not privately owned (c) A Council may require an adjoining Council to destroy noxious weeds for 40 chalus from the boundary	A Municipal Council must eradicate thistles on land within its boundaries vested in it, or occupied by it, other than unoccupied Crown lands. Any expenditure in excess of £100 in any one year may be refunded by the Government	A Local Authority must extirpate and destroy any noxious weeds existing upon any roads or land under its control
(vii) Noxious Weeds on Land vested in Trustees	Where any common or land is vested by the Crown in trustees other than a Municipal Council, (a) If prickly-pear is not eradicated within 3 months of notice, or (b) If trustees are unable to eradicate, or (c) there are no trustees, the Minister may lease same for not exceeding 21 years conditionally on lessee eradicating prickly-pear	..	Trustees must eradicate noxious weeds on land vested in them, and are liable for the expense of so doing if they fail to eradicate

TO NOXIOUS WEEDS IN THE AUSTRALIAN STATES.

South Australia.	Western Australia.	Tasmania.
Thistle and Burr Act 1862, 1887 Noxious Weeds Destruction Act 1891	Noxious Weeds Act 1904 ..	Californian Thistle Act 1883, 1884, 1887
(a) <i>Thistles</i> .—Star Thistle, Bathurst Burr (b) <i>Noxious Weeds</i> include all plants and weeds for the destruction of which any statutory provision is made (c) The Governor may, after resolutions have been carried by both Houses of Parliament, declare any weed to be a noxious weed	<i>Noxious Weeds</i> .—Such plants as the Minister, by notice in the <i>Government Gazette</i> , may declare to be noxious weeds either generally or in any particular locality	<i>Thistle</i> .— <i>Cirsium arvensis</i> (Californian Thistle), <i>Xanthium spinosum</i> (Bathurst Burr)
Notices are signed by a Chairman or Clerk of a Local Authority within its District, or by a Justice or Crown ranger or police officer or person authorized by the Commissioner of Crown Lands	The Governor may appoint Inspectors	Chief Inspector or any Inspector of Sheep appointed under the <i>Scab Act</i>
Any person authorized by a Justice or Crown Lands Ranger may enter upon land and search for noxious weeds, but no authority can be given to enter into any gardens, orchards, or growing crops	An Inspector may, at all reasonable times, enter upon any land for the purpose of ascertaining if any noxious weeds are growing thereon	An Inspector may, at any reasonable hour in the day time, enter upon any lands for the purpose of ascertaining if any thistles are growing thereon
Noxious weeds growing on waste lands of the Crown are to be eradicated by the Commissioner of Crown Lands, otherwise the Governor may direct the Treasurer to pay for the expenses of such eradication by any person authorized to do so	On a report to the Minister by any Municipal Council or by the Advisory Board of the Department of Agriculture that any noxious weed is growing on any Government railway reserve, stock route, camping ground, or unoccupied Crown land within one mile of cultivated land, all such lands must be cleared by the Minister for Lands and the Commissioner for Railways respectively	The Minister of Agriculture must cause all thistles growing on unoccupied waste lands to be cut down before blossoming
Noxious weeds upon waste lands of the Crown under the management of District Councils and Municipal Corporations must be eradicated by such Councils	(a) A Local Authority must clear all lands under its control and defray the cost out of its general revenue (b) A Road District Board may, and, if required by the Minister must, clear any road, reserve, or common of noxious weeds (<i>Road Districts Act</i>)	A Municipal Council must cause all thistles growing on streets and roads under its control to be cut down before blossoming
..	..	Trustees must cut down all thistles before blossoming on all land vested in them

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE RELATING

Particulars.	New South Wales.	Victoria.	Queensland.
(viii). Noxious Weeds on Private Lands	<p>(a) An Inspector may serve a notice on any owner or occupier of private lands on which prickly-pear is found, requiring him forthwith to eradicate the same.</p> <p>(b) A Municipal Council may give notice generally or to an owner in particular to destroy within two months all noxious plants on his land and at least 1 chain back from his boundary and keep such land free from noxious plants</p>	<p>(a) An owner, lessee, or occupier, on receipt of notice, must forthwith destroy and eradicate all thistles on his land and the adjacent half width of road and keep them clear for six months.</p> <p>(b) An occupier of land leased from the Crown may receive a refund from the Crown of any amount over £100 expended in any one year for the eradication of thistles</p>	<p>(a) Notice sent to occupier or person in charge, or failing these to owner, to extirpate and destroy noxious weeds within one month and keep the land clear for one year.</p> <p>(b) An occupier of land fronting a water-course must extirpate all water hyacinth to a distance of 2 chains or to the centre of the water-course if less than 2 chains distant</p>
(ix) Penalty for Failure to Eradicate Noxious Weeds	<p>(a) Failure to commence and continue to eradicate prickly-pear, first offence, maximum £10; subsequent offences, maximum £20, minimum £5</p> <p>(b) Failure to take reasonable steps to destroy noxious weeds, maximum £50</p>	<p>Failure to effectually clear land and half width of road within 14 days of notice and to keep clear for 6 months, first offence, maximum £5; subsequent offences, maximum £20, minimum £2</p>	<p>Permitting water hyacinth to be on land, maximum £50</p>
(x) Procedure when Owner or Occupier Fails to Eradicate Noxious Weeds	<p>(a) An Inspector may enter upon the land and do all things necessary to eradicate prickly-pear at the cost of the owner or occupier.</p> <p>(b) A Municipal Council may eradicate noxious weeds at the owner's expense</p>	<p>On neglect or refusal to destroy thistles within seven days, any person authorized by a Justice or Municipal Officer may enter and eradicate such thistles at the expense of the owner, lessee, or occupier</p>	<p>If at the end of one month noxious weeds are not extirpated or land kept free for one year, a Local Authority may expend money on the extirpation thereof, such expense to be a charge on the land and recoverable from the occupier or owner</p>
(xi) Procedure when Owner or Occupier is unknown or outside the State	<p>If the cost of eradicating prickly-pear cannot be recovered and remains unpaid for 12 months, the Minister may let the land for a term not exceeding 21 years</p>	<p>The Supreme Court may make an order for the payment of the cost of eradication, such order to be advertised four times in the <i>Government Gazette</i>, and if within 18 months no payment is made, the Sheriff may sell the land or so much thereof as is necessary to pay the cost</p>	<p>..</p>
(xii) Contribution between Landlord and Tenant	<p>Where on the 1st September, 1886, a lease was held and has since then been and is now held of any land, except Crown land, for an unexpired period, and no provision is made with respect to the cost of eradicating prickly-pear, the landlord and tenant must each contribute an equitable share of such cost</p>	<p>..</p>	<p>..</p>
(xiii) Miscellaneous	<p>(a) Any person authorized to enter upon land and to destroy prickly-pear may take such indigenous timber growing thereon for the purpose of burning or destroying such prickly-pear and may dig pits and bury same therein</p> <p>(b) Penalty for growing, cultivating, or disseminating prickly-pear, not exceeding £20</p>	<p>..</p>	<p>The Governor may declare that an area be entirely freed from prickly-pear, and then the Local Authority and every occupier and owner must extirpate it. If, after the time prescribed, any prickly-pear is found, both the owner and occupier are liable to a penalty of not less than £5 nor more than £50</p>

TO NOXIOUS WEEDS IN THE AUSTRALIAN STATES—*continued.*

South Australia.	Western Australia.	Tasmania.
<p>(a) Owner or occupier, on receipt of notice, must within 21 days destroy all noxious weeds on his land and on one-half of the adjacent roads</p> <p>(b) An owner or occupier, on notice from a District Council or Municipal Corporation, must, within 30 days, destroy all shrubs, plants, or bushes known as acacia, briar, furze, prickly-pear, African boxthorn, and blackberry on his land and the adjacent half roads</p>	<p>(a) An occupier, on receipt of notice from an Inspector, must clear his land of noxious weeds within the time specified in the notice</p> <p>(b) A Road District Board may make by-laws for requiring the owner or occupier of land to keep the roads abutting on such land clear of poisonous plants after such plants have been so cleared by the Board</p>	<p>(a) An occupier of land must cut down all thistles thereon to prevent them from blossoming</p> <p>(b) An Inspector on finding thistles on land must give the occupier thereof notice to cut same down within 14 days</p> <p>(c) An occupier of land infested with thistles must make an annual return of the estimated area of such infested land</p>
Failure to destroy noxious weeds after notice, maximum £10	Failure to clear land in accordance with notice, maximum £50	Failure to cut down all thistles before blossoming, maximum £20
If within 21 days an occupier or owner refuses or neglects to destroy weed, any authorized person may do so at his expense	If an occupier fails or neglects to clear his land in accordance with the notice, an Inspector may do the work at his expense	If occupier fails to take steps to cut down thistles within 14 days, an Inspector may authorize any person to do so at the expense of such occupier
If there is no occupier, notice may be given by advertisement in the <i>Government Gazette</i>	If an owner is absent from Western Australia, notice must be served upon his agent	An Inspector, without serving any notice, must forthwith take steps for cutting down thistles and may proceed <i>ex parte</i> to recover the expense thereof, and the amount so recovered remains a charge upon the land
	If the occupier has the right of occupation for 6 years or more, he must bear the whole expense; if for 4 years and less than 6, two-thirds; if for 2 years and less than 4, one-third; and if for less than 2 years, the owner must pay the whole expense	
Where noxious weeds are growing, and statutory powers have not been fully exercised, the Commissioner of Crown Lands must give notice to a Local Authority to exercise such powers within not less than 30 days, and in case of its failure to do so may exercise such powers himself at the expense of such Local Authority		<p>(a) Any person removing or selling any hay, straw, grass seed or any kind of grain in which are any thistle seeds is liable to a penalty of not less than £2 nor more than £25</p> <p>(b) A Municipal Council may make by-laws prescribing the means to be adopted for the destruction and extirpation of any noxious weed</p> <p>(c) A Municipal Council may levy a special rate for the eradication of noxious weeds</p>

IMPORTATION OF ANIMALS FROM FOREIGN COUNTRIES.

1. **General.**—The importation of animals from foreign countries is under the control of the Commonwealth, and the following are the chief provisions of the Acts and Regulations governing the same :—

2. **Acts in Force.**—Quarantine Act 1908, 1912.

3. **Diseases in Animals.**—Glanders, farcy, pleuro-pneumonia contagiosa, foot and mouth disease, rinderpest, anthrax, Texas or tick fever, hog cholera, swine plague, mange, scab, surra, dourine, rabies, tuberculosis, actinomycosis, variola ovina, and any disease proclaimed from time to time by the Governor-General.

4. **Prohibition of Importation, &c.**—The Governor-General may—

- (a) declare any ports to be ports where imported animals may be landed,
- (b) appoint quarantine stations,
- (c) prohibit the importation of any animals,
- (d) prohibit the removal of any animals from any part of the Commonwealth in which disease exists,
- (e) declare any part of the Commonwealth to be a quarantine area,
- (f) declare any animals to be subject to quarantine.

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
--------------	------------------	-----------	-------------

A.—ACTS AND REGULATIONS RELATING

(i) Acts in Force ..	Stock Act 1901 .. Stock Diseases (Tick) Act 1901, 1915	Stock Diseases Act 1915 ..	Diseases in Stock Act 1915
(ii) Definitions ..	<p>(a) <i>Stock</i>.—Cattle, sheep, goats, swine, dogs, and other proclaimed animals (<i>Stock Act</i>)</p> <p>(b) <i>Stock</i>.—Horses, cattle, asses, mules, camels, sheep, swine, or goats, or other proclaimed animals (<i>Stock Diseases Act</i>)</p> <p>(c) <i>Infectious or Contagious Disease</i>.—Cattle plague, foot and mouth disease, sheep-pox, and any other proclaimed disease (<i>Stock Act</i>)</p> <p>(d) <i>Disease</i>.—Any proclaimed disease not being scab in sheep, and includes cattle ticks (<i>Ixodes bovis</i>, and <i>Boophilus Australis</i>) (<i>Stock Diseases Act</i>)</p> <p>(e) <i>Diseased</i> means that stock have Texas or tick fever or have cattle ticks on them (<i>Stock Diseases Act</i>)</p> <p>(f) <i>Infected</i> means that the stock are diseased or are in a herd in which are diseased stock or have been upon any land upon which diseased stock have been within the preceding 3 months (<i>Stock Diseases Act</i>)</p>	<p>(a) <i>Stock</i> includes bull, cow, ox, calf, bison, buffalo, stallion, mare, gelding, foal, ass, mule, ram, ewe, wether, lamb, hogget, boar, sow, barrow, sucker, pigeon, goose, fowl, duck, turkey, pea-fowl, guinea-fowl, dog, bitch, camel, goat, deer, antelope, elephant, cat</p> <p>(b) <i>Disease</i>.—Proclaimed diseases are actinomycosis, anthrax, avian diphtheria, bacillus necrophorus, black-leg, cattle tick, contagious abortion, dourine, farcy, foot and mouth disease, fowl cholera, glanders, hog cholera, hog plague, infectious pneumo-enteritis, influenza, mange, pleuro-pneumonia contagiosa, poultry tick, rinderpest, roup, scab, scabies, sporadic urticaria, surra, swine erysipelas, swine fever, swine measles, tick fever, trichina, tuberculosis</p> <p>(c) <i>Diseased Stock</i>.—All stock proclaimed to be diseased</p>	<p>(a) <i>Stock</i> includes horses, cattle, sheep, swine, camels, and goats, and other proclaimed animals</p> <p>(b) <i>Disease</i>.—Actinomycosis, anthrax, malignant growths (cancer), foot and mouth disease, glanders and farcy, pleuro-pneumonia contagiosa, rinderpest, tuberculosis, variola, scab, malignant catarrh, rabies, contagious pneumonia in swine, swine fever, swine plague, epizootic lymphangitis, dourine or equine syphilis, strangles, surra, sheep fly, maggot disease, contagious mammitis, cattle tick, Texas or tick fever, and any other infectious or contagious disease affecting stock or any other proclaimed disease</p> <p>(c) <i>Diseased Stock</i>.—Stock actually suffering from or affected with disease</p> <p>(d) <i>Infected Stock</i> includes stock which has been in contact with diseased stock during the preceding 3 months</p>

5. **Provisions for landing imported Animals.**—The following provisions must be observed when animals are imported from other countries :—

- (a) they may be landed only at proclaimed ports,
- (b) they may not be landed without a permit from a quarantine officer,
- (c) they must be carefully inspected by a quarantine officer,
- (d) at least seven days' notice of the arrival must be given to the Chief Quarantine Officer, except in the case of animals from New Zealand, when three days' notice is sufficient,
- (e) the master of the ship on which are imported animals must make a declaration as to the health of the animals while on board,
- (f) a declaration from the owner or a certificate from a veterinary surgeon or both, according to the animal, must be forwarded to the Chief Quarantine Officer.

6. **Quarantining imported Animals.**—The quarantining of imported animals is subject to the following provisions :—

- (a) if the imported animals (other than camels, horses, or dogs) come from a country which is free from disease, and are accompanied by a certificate of cleanness, they may be landed without quarantine,
- (b) if any imported animal is not suffering from any disease it may be placed under quarantine surveillance and treated as prescribed,
- (c) in all other cases the animal is to be quarantined for a period ranging from 14 to 60 days, according to the class of animal.

7. **Destruction of imported Animals.**—If a quarantine officer certifies that an animal is diseased and is a source of danger, the Minister may order it to be destroyed, but if any animal so destroyed is found not to be diseased compensation is to be paid to the owner thereof.

RELATING TO DISEASES IN STOCK.

South Australia.	Western Australia.	Tasmania.
------------------	--------------------	-----------

TO STOCK GENERALLY.

Stock Diseases Act 1888, 1903, 1915, 1918	Stock Diseases Act 1895, 1906	Contagious Diseases (Cattle) Act 1861, 1880, 1896, 1901, 1909, 1912, 1918 Diseased Animals Importation Act 1883, 1887, 1910
<p>(a) <i>Stock</i>.—Camels, horses, cattle, sheep, goats, deer, dogs, swine, and other proclaimed animals</p> <p>(b) <i>Disease</i>.—Glanders, farcy, equine fever, rinderpest, pleuro-pneumonia, tuberculosis, anthrax, scab, sheep-pox, foot and mouth disease, catarrh, swine fever, trichinosis, rabies, lice, tick, cancer, contagious pneumonia (called pants), affecting swine, actinomycosis, tick fever, and any other proclaimed disease</p> <p>(c) <i>Diseased Stock</i>.—All stock actually suffering from or affected with disease</p> <p>(d) <i>Infected Stock</i>.—All stock not actually diseased, which forms or during the preceding 3 months has formed part of a lot containing diseased stock or which has been in contact with diseased stock or with stock treated for the cure of any disease</p>	<p>(a) <i>Stock</i>.—Horses, cattle, sheep, goats, swine, camels, deer, antelope, llamas, buffaloes, and other ruminants, dogs, poultry, and other proclaimed animals</p> <p>(b) <i>Disease</i>.—(i) <i>Horses</i>: anthrax, glanders, farcy, influenza, epizootic lymphangitis, tick, South African horse sickness, dourine; (ii) <i>Cattle</i>: actinomycosis, pleuro-pneumonia, warbles, anthrax, cattle tick or Texas fever, cancer, rinderpest, tuberculosis, foot and mouth disease; (iii) <i>Sheep</i>: anthrax, catarrh, ticks, lice, footrot, sheep-pox, foot and mouth disease, variola ovina; (iv) <i>Pigs</i>: anthrax, swine fever, foot and mouth disease, contagious pneumonia, hog cholera, tuberculosis, trichinosis; (v) <i>Goats, Deer, Antelopes</i>: anthrax, foot and mouth disease; (vi) <i>Camels</i>: surra, mange, dourine; (vii) <i>Dogs</i>: rabies, mange; (viii) <i>Poultry</i>: roup, cholera, ticks, lice</p> <p>(c) <i>Infected Stock</i>.—Stock suffering from disease or which has been in contact with diseased stock or has been treated during the preceding 3 months</p>	<p>(a) <i>Cattle</i>.—Bull, ox, bullock, steer, cow, heifer, calf (<i>Contagious Diseases Act</i>)</p> <p>(b) <i>Animal</i>.—An animal of any kind except mankind (<i>Diseased Animals Importation Act</i>)</p> <p>(c) <i>Disease</i>.—Anthrax (anthrax, splenic fever, splenic apoplexy), cattle plague (rinderpest), contagious pleuro-pneumonia, foot and mouth disease, bovine tuberculosis, and any proclaimed disease</p> <p>(d) <i>Poultry Disease</i>.—Fowl diptheria (roup), favus (<i>Lophophyton gallinæ</i>), canker, chicken-pox, fowl tick (<i>Argas persicus</i>), enteritis, tuberculosis, and the itch mite (<i>Sarcoptes mutans</i>)</p> <p>(e) <i>Diseased</i> means infected with disease</p>

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—ACTS AND REGULATIONS RELATING			
(iii) Proclaimed Districts	(Sheep Districts only) ..	(Sheep Districts only) ..	The Governor may constitute any part of the State a Stock District, and assign one or more districts to an Inspector
(iv) Stock Funds	(a) The Stock Diseases Fund consists of all assessments, penalties, and other moneys received (b) The Minister may levy an annual assessment on each owner, not exceeding 2s. 6d. on every 100 head of horses or cattle or 6d. on every 100 sheep or branded or ear-marked goats. Owners of less than 50 head of cattle or horses or 250 sheep or goats are exempt from assessment
(v) Returns of Stock to be furnished by Owners	(Sheep only) ..	(Sheep only) ..	Returns furnished under the <i>Stock Returns Act</i> are to be used for the purpose of making assessments
(vi) Appointment of Inspectors	(a) The Governor may appoint a Chief Inspector for New South Wales and Inspectors for one or more districts. Inspectors under the <i>Pastures Protection Act</i> must be certificated (b) The Governor may appoint Inspectors of horned cattle at the various ports	The Governor may appoint a Chief Inspector of Stock, Inspectors of Stock, and other officers	The Governor may appoint a Chief Inspector of Stock, Inspectors of Stock, and Honorary Inspectors, who, except the last-named, must pass an examination before being appointed
(vii) Powers of Inspectors with respect to Stock	An Inspector may at any time (a) enter upon any land, building, etc., for the purpose of examining stock; (b) take possession of infected or suspected stock; (c) order an owner to muster stock; (d) detain travelling stock for examination; (e) order any person in charge of infected travelling stock to take them back whence they came if under a distance of 40 miles	An Inspector of Stock has the power to enter at any time into any ship, land, or building not being a dwelling house, for the purpose of inspecting any stock or enforcing the provisions of the Act or Regulations thereunder	An Inspector may at any time (a) enter upon any holding to inspect stock; (b) detain travelling stock for examination; (c) examine and detain travelling stock; (d) order travelling stock to be forthwith taken back to whence they came; (e) impound or quarantine diseased or infected stock
(viii) Prohibition of Introduction of Stock from other States	The Governor may absolutely prohibit for a specified time the introduction of any stock, fodder or fittings from any other State in which there is reason to believe any infectious or contagious disease exists	(a) The Governor may prohibit the introduction of any infected stock and of the hides, skins, horns, hoofs, or other parts of any stock (b) The introduction by land or sea of diseased stock is prohibited.	The Governor may prohibit the introduction from another State of infected or suspected stock
(ix) Provisions under which stock may be introduced by sea from other States. (For importations from Foreign Countries, see Commonwealth Act in text)	(a) Cattle which are not infected must be quarantined for not less than 14 days. Cattle which are infected on arrival or within one month thereafter must be destroyed, with all fodder, fittings, and effects within 48 hours (b) No imported stock or fittings may be landed until examined by an Inspector and a permit for removal granted	(a) The introduction of stock by sea is permitted in clean vessels only. (b) Stock newly introduced must not travel until it has been examined by an Inspector, who must be satisfied that it is free from disease (c) Introduced diseased stock may be seized by an Inspector and destroyed or quarantined and treated (d) Stock introduced contrary to a prohibition may be destroyed or otherwise disposed of as the Minister directs	(a) A declaration and certificate of cleanness must be delivered to an Inspector on arrival, who forthwith examines such stock (b) If an Inspector is in doubt whether any stock is infected, he may temporarily detain such stock on board ship or quarantine them and cause them to be treated

RELATING TO DISEASES IN STOCK—*continued.*

South Australia.	Western Australia.	Tasmania.
TO STOCK GENERALLY— <i>continued.</i>		
	(Sheep Districts only) . .	The Governor may proclaim Cattle Districts, and any municipality or two more municipalities jointly may be declared a District
		The Contagious Diseases (Cattle) Fund is supported by a contribution not exceeding 3d. per annum for each head of cattle over 6 months of age and 2s. per horse; but where one or more municipalities are declared a District the maximum rate for cattle is 6d. The sum of 4d. per head is to be deducted and paid to the Chief Inspector of Stock. Owners of less than 4 head are exempt
	(Sheep only) . .	Every cattle owner must furnish an annual return of the number and description of cattle in his possession
The Governor may appoint a Chief Inspector of Stock, a Deputy Chief Inspector of Stock, Inspectors of Stock, and temporary Inspectors, all of whom must be certificated	The Governor may appoint a Chief Inspector of Stock and other Inspectors of Stock, and he may also appoint in sub-districts Inspectors and Assistant Inspectors of Sheep. The power of appointing Assistant Inspectors of Sheep may be delegated to any Government Resident or Resident Magistrate	The Governor may appoint a Chief Inspector of Sheep and other Inspectors of Sheep, who are also to act as Inspectors of Stock
An Inspector may enter any conveyance or land for the purpose of inspecting any stock, and may direct the owner of diseased or infected stock to place such stock in a quarantine ground and to treat them. He may also kill one head, or, if there are over 100 head, two head per hundred for the purpose of deciding whether they are diseased	An Inspector may enter any vessel or conveyance or upon any land or into any building, not being a dwelling-house, for the purpose of inspecting stock or enforcing the provisions of the Act or Regulations thereunder	
The Governor may prohibit the introduction of any stock, fodder, or fittings from any other State, during such periods as may appear to be necessary for preventing the introduction of disease	The Governor may prohibit the introduction of any stock from any place either by land or sea	(a) The Governor may prohibit the importation of cattle from any infected country, or may permit them to be landed only at certain ports (b) The importation of any packing likely to introduce Queensland cattle tick (<i>Ixodes bovis</i>) is prohibited
(a) Cattle or sheep may not be introduced by sea without a certificate from an Inspector or veterinary surgeon at the port of shipment that they are clean (b) Horses and swine must be accompanied by a declaration of health from the owner certified to by an Inspector or veterinary surgeon (c) Diseased or infected stock may be destroyed or removed to quarantine and treated	(a) No stock may be imported unless accompanied by a certificate from a veterinary surgeon that they were free from disease when placed on board (b) No imported stock may be landed until examined by an Inspector and a permit granted (c) Non-infected stock must be quarantined (d) Stock which on arrival or within 3 months thereafter is infected must be destroyed by the owner within 48 hours, together with fodder, fittings, etc. Swine from Queensland may be landed only at Fremantle and must be quarantined for 30 days	(a) Fourteen days' notice must be given of the importation of cattle (b) Cattle may only be landed at certain specified ports (c) Cattle must be accompanied by a certificate of cleanliness from an Inspector, and a certificate from a veterinary surgeon that they were recently subjected to the tuberculosis test and be quarantined on arrival for not less than 90 days (d) Three days' notice of the arrival of poultry must be given, and a declaration and certificate of freedom from disease furnished

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—ACTS AND REGULATIONS RELATING			
(x) Duties of Masters of Vessels carrying Stock	The Master of any vessel in which are imported stock must make a declaration to an officer of Customs regarding the stock shipped
(xi) Provisions under which Stock may be introduced by Land	Stock may not be introduced until examined by an Inspector and a permit for removal granted	(a) Stock may only be introduced at certain scheduled places, and not less than 24 nor more than 96 hours' notice must be given to an Inspector (b) An Inspector must be satisfied that stock is free from disease before authorizing its introduction, and such stock must not travel until it has been inspected (c) An Inspector may order stock and fittings to be disinfected or treated before introduction	(a) Stock may only be introduced at appointed places (b) The owner of stock must obtain from an Inspector a permit to travel such stock, which must not be removed from their place of destination within 3 months except under a fresh permit (c) No stock may be introduced without a certificate of cleanness from the Inspector in the other State contiguous to the crossing place (d) Stock must be examined by an Inspector, who may refuse admission until they have been observed and treated in the State of origin
(xii) Exportation of Stock, etc.	An Inspector of Horned Cattle must examine all cattle intended for export, and, if they are found free from disease, give a certificate of cleanness, and see that they are embarked	..	Hides may only be exported when accompanied by a declaration that they have been salted and stacked and remained in the stack for not less than 7 days, and have been examined by an Inspector
(xiii) Quarantine Stations	The Governor may proclaim any ground to be a quarantine station	..	The Minister may establish quarantine stations in all necessary places
(xiv) Proclamation of Infected Areas	The Governor may declare any of the Australian States or parts thereof to be infected, if there had existed therein within the previous twelve months any disease in stock	..	The Governor may declare any part of Queensland to be an infected area
(xv) Notification of Diseased Stock	Notice must be given to the nearest Inspector and to the nearest member of the police force within 48 hours when the stock is kept on any land by the occupier or his manager, agent, or superintendent, and within 24 hours by the person in charge of travelling stock	The owner of infected stock must forthwith give notice to the Chief Inspector or to the Inspector for his district	(a) An owner of stock must notify the nearest Inspector when disease appears in stock upon his holding or in his travelling stock (b) An owner of swine must similarly notify within 24 hours
(xvi) Isolation of Diseased Stock	An owner, on the discovery of disease, must have the diseased stock drafted out and kept separate, as far as practicable, from stock which are not diseased	Any stock which has been in direct or indirect contact with any stock affected with anthrax must be forthwith isolated	An owner must, when disease appears in his stock, forthwith draft out and continue to keep separate all diseased stock from stock not suffering from disease
(xvii) Quarantining Diseased Stock	An Inspector may order an owner of infected stock to remove them to any other locality, and may, with the approval of the Minister, place them in quarantine, and declare any land where such stock are or recently have been to be a quarantine area	When an Inspector finds any disease (except scab or influenza in sheep) he may declare the premises where it is found to be a quarantine district	(a) An Inspector may define the boundaries of any infected area and place it in quarantine, from which stock must not be removed unless authorized by the Minister (b) An Inspector may impound or quarantine any stock which are or are suspected to be diseased

RELATING TO DISEASES IN STOCK—*continued.*

South Australia.	Western Australia.	Tasmania.
TO STOCK GENERALLY.— <i>continued.</i>		
The Master of a vessel having on board any stock must give notice to an Inspector within 24 hours of arrival, and must not land stock, etc., without his permission	The Master of a vessel on which are imported stock must make a declaration with regard thereto and deliver it to an Inspector	The Captain of a vessel having cattle on board to be landed must notify the Inspector of Stock at the port of landing
(a) No stock may be introduced except at proclaimed points of entry (b) Twelve hours' notice must be given of the introduction by rail (c) The Importer of cattle must have a certificate of health from an Inspector or a declaration from the breeder or owner (d) Camels from Western Australia must be treated and dressed and placed in quarantine for not exceeding 3 months, and not released therefrom unless healthy and free from mange	(a) Same provision as for stock introduced by sea (b) Cattle may only be introduced from the Eastern States when accompanied by a certificate that they are free from tuberculosis (c) An owner of stock must give at least 7 days' notice of their introduction (d) Swine may only be landed at Fremantle and must be quarantined for 30 days	..
..	..	Sheep may not be exported unless certified to be clean Three days' notice to be given to an Inspector
The Governor may appoint quarantine grounds for the reception and detention and treatment of diseased or infected stock	The Governor may set apart land for quarantine stations	The Chief Inspector of Stock may rent or purchase and the Chief Inspector of Sheep may rent land for quarantine grounds, with the consent of the Governor
The Governor may appoint areas within the State from which no stock may be removed except in accordance with regulations, and may prohibit the removal of stock from one part of the State to another part	(a) Any district in which there are or have been within 6 months any infected sheep is an infected area (b) East Kimberley District is a quarantine area, and cattle may only leave at Wyndham after having been dipped	The Governor may declare "Clean Sheep Districts" and "Quarantine Sheep Districts"
(a) An owner of diseased stock must, within 24 hours of the discovery thereof, notify the nearest Inspector, and the Chief Inspector at Adelaide (b) An owner of swine affected with disease must give immediate notice thereof to the nearest Inspector	An owner of infected or suspected stock must, as soon as he has discovered that they are infected, forthwith give notice to the nearest Inspector	Every person having in his possession or under his charge any diseased or suspected cattle must forthwith give notice to an Inspector
An owner must keep diseased stock from coming into contact with stock belonging to other persons	An owner of infected or suspected stock must keep such stock from coming into contact with other stock until otherwise ordered by an Inspector	Every person having in his possession or under his charge any diseased or suspected animal must, as far as practicable, keep any such animal separate from animals not so affected
(a) An Inspector may direct the owner of diseased or infected stock to place such stock in a quarantine ground to be appointed by such Inspector (b) The Commissioner of Lands may order infected stock to be quarantined	If it appears to an Inspector that disease exists or has within the preceding 30 days existed on any land he must declare such land to be an infected holding in which diseased stock must be kept until released, and notify the Chief Inspector	When it appears to the Minister that disease exists in a shed, field, or other place, he must declare such place to be a place infected with disease, and animals must not be moved into, within, or out of any place infected with disease

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—ACTS AND REGULATIONS RELATING			
(xviii) Treatment of Diseased Stock	<p>(a) An Inspector may order the owner of infected stock to disinfect, dress, inoculate, or otherwise treat such stock under the supervision of an Inspector</p> <p>(b) All infected stock must be branded with red paint</p>	<p>The Chief Inspector may direct the owner of infected stock to treat such stock in order to prevent the spread of disease</p>	<p>(a) An Inspector may order stock infected with disease to be treated</p> <p>(b) An Inspector may order that all stock, before being removed from an infected area, must be treated to his satisfaction</p> <p>(c) An owner may appeal to the Minister against the decision of an Inspector</p>
(xix) Inoculation of Stock	<p>(a) Only certificated inoculators may practice inoculation</p> <p>(b) Notice of inoculation must be given to the Government Veterinary Surgeon and the District Inspector of Stock</p> <p>(c) Inoculated cattle must not be removed for 30 days</p> <p>(d) The carcass of stock dying within 30 days of inoculation must be burned</p> <p>(e) The results of inoculation must be reported to the Government Veterinary Surgeon</p>	..	<p>Only qualified veterinary surgeons or other persons approved by the Chief Inspector of Stock may practise the protective inoculation of stock against disease, except stock-owners inoculating their own stock against pleuro-pneumonia contagiosa, Texas fever or blackleg</p>
(xx) Destruction of Diseased Stock	<p>(a) The Minister may order the destruction of infected stock whenever such destruction would tend to prevent the spread of disease or the cause of disease</p> <p>(b) Any stock moved contrary to any order or regulation may be seized by an Inspector or Officer of Police, and, at the discretion of the Minister, sold or destroyed</p>	<p>Whenever the Governor is satisfied, upon the report of an Inspector, that any stock is diseased he may order the destruction of such stock</p>	<p>The Minister may order the destruction of infected stock whenever such destruction would tend to prevent the spread of disease, also of any diseased stock which has been impounded or quarantined by an Inspector</p>
(xxi) Procedure with regard to Straying Stock	<p>Stock straying within a quarantine area must be examined and treated. If the owner is known, he must take them to a secure paddock, and if unknown, they are to be disposed of as directed by the Minister</p>	..	<p>A Local Authority may destroy any diseased stock suffering from malignant growths (cancer) tuberculosis or pleuro-pneumonia contagiosa found straying upon any road or land under its control, without compensating the owner, and must notify an Inspector</p>
(xxii) Compensation for the Destruction of Stock	..	<p>The owner of diseased stock, which is destroyed, has no claim for compensation for their destruction</p>	<p>Compensation equal to one-half of the value for Australian-bred stock or full value for imported stock is paid when the animal destroyed is found to be free from disease, the value of products from boiling-down being taken into consideration when estimating compensation</p>

RELATING TO DISEASES IN STOCK—*continued.*

South Australia.	Western Australia.	Tasmania.
TO STOCK GENERALLY— <i>continued.</i>		
<p>(a) An Inspector may direct the owner of diseased stock to take measures regarding their treatment or to do such acts as are necessary to eradicate or check the spread of disease</p> <p>(b) If pleuro-pneumonia is found in a herd of cattle, the Chief Inspector may cause such herd to be inoculated</p>	<p>An Inspector of Stock may require that anything which is in contact with diseased or infected stock be cleansed and disinfected</p>	..
<p>Inoculation may only be carried out by a competent person</p>	<p>It is unlawful for any person, without the consent of the Chief Inspector, to inoculate or cause any stock to be inoculated with the virus of any disease, whether such virus be in an attenuated form or not</p>	..
<p>(a) The Commissioner of Lands, whenever any stock is diseased, and it is desirable in order to eradicate disease or prevent its spread, may order such stock to be forthwith destroyed by the owner</p> <p>(b) Diseased swine must be destroyed</p>	<p>(a) Stock infected with any infectious or contagious disease may be destroyed</p> <p>(b) If there is no efficient means of isolation of diseased stock, the Chief Inspector may order such stock to be killed</p> <p>(c) Diseased swine must be destroyed</p>	<p>The Minister may cause all animals to be destroyed which are (a) affected with disease, (b) in contact with diseased animals, (c) suspected of being affected with disease or of being in an infected place, (d) within a prescribed distance of an infected place</p>
<p>An Inspector may seize and destroy diseased stray stock</p>
<p>(a) No compensation is payable for stock destroyed under authority except that full compensation is paid to the owner of stock destroyed for examination which is found to be free from disease</p> <p>(b) When apparently infected swine after destruction are found free from disease, the Governor must compensate the owner with three-fourths of the value less the amount realized from the sale of the carcass</p>	<p>No compensation is paid to the owner of any stock destroyed owing to being diseased when imported or within 3 months thereafter</p>	<p>The Minister must pay compensation for animals slaughtered to the extent of three-fourths of their value but not exceeding £20, and may withhold compensation if the owner has been guilty of an offence against the Act. Any insurance is to be deducted from the amount of compensation</p>

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
A.—ACTS AND REGULATIONS RELATING			
(xxiii) Provisions with regard to Travelling Stock	An owner must obtain a permit from an Inspector to travel stock, but for less than 20 miles in certain districts a statement signed by the owner is sufficient. Not less than 12 nor more than 48 hours' notice must be given before crossing a run. When diseased stock are being travelled, notice must be given to the owner of a holding through which they will pass, and they must only travel by daylight, and every precaution must be taken to avoid contact with the stock on the run	..	(a) An owner, before starting to travel stock, must obtain a permit from the nearest Inspector, who notifies all the Inspectors in such districts through or adjacent to which the stock will travel (b) A drover must give not less than 24 nor more than 48 hours to the owner before entering his holding (c) Diseased travelling stock are to be quarantined and treated at the nearest convenient place
(xxiv) Powers of Local Authorities under Local Government Acts	A Municipal Council may provide, control, and manage tanks for the dipping of sheep and cattle	A Municipal Council may construct and maintain dipping places and portable dipping tanks for sheep	..
B.—ACTS AND REGULATIONS RELATING			
(i) Acts in Force ..	Pastures Protection Act 1912, 1918, 1920. (This Act also relates to the Destruction of Rabbits)	Stock Diseases Act 1915 .. Sheep Dipping Act 1915	No special Act relating to sheep, the provisions of the Diseases in Stock Act 1915 relate to all kinds of stock
(ii) Definitions ..	(a) <i>Infected Sheep</i> .—Any sheep affected with scab, influenza, or catarrh, or which have formed part of a flock so affected, or which have been in contact within 6 months with such sheep or which have been dressed or treated within the same period (b) <i>Destroy</i> .—To entirely consume by fire or bury not less than 3 feet underground, or, having burnt the wool and skin, boll down the carcass	(a) <i>Infected Sheep</i> (with catarrh or influenza) include sheep which have mixed with sheep infected with catarrh or influenza within the preceding 6 weeks (b) <i>Infected Sheep</i> (with scab) includes all sheep which (i) are actually infected with scab, (ii) have been within the preceding 4 months treated for scab, (iii) are branded with S, (iv) have been dipped or treated without authority during the preceding 4 months except in a clean district, (v) are on a run or travelling with sheep infected as (i) to (iv) (c) <i>Lice</i> .—The insects <i>Trichodectes sphærocephalus</i> (d) <i>Ticks</i> — <i>Melophagus ovinus</i> (e) <i>Destroy</i> .—Bury not less than 2 feet deep or consume by fire or boll down	<i>Destroy</i> .—Consume by fire, or bury under the ground, kill, or otherwise destroy to the satisfaction of an Inspector
(iii) Proclaimed Sheep Districts	The Governor may constitute Pastures Protection Districts	The Governor may divide Victoria into districts for the purposes of the Part of the Act relating to Scab in Sheep	..

South Australia.	Western Australia.	Tasmania.
Ligurian Bee Act 1885 .. Foul-brood among Bees Act 1887	Contagious Diseases (Bees) Act 1899	(No Legislation)
<i>Disease.</i> —Foul-brood ..	<i>Diseases.</i> —Foul-brood or other contagious diseases among bees	..
No person may have, breed, keep, or import into Kangaroo Island any bees other than pure Ligurian or Italian, under penalty not exceeding £10 for the first offence, and not exceeding £50 for a subsequent offence		

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
(iv) Appointment of Inspectors	The Governor may appoint Inspectors and other officers	The Governor may appoint Inspectors under the <i>Public Service Act</i>	..
(v) Powers of Entry of Inspectors and Authorized Persons	An Inspector may enter and inspect any premises where bees are kept and inspect bees, hives, etc.	An Inspector may enter and inspect any premises where bees are kept and inspect bees, hives, etc.	..
(vi) Registration of Bee-keepers	A bee-keeper must, unless he was already registered on the 1st November, 1917, apply to the Under-Secretary of Agriculture to have his apiary registered, and in case of removal of such apiary give notice thereof within 14 days
(vii) Notification of Disease	A beekeeper immediately upon becoming aware of the presence of disease must notify the Minister for Agriculture or an Inspector
(viii) Eradication of Disease	A beekeeper must immediately take steps to cure or eradicate diseases, and, on order from an Inspector, must cleanse and disinfect all articles liable to spread disease	A beekeeper, when ordered by an Inspector, must cleanse and disinfect hives, appliances, etc.	..
(ix) Destruction of diseased Bees, etc.	(a) On receipt of a certificate from an Inspector that any bees are a source of danger to other bees, the Minister may order a beekeeper to destroy them (b) An Inspector may destroy materials up to the value of £5, and, with the Minister's approval, over £5 if they cannot be disinfected	(a) On receipt of a certificate from an Inspector that any bees are a source of danger to other bees, the Minister may order a beekeeper to destroy them (b) An Inspector may destroy materials up to the value of £5, and, with the Minister's approval, over £5 if they cannot be disinfected	..
(x) Failure on part of Owner to eradicate or destroy diseased Bees.	If a beekeeper fails to destroy bees within seven days when ordered, an Inspector may do so at his expense	If a beekeeper fails to destroy bees within seven days when ordered, an Inspector may do so at his expense	..
(xi) Compensation for the Destruction of diseased Bees, etc.	No person is entitled to any compensation in consequence of any measures taken for the eradication of disease or in respect of any damage, unless the same was occasioned wilfully or without necessity	No person is entitled to any compensation in consequence of any measures taken for the eradication of disease or in respect of any damage, unless the same was occasioned wilfully or without necessity	..

RELATING TO DISEASES IN BEES—*continued.*

South Australia.	Western Australia.	Tasmania.
..	The Governor may appoint bee experts to carry out the duties necessary for the administration of the Act	..
(a) A police officer or person authorized by a Justice may enter any house, ship, etc., on Kangaroo Island and search for bees other than Ligurian or Italian (b) An Inspector or person authorized by the Commissioner of Crown Lands may enter any land or premises where bees are kept and inspect all bee-hives and materials used for bee-keeping	An Inspector or person authorized by the Department of Agriculture may enter upon any land or premises where bees are kept and inspect all bee-hives and materials used for bee-keeping thereon	..
..
..	Any person who has in his possession or under his care any colony, hive, or swarm of bees affected with foul-brood or other contagious disease must forthwith report to the Department of Agriculture	..
Any person having in his possession any colony, hive, or swarm of bees affected with foul-brood must forthwith destroy all comb and disinfect any box or hive or material used in connexion therewith	A beekeeper must take such steps for the eradication of disease as the Department of Agriculture may direct	..
..
Any person after one week's notice knowingly failing to eradicate disease or knowingly having on his premises any comb infected with foul-brood is liable to a penalty of not less than 5s. and not more than £10	Any person after one week's notice knowingly failing to eradicate disease or knowingly having in his possession any comb affected with disease is liable to a penalty of not less than 5s. and not more than £5	..
..

IMPORTATION OF PLANTS FROM FOREIGN COUNTRIES.

1. **General.**—The importation of plants from foreign countries is under the control of the Commonwealth, and the following are the chief provisions of the Acts and Regulations governing the same.

2. **Acts in Force.**—Quarantine Act 1908, 1912.

3. **Diseases in Plants.**—Any disease or pest declared by the Governor-General by proclamation to be a disease affecting plants.

4. **Prohibition of Importation, etc.**—The Governor-General may—

(a) declare any ports to be ports where imported plants may be landed.

(b) appoint quarantine stations,

(c) prohibit the introduction of any pest,

(d) prohibit the introduction of any plants,

(e) prohibit the removal of any plants from any part of the Commonwealth in which disease exists,

(f) declare any part of the Commonwealth to be a quarantine area.

(g) declare any plants to be subject to quarantine.

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE RELATING TO

Particulars.	New South Wales.	Victoria.	Queensland.
(i) Acts in Force ..	Vine and Vegetation Diseases and Fruit Pests Act 1912	Vegetation and Vine Diseases Act 1915	Diseases in Plants Act 1916
(ii) Definitions ..	<p>(a) <i>Disease.</i>—Any disease affecting plants proclaimed by the Governor, whether or not caused by insects or fungus</p> <p>(b) <i>Fruit Pest.</i>—Codlin moth (<i>Carpocapsa pomonella</i>), and any species of Fruit Fly (<i>Tephritidæ</i>)</p> <p>(c) <i>Fungus.</i>—Any fungus or vegetable parasite proclaimed by the Governor</p> <p>(d) <i>Insect.</i>—Any insect proclaimed by the Governor</p>	<p>(a) <i>Disease.</i>—Any disease affecting trees, plants, or vegetables, proclaimed by the Governor, whether or not caused by insects or fungus</p> <p>(b) <i>Fungus.</i>—Any fungus or vegetable parasite proclaimed by the Governor</p> <p>(c) <i>Insect.</i>—Any insect proclaimed by the Governor</p>	<p>(a) <i>Disease.</i>—Any disease affecting trees, plants, fruit, or vegetables caused by or consisting of the presence of any insect or fungus and any other such disease proclaimed by the Governor (a large number of diseases have been so proclaimed)</p> <p>(b) <i>Fungus.</i>—Any fungus or vegetable parasite proclaimed by the Governor</p> <p>(c) <i>Insect.</i>—Any insect proclaimed by the Governor</p> <p>(d) <i>Pest.</i>—Any plant, insect, or fungus proclaimed by the Governor in a fruit district</p>
(iii) Prohibition of Importation of Plants, etc. (For Commonwealth Act, see text)	<p>(a) The Governor may prohibit the introduction into New South Wales, or into any portion thereof specified in the proclamation, of any plant likely to introduce or spread any disease or insect</p> <p>(b) No person may introduce any insect or fungus, except for scientific purposes with the consent of the Minister</p>	<p>(a) The Governor may prohibit the introduction into Victoria of any tree, plant or vegetable likely to introduce any disease or insect</p> <p>(b) No person may introduce any insect or fungus, except for scientific purposes with the consent of the Minister</p>	<p>(a) The Governor may prohibit the introduction into Queensland from another State of any tree, plant or vegetable likely to introduce any insect, fungus or disease</p> <p>(b) No person may introduce into Queensland any insect, fungus, tree, plant or vegetable contrary to the Act</p>
(iv) Penalty for introducing Diseased Plants, etc.	Not exceeding £20 ..	Not exceeding £20 ..	Not exceeding £20 ..

5. **Provisions for Landing imported Plants.**—The following provisions are to be observed when plants are imported from other countries :—

- (a) plants may be landed only at proclaimed ports,
- (b) no imported plants may be landed without a permit from a quarantine officer,
- (c) all imported plants must be carefully inspected by a quarantine officer,
- (d) notice of importation of plants must be given to a quarantine officer.

6. **Quarantining imported Plants.**—The quarantining of imported plants is subject to the following provisions :—

- (a) if imported plants are free from disease a quarantine officer may authorize their delivery to the importer.
- (b) if the plants are not free from disease they are ordered into quarantine.
- (c) plants in quarantine are to be treated.

7. **Destruction of imported Plants.**—If a quarantine officer certifies that any plants ordered into quarantine are diseased and a source of danger, the Minister may order them to be destroyed.

VEGETATION (EXCLUSIVE OF VINE) DISEASES.

South Australia.	Western Australia.	Tasmania.
Vine, Fruit, and Vegetable Protection Act 1885, 1910	Plant Diseases Act 1914	Codlin Moth Act 1888, 1891, 1900, 1912 Vegetation Diseases Act 1898 Potato Diseases Act 1909 (2), 1910, 1914 San José Scale Act 1915
<p>(a) <i>Disease.</i>—Any disease caused by insects, or any other disease affecting trees, plants or vegetables proclaimed by the Governor</p> <p>(b) <i>Insect.</i>—Any of the insects <i>Phylloxera vastatrix</i>, <i>Carpocapsa pomonella</i> (Codlin moth), <i>Aspidiotus aurantii</i> (Round Orange Scale Insect), <i>Doryphora decemlineata</i> (Colorado Beetle), or any other insect proclaimed by the Governor</p> <p>(c) The following diseases have been proclaimed:—<i>Tylenchus</i> spp. (Eelworms), <i>Phytophthora infestans</i> (Irish potato blight), <i>Fusarium oxysporum</i>, (Dry rot Fungus), <i>Oospora scabies</i> (Potato scab), <i>Macrosporium solani</i> (Early blight or leaf curl of potato), <i>Bacillus solanacearum</i> (Bacteriosis of Potato), also the insect <i>Lilja solanella</i> (Potato moth)</p>	<p><i>Disease.</i>—Any parasite, whether of vegetable or animal nature, which commonly attacks or is found on plants</p>	<p>(a) <i>Disease.</i>—Any disease affecting plants, whether or not caused by or consisting of the presence of insects or fungus proclaimed by the Governor</p> <p>(b) <i>Fungus.</i>—Leaf curl of Peach (<i>Exoascus deformans</i>), Potato bacteriosis (<i>Bacillus solanacearum</i>), Wet rot (<i>Bacillus</i> spp.), Potato dry rot (<i>Fusarium oxysporum</i>), Potato scab (<i>Oospora scabies</i>), Canker of the apple tree (<i>Nectria ditissima</i>), Irish potato blight (<i>Phytophthora infestans</i>), Mildew and blight (<i>Peronospora</i> spp.)</p> <p>(c) <i>Insect.</i>—Codlin moth (<i>Carpocapsa pomonella</i>), Tomato fly (<i>Lonchea splendida</i>), Fruit flies, etc. (<i>Ceratitis</i>, <i>Tephritis</i>, and <i>Limnophora</i> spp.), Vine louse (<i>Phylloxera vastatrix</i>), Pear tree slug (<i>Selandria cerasi</i>), San José scale (<i>Aspidiotus perniciosus</i>), Aphis, plant lice (<i>Aphidæ</i> spp.), Apple and orange moths (<i>Cacæcia</i> spp.), Tomato moth (<i>Heliothis armigera</i>), Potato moth (<i>Lilja solanella</i>), Eelworm (<i>Anguillulidæ</i> spp.), Mussel scale (<i>Nytilaspis pomorum</i>)</p> <p>(d) <i>Potato</i> includes tomato</p>

<p>If a notice is not complied with in the time specified therein, the Minister may direct any Inspector to take steps to destroy or eradicate the insect or disease, at the occupier's or owner's expense, including the destruction of trees and plants</p>	<p>In case of default in compliance with any requisition any Inspector may do all the things required of the owner or occupier at the expense of the person guilty of default</p>	<p>The Governor or a Board may authorize an Inspector to enter an orchard and perform all such acts as the Act or Regulations direct at the expense of the occupier</p>
<p>Not exceeding £50 or imprisonment for three months</p>	<p>Not less than £5 nor more than £100</p>	<p>Not less than 10s. nor more than than £5 (<i>Codlin Moth Act</i>) Not exceeding £5 (<i>Potato Disease and San José Scale Acts</i>)</p>
<p>No compensation is allowed in consequence of any measures taken for the eradication of any insect or disease or in respect of any loss or injury resulting therefrom</p>	<p>No compensation is allowed in consequence of any measures taken for the eradication of any insect or disease or in respect of any loss or injury resulting therefrom</p>	<p>..</p>
<p>The Governor may prohibit (a) the removal within the State of any disease, or insect, or tree, plant, or other thing likely to spread any disease or insect; (b) the growing or planting of any tree or plant in any area defined in a proclamation</p>	<p>(a) The Minister may declare an orchard to be infected, together with an area around it, and no plants or fruit may be removed therefrom without permission of an Inspector; (b) The Governor may prohibit the bringing into any portion of the State from another portion thereof of (i) any specified kind of fruit or plant likely to introduce disease, (ii) any covering in which such fruit or plant has been in contact or any infected thing</p>	<p>(a) No person may carry infected fruit or containers from one part of the State to another unless previously cleansed; (b) The Governor may (i) prohibit the removal within the State of any potatoes; (ii) quarantine any building, land, or place in which diseased potatoes have been found. (c) No potatoes may be planted in an infected district within half-a-mile of a clean district; (d) No person may remove trees, etc., infected with San José scale without the authority of the Director of Agriculture</p>
<p><i>Orange Red Scale.</i>—Fumigation with hydrocyanic acid gas <i>Codlin Moth.</i>—(a) Scraping off dead bark, (b) bandaging and examining bandages from time to time, (c) treating affected fruit as directed, (d) spraying as Inspector may prescribe</p>	<p>..</p>	<p><i>Fumigation</i> with hydrocyanic gas for the destruction of coccids, aphids, etc. <i>Immersion</i> in a solution of formaldehyde for potatoes and packages <i>Spraying</i> with or immersion in Bordeaux mixture for fungus diseases and packages <i>Boiling</i> in water for not less than one hour for codlin moth</p>
<p>The Minister may hear and determine any appeal from the decision or direction of an Inspector</p>	<p>(a) Penalty for selling or offering or exposing for sale diseased or infected fruit, not less than £5 nor more than £100; (b) The Governor may appoint specified ports of entry; (c) If an orchard is abandoned, the Minister, after three months notice, may order all plants and trees to be destroyed; (d) Prunings must be destroyed if required by an Inspector; (e) No young plants intended for sale may be grown within a prescribed distance of fruit trees in bearing</p>	<p>(a) Penalty for selling or exposing for sale fruit infected with codlin moth, not less than 10s. nor more than £5; (b) Potatoes must be exported in new packages and accompanied by a certificate from an Inspector; (c) A Municipal Council may make by-laws regarding the introduction and prevention of pests</p>

CONSPPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
(i) Acts in Force ..	Vine and Vegetation Diseases and Fruit Pests Act 1912	Vegetation and Vine Diseases Act 1915 Mildura Vineyards Protection Act 1918	Grape Vine Diseases Act 1877 (not repealed but superseded by the Diseases in Plants Act 1916) Diseases in Plants Act 1916
(ii) Definition of Disease	The disease in grape vines caused by the insect <i>Phylloxera vastatrix</i>	The disease in grape vines caused by the insect <i>Phylloxera vastatrix</i> or any disease in grape vines proclaimed to be a disease	Any disease affecting grape vines caused by or consisting of the presence of any insect or fungus or any other proclaimed disease
(iii) Prohibition of Importation	The Governor may prohibit the introduction from any place of vines, grapes, or packages containing or which have contained or been in contact with vines or grapes the introduction of which has been prohibited	The Governor may by order prohibit or restrict the importation of vines, vine cuttings, or grapes either generally or from any particular place	The importation is prohibited of plants or portions of plants of all species of <i>Vitis</i> , but the Minister may import any plants, all of which, when so imported, are to be suitably disinfected and, if deemed advisable, detained and grown in close quarantine
(iv) Procedure with respect to prohibited Imports. (For Commonwealth Act see text)		While prohibition order is in force, all vines or vine cuttings or grapes brought into Victoria are to be destroyed or otherwise disposed of as the Minister directs	All grape vines and grape-vine cuttings introduced contrary to any proclamation may be seized and destroyed by fire
(v) Penalty for introducing prohibited Vines, etc.	No claim for compensation can be entertained for the destruction of prohibited introduced vines, etc.	Not more than £100 or imprisonment for not more than six months	Not less than £10 and not more than £50
(vi) Districts ..	The Governor may proclaim (a) any portion of New South Wales a Vine District; and (b) upon a report of an Inspector that disease is found in any vineyard not within a District, and upon proof that disease exists therein, a Vine District including such vineyard	(a) The Governor may proclaim any portion of Victoria to be a Vine Disease District. (b) The Shire of Mildura has been proclaimed a Vineyards Protection District under the <i>Mildura Vineyards Protection Act</i>	The Governor may declare any District to be a Fruit District
(vii) Constitution of Boards	A Board for each Vine District consisting of 5 members, vine-growers on the roll of the District, elected by such vine-growers, each elector being entitled to the prescribed number of votes If no candidates are elected the Governor may appoint a Board	The Mildura Vineyards Protection Board consists of 9 members elected by owners of ratable land. One vote is allowed for every 10 acres of vineyard (a portion exceeding 1 acre counting as 10 acres), but no person is entitled to more than three votes	
(viii) Rates leviable by Boards.	A Board may levy an annual rate not exceeding 1 per centum on the value of each vineyard The Minister may subsidise rates, but such subsidy must not exceed the amount collected during a year Unless expressly provided by agreement, a tenant may recover half the rate from his landlord	The Mildura Board may levy an annual rate per acre on all vineyards exceeding 1 acre of not more than (a) 1s. after the vines attain the age of 2 years, (b) 2s. when a vineyard has been planted for 4 but less than 8 years, (c) 2s. 6d. on vineyards planted for 8 years or over Wine makers and distillers pay a rate of not more than 6d. per ton of grapes purchased	

RELATING TO VINE DISEASES.

South Australia.	Western Australia.	Tasmania.
Vine, Fruit and Vegetable Protection Act 1885, 1910 Phylloxera Act 1899, 1911	Plant Diseases Act 1914	Importation of Diseased Grape Vines Prohibition Act 1879 Vegetation Diseases Act 1898
The disease in grape vines known as <i>Phylloxera vastatrix</i> , also the fungus anthracnose of the grape vine (<i>Manginia ampelina</i>)	Any parasite, of whatsoever kind, whether of animal or vegetable nature, which commonly attacks or is found on plants	Any disease affecting plants which may be declared to be a disease by the Governor. Vine louse (<i>Phylloxera vastatrix</i>) has been so declared
The Governor may prohibit (a) the introduction of any vine or grapes or package which has been in contact therewith; (b) the importation of any insect; (c) the introduction of anything likely to introduce disease or insects	The Governor may prohibit the bringing into the State, either generally or from any specified place, of any specified kinds of plants or coverings for same or anything which is infected with disease. The introduction of grape vines from the other States is absolutely prohibited	The Governor may prohibit or restrict the importation of grape vines or cuttings either generally or from specified places
Anything introduced in contravention of a proclamation or regulation may, together with its container, be seized and destroyed by fire or otherwise	Any plant, covering, etc., which is introduced in contravention of any proclamation may be seized by an Inspector and disinfected, destroyed, or otherwise disposed of	Grape vines imported contrary to a proclamation, and every package or covering must be forfeited and destroyed or otherwise disposed of
Not less than £5 nor more than £100 or imprisonment for not exceeding six months	Not less than £5 nor more than £100	Not more than £10 for offences against the <i>Vegetation Diseases Act</i>
The State is divided into six Phylloxera Districts		
A Board consists of 8 members, 2 appointed by the Minister and 1 elected for each District by vigneron on the roll. If the area of a vineyard exceeds 1 acre but not 10 acres, one vote is allowed; if it exceeds 10 but not 25 acres, two votes; if it exceeds 25 but not 50 acres, three votes; and one additional vote is allowed for every additional 50 acres		
The Board may declare an annual rate per acre on all vineyards exceeding 1 acre in extent of (a) 3d. when vines have attained the age of 2 years, (b) 6d. when a vineyard has been planted for 4 but less than 8 years, (c) 1s. on vineyards planted for 8 years or longer Wine makers and distillers must pay a rate of 6d. for every ton of grapes annually purchased		

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
(ix) Returns by Occupiers or Owners of Vineyards	The owner or occupier of a vineyard within a District must forward annually to the Board or to an officer appointed by the Governor a return shewing the area planted with vines, under a penalty not exceeding £5	Every occupier of vineyards within the Mildura District must give the Secretary of the Board notice stating his name and address, and such particulars as are necessary in order to identify his vineyard, under a penalty not exceeding £5	Every owner or occupier of an orchard within a Fruit District must register his orchard annually, stating the number of acres under vines, under a penalty of, for the first offence, not less than £1 nor more than £5, and for subsequent offences not less than £2 nor more than £10
(x) Appointment of Inspectors	(a) The Minister may appoint Inspectors of Vineyards; (b) A Board may appoint District Inspectors	(a) The Governor may appoint a Certifying Inspector and Inspectors of Vineyards; (b) The Mildura Board may appoint Inspectors for its District, and every member of the Board is an Inspector <i>ex officio</i>	The Governor may appoint Inspectors.
(xi) Powers of Entry of Inspectors	An Inspector may (a) enter at any time any vessel, building, land, or place containing any vines or grapes introduced into the State and examine them in quarantine, and, if they are diseased, destroy them; (b) enter any vineyard and examine vines and grapes therein, and temporarily isolate a vineyard in which he finds signs of disease; (c) periodically inspect vineyards in Districts and report the failure of any Board to give effect to the provisions of the Act	(a) Under the <i>Vegetation and Vine Diseases Act</i> , an Inspector must immediately after being appointed inspect all vineyards within is District, and may at all reasonable hours in the daytime enter into any vineyard for the purpose of ascertaining whether disease exists in such vineyard; (b) Under the <i>Mildura Vineyards Protection Act</i> , an Inspector may (i) between 7 a.m. and 5 p.m. enter into any land or place in which he suspects that vines or grapes have been brought into the District and examine them and destroy them if diseased; (ii) between 7 a.m. and 5 p.m. enter any vineyard and examine vines and grapes and quarantine temporarily any vineyard in which he finds any signs of disease	An Inspector may (a) seize any plant suspected to be diseased which is being introduced into Queensland or removed from one part thereof to another, also suspected boxes, packages, etc.; (b) enter at all reasonable times upon any land upon which any diseased plant is or is suspected to exist for the purpose of searching for and examining such plant
(xii) Notification of Disease by Occupier or Owner	The owner, tenant or person in charge of a vineyard must immediately notify an Inspector, District Inspector or the Minister of the appearance of any sign which may reasonably be suspected to be caused by disease	The owner, tenant, lessee or person in charge of a vineyard must immediately on the first appearance of any disease notify an Inspector or the Minister. In the Mildura District the owner, occupier or person in charge must notify an Inspector of the Board	
(xiii) Penalty for not notifying Disease	Not exceeding £100 or imprisonment for not more than six months, and no claim for compensation is entertained	All claim to compensation is forfeited and a penalty of not more than £100 or six months' imprisonment imposed. Maximum penalty in Mildura District, £50	
(xiv) Procedure when a Vineyard is found to be Infected with Disease	The Governor or a Board may— (a) isolate the vineyard and all vineyards within a radius of 1 mile thereof; (b) prohibit the removal of any vines, grapes, packages or things; (c) cause all vines within a radius of 1 mile to be rooted up, the land thoroughly trenched, all vines destroyed by fire, and other precautionary measures taken to prevent the spread of disease	(a) All vines planted or growing in a vineyard reported as diseased or within a radius of 3 miles thereof, if the Minister so directs, must be completely rooted up and destroyed by an Inspector; (b) The Mildura Board may cause all vines in an infected quarantined area to be destroyed by bisulphide of carbon and afterwards uprooted and burned and may take other precautionary measures to prevent the spread of disease	The occupier or owner of the land upon which are diseased plants may be ordered to eradicate the disease; or if it cannot be eradicated otherwise than by the destruction of the plants the Minister may order the occupier or owner to destroy such plants, and, if they fail to do so, they may be summoned and an Inspector authorized to eradicate the disease at their expense

RELATING TO VINE DISEASES—continued.

South Australia.	Western Australia.	Tasmania.
<p>The owner of every vineyard exceeding 1 acre in extent must furnish the Secretary of the Board annually with a return showing the area planted with vines and the age of such vines, under a penalty not exceeding £20</p>		
<p>(a) The Minister of Agriculture may appoint Inspectors under the <i>Vine, Fruit and Vegetable Protection Act</i>; (b) The Board may appoint Inspectors under the <i>Phylloxera Act</i>, and every member of the Board is an Inspector <i>ex officio</i></p>	<p>The Governor may, subject to the <i>Public Service Act</i>, appoint Inspectors and temporary Inspectors</p>	<p>The Governor may appoint officers of Customs and other persons to be Inspectors</p>
<p>(a) Under the <i>Vine, Fruit and Vegetable Protection Act</i>, an Inspector may enter at all times upon lands, buildings, vessels, etc., and remove any plant for the purpose of ascertaining if it is diseased; (b) Under the <i>Phylloxera Act</i> an Inspector may between 7 a.m. and 5 p.m. (i) enter into and examine any vessel, land, etc., suspected to contain any vines or grapes brought into the State and search for disease, and remove diseased vines into quarantine and destroy them; (ii) enter any vineyard and examine any vine or grapes and temporarily quarantine any vineyard in which he finds any sign of disease</p>	<p>An Inspector may at any time enter upon any orchard, land, premises, conveyance, or vessel and search and inspect them for the purpose of ascertaining whether the same is infected, and examine fruit, coverings, etc., and dig up plants, open packages, etc.</p>	<p>An Inspector may at any time enter upon any ship, vessel, or place and search for insects and fungi, and diseased plants and packages likely to convey disease</p>
<p>If any sign appears which may reasonably be suspected to be caused by disease, the owner, occupier or person in charge of the vineyard must immediately notify an Inspector or the Board or the Minister</p>	<p>Every occupier of an orchard in which any disease appears must within 24 hours of its discovery give notice to an Inspector or to the Under-Secretary for Agriculture</p>	
<p>Not exceeding £50</p>	<p>Not less than £5 nor more than £100</p>	
<p>(a) Under the <i>Vine, Fruit and Vegetable Protection Act</i>, an Inspector may serve the occupier with a notice directing that, within the period of time therein stated, steps must be taken for the destruction of the insect or the eradication of the disease, otherwise an Inspector may do so at occupier's or owner's expense; (b) Under the <i>Phylloxera Act</i>, the Board may cause all vines in a quarantined area to be destroyed with sulphide of carbon and afterwards uprooted and burnt and take precautionary measures to prevent the spread of disease</p>	<p>An Inspector may require the owner or occupier to eradicate disease and prevent the spread thereof. In default he may do so at their expense. An Inspector may also destroy infected plants and coverings</p>	

CONSPECTUS OF ACTS AND REGULATIONS IN FORCE

Particulars.	New South Wales.	Victoria.	Queensland.
(xv) Neglected or abandoned Vineyards	If the owner, lessee or occupier of a vineyard ceases for two years to cultivate it, any Inspector may serve him with a notice to root up all vines therein, and if he fails to do so within three months, the Minister or a Board may do so at his expense	In the Mildura District all vines in vineyards which have remained unused or abandoned for two years may be destroyed at the cost of the owner by the Board, or an Inspector or other authorized person	..
(xvi) Replanting diseased Vineyards	No vines may be planted in land from which diseased vines have been removed, for a period of four years from such removal. Penalty for contravention not exceeding £100 and all such vines destroyed	No vines may be planted on land from which diseased vines have been removed or within a radius of 3 miles thereof for such time as may be proclaimed after such removal. Penalty for contravention not exceeding £100 or six months' imprisonment. In Mildura District the period is 10 years and the maximum penalty £50	..
(xvii) Isolation of diseased Vines	The Governor may— (a) prohibit the removal from one place to another of vines, grapes, etc., likely to convey disease; (b) declare any parcel of land or building a quarantine; (c) isolate any quarantine or place whereupon there are or have recently been diseased vines or grapes	(a) The removal of any vine or part of a vine from any Vine Disease District is prohibited; (b) The Mildura Board, upon report that disease exists in a vineyard, may— (i) quarantine any area of such vineyard (ii) cause all quarantine areas to be clearly indicated by flags, etc.	The Governor may prohibit the removal of any plant from any place
(xviii) Compensation for the Destruction of Vines	Compensation may be claimed— (a) in respect of the rooting up of any vineyard in which there is no disease, to an amount not exceeding the ratable value of the vine yard; (b) in respect of the rooting up of diseased vines to an amount not exceeding 50 per cent. of the ratable value of the vineyard	The owner of vines in a vineyard which has been rooted up, none of which are diseased, is entitled to an amount not exceeding the estimated value (after deducting the full cost of cultivation) of three years' crops of such vines. In the Mildura District such compensation is only payable on the recommendation of the Board and is assessed on the basis of the actual damage sustained	Compensation is only payable where any plant not diseased is destroyed by direction of the Minister for the purpose of preventing the spread of any virulent disease
(xix) Miscellaneous.	(a) Grape vine cuttings must not be removed from the counties of Camden and Cumberland without having been immersed in water for six hours and then for twelve hours in a solution of sulpho-carbonate of potassium; (b) When a vine district is proclaimed the Minister must cause a list of vignerons therein to be made; (c) Penalty for selling or offering or exposing for sale diseased vines or grapes, not exceeding £5 in addition to any other penalty	(a) After the rooting up and destruction of vines, no tenant of land used exclusively as a vineyard, is bound by any agreement or lease entered into by him; (b) The Mildura Board may propagate and sell phylloxera resistant vines and conduct experimental and research work in connexion with vine diseases; (c) Penalty for selling or offering for sale diseased grapes or vines in Mildura District, not exceeding £50	Penalty for selling or offering or exposing for sale diseased grapes or vines, not exceeding £50

RELATING TO VINE DISEASES—*continued.*

South Australia.	Western Australia.	Tasmania.
<p>All vineyards which have remained unused or abandoned for two years may be destroyed, at the cost of the owner, by the Board or any Inspector or other person authorized by the Board</p>	<p>An Inspector, on an order of the Minister, may destroy all plants in an orchard which is habitually or has for a long period been left uncultivated or neglected</p>	
<p>Except with the sanction of the Board no vines may be planted on land from which any diseased vines have been removed for a period of ten years after such removal. Penalty for contravention not exceeding £50 and all such vines destroyed without compensation. Under the <i>Vine, Fruit and Vegetable Protection Act</i>, the period is fixed at five years and the penalty at not less than 10s. nor more than £10 or imprisonment up to one month</p>		
<p>(a) The Board may quarantine an area within a radius of 2 chains from a diseased vineyard and indicate such area by flags, etc. (b) The Governor may— (i) prohibit the removal within the State of any thing likely to convey disease; (ii) declare any land or building a quarantine; (iii) quarantine any place where diseased vines or grapes have been found or have been recently</p>	<p>(a) The Governor may appoint quarantine grounds; (b) The Minister may declare an orchard to be infected and no plants or fruit may be removed therefrom except with the permission of an Inspector</p>	<p>Imported plants may be removed into quarantine if an Inspector is not satisfied that they are free from disease</p>
<p>Compensation is paid on the recommendation of the Board in respect of all vineyards destroyed under the <i>Phylloxera Act</i>, but no compensation is paid in respect of— (a) any vineyard unused or abandoned for two years, or (b) any loss sustained in connexion with diseased vines or grapes introduced into the State</p>	<p>No person is entitled to any compensation in respect of anything done by any Inspector in discharge of any duty or in respect of any measure taken to eradicate or prevent the spread of disease</p>	
<p>Penalty for selling or offering or exposing for sale diseased grapes or vines, not exceeding £50</p>	<p>Penalty for selling or offering or exposing for sale infected or diseased plants or fruit, not less than £5 nor more than £100</p>	<p>All plants when landed are to be unpacked and examined by an Inspector at the port of entry, with the exception of those from the Australian States which are accompanied by a certificate from the Inspector in the country of origin that they have been fumigated with hydro-cyanic gas or sprayed with Bordeaux mixture</p>

SECTION IV.

POPULATION.

[NOTE.—This Section is printed out of its usual order for the reasons given on page 82.]

§ 1. Commonwealth Population—Its Distribution and Fluctuation.

1. **Present Population.**—The estimated population of the several States and Territories of the Commonwealth at the end of each of the five years 1916-20 is shewn in the following table:—

POPULATION OF COMMONWEALTH, ON 31st DECEMBER, 1916-20.

Year.	States.						Territories.		Common-wealth.
	New South Wales.	Victoria.	Queens-land.	South Australia.	Western Australia.	Tas-mania.	North-ern.	Federal.	
MALES.									
1916	945,846	666,186	352,639	212,602	159,086	96,010	3,712	1,194	2,437,275
1917	960,103	671,008	354,929	213,691	157,355	96,945	3,748	1,080	2,458,859
1918	984,453	684,167	363,650	219,723	159,662	100,109	3,499	1,179	2,516,442

2. **Growth of Population.**—(i) *1788 to 1824.* From 1788, when settlement first took place in Australia, until December, 1825, when Van Diemen's Land (now Tasmania) became a separate colony, the whole of the British Possessions in Australia were regarded as one colony, viz., that of New South Wales. The population during this period increased very slowly, and at the end of 1824 had reached only 48,072.

COMMONWEALTH POPULATION—ITS DISTRIBUTION AND FLUCTUATION. 1121

The population with which settlement in Australia was inaugurated, and that at the end of each year until 1824, are as follows :—

POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1788 TO 1824.

Year.	Males.	Females.	Total.	Year.	Males.	Females.	Total.
1788 ^a	1,024	1806	5,389	2,521	7,910
1788	859	1807	5,939	2,855	8,794
1789	645	1808	6,822	3,441	10,263
1790	2,056	1809	7,618	3,942	11,560
1791	2,873	1810	7,585	3,981	11,566
1792	3,264	1811	7,697	4,178	11,875
1793	3,514	1812	8,132	4,498	12,630
1794	3,579	1813	9,102	4,855	13,957
1795	3,466	1814	9,295	4,791	14,086
1796	2,953	1,147	4,100	1815	9,848	5,215	15,063
1797	3,160	1,184	4,344	1816	11,690	5,863	17,553
1798	3,367	1,221	4,588	1817	14,178	7,014	21,192
1799	3,804	1,284	5,088	1818	17,286	8,573	25,859
1800	3,780	1,437	5,217	1819	21,366	10,106	31,472
1801	4,372	1,573	5,945	1820	23,784	9,759	33,543
1802	5,208	1,806	7,014	1821	26,179	9,313	35,492
1803	5,185	2,053	7,238	1822	27,915	9,449	37,364
1804	5,313	2,285	7,598	1823	30,206	10,426	40,632
1805	5,395	2,312	7,707	1824	36,871	11,201	48,072

(a) On 26th January.

(ii) 1825 to 1858. The period extending from 1825 to 1859 witnessed the birth of the colonies of Tasmania (then known as Van Diemen's Land), Western Australia, South Australia, Victoria, and Queensland. The years in which these came into existence as separate colonies were as follows :—Tasmania, 1825; Western Australia, 1829; South Australia, 1834; Victoria, 1851; Queensland, 1859.

The estimated population of the Commonwealth at the end of each year of this transition period is as follows :—

POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1825 TO 1858.

Year.	Males.	Females.	Total.	Year.	Males.	Females.	Total.
1825	40,288	12,217	52,505	1842	153,758	87,226	240,984

(iii) 1859 to 1920. From 1859, the year in which Queensland came into existence as a separate colony, until the beginning of 1901, when the Commonwealth of Australia was inaugurated under the provisions of the Commonwealth Constitution Act, Australia consisted of six States, practically independent of each other in all matters of government. During this period, the population of the Commonwealth increased from 1,050,828 at the end of 1858 to 3,765,339 on the 31st December, 1900. The particulars for this period are given in the table hereunder.

During the twenty years that have elapsed since the federation of the States was effected the population of the Commonwealth has increased by 1,646,979, from 3,765,339 on 31st December, 1900, to 5,412,318 on 31st December, 1920, as shewn hereunder:—

POPULATION OF COMMONWEALTH ON 31st DECEMBER, 1859 TO 1920.

Year.	Males.	Females.	Total.	Year.	Males.	Females.	Total.
1859	644,376	452,929	1,097,305	1890	1,692,831	1,458,524	3,151,355

1883	1,357,423	1,148,313	2,505,736	1914	2,577,528	2,394,759	4,972,287
1884	1,411,996	1,193,729	2,605,725	1915	2,528,016	2,442,038	4,970,054
1885	1,460,394	1,234,124	2,694,518	1916	2,437,275	2,481,357	4,918,632
1886	1,510,954	1,277,096	2,788,050	1917	2,458,859	2,523,934	4,982,793
1887	1,559,118	1,322,244	2,881,362	1918	2,516,442	2,565,237	5,081,679
1888	1,610,548	1,371,129	2,981,677	1919	2,698,281	2,606,141	5,304,422
1889	1,649,094	1,413,383	3,062,477	1920	2,751,622	2,660,696	5,412,318

It will be seen from the foregoing tables that the population of Australia attained its first million in 1858, seventy years after settlement was first effected; its second million nineteen years later, in 1877; its third million twelve years later, in 1889; its fourth million sixteen years later, in 1905; and its fifth million thirteen years later, in 1918. The fifth million was expected in 1915, but owing to the war and the consequent dispatch of men out of Australia this result was not attained until 1918. As a matter of fact, through the retardation of immigration and the departure of troops consequent upon the war, the total population of Australia diminished during 1915 by 2,233 persons, and during 1916 by 51,422 persons. Taking the sexes separately, there was a decrease of 40,253 males and an increase of 86,598 females during those years. During 1917 and 1918 there was an increase of 163,047 in the total population, made up of 79,167 males and 83,880 females, and the fifth million was attained in March, 1918. In 1919 the population increased by 222,743, of whom 181,839 were males and 40,904 were females. The large increase in males was mainly due to the number of returning soldiers. The increase during 1920 was 107,896, of whom 53,341 were males and 54,555 were females.

The growth of the total population of the Commonwealth generally, and of each State therein, is graphically shown on page 1131, and of each sex considered separately on pages 1132 and 1133.

§ 2. Influences affecting Growth and Distribution of Population.

1. **Mineral Discoveries.**—The discovery of gold in Australia in 1851 was undoubtedly one of the most influential factors in bringing about a rapid settlement of the country. Its effect may be gauged by a comparison of the increase during the ten years preceding, with that during the ten years succeeding the discovery. From 31st December, 1840, to 31st December, 1850, the increase was only 214,948 (viz., from 190,408 to 405,356). The rush of people to the newly-discovered goldfields during the succeeding decennium caused an increase of no less than 740,229, the population advancing to 1,145,585 on 31st December, 1860. In 1861, owing to the opening up in that year of the New Zealand goldfields, a rush of population from Australia set in, the result being that the net increase of population of the Commonwealth, which in 1855 amounted to 98,343, and even in 1860 was as much as 48,280, fell in 1861 to 22,564. In fact, during the year 1861 the departures from Australia exceeded the arrivals by 6,283, the gain of 22,564 being due to the births exceeding the deaths by 28,847.

In more recent years the gold discoveries of Western Australia in 1886 and subsequent years led to such extensive migration to that State that its population, which on 31st December, 1885, amounted to only 35,959, increased in 35 years by no less than 294,860, totalling 330,819 on 31st December, 1920. In this case, however, the additions to the population of the western State were largely drawn for some years from those of the eastern States, so that the actual gain of population to the Commonwealth was relatively slight.

2. **Pastoral Development.**—Very early in the colonisation of Australia it was recognised that many portions were well adapted for pastoral pursuits, and pastoral developments have led to a considerable distribution of population in various directions. As the numbers engaged in connexion therewith, compared with the value of the interests involved, are relatively small, and as pastoral occupancy tends to segregation rather than aggregation of population, the growth of the pastoral industry is but slightly reflected in the population statistics of the Commonwealth.

3. **Agricultural Expansion.**—At the present time the area annually devoted to crops in the Commonwealth is over 13½ millions of acres. Although considerable in itself, this area, viewed in relation to the total area of the Commonwealth, is relatively small, and represents considerably less than 1 per cent. of the total area. Per head of population of the Commonwealth the area under crop, however, is about 2½ acres, a fairly high amount when allowance is made for the recency of Australian settlement. About 72 per cent. of the area under crop in 1919-20 was devoted to the production of wheat and hay, both of which for profitable production in Australia require a considerable area in the one holding. Thus, on the whole, the agricultural districts of Australia are somewhat sparsely populated, though in a less marked degree than is the case in the pastoral areas.

4. **Progress of Manufacturing Industries.**—One direct effect of the development of manufacturing industries is the concentration of population in places offering the greatest facilities for the production of the particular commodities. In Australia, where manufacturing industries are as yet in their infancy, the tendency throughout has been to concentrate the manufacturing establishments in each metropolis. This has accentuated the growth of the capital cities, which growth, when compared with that of the rest of the country, appears somewhat abnormal.

5. **Influence of Droughts.**—The droughts, which at times so seriously affect the agricultural and pastoral prospects of Australia, have a marked influence on the distribution of population. Districts, which in favourable seasons are fairly populous, occasionally in times of drought become more or less depopulated until the return of better conditions. This movement, however, ordinarily affects only the internal distribution of the population and not the total, but severe drought may even make its influence felt in the statistics of the total population of Australia. Thus in the case of the drought of 1902-3, the departures from the Commonwealth exceeded the arrivals for the two years 1903 and 1904 by 12,859. It may be noted also, that for the former of these years, the natural increase of population by excess of births over deaths was abnormally low, being only 51,150, as compared with 54,698 in the preceding and 60,541 in the succeeding year. As the solution of the problem of dealing with droughts is advanced, their influence will be less marked.

6. *Other Influences.*—(i) *Commercial Crises.* The effect on population of a commercial crisis, such as that which occurred in Australia in the early years of the final decade of the last century, is clearly indicated on comparing the migration statistics of the Commonwealth for the five years 1887-91 with those for the five years 1892-96. During the former period, the arrivals in the Commonwealth exceeded the departures by no less than 146,872. In the latter period, the corresponding excess amounted to only 2,064.

(ii) *War.* The war in South Africa has left its impress on the population statistics of the Commonwealth, the departures during 1899 and 1900 exceeding the arrivals for the same period by 10,546. A similar but much more marked result is shewn in connexion with the European war. Thus, for the four years 1914, 1915, 1916 and 1917 taken together, the departures exceeded the arrivals by a total of no less than 233,823. In 1918, 1919, and 1920, however, the arrivals exceeded the departures by 189,780. In this connexion it may be mentioned that during 1919 the arrivals of members of the Expeditionary Forces exceeded the departures of such members by 162,376.

A reference to the graphs of population on pages 1131 to 1136 will illustrate the preceding observations.

§ 3. Special Characteristics of Commonwealth Population.

1. *Sex Distribution.*—In respect of the relative proportions of the sexes in its population, Australia has, since the first settlement of the continent in 1788, differed materially from the older countries of the world. In the latter, the populations have, in general, grown by natural increase, and their composition usually reflects that fact, the numbers of males and females being in most countries approximately equal, with a more or less marked tendency, however, for the females to slightly exceed the males. The excess of females arises from a variety of causes, amongst which may be mentioned—(a) higher rate of mortality amongst males; (b) greater propensity on the part of males to travel; (c) the effects of war; (d) employment of males in the army, navy, and mercantile marine; (e) preponderance of males amongst emigrants. On the other hand, the last-mentioned cause has tended naturally to produce an excess of males in Australia, since the majority of those emigrating to Australia have been males. The circumstances under which the colonisation of Australia was first undertaken, and the remoteness of this country from Europe, have combined to accentuate this feature.

There is little doubt that the continent presented few attractions to the explorers who visited its shores, mainly on the west and north, during the sixteenth, seventeenth, and early part of the eighteenth centuries, and it was only when the Declaration of Independence of the United States, in 1776, closed to the British prison authorities the North American plantations, which had previously been used as receptacles for the deportation of convicts, that the overcrowding of the gaols caused them to consider the advisability of converting the great southern continent into a convict settlement. This idea was put into practice in 1787, when the first consignment left England, arriving in Sydney Cove on the 26th January, 1788. Reports concerning the number of persons actually landed are conflicting, but it appears that the total may be set down approximately at 1,024, including the military. Details as to the sexes are not available, but the males must have largely preponderated. Indeed, nearly nine years later, on the 31st December, 1796, in a total population of 4,100, there was an excess of 44 males in every 100 of the population.

The subsequent progress of Australia resulting from extensive mineral discoveries and the development of its great natural resources, pastoral, agricultural, forestal, etc., have tended to attract male rather than female immigrants, particularly in view of the distance from the principal centres of European population. Even at the Census of 4th April, 1921, after more than 133 years of settlement, there was an excess of 1.63 males in every 100 of the population, and this notwithstanding the equalising tendency due to additions to the population by means of births and to deductions therefrom by the deaths of immigrants, and notwithstanding also the heavy losses which the Australian Imperial Forces suffered during the Great War.

In the second issue of this publication, on pages 163 to 165, an extended table was published showing the masculinity of the population of each of the States for each year from 1796 to 1907. In the fifth issue, on page 123, the figures in this table for the years 1901-7 were modified to agree with the corrected estimates of the population, consequent

on the Census of 3rd April, 1911. The figures given in the tables mentioned represent the number of males to each 100 females.

A more satisfactory representation of masculinity, however, may be obtained by computing the ratio of the excess of males over females to the total population. This ratio expressed as a percentage has now been adopted by the Commonwealth Bureau of Census and Statistics as the "masculinity" of the population, and the ratios so computed are given hereunder for intervals of 5 years from 1800 to 1915 and for the five years 1916, 1917, 1918, 1919 and 1920 for the Commonwealth and each of its component States and Territories:—

MASCUILITY OF THE POPULATION, 1800 TO 1920.
(EXCESS OF MALES OVER FEMALES PER 100 OF POPULATION.)

(a) Including Federal Territory prior to 1911. (b) Including Northern Territory prior to 1900.
(c) Included with South Australia prior to 1900. (d) Part of New South Wales prior to 1911.

NOTE.—The sign — denotes excess of females over males per 100 of population.

The influence of the war will be observed in the decline of the masculinity for each of the States and the Commonwealth, and the introduction of negative results in the cases of South Australia, Tasmania and the Commonwealth indicating an excess of females there, as well as in Victoria, where this phenomenon was in evidence as far back as 1905. The effect of the demobilization of soldiers during 1919 has been to restore the excess of males in every State, except Victoria and South Australia.

The curious inequalities of the increases in the number of males and in the number of females for the Commonwealth as a whole, and for the individual States respectively, will be seen by referring to the graphs on pages 1132 and 1133.

The significance of the rates of masculinity shewn in the above table will perhaps be better understood by a comparison with the corresponding information for other countries. This has been made in the next table, which shews, for some of the principal countries of the world for which such particulars are available, the masculinity of the population according to the most recent statistics.

MASCULINITY OF THE POPULATION OF VARIOUS COUNTRIES.

Country.	Year.	Excess of Males over Females in each 100 of Population.	Country.	Year.	Excess of Males over Females in each 100 of Population.

NOTE.—The sign — denotes excess of females over males in each 100 of population.

(a) White population only.

2. Age Distribution.—The causes which operated to bring about an excess of males in the population of the Commonwealth were equally effective in rendering the age distribution essentially different for many years from that of older countries. The majority of the immigrants, whether male or female, were in the prime of life, and as the Australian birth-rate in earlier years was a comparatively high one, the effect produced was a population in which the proportion of young and middle-aged persons was somewhat above, and the proportion for advanced ages somewhat below the normal. With the progress of time, however, the age distribution for Australia has fallen more and more into line with that for the older countries, and now, except in shewing a somewhat lower proportion at old age and a slightly higher at young ages, does not differ essentially therefrom.

Thus in the Commonwealth at the Census of 3rd April, 1911, the age distribution of the population was as shewn in the table hereunder; that for England and Wales for the same Census is given also for the sake of comparison:—

AGE DISTRIBUTION OF POPULATION.

COMMONWEALTH, AND ENGLAND AND WALES IN 1911.

Age Group.	Population of COMMONWEALTH, 3rd April, 1911.	Percentage on Total Population.	Population of ENGLAND and WALES, 3rd April, 1911.	Percentage on Total Population.
Under 15	1,409,823	31.65	11,050,867	30.63
15 and under 65	2,854,753	64.08	23,141,109	64.16
65 and upwards	190,429	4.27	1,878,516	5.21
Total	4,455,005	100.00	36,070,492	100.00

During the past 50 years, the age distribution of the Australian population has varied considerably, as will be seen from the following table, which gives for each sex the proportion per cent. of the total population in the age groups "under 15," "15 and under 65," and "65 and over." The figures upon which these percentages have been computed are those furnished by the Censuses of the several States and the Commonwealth Census of 1911. Those for 1861 include the results of the Western Australian Census of 1859,

while those for 1871 include the results of the Western Australian and Tasmanian Censuses of 1870 :—

AGE DISTRIBUTION OF COMMONWEALTH POPULATION, 1861 TO 1911.

Census Year.	Males.				Females.				Persons.			
	Under 15 Years.	15 and under 65.	65 and over.	Total.	Under 15 Years.	15 and under 65.	65 and over.	Total.	Under 15 Years.	15 and under 65.	65 and over.	Total.
	%	%	%	%	%	%	%	%	%	%	%	%
1861..	31.41	67.42	1.17	100	43.03	56.20	0.77	100	36.28	62.72	1.00	100
1871..	38.84	59.11	2.05	100	46.02	52.60	1.38	100	42.09	56.17	1.74	100
1881..	36.37	60.85	2.78	100	41.89	56.07	2.04	100	38.91	58.65	2.44	100
1891..	34.77	62.02	3.21	100	39.36	58.08	2.56	100	36.90	60.20	2.90	100
1901..	33.87	61.82	4.31	100	36.50	59.85	3.65	100	35.12	60.88	4.00	100
1911..	30.84	64.82	4.34	100	32.52	63.28	4.20	100	31.65	64.08	4.27	100

The excess of males over females, which existed prior to the war, was found mainly in ages of 21 and upwards. In the total population under the age of 21 there was, at the date of the 1911 Census, an excess of males over females amounting to less than 1.3 in each 100 of population, while in that aged 21 and upwards the excess of males over females was more than 5.8 in each 100 of population.

3. Race and Nationality.—(i) *Constitution of Australia's Population.* As regards race, the population of the Commonwealth may be conveniently divided into two main groups, one comprising the aboriginal natives of Australia, and the other the various immigrant races which, since the foundation of settlement in 1788, have made the Commonwealth their home. Under the head of "immigrant races" would, of course, be included not only those residents of Australia who had been born in other countries, but also their descendants born in Australia.

(a) *Aboriginals.* It would appear that the aboriginal population of Australia was never large, and that the life led by them was, in many parts of the country, a most precarious one. With the continued advance of settlement the numbers have shrunk to such an extent that in the more densely populated States they are practically negligible. Thus, at the Census of 1911 the number of full-blood aboriginals who were employed by whites or were living in proximity to settlements of whites was stated to be only 19,939. In some cases, however, more particularly in Queensland, Western Australia, and the Northern Territory, there are, in addition, considerable numbers of natives still in the "savage" state, numerical information concerning whom is of a most unreliable nature, and can be regarded as little more than the result of mere guessing.

Ethnologically interesting as is this remarkable and rapidly-disappearing race, practically all that has been done to increase our knowledge of them, their laws, habits, customs, and languages, has been the result of more or less spasmodic and intermittent effort on the part of enthusiasts either in private life or in the public service. An enumeration of them had never been seriously undertaken in connexion with any Australian Census, prior to that recently taken on 4th April, 1921, though a record of the numbers who were in the employ of whites, or living in contiguity to the settlements of whites, has on the occasion of the recent Censuses usually been made. As stated above, various guesses at the number of aboriginal natives at present in Australia have been made, and the general opinion appears to have prevailed that 150,000 might be taken as a rough approximation to the total. More recent estimates, however, have given results considerably below this figure. Thus, in his report of April 30, 1915, the Queensland Chief Protector of Aborigines estimates the total at 61,705, distributed as follows :—New South Wales, 6,580; Victoria, 283; Queensland, 15,000; South Australia, 4,842; Western Australia, 32,000; Northern Territory, 3,000. In his report of April 20, 1917, the Chief Protector of Aborigines in Queensland estimated their number in that State to be 16,600 in 1916. A somewhat similar estimate made at an earlier date by Dr. Roth, formerly Chief Protector of Aborigines in Queensland, gave Queensland at least 18,000; Western Australia at least 24,000, and the Northern Territory from 20,000 to 22,000. In view of these figures it would

appear that the number of full-blood Australian aboriginals has been less than 80,000 for several years. The whole matter, however, is involved in considerable doubt.

In connexion with the Census of 1921 special arrangements were made with the Chief Protectors of Aboriginals in the several States, and as a result of the careful inquiries made by them, an enumeration was made of the full-blood aboriginals of Australia, which, although still incomplete, probably represents a much closer estimate than has been available previously in connexion with the taking of a Census. The most serious defect on the present occasion is an estimate of 10,000 aboriginals which the Chief Protector of Western Australia regards as out of touch with his Department, and consequently not included in the figures supplied by him. Taking these into account, and adding them to the numbers otherwise recorded either by Census Collectors or by officers of the Aboriginals' Protection Department, the total in Australia at 4th April, 1921, may be stated approximately as follows:—

ESTIMATED FULL BLOOD AUSTRALIAN ABORIGINALS, 4th APRIL, 1921.

Particulars.	N.S.W.	Victoria.	Queensland.	South Australia.	Western Australia.	Northern Territory.	Total C'with.
Males	879	62	7,234	876	13,611	9,466	32,128
Females	622	49	5,380	733	11,976	7,883	26,643
Total	1,501	111	12,614	1,609	25,587	17,349	58,771

In the above table the 10,000 estimated as in Western Australia out of touch with civilization have been treated as 5,000 males and 5,000 females. From the foregoing it would seem that the marshaling of every aboriginal of full-blood in Australia would fail to muster a total of 60,000 at the present time.

In the Commonwealth Constitution Act provision is made for aboriginal natives to be excluded for all purposes for which statistics of population are made use of under the Act, but the opinion has been given by the Commonwealth Attorney-General that "in reckoning the population of the Commonwealth half-castes are not aboriginal natives within the meaning of section 127 of the Commonwealth of Australia Constitution Act, and should therefore be included." It may be added, however, that as "half-castes," living in the nomadic state, are practically indistinguishable from aboriginals, it has not always been found practicable to make the distinction, and further, that no authoritative definition of "half-caste" has yet been given.*

(b) *Immigrant Races.* As regards the immigrant races, it may be said that they consist mainly of natives of the three divisions of the United Kingdom and their descendants. The proportion of Australian-born contained in the population of the Commonwealth has, in recent years, increased rapidly, and at the Census of 3rd April, 1911, out of a total population of 4,424,535 persons whose birthplaces were specified, no fewer than 3,667,670, or 82.90 per cent., were Australian born, while of the remainder, 590,722, or 13.35 per cent., were natives of the United Kingdom, and 31,868, or 0.72 per cent., were natives of New Zealand, that is, 96.97 per cent. of the total population at the date of the Census had been born in either Australasia or the United Kingdom. The other birthplaces most largely represented in the Commonwealth were Germany, 32,990 (0.75 per cent.); China, 20,775 (0.47 per cent.); Scandinavia (comprising Sweden, Norway and Denmark), 14,700 (0.33 per cent.); Polynesia, 3,410 (0.08 per cent.); British India, 6,644 (0.15 per cent.); United States of America, 6,642 (0.15 per cent.); and Italy, 6,719 (0.15 per cent.). The total population of Asiatic birth was 36,442 (0.82 per cent.), of whom 3,474 were born in Japan.

(c) *Non-European Races.* The Census taken on the 3rd April, 1911, was the first occasion on which a systematic attempt had been made to ascertain the number of persons of non-European races in Australia. On former occasions the inquiry did not usually extend further than a request that in all cases in which the person enumerated

* An article on the Aborigines of Australia, specially written for the Year Book by W. Ramsay Smith, D.Sc., M.B., Ch.M., F.R.S.E., Permanent Head of the Department of Public Health of South Australia, will be found in Year Book No. 3, page 158.

was an Aboriginal or a Chinese, whether of the full blood or of the half-blood, the fact should be specially noted in the column on the Census schedule relating to birthplace. At the Census of 3rd April, 1911, the inquiry as to race was made one of the leading items, and all persons of non-European race were required to have their race specified. From the figures so obtained the following table has been compiled :—

PERSONS OF NON-EUROPEAN RACE IN THE COMMONWEALTH, 3rd APRIL, 1911.
(EXCLUSIVE OF FULL-BLOOD ABORIGINALS.)

(ii) *Biological and Sociological Significance.* As regards race and nationality, therefore, the population of Australia is fundamentally British, and thus furnishes an example of the transplanting of a race into conditions greatly differing from those in which it had been developed. The biological and sociological significance of this will ultimately appear in the effects on the physical and moral constitution produced by the complete change of climatic and social environment, for the new conditions are likely to considerably modify both the physical characteristics and the social instincts of the constituents of the population. At present, the characteristics of the Australian population, whether physical, mental, moral, or social, are only in the making, and probably it will not be possible to point to a distinct Australian type until three or four generations more have passed. Even then, it is hardly likely that, with the great extent of territory and varying conditions presented by the Commonwealth there will be but one

type; on the contrary, a variety of types may be expected. The Australian, at present, is little other than a transplanted Briton, with the essential characteristics of his British forbears, the desire for freedom from restraint, however, being perhaps somewhat accentuated. The greater opportunity for an open-air existence, and the absence of the restrictions of older civilisations, may be held to be in the main responsible for this.

4. Differences among the States and Territories.—(i) *Sex Distribution.* The varying circumstances under which the settlement of the several States has been effected, and the essentially different conditions experienced in the due development of their respective resources have naturally led to somewhat marked differences in the constitution of their populations. In the matter of sex distribution, the States in which the normal condition of older countries is most nearly represented are those of Victoria, South Australia, and Tasmania, in the first-mentioned of which, the females have, for some years past, with the exception of the year 1913, exceeded the males. This was also the case in South Australia in the years 1914 to 1920. In Western Australia and Queensland, on the other hand, the position of affairs has been somewhat abnormal, the excess of males over females in each 100 of population in 1915 being respectively 7.93 and 6.83. In 1916 and subsequent years, these rates were much reduced, having fallen in 1918 to 3.08 for each of the States mentioned. However, the rates for 1920 have risen to 6.79 and 5.60 respectively, indicating that the pre-war conditions are again in force. In 1917 there was only an excess of 585 males in New South Wales representing an excess of 0.03 in each 100 of the population, followed in 1918 by an excess of 0.33, and an excess of 2.25 in 1919 and 2.10 in 1920.

In the Northern Territory, owing to lack of settlement, the masculinity has always been large, the figures for 1920 giving an excess of males over females in each 100 of population of 45.84.

The variation in the masculinity of the estimated population of the several States and Territories and of the Commonwealth as a whole will be seen in the table on page 1125.

(ii) *Age Distribution.* The disparity in sex distribution exhibited by the several States is accompanied by a corresponding inequality in the matter of age distribution. For the purpose of convenient comparison in this respect the several populations may each be divided into three groups, indicative of dependence on the one hand, and ability to support on the other. The usual division for this purpose is into an initial group of "under 15" classed as "dependent age," a second group of "15 and under 65" classed as "supporting age," and a final group of "65 and upwards" classed "old age." From certain points of view the division might be into two classes, the "supporting" and the "dependent," as the majority of those aged "65 and upwards" strictly belong to the dependent class. The number of persons in each State and Territory at the Census, 3rd April, 1911, in each of the three groups mentioned, and the proportion of same to the total for each State or Territory and the Commonwealth, were as follows:—

**NUMBER AND PROPORTION OF PERSONS IN THE COMMONWEALTH OF
DEPENDENT, SUPPORTING, AND OLD AGE, ON 3rd APRIL, 1911.**

State or Territory.	Number of Persons of—				Proportion of Population of—		
	Dependent age (under 15).	Supporting age (15 and under 65).	Old age (65 and upwards).	All ages.	Dependent age (under 15).	Supporting age (15 and under 65).	Old age (65 and upwards).
States—					%	%	%
New South Wales	526,625	1,053,400	66,709	1,646,734	31.98	63.97	4.05
Victoria ..	400,260	847,700	67,591	1,315,551	30.42	64.44	5.14

GRAPHS OF TOTAL POPULATION OF THE COMMONWEALTH OF AUSTRALIA
AND EACH STATE THEREIN, 1788-1920.

(See Tables pages 1120 to 1122.)

EXPLANATION OF GRAPHS, 1788-1860.—The base of each small square represents two years' interval for both States and Commonwealth, and the vertical height for the States 25,000 persons, and for the Commonwealth 50,000 persons.

1860 onward.—The base of each small square represents one year's interval for both States and Commonwealth, and the vertical height for the States 50,000 persons, and for the Commonwealth 100,000 persons.

In both graphs the zero line for the States is the bottom line; for the Commonwealth it is the line marked "Zero for Commonwealth." The scales on the right above the Commonwealth zero line relate to the Commonwealth, and those on the left to the States.

Where the population falls suddenly the fall denotes the creation of a new colony, e.g., New South Wales 1825, loses the whole population of Tasmania, then erected into a separate colony.

The curves are as follows:—Commonwealth, an unbroken line; New South Wales, — — —; Victoria, — — — —; Queensland, — — — — —; South Australia, — — — — — —; Western Australia, — — — — — — —; Tasmania, — — — — — — — —; the names on the curves also shew which State each represents.

GRAPHS OF MALE AND FEMALE POPULATIONS, COMMONWEALTH OF AUSTRALIA, 1796-1920.

(See Tables pages 1120 to 1122.)

EXPLANATION OF GRAPHS.—1796-1860. The base of each small square represents two years' interval, and the vertical height 50,000 persons. The distances upward from the zero line denote the number of males, and downward the number of females.

1860 onward.—The base of each small square represents one year's interval, and the vertical height 100,000 persons.

From 1860 onward is shewn, for purposes of comparison, the manner in which the numbers of each sex in the Commonwealth would have grown from 1860, if, during that period, there had been in operation the rate of increase actually experienced in the United States from 1790 to 1860.

The asymmetry of the two series of graphs reveals the want of uniformity in the increase of the two sexes.

GRAPHS OF MALE AND FEMALE POPULATION OF THE STATES OF
AUSTRALIA, 1796-1920.

(See Table page 1120.)

EXPLANATION OF GRAPHS.—1796-1860. The base of each small square represents two years' interval, and the vertical height 20,000 persons. The distances upward from the zero line represent the number of males, and downward the number of females.

The sudden falls denote the creation of new colonies.

1860 onward.—The base of each small square represents one year's interval, and the vertical height 50,000 persons.

The names on the curves denote the States to which they refer, and the curves are as follows:—New South Wales, ———; Victoria, ———; Queensland, ———; South Australia, ———; Western Australia, ———; Tasmania, ———.

The asymmetry of the two series of graphs reveals the want of uniformity in the increase of the two sexes.

GRAPHS SHEWING TOTAL INCREASE OF POPULATION OF THE COMMONWEALTH OF AUSTRALIA AND THE STATES OF NEW SOUTH WALES AND VICTORIA, 1860-1920.

(For explanation see foot of next page.)

GRAPHS SHEWING TOTAL INCREASE OF POPULATION OF THE STATES OF QUEENSLAND,
SOUTH AUSTRALIA, WESTERN AUSTRALIA, AND TASMANIA, 1860-1920.

EXPLANATION OF GRAPHS SHEWING TOTAL INCREASE.—The base of each small square represents an interval of a year for both States and Commonwealth; the vertical height represents 5,000 persons for the Commonwealth and the States. In the first graph (on page 1134) three zero lines are taken (i) for the Commonwealth, (ii) for New South Wales, and (iii) for Victoria. In the second graph four zero lines are taken (i) for Queensland, (ii) for South Australia, (iii) for Western Australia, and (iv) for Tasmania.

DECREASES in population are shown by carrying the graph in such cases below the zero line, the distance of the graph below the zero line indicating the extent of the decrease. The scales in these instances are on the right hand of the graph.

The names above the curves denote the States to which they belong.

(See Table page 1144.)

GRAPHS OF NATURAL INCREASE OF THE POPULATION OF THE COMMONWEALTH
AND STATES OF AUSTRALIA, 1860-1920.

EXPLANATION OF GRAPHS.—The base of each small square represents one year for both States and Commonwealth, and the vertical height 1,000 persons for the States and 2,000 persons for the Commonwealth.

The distances upward from the zero line, marked 0 for both Commonwealth and States, denote the excess of births over deaths. The scale on the left relates to the Commonwealth, and that on the right to the States. The names show the States to which the curves refer, they are as follows:—Commonwealth ———; New South Wales, ———; Victoria, ———; Queensland, ———; South Australia, ———; Western Australia, ———; Tasmania, ———.

(See Table page 1141.)

GRAPHS SHEWING MASCULINITY OF THE POPULATION OF THE COMMONWEALTH
AND STATES OF AUSTRALIA, 1796-1920.

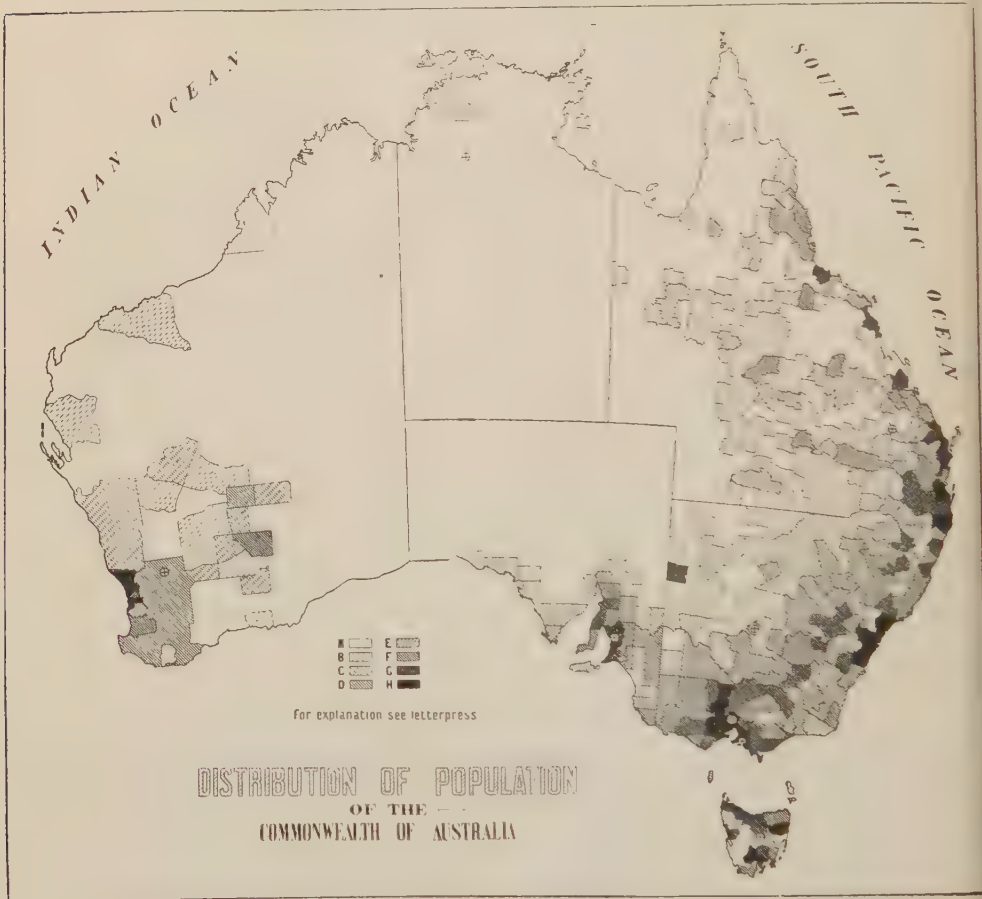

(See Table page 1125.)

EXPLANATION OF GRAPHS.—The base of each small square represents an interval of two years and the vertical height an excess of five males per 100 of population. The basic lines (shewn thickened) for Commonwealth and all the States are at zero, equivalent to a numerical equality of the sexes.

It will be noticed that in the case of New South Wales, and the Commonwealth in the years 1916, 1917, and 1918, Victoria in the years 1903 to 1912 and 1914 to 1919, South Australia in the years 1902 to 1904 and 1914 to 1919, and Tasmania for the years 1916 and 1917, the curves are below the zero line, thus shewing an excess of females over males.

DISTRIBUTION OF POPULATION THROUGHOUT THE COMMONWEALTH OF
AUSTRALIA, ACCORDING TO CENSUS OF 1911.

The above map furnishes a graphic representation of the distribution of the population of the Commonwealth at the date of the census of 1911. For this purpose the density of the population has been computed for the counties of each State, and the areas representing these counties have been shaded in accordance with the following scale of density:—

A	—Less than 1 inhabitant in 16 sq. miles	
B	—From 1 inhabitant in 16 sq. miles to less than 1 in 4 sq. miles	
C	— " 1 " " 4 " "	1 in 1 sq. mile
D	— " 1 " " 1 sq. mile "	2 in 1 " "
E	— " 2 inhabitants in 1 " "	4 in 1 " "
F	— " 4 " " 1 " "	8 in 1 " "
G	— " 8 " " 1 " "	16 in 1 " "
H	—16 inhabitants and upwards in 1 sq. mile	

The cross within the concentric circles, the centre of which is practically on the longitude of Melbourne and the latitude of Sydney, represents the "centre of gravity" of the population of the Commonwealth, and the cross within the single circle in each State represents the "centre of gravity" of the population of such State.

In Western Australia the proportion of its population of supporting age was larger than in any other State, whilst the corresponding Tasmanian proportion was the lowest for the Commonwealth. On the other hand, in Tasmania the proportion of dependent age was the highest for the Commonwealth, while the Victorian proportion was the lowest. Victoria had the highest and Western Australia the lowest proportion of persons aged 65 years and upwards.

In the Northern Territory the proportions are quite exceptional, the percentage of those of dependent age being much lower, and that for supporting age being much higher, than in any other part of the Commonwealth.

(iii) *Birthplaces.* The following table exhibits, in a very condensed form, the distribution of the population of the several States and Territories according to birthplace:—

BIRTHPLACES OF POPULATION AT CENSUS OF 3rd APRIL, 1911.

(COMMONWEALTH.)

Birthplace.	States.						Territories.		C'wealth.
	N.S.W.	Victoria.	Qld.	S. Aust.	W. Aust.	Tas.	North-ern.	Fede-ral.

As regards distribution in the States according to birthplace, the population of New South Wales is very similar to that of Victoria, the proportions born in the United Kingdom and Asia being slightly higher, and that born in Australia slightly lower, in the case of New South Wales. There is also a rough similarity between the birthplace distributions

of Queensland and Western Australia. In both, the Australian-born represent a much smaller, and those born in the United Kingdom, in "Other European Countries" and in Asia, a much larger proportion than is the case with the remaining States. Polynesians were, however, more numerously represented in Queensland at the date of the Census than in any other State. Natives of New Zealand were, proportionately, most numerous in Western Australia. Tasmania had the largest proportion of Australian born population, viz., 91 per cent., while Queensland, with 74 per cent., had the smallest. On the other hand, nearly 20 per cent. of Queensland's population consisted of natives of the United Kingdom, while only 7 per cent. of the population of Tasmania had been born there. For the Commonwealth as a whole, over 98½ per cent. of the population were from Australasian or European birthplaces.

In the case of the Northern Territory, about 46 per cent. of the population were Australian born, while 43 per cent. were of Asiatic birth.

§ 4. Elements of Growth of Population.

1. **Natural Increase.**—The two factors which contribute to the growth of a population are the "natural increase" by excess of births over deaths, and the "net immigration," i.e., the excess of arrivals over departures. While the relative potency of these factors depends upon a variety of causes, it may be said that, in general, in the case of a new country "net immigration" occupies an important position as a source of increase of population, while in an old country "natural increase," modified more or less by "net emigration," or excess of departures over arrivals, is the principal element causing growth of population. The table hereunder gives the total natural increase, as well as that of males and females:—

NATURAL INCREASE(a) OF THE POPULATION
OF STATES, TERRITORIES, AND COMMONWEALTH, FROM 1861 TO 1920.

Period.	States.						Territories.		C'wealth.
	N.S.W. (b)	Victoria.	Q'land.	S. Aust. (c)	W.Aust.	Tas.	North- ern. (d)	Federal. (e)

(a) Excess of births over deaths. (b) Including Federal Territory prior to 1911. (c) Including Northern Territory prior to 1901. (d) Included in South Australia prior to 1901. (e) Part of New South Wales prior to 1911.

NOTE.—Minus sign (—) denotes excess of deaths over births.

With two exceptions, viz., Tasmania for the period 1906 to 1910 and the Federal Territory for the period 1916 to 1920, the natural increase of females exceeded that of males throughout the years referred to in the foregoing table. The quinquennial period in which the largest natural increase of population took place was that of 1911-15 with a total for the Commonwealth of 407,512. For the individual States the quinquennia of maximum natural increase were as follows:—New South Wales, Queensland, South Australia, Western Australia, and Tasmania, 1911-15; and Victoria, 1891-5.

2. Comparison with other Countries.—Notwithstanding its comparatively low birth-rate, Australia has a high rate of natural increase, owing to the fact that its death-rate is a very low one. The following table furnishes a comparison between the average rates per annum of natural increase for some of the principal countries of the world for which such information is available, and those for the several States of the Commonwealth and the Dominion of New Zealand:—

**NATURAL INCREASE PER ANNUM PER 1,000 OF MEAN POPULATION.
(VARIOUS COUNTRIES.)**

Country.	Natural Increase per 1,000.	Country.	Natural Increase per 1,000.	Country.	Natural Increase per 1,000.
Australasia (1916-20)—		Europe—continued.		Asia—

(a) 1907-11. (b) 1908-12. (c) 1909-13. (d) 1910-14. (e) 1911-15. (f) 1912-16. (g) 1913-17.
(h) 1914-18. (i) 1915-19. (j) 1916-20.

The graphs of natural increase for each of the States, as well as for the Commonwealth, are shewn on page 1136.

3. Net Immigration.—The other factor of increase in the population, viz., the excess of arrivals over departures, known as "net immigration," is, from its nature, much more subject to marked and extensive variation than is the factor of "natural increase." These variations are due to numerous causes, many of which have already been referred to in dealing with the influences which affect the growth of population. An important cause, not yet referred to, is that of assisted immigration. The number of persons so introduced varies considerably in different years.

NET IMMIGRATION, OR EXCESS OF ARRIVALS OVER DEPARTURES.

(a) Including Northern Territory up to 1900. (b) Included in South Australia up to 1900.

(c) Part of New South Wales prior to 1911.

NOTE.—The minus sign (—) signifies that the number of departures was in excess of arrivals.

During the period 1861–1920, viz., 60 years, the gain to the Commonwealth population by excess of arrivals over departures was 1,015,066 persons, while the gain by excess of births over deaths for the same period was 3,251,668. That is, 23.8 per cent. of the increase for the Commonwealth during the past 60 years has been due to “net immigration” and 76.2 per cent. to “natural increase.” In regard to the contribution by individual States to the total net immigration of 1,015,066, every State has shewn an increase with the exception of Tasmania, where the loss by emigration has been 31,068.

The quinquennial period in which the greatest net immigration to the Commonwealth occurred was that of 1881–5 with a total of 224,040, whilst in the period 1901–5, the departures exceeded the arrivals by 16,793. The quinquennial periods in which maximum net immigration occurred in the several States were as follows:—New South Wales and Queensland 1881–5, Victoria 1886–90, South Australia 1876–80, Western Australia and Tasmania 1896–1900. In all the States quinquennial periods have occurred in which the departures for the five years have exceeded the arrivals. The periods in which such net emigration from the several States was greatest were as follows:—New South Wales and Victoria 1896–1900, Queensland 1901–5, South Australia 1886–90, Western Australia 1916–1919, and Tasmania 1911–15. In the five years 1916, 1917, 1918, 1919 and 1920 a net immigration of 71,133 was experienced, all the States having contributed to that total except Western Australia and Tasmania, where there was an excess of emigration. The smallness of the gain by immigration during the period 1916–20 was largely due to the restrictions placed on travelling during the war period.

4. **Total Increase.**—The total increase of the population is found by the combination of the natural increase with the net immigration.

In the following table are set out the figures shewing the total increase in each quinquennium from 1861 to 1915 and for the five years 1916 to 1920:—

TOTAL INCREASE OF THE POPULATION OF THE STATES, TERRITORIES, AND COMMONWEALTH FROM 1861 TO 1920.

(a) Including Northern Territory up to 1900. (b) Included in South Australia up to 1900
(c) Part of New South Wales prior to 1911.

NOTE.—The minus sign (—) denotes decrease.

As regards the Commonwealth as a whole, the greatest increase in any quinquennium up to 1910 was that for the period 1881–5, viz., 462,987. These figures were, however, closely approached by those for the succeeding quinquennium, viz., 456,837. The rate of increase fell off, however, in the three subsequent quinquennia, the increase for the years 1901–5 being 267,638. In the following quinquennium an improvement set in, the increase in that period being 392,106. This was followed by a further improvement in the quinquennium 1911–15, the first three years of which gave increases of 148,785, 172,933, and 147,298 respectively. In the two succeeding years a falling-off was recorded, but this must be taken as having been caused by the war, there having been an excess of departures over arrivals in the two years of 8,075 and 84,322 respectively. In spite of this adverse influence, the increase for the quinquennium 1911–15 was 544,971, the highest quinquennial increase yet recorded for the Commonwealth. In 1916 the departures exceeded the arrivals by 128,651 and by 17,775 in 1917, but during 1918 and 1919 the excess of arrivals was 23,396 and 166,384 respectively, due mainly to the return of the Australian Imperial Forces. Although in 1920 the increase by migration totalled only 27,779, yet the total increase in population for this decennium was 442,264.

As regards the individual States the maximum increases in any quinquennium are as follows:—New South Wales, 250,981, in 1911-15; Victoria, 173,890, in 1886-90; Queensland, 105,641, in 1881-5; South Australia (including the Northern Territory), 66,317, in 1876-80; Western Australia, 79,452, in 1896-1900; Tasmania, 18,005, in 1896-1900.

As regards the minimum quinquennial increases, it will be seen that they have occurred as under:—New South Wales, 59,960, in 1861-5; Victoria, 10,537, in 1896-1900; Queensland, 28,351, in 1866-70; South Australia, 5,371, in 1901-5; Western Australia, 1,867, in 1871-5; Tasmania, 2,853, in 1871-5.

The graphs shewing net increase, both for the Commonwealth as a whole and for each of the States, will be found on pages 1134 and 1135.

5. Rates of Increase.—(i) *Rates for various Countries.* The table hereunder furnishes particulars concerning rates of increase in population for the Commonwealth, its component States, and other countries:—

(g) 1916 to 1917.

(h) 1916 to 1918.

(i) 1916 to 1919.

NOTE.—The minus sign (—) denotes decrease.

(ii) *Variations in the Commonwealth Rate.* During the twenty-five years 1881-1906 the annual rate of increase in the population of the Commonwealth exhibited a marked decline, falling from an average of 3.86 per cent. for the five years 1881-6 to an average of 1.38 for 1901-6. During the succeeding quinquennium, however, an improvement took place, the rate of increase being 2.03. In the quinquennium 1911-1916 there was a decline owing to the war. As regards the separate States of the Commonwealth, it will be seen that though the rates of increase for the quinquennium 1911-16 were in all cases lower than those for the quinquennia 1881-6 and 1886-91, it is only in the case of Western Australia that the 1911-16 rate represents the minimum for the seven quinquennia under review. During the four years 1916-20 the Commonwealth as a whole experienced a higher rate of increase than for the previous quinquennium.

(iii) *Comparison of Rates of Increase.* It may be noted that the highest rates of increase for the period 1911-16 are those for Canada, Rumania, and the Commonwealth of Australia in the order named. The Netherlands and Serbia rank next in order.

6. *Density of Population.*—From one aspect population may be less significant in respect of its absolute amount than in respect of the density of its distribution. The Commonwealth of Australia, with an area of 2,974,581 square miles, and a population on 31st December, 1920, of 5,472,318, including aborigines, has a density of only 1.84 persons to the square mile, and is therefore the most sparsely populated of the civilised countries of the world. For the other continents the densities are approximately as follows:—Europe, 123; Asia, 55; Africa, 12; North and Central America, 17; and South America, 8. The population of the Commonwealth has thus about 21 per cent. of the density of that of South America; about 15 per cent. of that of Africa; about 10½ per cent. of that of North and Central America; about 3½ per cent. of that of Asia; and about 1½ per cent. of that of Europe.

Particulars concerning the number and density of the population of the various countries of the world for the latest dates for which such information is available are given in the following table. These figures have in the main been derived from the 1921 issue of the "Statesman's Year Book," and in some instances, more particularly in the case of Africa, must be considered as rough approximations only, complete data not being obtainable. As already mentioned on page 44 *ante* the areas dealt with in the following table are those which prevailed as at the outbreak of war:—

NUMBER AND DENSITY OF THE POPULATION OF THE VARIOUS COUNTRIES OF THE WORLD.

§ 5. Seasonal Variations of Population.

1. **Natural Increase.**—For the Commonwealth as a whole the natural increase of the population is greatest in the quarter ending 30th September, and least in that ending 30th June. The birth rate is usually at its highest, and the death rate at its lowest, in the September quarter. The average natural increase in population of the several States for each of the quarters, based upon the experience of the ten years 1911 to 1920, is given in the following table, from which it will be seen that the quarter in which the rate of natural increase was highest is that ended 31st March for New South Wales, that ended 30th June for Queensland, that ended 30th September for South Australia and Western Australia, and that ended 31st December for Victoria and Tasmania. The quarters shewing lowest rate of natural increase were that ended 30th June for New South Wales, Victoria and Tasmania, and that ended 31st December, for the three remaining States.

AVERAGE QUARTERLY NATURAL INCREASE, STATES, TERRITORIES AND COMMONWEALTH, 1911 TO 1920.

State or Territory.	(a) Average Natural Increase for Quarter ended on last day of—										Average Natural In- crease per Annum, 1911–20.

(a) The symbol ‰ denotes "per thousand."

2. **Net Immigration.**—For the Commonwealth as a whole for the decennium 1911–20, arrivals exceeded departures in each quarter. New South Wales experienced excesses of arrivals in each quarter, Victoria, Queensland, and Western Australia in three of the four quarters, South Australia in two, and Tasmania in one only. Particulars concerning the average net immigration of the several States and Territories are as follows :—

AVERAGE QUARTERLY NET IMMIGRATION, STATES, TERRITORIES AND COMMONWEALTH, 1911 TO 1920.

State or Territory.	Quarter ended on last day of—								Average Net Immigration per annum, 1911–20.

C'wealth	5,812	1.19	5,491	1.12	9,015	1.83	541	0.11	20,859	4.27

NOTE.—The minus sign (–) denotes that the departures were in excess of arrivals, and ‰ denotes “per thousand” of population.

§ 6. Urban Population.

1. **The Metropolitan Towns.**—A feature of the distribution of population in Australia is the tendency to accumulate in the capital cities. To such an extent is this metropolitan aggregation carried, that in every State the population of the capital far outnumbers that of any other town therein, and ranges between 20 and 55 per cent. of the entire population of the State. The populations of the several capitals at the Census of the 4th of April, 1921, and the percentages of such populations on the totals for the respective States, are shewn in the table hereunder. As might be expected, the proportion of males resident within the metropolitan areas of the Commonwealth is less than that for females. Of the total male population of the Commonwealth 40.44 per cent. live in the capital cities, while the corresponding figure for females is 45.83 per cent. That this metropolitan concentration is phenomenal may be readily seen by comparing the percentage on the total population with the similar figures for the principal countries of Europe, also given in the table hereunder :—

**METROPOLITAN POPULATION.
(VARIOUS COUNTRIES.)**

State or Country.	Metropolis.	Year.	Population.	Percentage on total of State or Country.

2. **Urban Population Generally.**—In connexion with the particulars shewing the tendency in Australia to concentrate population in the metropolis, it should be borne in mind that in most of the European States the capital is but one of many populous cities, and in some instances is by no means the most populous. In Australia, on the other hand, the metropolis is in every instance the most populous city, and, in some of the States, is also the only town of considerable magnitude.

In the following table will be found particulars of the Principal Urban Incorporated Areas in the Commonwealth returned at the date of the Census, on 4th April, 1921, as having a population of over 3,000. From this it will be seen that there were, in all, 50 localities in the Commonwealth returned as having a population upwards of 20,000. Of these 19 were in New South Wales, 18 in Victoria, 7 in Queensland, 3 in South Australia, 1 in Western Australia, and 2 in Tasmania.

By the term "Urban Incorporated Areas" is meant those urban districts which have been incorporated for municipal purposes. The populations shewn in each case are those recorded within the municipal boundaries.

For the purpose of providing a comparison of the populations of the several States and Territories, the following table has been compiled from the 1921 Census data, shewing the population of each State and Territory divided into four distinct sections, viz. :— Urban Metropolitan, Urban Provincial, Rural, and Migratory, and the percentage of each section on the total population for the State or Territory :—

URBAN AND RURAL POPULATION OF AUSTRALIA, 4th APRIL, 1921.

(EXCLUSIVE OF FULL-BLOOD ABORIGINALS.)

(Subject to revision.)

Particulars.	States.						Territories.		Total Commonwealth.
	New South Wales.	Victoria.	Queensland.	South Australia.	Western Australia.	Tasmania.	Northern Territory.	Federal Capital Territory.	
Urban—									
Metropolitan	899,099	766,506	210,032	255,481	154,866	52,391	2,338,375

Provincial ..	24.99	12.24	24.26	8.64	12.81	22.98	36.12	..	18.98
Rural ..	31.64	37.33	47.58	39.16	39.06	52.22	62.20	99.65	37.47
Migratory ..	0.55	0.38	0.44	0.62	1.51	0.30	1.68	0.35	0.54
Total ..	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

For the Commonwealth as a whole 61.99 per cent. of the population is urban, this percentage being exceeded by New South Wales, 67.81 per cent., and Victoria, 62.29 per cent. Tasmania, with 47.48 per cent., has the smallest percentage of urban population in all the States.

§ 7. Assisted Immigration.

In the earlier days of settlement in Australia, State-assisted immigration played an important part. Such assistance ceased for the time being in Victoria in 1873, in South Australia in 1886, and in Tasmania in 1891. In New South Wales, general State-aided immigration was discontinued in the year 1887, but those who arrived under that system and were still residing in New South Wales might, under special regulations, send for their wives and families. A certain amount of passage money, graduated according to the age of the immigrant, was required to be paid in each case. Under the provisions of these regulations, immigrants to the number of 1994 received State assistance during the years 1888 to 1899 inclusive. From 1900 to 1905 no assistance of any kind was

given, but from 1906 onwards assistance has again been afforded. In Queensland and Western Australia, such assistance, although varying considerably in volume from year to year, has been accorded for many years past. Assistance to immigrants, which in the case of Victoria had practically ceased in 1873, has recently been again afforded. In South Australia the principle of State assistance was again introduced in 1911, and in Tasmania in 1912.

The number of assisted immigrants for the years 1914 to 1920, and the total from the earliest times up to the end of 1920, are given in the following table:—

ASSISTED IMMIGRANTS DURING THE YEARS 1914 TO 1920, AND UP TO THE END OF 1920.

STATES AND COMMONWEALTH.

§ 8. Enumerations and Estimates.

1. **Musters.**—Actual enumerations of Australia's population, of varying accuracy, have been made from the earliest times onward. These were originally known as "Musters," and were first undertaken with a view to estimating the food and other requirements of the settlements. They appear to have been very unreliable, and to have been carried out at least annually from 1788 to 1825, when they were discontinued.

2. **Census-taking.**—The first regular Census in Australia was that of New South Wales, in November, 1828. The dates on which Censuses have been taken in the several States, and the populations enumerated thereat, are shewn in the table on page 1155.

3. **The Census of 1901.**—A conference of the Government Statisticians of Australia and New Zealand was held in Sydney in February and March, 1900, with the object of securing uniformity in the collection and compilation of the Census of 1901. The householder's schedule which it drafted made provision for the collection of information in all the States under the following heads, viz. :—Name, Sex, Age, Conjugal Condition, Relation to Head of Household, Occupation, Sickness and Infirmary, Birthplace, Length of Residence in Colony, Religion, Education, Materials of Houses and Number of Rooms. In addition to these, it was agreed that States so desiring might include further inquiries relating to Land, Live Stock, Crops, and certain other matters.

Provision was made for uniformity in the classification and compilation of the data by formulating rules for dealing with cases in which differences of opinion as to methods of treatment might exist. Thus, although conducted by six different States, the Census of the Commonwealth, as taken in 1901, was carried out on a fairly uniform plan, and consequently furnished data in many ways suitable for purposes of aggregation or comparison. A detailed examination of the results, however, gives many indications of departure from a common line of action, which, in the absence of a central authority, can hardly be avoided in an undertaking of this nature.

4. **The Census of 1911.**—Under Section 51, sub-section (xi.) of the Constitution Act, power is given to the Parliament of the Commonwealth to make laws with respect to "Census and Statistics." This power was brought into requisition in 1905, when the Census and Statistics Act of 1905 became law, being assented to on 8th December, 1905. Under this Act provision is made for the appointment of a Commonwealth Statistician, and amongst other duties that officer is charged with the taking of a Census in the year 1911 and in every tenth year thereafter.

The particulars which the Act requires to be included in the Census schedule are almost identical with those which were contained in the 1901 schedule, the principal alterations being that "Length of Residence in Australia" is specified instead of "Length of Residence in the Colony of Enumeration," that "Duration of Marriage" has to be asked in all cases, and that nationality has to be ascertained in addition to birthplace. The Census was taken as at 3rd April, 1911.

In each State a Census supervisor was appointed to control the collection within that State under the direction of the Commonwealth Statistician. Each State was then divided into Census districts, each of which was placed in the charge of an enumerator, and each Census district was further subdivided into collectors' districts, one collector for each district.

It should be noted, in connexion with the Census of 1911, that a slight change in defining the date of reference has been made in order to accord with the English practice. In previous Australian Censuses the date of the Census has been taken to be that of the day preceeding the midnight which is adopted as the determining point. Thus, at the Census of 1901, where the figures given relate approximately to midnight between the 31st March and the 1st April, the Australian Census was stated to be that of the 31st March, while in a precisely similar case in England it was stated to be that of 1st April. At the Census of 1911, taken as at midnight between the 2nd and 3rd April, the date of the Census has, in accordance with the English practice, been stated to be the 3rd April, and that day was gazetted as the day of the Census.

5. **The Census of 1921.**—The third Australian Census since the commencement of the century was taken under the Census and Statistics Act 1905-20, as at midnight between the 3rd and 4th April, 1921, the latter date being gazetted as Census Day. On this occasion the Federal Electoral organization was utilized for collecting purposes, the Commonwealth Chief Electoral Officer (Mr. Oldham) kindly consenting to allow his officers to undertake the local direction of the collecting staffs.

In each State the Commonwealth Electoral Officer was appointed Deputy Supervisor of Census for that State, and each Divisional Returning Officer was appointed Census Enumerator for the Division under his control. To assist the Enumerators in the selection and direction of the actual collectors, Sub-enumerators were appointed, the Census Subdivision being in most cases a Federal Electoral Subdivision or a group of two or more such electoral subdivisions.

In addition to the six States the five territories of the Commonwealth were also enumerated, viz., (i) Northern Territory, (ii) Federal Capital Territory, (iii) Norfolk Island, (iv) Papua, (v) New Guinea.

In each of these cases a Deputy Supervisor of Census was appointed who, however, dealt directly with his collectors without the intermediary of Enumerators and Sub-enumerators. For the whole of the Commonwealth and its dependencies the collecting organization comprised the following, viz.:—11 Deputy Supervisors, 75 Enumerators, 979 Sub-enumerators, 9,500 Collectors.

The compilation of the results is being carried out as far as possible by machinery, this being the first occasion on which the tabulation of an Australian Census has been so conducted. The system in use is that which is generally known as the "Hollerith," and the requisite machines and cards are supplied by the British Tabulating Machine Company, London.

The particulars at present available are the populations of the several States and Territories, and of the several Local Government Areas comprised therein, details of which have been included as far as practicable in the present Section. The population estimates for the intercensal period 1911-21 have also been adjusted on the basis of the results disclosed by the Census of 1921. Analyses of the Census data according to age, birthplace, religion, occupation, &c., will, however, not be available for some considerable time, and the figures relative thereto for the Census of 1911 have consequently been allowed to stand.

The total populations enumerated at the several Australian Censuses are shewn in the following table :—

AUSTRALIAN CENSUSES.

(a) Including Port Phillip District, which afterwards became the Colony of Victoria. (b) Previously included with New South Wales. (c) 3rd April. (d) 5th April. (e) 31st March. (f) 3rd April. (g) Federal Capital Territory, previously included with New South Wales. (h) Northern Territory, previously included with South Australia. (i) 4th April (subject to revision). (j) Federal Capital Territory. (k) Northern Territory.

6. **Estimates of Population.**—In the absence of an annual enumeration of the population, it becomes necessary to adopt some method of estimating it for intercensal periods, basing such estimates on the results of the most recent Censuses. The manner in which this is effected varies, however, in different parts of the world. In England, for example, the assumption usually made is that the rate of increase of the preceding intercensal period will continue unchanged during the current period. Again, in the United States, it has been assumed, in certain cases, that the numerical increase per annum ascertained for the preceding intercensal period will hold good for the current period. From the earliest times in Australia, "statistics of fluctuation" have been obtained from the records of births, deaths, arrivals and departures. With reasonable thoroughness in the collection of such statistics, the deduced estimates possess much greater weight than those based on the mere assumption of a continuation of the increase experienced in the preceding period. In most cases, however, estimates of population, based on statistics of fluctuation, are found to be in excess at the Census, thus furnishing evidence of a uniform tendency to over-estimation, and indicating the necessity for a correction. In the population figures given in the earlier portion of the present section, the estimates of the population of the several States have been carefully revised, the results of the various Censuses being taken in conjunction with the records of births, deaths, arrivals and departures. It is believed that by this means the population of the Commonwealth from the date of settlement onwards has been obtained with a high degree of accuracy, and that the figures supplied represent a reasonably close approximation to the actual numbers. A detailed account of the adjustment for the decennium 1901–10 will be found on pp. 112–118 of Year Book No. 6. Particulars for the several States and Territories from the date of settlement onwards are given in the following tables, and are shewn by graphs on pages 1131 to 1133:—

COMMONWEALTH POPULATION FROM EARLIEST DATE.

Estimated Population at end of Year.

(a) Details as to sex not available for earlier quinquennial dates. (b) Previously included with New South Wales. (c) Previously included with South Australia.

The tables on this and the preceding page, shewing the quinquennial and other figures for the male, female, and total population of each State and the Commonwealth, give sufficient indication, for general purposes, of its progress. A reference to the diagrams

given hereinbefore (pp. 1131 to 1133), on which the graphs shew the particulars for each year, is also desirable. The characteristics of the fluctuations of each element, or of the totals, will be more readily perceived by reference to the graphs than they possibly can by reference to these numerical tables. The earliest date for which particulars as to sex were available is 1796. The figures from 1788 to 1825 inclusive, as already mentioned, are based upon the results of the musters taken in those years; those for subsequent years are founded upon estimates made on the basis of the Census results and the annual returns of births and deaths and immigration and emigration.

The following table furnishes particulars relative to the increase of population of the Commonwealth during each decade, and the percentage of such increase on the population at the commencement of the decade :—

INCREASE OF COMMONWEALTH POPULATION.

Decade ended 31st December.	Increase during Decade—					
	Numerical.			Percentage.		
	Males.	Females.	Persons.	Males.	Females.	Persons.
1790	(a)	(a)	2,056	%	%	%

§ 9. Census of 4th April, 1921.

1. Numbers Enumerated.—As already mentioned, the Census for the whole of the Australian Commonwealth was taken as for the night between the 3rd and the 4th of April, 1921, and was the second Census under the provisions of the Commonwealth Census and Statistics Act 1905-20, which provides for the enumeration of the whole of Australia being dealt with from one centre, instead of each State being responsible for its own count as on previous occasions. The numbers recorded in the several States and Territories of the Commonwealth were as follows :—

POPULATION OF THE COMMONWEALTH, 4th APRIL, 1921.

(EXCLUSIVE OF FULL-BLOOD ABORIGINALS.)

States and Territories.	Males.	Females.	Persons.
States—			
New South Wales	1,071,058	1,028,705	2,099,763
Victoria	754,629	776,900	1,531,529
Queensland	399,610	358,024	757,634
South Australia	248,293	247,043	495,336
Western Australia	177,013	155,200	332,213
Tasmania	107,767	106,110	213,877
Territories—			
Northern	2,821	1,049	3,870
Federal	1,567	1,005	2,572
Total Commonwealth	2,762,758	2,674,036	5,436,794

2. **Growth during last Four Decennia.**—The total increase of population of the Commonwealth between the Census of 3rd April, 1911, and that of 4th April, 1921, was 981,789, of which 449,723 were males and 532,066 were females, as compared with a total increase of 681,204, comprising 335,107 males and 346,097 females, for the preceding ten years. The population of each sex enumerated at the Censuses of 3rd April, 1881, 5th April, 1891, 31st March, 1901, 3rd April, 1911, and 4th April, 1921, was as follows :—

POPULATION OF COMMONWEALTH AT LAST FIVE CENSUSES.

(EXCLUSIVE OF FULL-BLOOD ABORIGINALS.)

Date of Census.	Males.	Females.	Persons.	(a) Masculinity.
3rd April, 1881	1,214,913	1,035,281	2,250,194	7.98
5th April, 1891	1,704,039	1,470,353	3,174,392	7.36
31st March, 1901	1,977,928	1,795,873	3,773,801	4.83
3rd April, 1911	2,313,035	2,141,970	4,455,005	3.84
4th April, 1921 (b) ..	2,762,758	2,674,036	5,436,794	1.63

(a) Excess of males over females per 100 of population.
revision.

(b) Preliminary totals only ; subject to revision.

The increases in the populations of the several States and Territories during the past four intercensal periods have been as follow :—

INTERCENSAL INCREASES IN THE TOTAL POPULATION.

State and Territory.	1881-1891.		1891-1901.		1901-1911.		1911-1921.

Commonwealth	924,198	41.07	599,409	18.88	681,204	18.05	981,789	22.04

(a) Including Federal Territory.

(b) Decrease.

For the Commonwealth as a whole, the increase in population during the period 1911-1921 was greater by 300,585 than that for the period 1901-1911, the rate of increase being 22.04 per cent. for 1911-1921, as against 18.05 for 1901-1911. The former corresponds to an increase of 1.67 per cent. per annum, the latter to an increase of 2.03 per cent. per annum.

As regards the separate States, the numerical increases in the case of New South Wales, Victoria, Queensland, South Australia, and Tasmania were greater for 1911-1921 than for 1901-1911. On the other hand, Western Australia experienced greater numerical increases in the earlier than in the later decennia. The Northern Territory, which exhibited an actual loss of population in 1891-1901 and 1901-1911, experienced its first increase since the 1881-1891 decennium during the period 1911-1921. In the matter of rates of increase per cent. New South Wales, Victoria, Queensland, South Australia, and Tasmania were higher in 1911-1921 than in 1901-1911, while Western Australia was considerably lower.

§ 10. Principal Results of Census of 1911.

1. Census Results.—In the first issue of the Official Year Book tables are given shewing in some detail particulars concerning the Census of 1901 for the several States under the headings of Ages, Birthplaces, Occupations, Religions, and Conjugal Condition. (See Year Book No. 1, pp. 164 to 179.) In the Official Year Book No. 6, pp. 143 to 171, similar and a few additional particulars appeared as to the Census of 3rd April, 1911. In the following tables this information is given in a condensed form. Corresponding particulars for the Census of 1921 are not available at date of going to press.

2. Ages.—The numbers of persons of each sex at each age enumerated in the several States of the Commonwealth at the Census of 3rd April, 1911, are as follows:—

AUSTRALIAN POPULATION AT 3rd APRIL, 1911, CLASSIFIED ACCORDING TO AGE.

(EXCLUSIVE OF FULL-BLOOD ABORIGINALS.)

3. Birthplaces.—In the next table particulars are given of the populations of the several States of the Commonwealth on 3rd April, 1911, classified according to sex and birthplace, the birthplaces being grouped under the five continental divisions of the globe, with two additional headings for those born in Polynesia, and those born at sea. Of the total population of 4,455,005, those of unspecified birthplace numbered 30,470, or slightly less than 7 per thousand :—

4. *Occupations.*—In the compilation of the results of the Census of 3rd April, 1911, the populations of the several States and Territories were tabulated according to occupation in the following classes :—

(i) *Professional.* Embracing all persons not otherwise classed, mainly engaged in the government and defence of the country, and in satisfying the moral, intellectual, and social wants of its inhabitants.

(ii) *Domestic.* Embracing all persons engaged in the supply of board and lodging, and in rendering personal services for which remuneration is usually paid.

(iii) *Commercial.* Embracing all persons directly connected with the hire, sale, transfer, distribution, storage, and security of property and materials.

(iv) *Transport and Communication.* Embracing all persons engaged in the transport of persons or goods, or in effecting communication.

(v) *Industrial.* Embracing all persons not otherwise classed who are principally engaged in various works of utility, or in specialities connected with the manufacture, construction, modification, or alteration of materials so as to render them more available for the various uses of man, but excluding, as far as possible, all who are mainly or solely engaged in the service of commercial interchange.

(vi) *Agricultural, Pastoral, Mineral, and other Primary Producers.* Embracing all persons mainly engaged in the cultivation or acquisition of food products, and in obtaining other raw materials from natural sources.

(vii) *Independent.* Embracing all persons of independent means having no specific occupation.

(viii) *Dependents.* Embracing all persons dependent upon relatives or natural guardians, including wives, children, and others, not otherwise engaged in pursuits for which remuneration is paid, and all persons depending upon private charity, or whose support is a burthen on the public revenue.

Particulars concerning the number contained in each of these classes are given in the table hereunder :—

5. Religions.—In the Act under which the Census of 1911 was taken in the several States, persons enumerated were required under penalty to furnish replies to all the inquiries contained in the schedule, with the exception of that relating to religion. In this case, any person objecting to give such particulars was allowed to insert the words "Object to state" in the space provided for religion. Of the total population of 4,455,005 there were 83,003, or 1.86 per cent., who availed themselves of this option. There were also 36,114, or 0.81 per cent., concerning whom no particulars as to religion were obtained.

Of the remainder, 4,274,414, or 95.95 per cent., were members of the various Christian denominations, 36,785 were members of non-Christian religions, 14,673 were of indefinite religious belief, and 10,016 stated that they were of no religion.

Amongst the Christian denominations, that most numerous represented was the Church of England, with 1,710,443 adherents, the next in order being the Roman Catholic (921,425), the Presbyterian (558,336), the Methodist (547,806), the Baptist (97,074), the Congregational (74,046), the Lutheran (72,395), the Church of Christ (38,748), and the Salvation Army (26,665).

The principal non-Christian religions represented in Australia were the Hebrew, Confucian, Mohammedan and Buddhist, the members of the Hebrew congregation totalling 17,287.

Those included under the head of "Indefinite" in the attached table consist mainly of persons who stated that they were "Freethinkers" or "Agnostics," or returned themselves as being of "No Denomination," while under the head of "No Religion" are given those who were so returned on the schedules as well as a small number who stated that they were "Atheists."

AUSTRALIAN POPULATION AT 3rd APRIL, 1911, CLASSIFIED ACCORDING TO RELIGION.

The accompanying table furnishes for the Censuses of 1891, 1901, and 1911, a comparison of the numbers recorded in the principal denominations and religions. An unsatisfactory feature of the table is the large number who stated their religion simply as "Protestant" or "Catholic." Presumably, the majority of the latter were "Roman Catholic," but an appropriate allocation of the undefined Protestants could not readily be made. The returns for 1911 included no fewer than 109,861 Protestants (undefined) and 75,379 Catholics (undefined).

POPULATION OF THE COMMONWEALTH AT THE CENSUSES OF 1891, 1901, AND 1911

7. Education.—In the following table are contained particulars of the education of the population of the States and Territories of the Commonwealth as at the date of the Census of 3rd April, 1911. Of the total population of 4,455,005, there were 3,650,030, or 81.93 per cent., who were able to read and write in the English language, and 26,210, or

0.59 per cent., who were able to read and write in a foreign language, though unable to read or write English. Of the remainder no fewer than 525,633 were recorded as being under five years of age, all of whom were classed at the Census under the head of "Cannot read."

§ 11. Naturalization.

1. **The Commonwealth Act.**—The Commonwealth Constitution empowers the Commonwealth Parliament to make laws with respect to "Naturalization and Aliens," a power which was exercised when the "Naturalization Act of 1903" was passed. This Act was assented to on 13th October of that year, and came into force on 1st January, 1904, in accordance with a proclamation by *Gazette* of 14th November, 1903.

In 1917 it was considered advisable to make more stringent the provisions of the Act, notably with reference to the question of dual nationality, circumstances arising out of the war having clearly demonstrated that while many naturalized persons of enemy birth were enjoying the rights, privileges, and protection guaranteed to Australian citizens, they were still pledged to allegiance to their Mother Country. As a result the "Naturalization Act 1917," containing a number of new and important provisions, was passed by Parliament and was assented to on 20th September of the same year.

In 1920, an Act was passed, which superseded the Acts passed in 1903 and 1917. The purpose of this measure, which was known as the "Nationality Act 1920," and which came into operation on 1st January, 1921, was to consolidate and amend the law regarding naturalization. The most important provision of this Act was the adoption of Part II. of the "British Nationality and Status of Aliens Act 1914," which conferred on any person naturalized under the Act the rights of a British subject, not only in the Commonwealth but also in Great Britain and in any other parts of the Empire which have adopted Part II. of the British Act.

Prior to the passing of the original Act the issue of certificates of naturalization had been a function of the State Governments, carried out under Acts of the several State Legislatures, which, however, did not differ materially from each other, and furnished the basis on which the Commonwealth Act was drafted. From 1st January, 1904, when the Commonwealth Act of 1903 became operative, the right to issue certificates of naturalization in the Commonwealth has been vested exclusively in the Federal Government, but all certificates or letters of naturalization issued under the several State Acts prior to that date entitle the recipients to be deemed to be naturalized under the Commonwealth Act.

The grant of a certificate of naturalization entitles the recipient to all the rights and privileges, and renders him subject to all the obligations of a natural-born British subject, with the exception that where, by any Commonwealth or State Constitution or

Act, a distinction is made between natural-born British subjects and naturalized persons, such distinction shall hold good in the case of all persons naturalized under the Commonwealth Act.

The "Nationality Act 1920" provides that applications for certificates of naturalization must be made to the Governor-General, the qualifications required in an applicant being :—

- (i) Residence in Australia continuously for not less than one year immediately preceding his application for naturalization, and previous residence, either in the Commonwealth or in some other part of His Majesty's dominions, for a period of four years within the last eight years before the application.
- (ii) Good character and an adequate knowledge of the English language.
- (iii) Intention to settle in the British Empire.

The applicant is required to furnish the following particulars in support of his application :—

His own statutory declaration stating—

- (a) Name; (b) Age; (c) Birthplace; (d) Occupation; (e) Residence;
- (f) Length of residence in the British Empire; (g) Intention to settle in the British Empire; (h) Such other particulars as are prescribed.

He must also furnish :—

- (i) Newspapers containing copies of an advertisement, as prescribed, of his intention to seek naturalization.
- (ii) Certificates of character from three natural-born British subjects, two of whom must be householders, and the third a Justice of the Peace, Postmaster, State School Teacher, or Police Officer.
- (iii) Satisfactory evidence that he has an adequate knowledge of the English language.

Any person may make representation by statutory declaration with regard to an applicant for naturalization. The contents of such declaration will not be disclosed other than with the consent of the person making the declaration, except for the purpose of a prosecution for perjury.

The Governor-General in Council may, in his absolute discretion, and with or without assigning any reason, grant or withhold a certificate of naturalization as he thinks most conducive to the public good; but the issue of a certificate of naturalization will not be effected until the applicant furnishes a certificate signed by a Justice of the High Court of Australia, a State Judge, or a Magistrate, certifying that he has renounced allegiance to the country of which he was a subject at the time of his application for naturalization, and that he has taken an oath or affirmation of allegiance to the Crown in accordance with the Constitution. The grant of a certificate is made free of charge.

The Governor-General may, in his absolute discretion, in any special case in which he thinks fit, grant a certificate of naturalization to any minor, whether or not the conditions required by this Act have been complied with.

In addition to naturalization by grant of certificate, the Act makes provision for—

- (i) Naturalization by marriage.
- (ii) Naturalization by residence with naturalized parent.

The former relates to the case of a woman who is not herself a British subject, but is married to a British subject; the latter to that of a person who is not a natural-born British subject, but who has resided at any time during infancy in Australia with a father or mother who at the time was a naturalized British subject. In each instance the person concerned is deemed to be naturalized under the Commonwealth Act.

The Governor-General may revoke any certificate of naturalization where—

- (i) It is proved that the certificate has been obtained by false representation or fraud, or by concealment of material circumstances, or that the person to whom the certificate is granted has shewn himself by act or speech to be disaffected or disloyal to His Majesty.
- (ii) he is satisfied that the person to whom the certificate was granted either—
 - (a) has during the war in which His Majesty is engaged unlawfully traded or communicated with the enemy or with the subject of an enemy State, or been engaged in or associated with any business which is to his knowledge carried on in such manner as to assist the enemy in such war; or

- (b) has within five years of the date of the grant of the certificate been sentenced by any court in His Majesty's dominions to imprisonment for a term of not less than twelve months, or to a term of penal servitude, or to a fine of not less than one hundred pounds; or
- (c) was not of good character at the date of the grant of the certificate; or
- (d) has since the date of the grant of the certificate been for a period of not less than seven years ordinarily resident out of His Majesty's dominions otherwise than as a representative of a British subject, firm or company carrying on business, or an institution established in His Majesty's dominions, or in the ordinary service of the Crown, and has not maintained substantial connexion with His Majesty's dominions; or
- (e) remains according to the law of a State at war with His Majesty a subject of that State;
- and that (in any case) the continuance of the certificate is not conducive to the public good.

Where a wife and any minor children have acquired British nationality under the certificate issued to the husband and father and such certificate is subsequently revoked, the wife and children remain British subjects unless the Governor-General otherwise declares, or unless they themselves elect to make a declaration of alienage.

In accordance with the Act, a list of persons naturalized, with their addresses, is published in the *Commonwealth Gazette* from time to time.

The administration of the Act is carried out by the Home and Territories Department, and the Governor-General is authorised to make such regulations as are necessary or convenient for giving effect to the Act.

2. *Statistics of Naturalization.*—Particulars relative to the nationalities of the recipients of certificates of naturalization issued under the Act during each of the five years 1916 to 1920, and to the countries from which such recipients had come, are shewn in the following table:—

3. **Census Particulars.**—On the Personal Card used at the Census of 3rd April, 1911, an inquiry as to naturalization was made, all persons who were British subjects by naturalization being required to indicate the fact by inserting the letter N in the place provided for the purpose on the card. In addition, in checking the cards in the Census Bureau, instructions were given that cases of women naturalized by marriage to British subjects, and of children naturalized by residence with parents who have become British subjects, should be duly taken into account by the insertion of the letter N if originally omitted. The results of the tabulation will be found in the following table :—

Corresponding particulars for the Census of 1921 are not yet available.

§ 12. Graphical Representation of Growth of Population.

1. **General.**—The nature of the fluctuations of the numbers representing (a) total population, or those representing (b) births and deaths from year to year, or (c) the natural increase, i.e., the difference of births and deaths, or (d) the net immigration, all of which taken together make up the element of increase of total population, cannot be readily discerned from mere numerical tables. It has been deemed desirable, therefore, to furnish a series of graphical representations, shewing in some cases the characteristics

of these elements from 1788 to 1920, and in others from 1860 to 1920. The graphs furnish at a glance a clear indication of the changes taking place, and of their significance from year to year. The great importance of such representations is that only by their means can the most recent changes be justly apprehended, either in their relation to the past, or their meaning for the future.

2. **Graphs of Total Population** (page 1131).—These graphs furnish interesting evidence of the comparatively slow rate of growth of the several States and of the Commonwealth as a whole, during the period from the foundation of settlement in 1788 until 1832. From that year onwards to 1851, a moderately increased rate of progress was experienced. In 1851 gold was discovered in Australia, and the effect of this discovery on the population of the Commonwealth is shewn by the steepness of the curves for New South Wales and Victoria, and for the Commonwealth, from this point onwards for a series of years. The sudden breaks in the continuity of the curves for New South Wales indicate the creation of new colonies, and their separation from the mother colony. Thus, Tasmania came into existence in 1825, Victoria in 1851, and Queensland in 1859. Owing to the extensive gold discoveries in Victoria, its population increased so rapidly that in 1854 its total passed that of New South Wales, and remained in excess until 1892, when the mother State again assumed the lead, which it has since maintained. The rate of increase in New South Wales is large, but the State is still only sparsely populated. A feature of the New South Wales curve is its comparative regularity as compared with that of Victoria, the population of which State increased with great rapidity from 1851 to 1860, less rapidly from 1861 to 1878, with a further period of increased rapidity from 1878 to 1891, and a period of very slow and fluctuating growth from the latter year to 1914. In 1915 and 1916 the population decreased, but in 1917, 1918, 1919, and 1920 increases were again recorded. Victoria, however, has a population density more than double that of Tasmania, and nearly three times that of New South Wales.

In the case of Queensland, the curve indicates a rate of growth which, though varying somewhat, has on the whole been satisfactory, and at times very rapid. Periods of particularly rapid increase occurred from 1862 to 1865, from 1873 to 1877, and from 1881 to 1889. With the exception of the year 1916 the population of this State has always increased each year up to 1920. The population of Queensland passed that of Tasmania in 1867, and that of South Australia in 1885. The population density of Queensland is about one-seventeenth of that of Victoria.

The curve for South Australia indicates that with fluctuations more or less marked, the population increased at a moderate rate from the date of the effective settlement of the colony in 1836 until 1884, and that from that point onwards, a diminished rate of increase was experienced, with slight decreases in 1886, 1888, 1900, 1902, 1915, and 1916. In 1917, 1918, 1919, and 1920 increases were again recorded. The population of South Australia passed that of Tasmania in 1852. Its density is nearly one and one-fifth of that of Queensland, about one-fifth of that of New South Wales, and about one-fourteenth of that of Victoria.

The curve for Western Australia indicates that the population increased regularly but very slowly until 1886, when the discovery of gold in the Kimberley division caused an influx of population. The effects of the further rich discoveries of gold in the Murchison and Coolgardie districts in 1891 and 1892, are clearly shewn in the rapid increase of population in those and subsequent years to 1897. Two years of retarded progress then occurred, followed by a satisfactorily rapid rate of increase from 1899 to 1906, a slight decline in 1907, and a further advance in 1908 and subsequent years to 1914. Decreases occurred in 1915 and 1916, with increases in 1917, 1918, 1919, and 1920. The population of Western Australia became greater than that of Tasmania in 1899. Its density is little more than one-fourth of that of South Australia, one-third of that of Queensland, one-nineteenth of that of New South Wales, and about one-fiftieth of that of Victoria.

The Tasmanian population curve indicates a comparatively slow rate of growth throughout. Its most noticeable feature is a retardation in increase in 1852 and subsequent years, brought about by the discovery of gold on the mainland. The population density of Tasmania is about 30 per cent. greater than that of New South Wales, and a little less than half of that of Victoria.

3. Graphs for Commonwealth of Male and Female Population (page 1132).—These curves shew the relative growth of male and female population of the Commonwealth, and it will be seen that the former are far more liable to marked fluctuations than the latter. The curves representing an increase of population on the basis of the United States rate for 1790 to 1860, indicate that on the whole the female rate of increase in the Commonwealth has been a fairly satisfactory one, and that from 1860 to 1893 the same might be said of the male population. From 1893 onwards, however, the male population of the Commonwealth has fallen considerably below this rate.

Although the rate of increase of the female population from 1860 onwards is on the whole very satisfactory, it should be noted that the total number at the beginning of this period was relatively very small, and that from 1894 onwards there is a falling-off in the rate of increase, similar to that experienced in the case of males.

4. Graphs for each State of Male and Female Population (page 1133).—These graphs, shewing the relative progress in male and female population for each of the States, disclose the fact that in all cases the female population is much less liable to marked fluctuations than the male, and further, that in cases where rapid increases have taken place in the latter, a similar, but much more gradual, increase is in evidence in the former, commencing usually, however, somewhat later than in the case of the males. A comparison of the graphs of each of the States with that of the Commonwealth shews that the fluctuations in the latter case are smaller than in the former. This is largely due to internal migrations of the male element of the population, brought about by various causes, amongst which mining developments figure prominently.

5. Graphs for Natural Increase of Population, Commonwealth and States (page 1136).—The graphs indicate that, with the exception of certain marked variations, the natural increase of the population of the Commonwealth, *i.e.*, the excess of births over deaths, advanced with fair rapidity from 1860 to 1892, in which year it attained its maximum, and then fell rapidly till 1898. A subsequent rise to 1900 was followed by a continuous fall for the three years succeeding, *viz.*, to 1903. The recovery shews a fairly rapid rise to 1909, during which year the natural increase was 16.35 per 1,000 of mean population. In succeeding years a correspondingly high rate was maintained with minor fluctuations until 1914, when a record of 17.54 was obtained. In 1915 and 1916 the rate declined to 16.59 and 15.74 respectively, but improved to 16.71 in 1917. In 1918 it declined to 15.16, and in 1919 a further heavy decline to 10.96 was experienced. The rate for 1920 was 15.12. In 1912 a rate of 17.42 was obtained; this was, however, an over-statement of the true natural increase for the year, owing to the fact that the introduction of "Maternity Allowances" in 1912 resulted in expediting the registration of births. The years in which the natural increase of the Commonwealth was at its highest were 1865, 1871, 1881, 1892, 1900, and 1914, and the years of extraordinarily low rates of natural increase were 1866, 1875, 1882, 1898, 1903, and 1919. The low rate of 1898 was due in large measure to a phenomenally high death rate experienced in practically all the States in that year, when an epidemic of measles was prevalent throughout the Commonwealth. The low rate of 1903 was brought about by the low birth rates and the high death rates which accompanied the drought of 1902-3, while the advance in the rate of natural increase since 1903 has been collateral with the marked improvement in material conditions experienced throughout the Commonwealth during that period. The very low rate for 1919 was due to a low birth rate and a very high death rate, caused by an epidemic of influenza.

6. Graphs shewing Total Increase of Population (pages 1134 and 1135).—The graphs disclose the fact that the most notable years of large total increases of population of the Commonwealth as a whole were 1864, 1877, 1883, 1888, 1909, 1910, 1911, 1912, and 1919. The total increase for 1910 was higher than for any year since 1883, while that for 1919 was the highest on record. The years in which low total increases were noticeable were 1861, 1867, 1872, 1878, 1889, 1893, 1898, and 1903. The decreases in the years 1915 and 1916 are a direct effect of the war. The great increase in 1919 was due very largely to the return of soldiers after the cessation of hostilities in Europe.

The graph for New South Wales indicates a high total increase of population between 1876 and 1894, advancing to a maximum in 1883, and then declining to 1901. From the latter year onwards to 1907 an advance in the total increase was in evidence, followed by a decline in 1908, and a recovery in 1909, which was maintained in subsequent years to 1912. In 1913, 1914, and 1915 the figures fell continuously, followed in 1916 by a decrease, and a rapid increase since 1917.

Some features of the graph shewing the Victorian total increase are the height attained in 1864, 1870, 1888, 1901, and 1912, the smallness of the increase for the years 1861 and 1875, and the decreases for 1896, 1902, and 1903. The increase fell off in 1913 and 1914 and a decrease was experienced in 1915 and 1916, followed by an increase in 1917 and the following years.

For Queensland it will be seen that the years of high total increases were 1863, 1875, 1883, 1895, 1901, 1909, 1910, 1911, 1913, and 1919 while the years in which these were at very low level were 1869, 1878, 1891, and 1903. In 1914, 1915, and 1916 there was a progressive decline, followed by an increase in 1917, 1918, 1919, and 1920.

In South Australia the total increases were exceptionally high in 1865, 1876, 1877, 1878, 1883, 1892, 1908, 1910, 1911, 1912, and 1919, and correspondingly low in 1870, 1885, 1896, and 1903, while actual decreases took place in 1886, 1888, and 1902. In 1913 there was a slight decline in the total increase, followed by decreases in the years 1914, 1915, and 1916, and increases in 1917, 1918, 1919, and 1920.

In Western Australia the total increase graph indicates no very marked advance until about 1884, from which it rises somewhat rapidly to 1886, and then declines to 1888. This is followed by an exceedingly rapid rise to 1896, and a subsequent fall to 1899, succeeded by a further rise to 1902, and a fall thereafter to 1907, followed by a rise to 1911, a further fall in 1912, and a rise in 1913. Decreases took place in 1888, 1907, 1914, 1915, and 1916.

In the case of the Tasmanian graph, indications of a very varied total increase are in evidence, the principal high points being those for the years 1887, 1891, 1897, 1902, 1907, 1912, 1913, and 1919 while actual decreases were experienced in 1874, 1875, 1892, 1906, 1911, 1914, 1915, and 1916.

7. *Graphs shewing Masculinity of Population. Commonwealth and States* (page 1137).—These graphs furnish information concerning the variations which have taken place in the relative numbers of males and females in the populations of the Commonwealth and the several States during the years 1796 to 1920, and incidentally serve to indicate special features of growth in the respective populations. In general it will be noted that in recent years there has been a marked tendency towards a masculinity of zero, that is, to a condition in which the numbers of males and females in the population were equal, but that with the exception of Victoria and South Australia the masculinity had never fallen below zero prior to the outbreak of war. In 1916 and 1917, however, it fell below zero in all the States except Queensland and Western Australia, and in the Commonwealth as a whole. In 1918 the rates were below zero in the Commonwealth as a whole, and in the States of New South Wales, Victoria, and South Australia. During the year 1920, the Commonwealth as a whole, and all the States except Victoria and South Australia, had an excess of males. The early experience of the Commonwealth exhibits a fairly rapid decline in masculinity to 1812, followed by an even more rapid rise to 1828 and a subsequent fall with a more gentle slope to 1850. From 1850 onwards the decline in masculinity has been fairly continuous though subject to fluctuations. It should be noted that the great variations of the earlier as compared with the later years have been due to a considerable extent to the fact that, owing to the smallness of the population, any considerable influx of male immigrants had a marked effect in increasing the masculinity of the population, while an influx of female immigrants tended to considerably reduce it. Two points of special interest in the graphs of the separate States are the maxima attained in 1852 in Victoria and 1896 in Western Australia, as the result of extensive male immigration consequent on the gold discoveries in the respective States.

APPENDIX.

Recent information and returns which have come to hand since the various sections of this book were sent to press are given hereunder.

SECTION IV.

POPULATION.

§ 1. Commonwealth Population.—Its Distribution and Fluctuation.

1. Present Population, p. 1120.—The following table shews the estimated population of each State and Territory and for the Commonwealth on 30th June, 1921 :—

ESTIMATED POPULATION ON 30th JUNE, 1921.

Particulars.	States.						Territories.		C'wealth.
	N.S.W.	Victoria.	Q'land.	S. Aust.	W. Aust.	Tas.	Nor. Terr.	Fed. Terr.

Main Features of Organizations.	New South Wales.	Victoria.	Queensland.
<p>IV. Facilities for Agricultural Education—<i>continued</i>. Nature and extent of—</p> <p>(i) Agricultural Teaching given in Primary Schools</p>	<p>Instruction in Agriculture, Gardening, and Elementary Science is provided under the heading of Nature Study. The school garden forms a useful aid in supplementing and demonstrating the class-room instruction.</p> <p>In High Schools the Intermediate Certificate Examination reaches a fairly high standard. In Agricultural Theory, Agricultural Physics, Chemistry (theoretical and practical), Entomology, etc.</p> <p>A teacher of Agriculture has been appointed at several High Schools, and Hurlstone Agricultural High School is entirely devoted to preparing lads for farm life.</p>	<p>Elementary Agriculture is taught in a large number of rural elementary schools, and the numbers are steadily increasing. The subject is now taken in 814 schools. The work is largely experimental, and deals with the properties of soils, the growing of common crops, and the principles of manuring.</p>	<p>The teaching of Agriculture has a place in a large number of primary schools, especially in agricultural centres. The branches dealt with are:—Planting, Flower and Vegetable Gardening, Farm Work including Experimental Work with Maize, Potatoes, Bananas, Hay and Fodder Crops, Grasses, Manuring, Watering, Conservation of Soil Moisture, Orchard Work, Milk and Cream Testing.</p>
<p>(ii) Agricultural Teaching given in Technical Schools</p>	<p>At Sydney Technical College lectures are given on matters relating to Farm, Garden, and other Agricultural work. From time to time field demonstrations are given in pruning, and visits are made to orchards, pig, poultry, and dairy farms, &c. Instruction is also given by correspondence.</p>	<p>Agricultural Chemistry, Wool-classing, and Botany.</p>	<p>Botany, Sugar Chemistry, Milk and Cream Testing, Veterinary Science, Wool-classing and Sorting.</p>
<p>(iii) Work undertaken in Agricultural Colleges</p>	<p>Students are trained for the successful management of stations, mixed farms, irrigation farms, dairy, wheat, pig-gery, and poultry farms, orchards, vineyards, and apiaries, and for positions as dairy inspectors, milk testers, dairy factory managers, and butter and cheese makers.</p> <p>Full courses covering all subjects, and short courses intended for those who are not fitted to take the full course, or who wish to gain information on some special subject are given.</p>	<p>Complete course in practical and theoretical Agriculture extending over three years. Short courses of instruction are also held for farmers and farmers' sons.</p>	<p>Practical and theoretical Agriculture, pre-eminence being given to the farmer. The curriculum includes Agriculture, Live Stock, Agricultural Chemistry, Botany, Mensuration, Poultry Raising, Veterinary Science, Horticulture, Surveying, Farm Book-keeping, Farm Engineering, Milk and Cream Testing, Sheep and Wool Classing, Rural Economics, Dairying, Farm Bacteriology, Pig Raising, and Bacon Curing.</p>
<p>(iv) Work undertaken on Experimental Farms, Orchards, and Vineyards</p>	<p>The Government Experimental Farms were established to obtain a thorough knowledge of local conditions and to afford an education in Agriculture on scientific lines. The work covered generally includes Dairying, Orcharding, Wheat Growing, Irrigation, Sheep-breeding, Pig-raising, and Poultry Breeding. Various systems of rotation of crops, the comparative values of different fertilizers, and methods of soil culture are tried with regard to their suitability to the district and commercial values. Experiments relating to problems of Dry Farming and the application of Artesian Bore Water to Agriculture are made at several of the farms.</p>	<p>Research work, Experiments and Practical Demonstrations in all branches of Agriculture and Live-stock Husbandry. The purpose of these farms is to confer on Agriculture the benefits of modern scientific advances by the prosecution of investigations and trials under practical and accurately recorded conditions concerning the problems involved in increasing the agricultural output of the State in regard to—</p> <p>(a) Improvement of wheat and other cereals, grasses, and economic plants by selection and hybridization;</p> <p>(b) Soil renovation, fertilizing, and tillage methods;</p>	<p>Experimental and Acclimatization work, Stock Breeding, Hybridization, Object Lessons in Cultivation, Orchard work, and investigations into Stock Diseases.</p>

OF THE SEVERAL STATES OF THE COMMONWEALTH—*continued.*

South Australia.	Western Australia.	Tasmania.
<p>No systematic agricultural teaching in Primary Schools. Experimental elementary Agriculture taken up by individual teachers—result satisfactory. Work optional, but not widespread</p>	<p>Primary Schools:—Elementary courses bearing on Agriculture are given in Classes IV. to VI. Definite project work in connexion with Agriculture is undertaken in some of the country schools in Poultry-keeping, Bee-keeping, Pig-keeping, and the growing of Vegetables, Cereals, Fodders, etc. Manual work is also undertaken, Woodwork being the commonest form, while Forge work is taken in a few schools. Farm Bookkeeping is being introduced for the older children</p> <p>Secondary Schools:—The District High Schools give courses in Agricultural Science. In a country High School that is just opening, preparations are being made for a varied course in Agricultural work, including the growing of Cereals, Vegetables, Fodders, and Fruit. Bee-keeping and Fruit Preserving will also be taught</p>	<p>Nil</p>
<p>Lectures and agricultural practical work, Viticulture, Fruit culture, Botany lectures in conjunction with School of Mines and also by Horticultural Instructor</p>	<p>Wool-classing is taught in the Technical Schools at Perth and Fremantle. Many students also attend classes in Carpentry, Plumbing, and Blacksmithing with a view to qualifying themselves for farm life</p>	<p>Nil</p>
<p>The training of young men in the practice of science of Agriculture, Viticulture, Dairying, and Stock. Experimental and Research work</p>	<p>At Narrogin there is a School of Agriculture, which provides a two-year course for boys of fourteen years and over. There is a farm of over 2,000 acres attached. A dairy herd, and sheep, pigs, and poultry are kept. The boys learn Carpentry, Blacksmithing, Plumbing and Saddlery, as well as the care of horses and stock, and the ordinary farm operations. Lectures are delivered on economic insect pests with practical demonstrations in the preparation and application of sprays</p>	<p>Nil</p>
<p>Experimental work in Manuring, Irrigation, Rotation of Crops, Stock Rearing, Breeding and selection of Cereals</p> <p>General cultural work of farm, orchard, and vineyard</p>	<p>Dairying and Pig-raising, Cultivation of Fodders, Crops, and Grasses, and Ensilage Making</p> <p>The experimental plots referred to above have been established for the purpose of growing fodder plants so as to demonstrate to settlers what fodders are most suitable for their districts</p>	<p>In so far as the Orchards are concerned, Experiments in Manuring, Spraying for different diseases, Pruning and the Growing of Fruit-tree Stocks</p>

Main Features of Organizations.	New South Wales.	Victoria.	Queensland.
<p>IV. Facilities for Agricultural Education—<i>continued</i>.</p> <p>(iv) Work undertaken on Experimental Farms, Orchards, and Vineyards—<i>continued</i>.</p>	<p>Viticultural nurseries are established for experiments in growing wine and table grapes, also for the purpose of supplying vigneron with vines grafted upon phylloxera-resistant stocks; in some cases the phylloxera-resistant rootlings are supplied.</p> <p>The Apiary at Wauchope is utilized for the study of diseases among bees. A small number of students is admitted and short courses in Apiculture are conducted from time to time.</p> <p>With the object of improving the stock of the State, pure-bred studs have been established at several of the farms. Selected animals of the best strains are purchased and imported from time to time, and the progeny sold to farmers at reasonable rates.</p>	<p>(c) Rotation of crops and improved cropping practices;</p> <p>(d) Irrigated crops—particularly lucerne;</p> <p>(e) Improvements of natural pastures, and trials of artificial grassing with exotic and native grasses</p> <p>(f) The breeding and feeding of live stock, and improvement of milk yields</p> <p>(g) Research concerning soil moisture, temperatures, biological conditions, and nitrification processes; and the nutrition of plants;</p> <p>(h) Meteorological observations relating to Agriculture</p> <p>In addition to the above, pure seed is raised for distribution among farmers, and in the nursery connected with the Rutherglen establishment large numbers of phylloxera-resistant stocks are raised and distributed, and investigational work connected with the propagation and cultivation of the vine and manufacture of wine is carried out</p>	
<p>(v) Instruction given by Travelling Dairies, etc.</p>	<p>During the winter months schools are conducted for the examination of dairy factory employees in Cream Grading and Milk and Cream Testing, and successful students are given certificates of competency. The Dairy Industry Act prescribes that only persons who have so qualified will be permitted to test or grade milk or cream.</p> <p>In addition to the above, a number of Dairy Instructors are employed by the Department to give instruction in Butter and Cheese Manufacture, conduct experiments, and enforce the provisions of the Act regarding the compulsory grading of cream and the packing of butter under brands denoting the quality</p>	<p>None now employed. Demonstrations are given in the method of control of contagious diseases of stock and also on Milk and Cream Dairy Practice. Classes are being arranged in order to impart knowledge on general Factory Management, Grading and Testing of Milk and Cream, Pasteurization, and Manufacture of Butter and Cheese. Practical instruction is also given by experts in Cheese Making, Fruit Preserving, Drying, etc., Flax Manufacture, Poultry Dressing, etc.</p>	<p>None are now employed. Instructors in Butter and Cheese Making personally visit the different factories, while the Dairy Inspectors are out all the time giving advice at the farms on the routine of the dairy</p>
<p>(vi) Lectures given by Experts</p>	<p>Lectures are given by Inspectors of Agriculture on the growing of cereals, etc. Lectures and Demonstrations are also given by the Poultry Expert, Dairy Expert, Entomologist, Biologist, Agrostologist, Veterinary Officers, Assistant Chemist, etc.</p> <p>Special features of the work are Demonstrations in Pruning and Spraying, and the Handling, Drying, Canning, and Packing of Fruit given by the staff of the Fruit Expert</p>	<p>Agricultural Classes, Free Lectures and Practical Demonstrations are given by departmental experts throughout the State under the auspices of local Agricultural and other Associations</p>	<p>Lectures are given by the technical instructors on all Agricultural, Horticultural, and casual subjects</p> <p>The local Farmers' Society provides the hall, attends to advertising, etc., and the lectures are free to all</p> <p>The Departmental tendency is, however, more in the direction of practical personal instruction at the farm</p>

OF THE SEVERAL STATES OF THE COMMONWEALTH—*continued.*

South Australia.	Western Australia.	Tasmania.
Nil	Nil	<p>A School of Instruction for Factory Managers is held annually, covering a period of two weeks. Lectures and Demonstrations are given on Butter and Cheese Making, Pasteurizing, Neutralizing, Pure Cultures for the Ripening of Cream, Chemistry of Dairying, Refrigeration, and Cream and Butter grading. This School is organized by the State Department of Agriculture, and includes lectures and demonstrations on Cattle Diseases, First Aid, etc., by the Veterinary Officers, Hygiene, Drainage, etc., by the officers of the Department of Public Health.</p> <p>The Commonwealth Dairy Expert and his officers also render assistance in the various subjects.</p> <p>The State Dairy Expert and Dairy Supervisor visit both factories and dairies for instructional purposes, and periodical schools are also held for sons of farmers.</p>
<p>Lectures and Practical Demonstrations are given by the Departmental Experts in various parts of the State</p>	<p>Lectures on matters pertaining to Fruit Growing, treatment of Insect Pests and Fungoid Diseases, Dairying, Pig-raising, Sheep Farming, Wool, Wheat, Fertilizers, Grasses and Fodder Plants, and Stock are given by Departmental Experts in various districts throughout the course of the year</p>	<p>Lectures are given by the various Experts of the Department at intervals upon the Insect and Fungus Pests of Fruits, Potatoes, and other commercial crops; on all Dairying subjects; on Drainage, Pruning, Tree and Plant Physiology, Soils, Fertilizers, Co-operation, Marketing of Fruit, Small Fruit Culture, and on other matters dealing with the fruit industry generally</p>

PARTICULARS RESPECTING AGRICULTURAL AND STOCK DEPARTMENTS

Main Features of Organizations.	New South Wales.	Victoria.	Queensland.
<p>IV. Facilities for Agricultural Education—<i>continued</i>. (vii) Other forms of Agricultural Instruction</p>	<p>The State is allotted into districts, each supervised by a District Inspector, who visits farmers for the purpose of advising on agricultural operations and generally to connect up the work of Government Experimental Farms with the everyday work of the farm. Each month, the "Agricultural Gazette" is issued, and bulletins dealing with agricultural subjects are published. Weekly notes are circulated throughout country newspapers supplying the latest agricultural information.</p> <p>An Agricultural Bureau has been established, with 130 branches throughout the country to enable the farmers to meet and exchange ideas on subjects of common interest. The Department assists by lectures and demonstrations, supplies literature and financially subsidises the members' subscriptions to the extent of 10s. in the £1</p>	<p>Bulletins are issued from time to time dealing with all phases of production. A monthly "Journal of Agriculture" is issued, and this contains articles prepared by Departmental specialists. An extensive correspondence is also carried on with producers</p>	<p>Monthly issue of the "Agricultural Journal" and pamphlets on given subjects; practical demonstrations in the building of silos; pruning, budding, and cultivating; methods of inoculating cattle; the application of insecticides and fungicides; the establishment of experiment plots on private farms; displays at shows to demonstrate the value of improved methods and the possibilities in the direction of new crops</p>
<p>V. General work of Department— (i) Extent to which distribution of plants is carried out by Department, and General Regulations governing such distribution</p>	<p>Approximately 100,000 plants are distributed annually, although in some good seasons the numbers are considerably more. Soldiers on Settlement Areas are supplied with suitable trees and shrubs. Plants are sent to public bodies, the season beginning with June and ending with August each year. It is stipulated that plants raised at the public expense cannot be issued for planting on private property</p>	<p>Select-bred seed wheat, oats, and barleys are grown for distribution among farmers, and are sold in small parcels to farmers at market rates. Phylloxera-resistant stocks are also raised and sold for the re-establishment of vineyards ravaged by phylloxera</p>	<p>The general distribution of seeds by seedsmen is controlled by the Expert under the Pure Seeds Acts. Trees for shade for Public Institutions and Schools are provided free, while seeds of crops which the Department desires should be given a trial in the State are from time to time issued free to farmers. Free Cotton seed is supplied to intending growers, and in abnormal seasons seed wheat is supplied to growers on reasonable terms</p>
<p>(ii) Number of Inspectors employed— (a) Fruit and Orchard Inspectors (b) Stock Inspectors (c) Rabbit Inspectors (d) Other Inspectors</p>	<p>20 Permanent, 13 part-time</p> <p>74</p> <p>1</p> <p>26, including 14 Dairy Inspectors</p>	<p>26</p> <p>11</p> <p>66</p> <p>78</p>	<p>24</p> <p>88</p> <p>4</p> <p>51, including 29 Dairy Inspectors</p>

OF THE SEVERAL STATES OF THE COMMONWEALTH—*continued.*

South Australia.	Western Australia.	Tasmania.
Nil	Visits to individual farms, especially returned soldiers and new settlers just embarking on farming. Advice and Demonstrations given in Skirting and Rolling of Fleeces, Pruning, Packing, Grafting, and Budding. Practical instruction in Testing, Butter Making, General Manufacture, and Cream Grading is given at butter factories, and visits are made to insect-infested districts to advise the best remedial measures	The Fruit Division has several experimental areas on private properties, that is to say, portions of orchards in different Districts where Spraying, Pruning, and Manuring Experiments are being conducted. The results of these will be published periodically. Schools of instruction in Packing and Grading of Apples and Pears are being held in every fruit centre. First and Second Class Certificates are issued to those passing the required examination. Towards the end of last season, in conjunction with the Education Department, classes of children for Packing and Grading were inaugurated, and during the present season, these will be extended
Special varieties of cereals and fodder crops are distributed free, chiefly from the Agricultural Bureaux. Large quantities of selected cereals are raised at the various farms for sale	Seeds are distributed in small quantities by the Wheat Branch, to ascertain their suitability for particular conditions. From time to time a distribution of seed for fodder crops and grasses grown at State farms is made. Seeds are distributed to schools and demonstrations are arranged in connexion therewith	The only plants distributed by the Department are Conifers, which are sold at £1 per 100. Last year, however, a limited number of apple stocks (<i>Pyrus malus baccata</i> seedlings) were delivered out of the nursery.

<p>(iv) Special features of Entomological or other work of the Department</p>	<p>A field laboratory and experiment station is established at Willow Tree for Sheep Fly Investigation, and a fly aviary and breeding-room for the breeding and the distribution of the sheep-fly parasite has been built at Glenfield. Insectaries are situated at the Botanical Gardens to provide facilities for the study of the life-history and development of various insect pests under natural conditions, and at Narara, in the centre of the Gosford fruit-growing area, to deal with orchard insect pests such as fruit-fly, scale insects, etc. Extensive experiments are carried out regarding the most effective methods of protecting stored maize from insect pests, and the treatment of timber with protective mixtures to obviate the attacks of the powder post beetle. The work carried out by the Biologist includes the examination of specimens of Cereals, Fruit, Fruit Trees, and Truck Crops for the presence of disease: the issue of bulletins and leaflets on plant diseases and their control; and the investigation of new plant diseases. A considerable amount of time is taken up with bacteriological examinations of Milk, Butter, Cheese, and Cream, samples of which are forwarded by butter factories for opinion as to the presence of harmful bacteria. Regular supplies are also made of pure cultures or bacteria which are used as "starters" in butter factories. Biological examinations are also made of wines, preserves, seeds, frozen rabbits, etc.</p>	<p>Economic Entomology, Vegetable Pathology, Botany, and Biology lectures to farmers, horticulturists, etc., on fungus, insect and other pests, and the means adapted for their eradication and prevention. Field experiments with fungicides, insecticides, etc. Cultivation of pure yeasts for wine making, bacteriology of soils, etc.</p>	<p>The investigation of the Sugar Cane Grub, diseases of the Banana, and all insect and fungus pests affecting the fruits growing in the State, the Cattle Tick and Blow-fly pest</p>

<p>▼. General work of Department — <i>continued</i>.</p> <p>(v) Special steps taken by the Department for distribution of information—</p> <p>(a) Amongst the agriculturalists of the State</p>	<p>Distribution of "Agricultural Gazette," Bulletins, and Pamphlets, and the insertion in country newspapers of weekly agricultural notes</p>	<p>"Journal of Department of Agriculture" and publications on special subjects. The Department has a special pavilion at the Royal Agricultural Show Grounds, Flemington, where a very comprehensive exhibition of agricultural and live stock products is staged during Royal Show week. In addition exhibits are sent to the principal country shows to illustrate the teachings of the Department. Farmers' Field Days are held annually at Werribee, Dookie, and Longerenong, and at many of the experimental plots. These are attended by large numbers of farmers</p>	<p>The practically free distribution of the "Queensland Agricultural Journal" and pamphlets; object lessons at the Agricultural College, State Farms, and private farms; displays at shows; co-operation with the public press in the dissemination of agricultural information</p>
<p>(b) With a view to improving the market for the State's products</p>	<p>Reports from the Agent-General are published in the press, and a Commercial Commissioner is located at Kobe, Japan</p>	<p>Agent-General is supplied with samples of produce, etc., which are exhibited in Great Britain. Cool storage provided by Government to assist export trade. Companies assisted by way of loan to build fruit cool stores and undertakings for the treatment of primary farm products. Inquirers are supplied with lists of producers and exporters, and information is given regarding marketing</p>	<p>By close inspection of exports; by the collection and distribution of information from markets where business may possibly arise</p>
<p>▼I. Any other work undertaken</p>	<p>Nil</p>	<p>Nil</p>	<p>Assisting in the development of both new and old primary industries; for instance, the Department pays a minimum price on all raw cotton and coffee that may be grown in the State. The cotton and the coffee is ginned and hulled respectively by the Department and the resultant product is disposed of on owners' accounts. The wool clips of small farmers are classed and sold to the best advantage on owners' account, and beginners in dairying may be financed for the purchase of dairy cattle and pigs and the erection of silos</p>

SECTION XIX.

COMMONWEALTH FINANCE.

§ 1. General.

2. Accounts of Commonwealth Government, p. 666.—The Budget for 1921-22 was introduced on 29th September, 1921. In connexion with the statements which follow, it must be remembered that the figures for 1920-21 are not final, but subject to a slight revision, whilst the figures for 1921-22 are estimates. Excluding the amounts paid as subsidy to the States, the Consolidated Revenue Account stands as follows :—

COMMONWEALTH REVENUE AND EXPENDITURE, 1920-21, 1921-22.

Particulars.	1920-21.	1921-22 (estimated).
	£	£
Net Revenue ..	58,677,445	54,764,850
Expenditure ..	57,783,924	57,581,958
Surplus	893,521	..
Deficit	..	2,817,108

The result of the estimated deficit of £2,817,108 in the latter year will be to reduce the credit balance of £6,618,327 at 30th June, 1921, to one of £3,801,219 at 30th June, 1922.

§ 2. Consolidated Revenue Fund.

(B) Revenue.

3. Sources of Revenue, p. 668.—The following table gives the Commonwealth Revenue from each source during the years 1920-21 and 1921-22 :—

SOURCES OF COMMONWEALTH REVENUE, 1920-21 AND 1921-22.

Source of Revenue.						1920-21.	1921-22 (estimated).
						£	£
Customs	21,731,210	16,105,000
Excise	10,078,696	10,026,000
Land Tax	2,155,699	2,250,000
Income Tax	14,351,408	15,000,000
Succession Duties	1,179,513	1,150,000
War Time Profits Tax	2,083,139	2,000,000
Entertainments Tax	649,828	750,000
Total Taxation						52,229,493	47,281,000
Post Office						8,586,497	9,311,000
Miscellaneous						4,701,618	5,195,350
Gross Total						65,517,608	61,787,350
Less Paid to States						6,840,163	7,022,500
Net Revenue						58,677,445	54,764,850

(C) Expenditure.

2. Total Expenditure, p. 680.—The expenditure by the Commonwealth for the years 1920-21 and 1921-22 is shown in the following table :—

COMMONWEALTH EXPENDITURE, 1920-21 AND 1921-22.

Particulars.						1920-21.	1921-22.
						£	£
Ordinary expenditure	23,586,441	25,467,455
War expenditure	33,286,233	31,203,253
Interest (States)	911,250	911,250
Total						57,783,924	57,581,958

18. Cost of the War, p. 687.—The estimated war expenditure up to 30th June, 1922, is £481,630,600, of which £135,205,493 comes from revenue, and £346,425,197 from loan. To this must be added £49,082,059 owing to the British Government, and £28,000,000 for war gratuities. The expenditure for the two years under review is as follows :—

WAR EXPENDITURE.

Items.						1920-21.	1921-22 (estimated).	Total.
						£	£	£
From loan	24,148,501	33,286,233	57,434,734
From revenue	11,196,000	31,203,253	42,399,253

The expenditure from loans has defrayed the direct cost of the war, and most of the cost of repatriation. The expenditure from revenue pays for interest, sinking fund, pensions, and the incidental charges of the war.

§ 4. Commonwealth Public Debt.

6. Total Commonwealth Public Debt, p. 696.—The situation of the Federal Public Debt is best set out in tabular form as follows:—

PUBLIC DEBT OF THE COMMONWEALTH AS AT 30th JUNE, 1921.

Particulars.	—	—
	£	£
War Loans in Australia	232,819,660
War Savings Certificates	2,004,870
War Savings Stamps	7,388
Treasury Bills	2,000,000
War Loan, London, 1931-41	5,000,000
Accrued Deferred Pay, A.I.F.	14,720
Indebtedness to Imperial Government	92,480,156
War Gratuity	25,279,925
Total War Debt	359,606,719
Inscribed Stock and Bills	9,858,869
Northern Territory and Oodnadatta Railway Loans	3,968,298
Transferred Properties	11,536,139
Loans raised for States	16,750,000
Gross Debt	401,720,025
Deduct—		
Loans raised for States	16,750,000	
Loans for Settlement, Wheat Silos, &c.	27,927,466	
Expenditure on War Service Homes	11,691,169	
Present Capital Value of Ships	7,137,328	
Unexpended balance of Loan Moneys	6,205,030	
		69,710,993
Net Debt at 30th June, 1921	332,009,032

SECTION XXI.

PRIVATE FINANCE.

§ 1. Currency.

2. Receipts and Issues in 1919, p. 746.—The issues of coin and bullion for the year 1919 are given in the following table:—

ISSUES OF GOLD FROM AUSTRALIAN MINTS DURING 1919.

Mint.	Coin.			Bullion.	Total.
	Sovereigns.	Half Sovereigns.	Total.		
	£	£	£	£	£
Sydney	1,835,000	..	1,835,000	117,001	1,952,001
Melbourne	514,257	..	514,257	239,848	754,105
